INDIANYEARBOOK
WHO'S WHO
1938-39

KINDof

VERLAND TRAIN

Then you will enjoy every page of this account of the Overland Route by train from Bombay to London via the oilfield and pearling waters of Bahrein Island: Basra, Venice of the East', ancient Babylon; Baghdad; modern Turkey with the girls of Pera in contrast to the former odalisques of the old Seraglio; golden Tokay, and blue Danube . . . a dozen countries laid bare to your eyes! And if you are going on leave this book will prove, with its details of fares, hotel rates and scores of travel tips, more invaluable and more interesting than a dozen handbooks.

gly bound in cloth, with 74 iful photographs, two maps, and tive coloured dust cover, 151 pp. y pocket size. Price Rs. 6 from ellers, or Rs. 6-12 V. P. P. from Times of India Press", Hornby Road, Bombay.

FULL OF INTEREST AND BEGUILING INFORMATION!

that deserving army of officials, businessmen and soldiers who travel . se they must I have never had the good fortune to encounter one half o terest and beguiling information held together for the first time in this 'ook.'

-Col. P. T. Etheritae

The Last Straw

Many is the business that has foundered because it has tried to minimise its burden of overheads by "economising" on the most vital factor of modern commerce...print. Cheap and shoddy print tells the public that the product advertised is cheap and shoddy too. Good print, on the other hand, is the most effective of all salesmen... lightens overhead costs by increasing demand... sells your goods and services wherever it been to Good print is the cheapest in the large fund... ask any business man who patronizes The Times of Iudia Press (where quality and economy go hand in hand).

THE (3) INDIAN YEAR BOOK

1938-39

4.10- 3569-

VOLUME XXV

39505

A Statistical and Historical Annual of The Indian Empire, with an Explanation of the Principal Topics of the day.

FOUNDED BY
SIR STANLEY REED, KT., K.B.E.
EDITED BY

O. 58 FRANCIS LOW.

PREFACE

STOR STOR

THE Editors have to thank many correspondents who during the past year have sent them suggestions for the improvement of this book. The Indian Year Book is intended above all to be a book of reference, and its completeness and convenience of arrangement must necessarily depend to a great extent on the part taken in its editing by the members of the public who most use it.

The help extended to the Editors by various officials, and more particularly by the Director of Information and Labour Intelligence, Bombay, and the Indian Commercial Intelligence Department, has again been readily given and is most gratefully acknowledged. Without such help it would be impossible to produce the Year Book with up-to-date statistics.

Suggestions for the improvement or correction of the Year Book may be sent to the Editors at any time, but those which reach them before January have a better chance of being adopted than later suggestions which only reach them after the work of revision has been partly completed.

The Times of India, Bombay, July, 1938.

An Indian Glossary.

ARKARI .- Excise of liquors and drugs.

ACHHUT .-- Untouchable (Hindi) Asuddhar, ACREAGE CONTRIBUTION .-- Contribution paid by holders of land irrigated by Government.

TALUE, taluka.—The estate of a talukdar in Oudh, Gujarat and Kathiawar. A revenue sub-division of a District, in Bombay, Madras and Mysore: syn. tashil.

TALUKDAR—A landholder with peculiar tenures in different parts of India. (1) An official in the Hyderabad State, corresponding to the Magistrate and Collector (First Talutdar) or Deputy Magistrates and Collectors (Second and Third Talukdars); (2) a landholder with a peculiar form of tenure in Guiarat.

TALPUR.—The name of a dynasty in Sind.

Tamasha, Tambaku, Tobacco,
Tamasha, Entertainment, cala. In sarcastic

sense, exhibition.

TAMBU.—Tent in the Bombay Presidency.

TAMBAN, turntum —A North Indian name for

a light trap or cart.

TANK.—In Southern, Western, and Central India, a lake formed by damming up a valley,

in Northern India, an excavation holding water.

TANKIM.—Literally "organization." A movement among the Mahomedans which aims at scentring better education and a closer approach

to unity among Mahomedans in India.

TAPEDAR.—See PATWARI.

Tarai.—A moist swampy tract; the term especially applied to the tract along the foot of the Himalayas.

TARI, toddy—The sap of the date, palmyra, or cocoanut palm, used as a drink, either fresh or after fermentation. In Northern India the juice of the date is called Sendhi.

TASAR, tussore.—Wild silkworms, ANTHERAEA PAPHIA; also applied to the cloth made from their silk.

TALTI. - Brush woodfence or hurdle.

TAZIA.—Lath and paper models of the tombs of Hasan and Husain, carried in procession at the Muharram festival; syn. tabut, Marathi, dola. TEIK.—A valuable timber tree in Southern

and Western India and Burma, TECTONA GRANDIS.

TELEGRAPHIC TRANSFERS.—See Council bills.

Telegraphic Transfers.—See Council bills.

Thag, thuggee.—Robbery after strangulation

of the victim.

THAEUR.—(1) The modern equivalent of the caste name Kshattriya in some parts of Northern India; (2) a title of respect applied to Brahmans; (3) a petty chief; (4) a hill tribe in the

Western Ghats.
THAMIN.—The brow-antiered deer, Burma CHRYUS ELDI.

THANA.—Military or Police-Station hence the circle attached to it.

Typ or TIR .- Locust.

TIKA .- (1) Ceremonial anointing on the forehead; (2) vaccination.

TIKA SAHEB,-Heir-apparent in several North Indian States.

TIKAM.—The English pickaxe (of which "pikass" is the common corruption. "Tikam" is derived in dictionaries from Tikshna=Sharp). TIL .- An oilseed, SESAMUM INDIGUM; also

known as gingelly in Madras. TILAK .- (Short a) the caste mark on the to the English parish. forehead among Hindus.

TINDAL, tandel .- A foreman, subordinate affairs are administered by a small committee, officer of a ship,

TIPAL, Teapoy .- A table with 3 legs, and hence used of any small European style table.

TITAR .- Partridge.

Tola .- A weight equivalent to 180 grains

TONGA .- A one or two horsed vehicle with a covered top ; syn. SHIGHRAM.

TOTE.-The word invariably used by South Indian planters to describe their estates. It is derived from the Kanarese thois and similar words in Tamil and Malavalam meaning an estate.

TSINE,-Wild cattle found in Burma and to the southward, Bos sondaious : syn. hsaing and banteng.

TUMANDAR .- A Persian word denoting some Office. ULEMA, (Plural of Alim) .- Mahomedan learned

UMARA .--- Term implying the Nobles collectively. Plural of "Amir."

UMBAR .- A wild fig-(FIGUS GLOMERATA). UMEDWAR.—A hopeful person; one who works, without pay in the hope of gaining a

situation ; candidate. UNIT .- A term in famine administration denoting one person relieved for one day.

URDU,-Hindustan language as spoken and written by Musalmans opposed to Hindi, spoken and written by Hindus.

URIAL,-A wild sheep in North-Western In lia, Ovis vignei. URID, UDID .- A pulse, 'black grain ' (PHA-

SHOLUS MUNGOL URUS.-Mahomedan fete held in connexion with celebration at the tomb of a saint.

USAR .- Soil made barren by saine efflorescence, Northern India.

USTAD .- Master teacher, one skilled in any harem. art or science. UTHAMNA .- Among Hindus, consolation visit

paid on second or third day after the death of a person. Among Parsis, a religious ceremony held on the third day after the death of a person.

VARIVATDAR .- Officer in charge of a revenue sub-division, with both executive and magisterial functions, Baroda; syn, tabsildar,

Vaid or Baidya (is also a caste in Bengal).---A native doctor practising the Hindu system of medicine.

VARIL-(1) A class of legal practitioners; (2) an agent generally.

VEDA.—Revealed sacred books of Hindus.

VEDANTA,-The philosophy of the Upanishads, VIHARA .- A Buddhist monastery.

VILLAGE.—Usually applied to a certain area demarcated by survey, corresponding roughly VILLAGE UNION .- An area in which local

WAAZ .- Mahomedan sermon.

WADA or WADI .- (1) An enclosure with houses built round facing a centre yard; (2) private closed land near a village. WARF .- A Muhammadan religious or chari-

table endowment. WALL-Like "Sardar." The Governor of Khelat is so termed, whilst the Chiefs of Kabul are both "Wali" and "Mir."

WAO .- A step well.

WATAN .- A word of many senses. In Bombay Presidency used mostly of the land or cash dlowance enjoyed by the person who performs some service useful for Government or to the village community.

Wazir.-The chief minister at a Mahomedan court.

WET RATE .- The rate of revenue for land assured of irrigation.

WRITER .- South Indian equivalent of babu. YAMA,-Hindu god of death. Yoga .- A system of Hindu philosophy.

Practice of breath control, etc., said to give supernatural powers. Your.-A Hindu ascetic who follows the Yoga system, a cardinal part of which is that it confers

complete control over bodily functions. YUNANI.-Lit. Greek; the system of medicine practised by Mahomedans.

ZABARDAST .- Lit. "Upper hand." hence strong, oppressive.

ZABARDASTI .- Oppression. ZAMINDAR .- A landholder.

ZAMINDARL—(1) An estate: (2) the rights of a landholder, zamindar; (3) the system of tenure in which land revenue is imposed on an individual or community occupying the position of a landlord

ZANANA .- Of women. Women's apartment,

ZIARAT.-Pilgrimage. Ziarat-gah, any shrine or tomb to which people go in pilgrimage,

ZIKR.—Commemorative prayer said at the tomb of the prophet or a Mahomedan saint. ZILA .- A District. ZOR-TALABI .- Tribute paid to Junagadh

Darbar by numerous Kathlawar States. ZULM, ZULUM, -Tyranny, Oppression.

Manners and Customs.

varies from fair to black, the tourist's atten-tion in India is drawn by their dress and personal decoration. In its simplest form a Hindu's dress consists of a piece of cloth round the joins. Many an ascetic, who regards dress as a luxury, wears nothing more, and he would dispense with even so much if the police allowed him to. The Mahomedan always covers his legs, generally with trousers, sometimes with a piece of cloth tied round the waist and reaching to the ankles. Hill men and women, who at one time wore a few leaves before and who at one time were a lew leaves before and behind and were totally innocent of clothing, do not appear to day within the precincts or civilisation and will not meet the tourist's eye. Children, either absolutely nude or with a piece of metal hanging from the waist in front, may be seen in the streets in the most advanced cities, and in the homes of the rich. The child Krishna, with all the jewels on his person, is nude in his pictures and images.

Dress.-The next stage in the evolution of the Hindu dress brings the loincloth nearly down to the feet. On the Malabar coast, as in Burma, the ends are left loose in front. the greater part of India, they are tucked up behind-a fashlon which is supposed to best the warrior, or one end is gathered up in folds before and the other tucked up behind. The simplest dress for the trunk is a scarf thrown over the left shoulder, or round both the shoulders like a Roman toga. Under this garment is often worn a coat or a shirt. When an Indian appears in his full indigenous dress, he wears a long robe, reaching at least down to the calves: the sleeves may be wide, or long and sometimes puckered from the wrist to the elbow. Before Europeans introduced buttons, enow. Before Enropeus introduced outlooks a coat was fastened by ribbons, and the fashion is not obsolete. The Mahomedan prefers to button his coat to the left, the Hindu to the right. A shawl is tied round the waist over the long coat, and serves as a belt, in which one into coat, and selves as been a been and one into coat, and selves as been a weapon, if allowed, dress. More than seventy shapes to the base, and thinks a been domes and truncated pyramids, high and low, with sides at different angles; folded brims, projecting brims: long strips of cloth wound round the head or the cap in all possible ways, ingenuity culminating perhaps in the "parrot's beak" of the Maratha turban-all these fashions have been evolved by different communities and in different places, so that a trained eye can tell from the head-covering whether the wearer is a Hindu, Mahomedan or Parsi, and whether he halls from Poona or Dharwar.

Ahmeda bad or Bhavnagar. Fashion Variations,-Fashions often vary with climate and occupation. The Bombay fisherman may wear a short coat and a cap, and may carry a watch in his pocket; yet, as he must work for long hours in water, he does not cover his legs, but suspends only a coloured kerchief from his walst in front. The Pathan

Next to the complexion of the people, which | of the cold north-west wears loose barry trousers, a tall head-dress belitting his stature and covers his ears with its folds as if to keep off cold. The poorer people in Bengal and Madras do not cover their heads, except when they work in the sun or must appear respectable. Many well-to-do Indians wear European dress at the present day, or a compromise between the Indian and European costumes; notably the Indian Christians and Parsis. Most Parsis however have retained their own headdress, and many have not borrowed the European collar and cuffs. The majority of the people do not use shoes: those who can afford them wear sandals, slippers and shoes, and a few cover their feet with stockings and boots after the European fashion in public.

Women's Costumes .- The usual dress of a woman consists of a long piece of cloth tied round the waist, with folds in front, and one end brought over the shoulder or the head, The folds are sometimes drawn in and tucked up behind. In the greater part of India women wear a bodice; on the Malabar coast many do not, but merely throw a piece of cloth over the breast. In some communities petiticoats, or drawers, or both are worn. Many Mussahnan ladies wear gowns and scarfs over them. The vast majority of Mahomedan women are gosha and their dress and persons are hidden by a weil when they appear in public : a few converts from Hinduism have not borrowed the custom. In Northern India Hindu women have generally adopted the Mussalman practice of seclusion. In the Dekhan and in Southern India they have not.

As a rule the hair is daily oiled, combed parted in the middle of the head, plaited and rolled into a chignon, by most women. Among high caste Hindu widows sometimes shave their heads in imitation of certain ascetics, or monks and nuns. Hindu men do not, as a rule, completely shave their heads, Mahomedans In most cases do. The former generally remove the hair from a part of the head in front, over the tempies, and near the neck, and grow it in the centre, the quantity grown depending upon the fancy of the individual. Nowadays many keep the hair cropped in the European fashion, which is also followed by Parsis and Indian Christians. Most Mussalmans grow beards, most Hindus do not, except in Bengal and elsewhere, where the Mahomedan influence was paramount in the past. Parsis and Christians follow their individual inclinations. Hindu ascetics, known as Sadhus or Bairagis as distinguished from Sanyasis, do not olip their hair, and generally coll the uncombed hair of the head into a crest, in imitation of the god Shiva.

Hindu women wear more ornaments than others of the corresponding grade in society, Ornaments bedeck the head, the ears, the nose the neck, the arms, wrists, fingers, the waist until motherhood is attained, and by some even later—and the toes. Children wear even later—and the toes. Children wear anklets. Each community affects its peculiar ornaments, though imitation is not uncommon, Serpents with several heads, and flowers, like

the lotus, the rose, and the champaka, are among the most popular object of representation is gold or silver

Caste Marks.—Caste marks constitute a mode of personal decoration peculiar to filindus, especially of the higher castes. The simplest mark is a round spot on the foreband, it represents prosperity or foy, and is omitted in morning and a second second second control of the morning and a went it is made with ground sandatwood paste. The worshippers of Vishnu draw a vertical line across the spot, and as Lakshmi is the goddess of prosperity, it is said to represent her. A more calcorate mark only with the central line, sometimes without it, and represents Vishnus' soft. The worshippers of Shiva adopt horizontal lines, made with another than the second seco

respectively. The Lingsysts, a Shulva seel suppend from their necks a metallic case tentance state of their necks are traille caselet containing the Lings or phallus of their god, Bairngis, ascetties, besides wearing Rudraisha rosaries round their necks and matted hair, smear their bodies with sabes. Religious mendicants suspense name they beg. Stries of cowries may also be seen round their necks. Muslim dervishes sometimes carry peacock's leathers.

and the common must, their forehoods with a direct point and line. High casts who are forbidded no exhibit sits sign of happines, nor may they deck themselves with flowers or ornanents. Flowers are worn in the chignon, the common smear their faces, arms, and feet sometimes with a paste of turneric, so that same colour for different purposes cannot always be explained in the same way. The diquid with which the will up is averted may be a substitute for the blood of the unimal in many other case; this colour has no such associations. The Muslim dervish affects green, the Sikh Akali Is fond of blue, the Sanyasi adopts orange for his robe, and no receon can be assigned with any degree of certainty.

Indian Names.

The personal name of most Hindus denotes a material object, colour, or quality an annual, a relationship, or a delty. The unducated man, who cannot correctly pronounce long Sanskrit words, is content to call his child, father, brother, under, or mother, or sister, among the higher classes as well. Apps Saheb, Anna Rao, Babaji, Rapu Lal, Bhai Shankar, Tatacharya, Ilibhai, are names of this description, with honorific titles added. It is experited to the same of the description of the same of the description of the same of the description of the same of the name of the same of the same of the name of the same of the name of the same of the name of

of a devil is to invite him to do harm. If the spirits sometimes bear the names of human beings the reason seems to be that they were originally human.

High-easte practices.—The high easte lindu, on the other hand, believes that the more often the name of a delty is on his lips, the more marit he earna. Therefore he deliberately names his children after his gods and the properties of the control of the control

Family names.—When a person rises in inportance, he adds to his personal name a family or caste name. It was once the rule, that the title Sharma might be added to a Brahman's name, Varma to a Kshatriya's, Guota to a Vaishyas, and Dass to a Shudra's. This rule is fairly well observed in the case of

the first two titles, but the meaning of the other two has changed. Dasa means a slave or servant, and the proudest Brahman cannot disdain to call himself the servant of some god. Thus, although Kalidas, the famous poet, was a Shudra, Ramadas, the famous guru of Shivaji, was a Brahmin. The Vaish-navas have made this fashion of calling oneself a servant of some god exceedingly popular. and in Western India high caste Hindus of this sect very commonly add Das to their names. The Brahmans of Southern India add Aiyar or Aiyangar to their names. Shastri, Acharya, Bhat, Bhattacharya, Upadhyaya, Mukhopadhyaya, changed in Bengal Into Mukerii, are among the titles indicative of the Brahmanical profession of studying and teaching the sacred bools. Among warlike classes, like the Rajputs and Sikhs, the title Singh (lion) has become more popular than the ancient Varma. The Sindhi Mal, as in Gidumal, means brave and has the same force. Raja changed into Raya, Rao and Rai was a political title, and is not confined to any caste. The Bengali family names, like Bose and Ghose, Dutt and Mitra, Sen and Guha, enable one to identify the caste of their bearers, because the caste of a family or clan cannot be changed, Shet, chief of a guild or a town, becomes Chetty, a Valshya title, in Southern India. Mudaliyar and Nayudu, meaning leaders, are titles which were assumed by castes of political importance under native rulers. Nayar and Menon are the titles of important castes in Malabar. Lal, Nand, Chand, are among the additions made to personal names in Northern India. Suffixes like Ji, as in Ramii or Jamshedji, the Kanarese Appa, the Teugu Garu, the feminine Bai or Devi, are honoritic. Prefixes like Babu, Baba, Lala, Sodhi, Pandit, Raja, and the Burmese Maung are also honorific.

Professional names.-Family names sometimes denote a profession : in some cases they might have been conferred by the old rulers, Mehta, Kulkarni, Deshpande, Chitnavis, Mahai-navis are the names of offices held in former times. One family name may mean a flour seller, another a cane-seller, and a third a liquor-seller. To insert the father's name between one's personal and the family name is a common practice in Western India. It is rare elsewhere. When a family comes from a certain place, the suffix 'kar' or 'wallah' is added to the name of the place and it makes a family surname in Western India. Thus we may have Chiplunkars and Suratwallahs, or without these affixes we may have Bhavnagris, Malabaria and Bilimorias, as among Parsis. Thus Vasudev Pandurang Chiplunkar would be a Hindu, whose personal name is Vasudev, his father's name Pandurang, and family name derived from the village of Chiplun, is Chiplunkar. In Southern India the village name precedes the personal name. The evolution of Musalman names follows the same lines as Hindu names. But Muslims have no god or goddesses, and their names are derived from their religious and secular history. These names and titles are often as long and ple-turesque as Hindu appellations. The agno-mens Baksh, Din, Ghulam, Khwaje, Fakir, Kazi, Munshi, Sheiki, 920, Begum, Bibi and others, as well as honoyird additions like Khan have meanings which throw light on Muslim customs and institutions. The Parsis also have no gods and goddesses, and their personal names are generally borrowed from their sacred and secular history. Their surnames frequently indicate a profession or a place, as in the case of Hindus in Western India. Batliwallah, Readymoney, Contractor, Saklatwallah, Adenwallah and others like them are tell-tale names.

Indian Art.

In India there has never been so marked a separation between what are now known as the Fine Arts, and those applied to industry as was the case in Europe during the nineteenth century. As, however, industrial art forms the subject of a special article in this book, the term Indian Art will here be confined to Architecture, Sculpture and Painting.

Historical.—The degree of proficiency attained in art by lainap prior to face. 250, can only be conjectured by their advancement of indebtedness shown by the works of the of indebtedness shown by the works of the historic period, to those which preceded their or direct records of artistic work of an earlier date than B.O. 250 do not exist. The chief historic schools of architecture are as follows:— Name. Dates. Locality of the best

Name. Dates. Locality of the best Examples.

Ohalukyan ..A.D.1000— Umber, Somnathpur, 1200. Ballur.

Dravidian ..A.D.1350— Ellora, Tanjore, Matura, Tinnevelly.

Pathan ..A.D.1200— 1550. Indo-Saracenic A.D.1520— Lahore, Delhi, Agra, 1760. Amber, Bijapur.

suddhist Architecture is mainly exemplified by the rock-cut temples and monasteries found in Western India and in the Topes or sacred mounds. The Interior decorations, and external facades of the forn.cr. and the rails and gates surrounding the latter point unmistakeably to their being derived from wooden structures of an antile period. The characteristic factor of the control o

porch, and an arcaded courtyard with niches for images. The characteristic of the style is grace and lightness, with decontive carving covering the whole interior, excented with great elaboration and detail. Constructional methods suggest that original types in wood have been copied in marble.

Brahminical Chalukvan and Dravidian styles differ little in essential plan, all having a shrine for the god, preceded by pillared por-ches. The outer forms vary. The northern Brahminical temples have a curved pyramidal roof to the shrines, which in the southern or Dravidian style are crowned by a horizontal system of storied towers, and each story, decreasing in size, is ornamental with a central cell and figures in high relief. The Chalukyan style is affected by its northern and southern neighbours, taking features from each without losing its own special characteristics of which the star-shaped plan of the shrine, with the fivefold bands of external ornament, is the principal feature. Pathan Architecture introduced into India by the Mahomedan invasion of the thirteenth century. At old Delhi are fine examples in the Kutub Mosque and Minar, The characteristics of the style are severity of outline, which is sometimes combined with elaborate decoration due, it is stated, to the employment of Hindu craftsmen. The mosques and tombs at Ahmedabad already show Hindu influence; but purer examples are to be found Jaunpore and Mandu. Indo-Saracenic Architecture reached the climax of its development during the reigns of the Moghul Emperors. Akbar, Jehangir and Shah Jahan. It eclipsed in richness of material and refinement of taste the building efforts of previous periods, its crowning example being the Taj Mahal at Agra. The buildings erected during the Adil Shahi dynasty at Bijapar at a slightly later date, exhibit a certain Turkish influence, especially in the great tomb of Mahmoud. Though less refined and lacking the attraction of precious materials in their decoration, these splendid edifices are held in higher esteem by some critics than those of the Moghals, on account critis than those of the Moghals, on account of their simplicity, grandeur and fine proportions. The era of great drill architecture in India was routed by the state of their simple state of the state treatment, unequalled in extent elsewhere, is to be seen in the Ghauts or steps enclosing lakes and on the banks of rivers. The most notable constructional contribution of the Mahomedans to Indian architecture was the introduction of the true arch and dome.

Sculpture.—The use of sculpture and painting in isolated works of at was passiciated and containing in the control of the properties of th

of ancient India, as they have from those of Rgyrfs, Greece and Rome. Sculpture has been used exclusively as the handmald of religion, and to this fact may be attributed the stercotyped forms to which it became bound. The levels use of senipture on Indian temples often levels use of senipture on Indian temples often levels used to the senipture of the senipture of the and dignity of their mass and outline; but for excherance of imagnation, industrious elaboration and vivid expression of movement, Indian seulpture is pernaps without its equal elsewhere in the world. The most impressive specimens are the earliest, found in the Buddhiet specimens are the earliest, found in the Buddhiet specimens are the earliest, found in the Buddhiet and Hephanta. The proof of Buddhiet and Hephanta. The proof of Buddhiet has a manuel of these temples ranks for mystery and expressive grandeur with the greatest masterpleece of art.

Painting.-Much of the carved stonework

upon ancient Indian buildings was as in ancient Greece decorated with colour, but the only paintings, in the modern accepta-tion of the term, now existing, which were executed prior to the Moghul period, are those upon the walls of the cave temples at Ajanta. Bagh, and in Ceylon. These remarkable works were produced at intervals during the first 600 years of the Christian era. They exhibit all the finer characteristic of the best Indian sculpture, but with an added freedom of expression due to the more tractable vehicle employed. Alanta Caves remained hidden in the Decean jungles for nearly twelve hundred years, until accidentally rediscovered by officers of the Madras army in 1929. They are painted in a species of tempora; and when first brought to light were well preserved, but they have greatly deteriorated owing to the well meant, but deteriorated owing to the well meant, our misguided action of copyists, and the neglect of the authorities. The Nizam's Government have in recent years done a great deal towards the preservation and study of these mural paintings. The second period of Indian painting owed its origin to the introduction of Persian methods of painting by the Moghul Emperor Akbar; and the establishment of the indigenous Moghul school was due to the encouragement and fostering eare of his successors, Jehangir and Shah Jahan, Unlike the works of the Ajanta painters, which were designed upon a large scale, the pictures of the Moghul school were miniatures. They were executed in a species of opaque watercolour upon paper or vellum, resembling to some extent the illuminated missals produced by the monks in Europe during the middle ages. Some of the finest of the earlier specimens in Some of the infest of the center specimens in India are of a religious character; this phase of development being closely allied to the art of the caligraphist. As its range extended, a remarkable school of portrait painters arose notable for restrained but extremely accurate drawing, keen insight into character, harmonious colour, fine decorative feeling, and extraordinary delicacy and finish in the painting of detail. The artists of a Hindu off-shoot of this movement, known as the Rajput school, were less interested in portraiture than in depicting poetical and imaginative subjects, The

when not used as illustrations or decorations to manuscript books, were preserved in portfolios. Modern Painting,-As the reign of Shah Jahan exhibits the high tide of artistic develop-

ment in India, so the reign of his successor Agranggeb marks the period of its rapid decline. The causes of this are attributable to the absence of encouragement by this Emperor; to his long periods of absence from the court at Delhi or Agra, entailed by the continuous wars he waged in his efforts to bring the whole of the Peninsula under his rule; and partly to the fact of the school of Moghul painting becoming fact of the school of adjusted particles. Foreign designers, painters and craftsmen who had been attracted to India by the great works carried out by Akbar, Jehangir and Shah Jahan left the country, and their places were taken by no successors. The indigenous artists taken by no successors. The indigenous artists left to themselves in the isolated courts of small Indian princes, or collected in schools in remote districts, employed themselves mainly upon repeating the works of a previous age, instead of seeking new motifs for artistic treatment. At the time when the British East India Company ceased to be only a guild of merchants and became a great administrative power in 1757, very little vitality survived in the ancient art of the country. During the century of its administrative history between the hattle of Plassey and the Indian Mutiny, the "Company" was too fully occupied in fighting for its existence, extending its borders and setting the internal economy of its ever increasing territories, to be able to give much attention to conserving any remnant of artistic practice which had survived. Without any deliberate intention of introducing western art into the country, Greek and its derivative style of architecture were adopted for public and private buildings in Calcutta, Bombay and Madras because these were found to be more suitable for their purpose than buildings indigenous pattern. The practical result was the same; for the Indian craftsmen employed upon their crection were confronted with styles affording no scope for the application of their traditional ornament and concerning which they had no knowledge or sympathy. As there were no sculptors in Ladia capable of modelling or carving civil scalpture, the monuments to distinguish public servants were imported from Europe; and the portraits, or other paintings which decorated the interior walls of the buildings, were furnished by European painters who visited India or by artists in Europe. Although a considerable amount of research work of a Voluntary nature was done by Archæologists, no official interest was taken in artistic education until the Government of India was

The Schools of Art then instituted throughout England in the 19th Century enroughous England in the 19th Century were imitated in India; and were attached to the educational system, which had been previously modelled upon a definitely European basis. The work of the Schools of Art in regard to industrial art is referred to elsewhere; and as several of them have confined their activities almost exclusively to this branch of the subject it is sufficient to mention only the work of a few of the Indian

transferred to the British Crown in 1859.

Art Schools in the presentarticle. The Calcuttaschool, except for occasional experiments in the application of the graphic arts to lithography, engraving and stained glass, has become chiefly a school of painting and drawing. That at Bombay covers a wider field; for in addition to classes for modelling, painting and design it possesses a special school of architecture; and a range of technical workshops, in which instruction is given in the applied arts. in the principles underlying the instruction in painting that the schools at Calcutta and Bombay have taken almost diametrically opposite roads to reach the end they both have in view, namely, the revival of the art of painting in India by means of an indigenous school of Indian painters. Mr. Havell, who several years ago was the Principal of the Calcutta School, left India in 1907) banished from the left India in 1907) bankined from within its walls every vestige of European art; and claimed that the traditional art of India, in its old forms, is not dead, but merely skeping or smothered by the blanket of European culture laid upon it for the last 150 years, and needed but to be released from this incubus to regain its pristine vigour.

Bombay School of Art .- The attitude towards the development of art in modern India taken by its successive Principals Messrs, Lockwood Kipling, Griffiths, Greenwood, and Cecil Burns, was on wider lines than that favoured by Mr. Havell. In general the view this School of Art has taken is that with European literature dominating the system under which the edu-cated classes in India are trained and with European ideas, and science permeating the professional commercial, industrial, and political life of the country, it is not possible for modern artists in India to work on purely archaic models; and that to copy these would be as anprolitable as it would be for the artists of Europe to harness themselves to the conventions of the Greek and Roman sculptors or to those of the mediaval painters; that with European pictures, often of inferior quality illustrating every educational text book, and sold in the shops of every large city, it is essential for the proper education of art students that they should have before them the masterpieces of European art; and that, with the wide adoption of Euro-pean styles of architecture in India, it is necessary for a school of art to possess the best examples of ornament applicable to the great historic styles, for the purpose of study and reference. There are certain basic principles common to the technique of all great art, such as line and accurate drawing in its widest sense, composition and design, and the science of colour harmony.

Among the developments during Mr. Burns, administration were the founding of the Architectural School, the extension of drawing classes in the Government Schools, and the appointment of an Inspector of Drawing to Inspect and report on the drawing classes in the schools. A Pottery Department was also started and was abolished in 1926. Mr. Eurns retired in 1918 and was succeeded in 1919 by Mr. W. E. Igno and was succeeded in 1919 by Mr. W. B., Gladetone Solomon, K.I.I., R.B.O., who retired in 1937. He was succeeded by the present Direc-tor, Mr. C. B., Gerrard, A.E.O.A., R.B.A., R.O.I. Mr. Solomon entirely reorganised the courses of skudy. He siso, as Chairman of the Govern-

ment Art Examinations, revised and reconstructed the code which governs these tests in to-operation with the Board of Examiners. The result is an efficient system of tests of efficiency in Painting, Sculpture, and Architecture; and the latest development in the curriculum has been the introduction in 1935 of a section devoted to the study of Commercial Art. The popularity of the improved curriculum is shown by the great influx of students to the School of Art. These now number some six hundred including at least sixty-five ladies. It is noteworthy that whereas no candidates had entered for the Government Diploma of Sculpture prior to 1920 in the year 1937 no fewer than 54 competed in this very advanced test of capacity. In this very advanced test of capacity.

The life Classes which were organised at
the end of 1919 have been pronounced by
competent judges as well up to the level of the
Life Classes of the European Schools of Art. But proficiency in technique forms only one side of the present system of training; for even in Europe, too much of the study from Life is quite capable of negativing its own object. In India where the decorative instinct is inherent, and where the possibilities of freehand drawing are still understood, the danger of overdoing the Life Class is even more palpable. So side by side with these realistic aids to study, and at the same period, a class of Indian Decorative Painting was inaugurated in the Bombay School of Art on a basis of sebolarships under the patronage of the Governor of Bombay (Lord Lloyd). As this class specialises in Mural Painting it has long been popularly known as the Class of Mural Painting. This class has executed the decorations for many public and private buildings, and painted the ceiling and panels of a specially constructed Indian Room which was exhibited at Wembley in 1924, and found a purchaser in England

when five artists of Bombay, and the be expected that it will not occasional Bombay and Lahore Schools of Art were com- itself in sporadic outbursts hereafter.

missioned to paint Mural Decorations in the new Secretariat buildings. The Bombay School andertook the decoration of Committee Room "A" (in the North Block) and the paintings, which were executed in oils on canvas, were finished, and successfully placed in position on the dome and walls by the middle of September 1929. These decorations were original compositions of life size figures, symbolising the main periods of Indian Art, and the different branches of the Fine and Applied Arts. In April 1920, the Government of Bombay converted the Bombay School into a Department independent of the Director of Public Instruction, the Principal (Mr. W. E. Gladstone Solomon) being made Director. In October 1930 the latter organised an exhibition of the work of all Departments of this School of Art in India House, London. The Exhibition was very well patronised by the public and extremely well received by the art critics and the Press. Her Majesty the Oneen Empress graciously patronised the exhibition and selected several of the paintings displayed.

Exhibiton in London.—The India Society of London organised an Exhibition of Modern Indian Art in London, which was opened by H.H. the Duchess of York at the New Burlington Galleries on December 10, 1934. The most instructive feature of this Exhibition was that the representation of India was secured by means of Regional Committees which collected pictures and sculptures from their own districts. Thus the respective sections of the Exhibition devoted to Bombay and Bengal were compared, and the work from Western India received a most favourable welcome from most of the critics and prominent art journals in England, The Regional Committee of Bombay had selected a varied and fairly representative collection of paintings, sculpture, and architec-tural drawings. At the request of this Committee, The School of Art has of late years enjoyed the the Government of Bombay deputed Mr. (Had-patronage of successive Governors of Bombay stone Solomon to supervise, arrange, and catapatronage of successive Governors of Bombay stone Solomon to supervise, arrange, and cata-and, largely due to the efforts of Sir Leslie Wil- logue the Bombay exhibits in London. The whole son, the Government of India inaugurated a enterprise was a successful demonstration of the competition of Indian Artists in 1927 for the aims and ideals of the Bombay School of Paint-decoration of wall spaces in the new ing, and since this Exhibition the long-standing buildings at New Delhi. The result of the controversy as to the Bombay methods of art Competition was notified in October 1928, training has collapsed though it is hardly to when five artists of Bombay, and the be expected that it will not occasionally reassert

Indian Architecture.

The architecture of India has proceeded on can entirely understand it, while art criticism and in the sterner building materials-these are a few of the factors that contributed to making it what it was, while a stirring history gave it both variety and glamour. Indian architec-ture is a subject which at the best has been studied only imperfectly, and a really comprehensive treatise on it has yet to be written. The subject is a vast and varied one, and it

lines of its own, and its monuments are unique analysis is a branch of study that the Indian among those of the nations of the world. An has not as yet developed to its full extent, and the difficult at the lest authority on the subject of the people towards religious ferrour of the has been Fergusson, whose compendious work contemplative rather than of the fanatical is that which will find most ready acceptance sort, combined with the richness of the country by the general reader. But Fergusson attempts by the general reader. But Fergusson attempted the nearly impossible task of covering the ground in one volume of moderate dimensions: and it is sometimes held that he was a man of too purely European a culture, albeit wide and eclectic, to admit of sufficient depth of insight in this particular direction. Fergusson's classification by races and religions is, however, the one that has been generally acmay be such a treatise never will be written in cepted ditherto. He asserts that there is no the form of one work at any rate. The spirit of stone architecture in India of an earlier date Indian art is foreign to the European and few than two and a half centuries before the Christ272 to 236."

at Sanchi with its famous Northern gateway is perhaps the most noted example. Then we have the Gandharan topes and monasstrong resemblance to the Greek acanthus, of drapery, but also of hair and facial expression. same degree, From this it has been a fairly common assump-tion amongst some authorities that Indian art owed much of its best to European influence, an assumption that is strenuously combated by others as will be pointed out later.

The architecture of the Jains comes next in order. Of this rich and beautiful style the most noted examples are perhaps the Dilwara temples near Mount Abu, and the unique

"Tower of Victory" at Chittore, Other Hindu Styles.

The Dravidian style is the generic title usually applied to the characteristic work of the Madras Presidency and the South of India. It is seen in many rock-cut temples as at Eliora, where the remarkable "Kylas" is an instance of a temple cut out of the solid rock, complete, not only with respect to its interior (as in the case of mere caves) but also as to its exterior. It is, as it were, a life-size model of a complete building or group of buildings, several hundred bunning or group of bunnings, several fundred feet in length, not built, but sculptured in solid stone, ar undertaking of vast and, to our modern ideas, unprofitable industry. The Pagoda of Tanjore, the temples at Srivangam, Chidambaram, Vellore, Vijayanagar, &c., and the palaces at Madura and Tanjore are among the best known examples of the style. Amongst a vast number of Hindu temples

the following may be mentioned as particularly worthy of study: Those at Mukteswara and Bhuvaneswar in Orissa, at Khajuraho, Bindrabun, Udaipur, Benares, Gwalior, &c.

Indo-Saracenic.

ian era, and that "India owes the introduc teations. The dome, not entirely an unknown tion of the use of stone for architectural pur-feature hitherto, became a special object of poses, as she does that of Buddhism as a state development, while the arch, at no time a religion, to the great Asoka, who reigned B.C. favourite constructional form of the Hindu builders, was now forced on their attention by Buddhist Work.
Fergusson's first architectural period is minaret also became a distinctive feature, when the Buddhist, of which the great top [The requirements of the new religion, mosque with its wide spaces to meet the needs of organized congregational acts of worshipwe have the Gandharan topes and monas-teries. Perhaps the examples of Buddhist treatments that had hitherto been to some architecture of greatest interest and most ready extent denied. The Moslem hatred of idolatry architecture of greatest inderest and most ready extent denied. The Moslem harted of idolatery access to the general student are to be found set a tabu on the use of sculptured represent the Chaitya halls or rock-cut caves of Karil, jations of animate objects in the adornment with relation to the Gandharn work may be of other decorative forms. Great ingenuity alhede to in passing. This is the strong came to be displayed in the use of pattern and European tendency, variously recognized as of geometrical and foliated ornament. This great, the observed in the details. The like builders to a greater extent than before foliages seen in the capitals of columns bears to proportion, scale and mass as means of giving strong resemblance to the Greek acanthus, beauty, mere richness of sculptured surface while the sculptures have a distinct trace of and the wathetic and symbolic interest of Greek influence, particularly in the treatment detail being no longer to be depended on to the Agra and Delhi may be regarded as the

principal centres of the Indo-Saracenic stylethe former for the renowned Taj Mahal, for Akbar's deserted capital of Fatehpur Sikri. his tomb at Secundra, the Moti Musjid and palace buildings at the Agra fort. At Delhi we have the great Jumma Musjid, the Fort, the tombs of Humayon, Sufdar Jung, &c., and the unique Qutb Minar. Two other great centres may be mentioned, because in each there appeared certain strongly marked indi-vidualities that differentiated the varieties of the style there found from the variety seen at Delhi and Agra, as well as that of one from that to the other. These are Ahmedabad in Gujarat and Bijapur on the Dekhan, both in

the Bombay Presidency.

At Ahmedabad with its neighbours Sirkhei and Champanir there seems to be less of a departure from the older Hindu forms, a tendency to adhere to the lintel and bracket rather than to have recourse to the arch, while the dome though constantly employed, was there never developed to its full extent as elsewhere, or carried to its logical structural conclusion. The Ahmedapad work is probably most famous for the extraordinary beauty of its stone "jali"or pierced lattice-work, as in the palm tree windows of the Sidi Sayyid Musjid.

Bijapur.

The characteristics of the Bijapur variety of the style are equally striking. They are unnoun, unappur, memares, uwantor, acc. The bit the sayle and equally straining. II. MODERN.

is first that of the indigenous Indian department has been much animadverted upon as being all that building should not be, but, considering it has been produced by men of whom it was admittedly not the metier, and who were necessarily contending with lack of expert training on the one hand and with departmental methods on the other, it must be conceded that it can shew many notable buildto turn their attention to India, and a number of these has even been drafted into the service of Government as the result of a policy ini-tiated in Lord Curzon's Viceroyaity.

To the work of the indigenous "masterbuilder" public attention has of recent years been drawn with some insistence, and the suggestion has been pressed that efforts should be directed towards devising means for the pre-servation of what is pointed out—and now universally acknowledged—to be a remarkable survival-almost the only one left in the worldof "living art," but which is threatened with gradual extinction by reason of the spread of vital to the interests of the country's archi-Western ideals and fashions. The matter tecture, is too purely technical for its neurit assumed some years ago the form of a mild to be estimated by the general reader or discontroversy centring round the question of the then much discussed project of the Government lies in the fact that it affords an added interest of India's new capital at Delhi. It was urged to the tourist, who may see the fruits of both that this project should be utilised to give the schools of thought in the modern build-required impetus to Indian art rather than ings of British India as well as examples of the that it should be made a means of fostering "master builders" work in nearly every native European art which needed no such encourage-town and bazaur. The town of Lashkar in ment at India's expense. The advocates of Gwalior State may be eited as peculiarly rich Hills we allowed the second part to have been in mind agency of the second part of the second part of have been in mind agency of the second part of the second part

The modern architectural work of India the past. They still muster a considerable divides itself sharply into two classes. There following not only amongst the artistic public is first that of the indigenous Indian "Master of England and India, but even within the is first that of the indigenous indicated in the lands of the indigenous holding in the builder. In the builder is the befound chiefly in the lands of lovernment services. Their opponents, holding States; particularly those in Rajputana, what appears to be the more official view both Second there is that of British India, or of as to archeology and art, have pointed to the all those parts of the peninsula wherever "death" of all the arts of the past in other Western ideas and methods have most strongly countries as an indication of a natural law, and weaker the transfer of the property of the control of the property of the prop Romans in every country on which they planted their conquering foot. As those were wont to replace indigenous art with that of Rome, so should we set our seal of conquest permanently on India by the erection of examples of the best of British art. This is the view which, as we have indicated, appears to have obtained for the moment the more influential hearing, and the ings. Of recent years there has been a tend-moment the more influential hearing, and the ency on the part of professional architects task of designing and directing the construction of the principal buildings in the new Capital was accordingly entrusted jointly to two famous British architects, neither of whom can be unduly influenced by either past or recent architectural practice so far as India is concerned. The building of New Delhi is perhaps too recent an event for the passing of a definite verdict. The work of Sir Edwin Lutyens and Sir Herbert Baker abides the judgment of posterity. If that work has had its severe critics, it has also received the commendation of many,

The controversy of East and West, however cussed here. Its chief claim on our attention

Industrial Arts.

The ancient industrial arts of India formed two distinct groups. The first included those allied to, and dependent upon, architecture; the second comprises those applied to articles devoted to religious ritual; military weapons and trappings, domestic accessories; and to personal adornment.

The articles of the first group were intended for some fixed and definite position, and the style of their design and the character of their workmanship were dictated by that of the building with which they were incorporated. Those of the second group were movable, and the range of their design was less constricted and their workmanship was more varied.

Examples of work in both groups are so numerous, and the arts comprise such a diversity of application, that only a cursory survey can be attempted within the limits of a short review. Although the design and treatment differ in the two groups, the materials used were often the same. These materials cover a very wide range but space only permits of reference to work applied to the four materials upon which the Indian craftsman's skill has been most extensively displayed. These are stone, wood, metal and textiles.

Before dealing separately with each of these materials a few words upon the principal Indian styles are necessary. The two distinctive styles are Hudu and Mahomedan. The former may be termed indigenous, detaing as it does from remote antiquity; the latter was a variation of the great. Arabidan skyle, which was brought into India in the fourteenth century, and has since developed features essentially Indian in medians is based upon religion and the requirements of religious timal. The obvious expression of this is shown in the different motifs used for their ornament. In Hindia art all natural forms are accepted and employed for decreative purposes; but in that of the Mahomedan rative purposes; but in that of the Mahomedan the continuity of the second of them, radial characteristics are strikingly exhibited. The keynote of Hindu work exhibited. The keynote of Hindu work exhibited. The keynote of Hindu work with the sexulemune, imagination and poetry; that of Mahomedan, tectioner, include and good taste. Mahomedan use more restraint.

Stone Work.—Carved stone work is the principal form of decoration employed in Hindu temples. In variety and acope it ranges, from the massive figures in the Buddhist ground the Buddhist ground the same strength of the temples of Southern India, employed to the temples of Southern India, Abn. A curious fact in relation to Hiddu work abn. A curious fact in relation to Hiddu work is that priority of date appears to have no relation to artistic development. It is not possible to frace, as in the case of Greek, Moman and steps from art in its primitive state to its eulminating point and its subsequent decay. Styles in India seem to spring into existence fluid evaluation in India seem to spring into existence fluid evaluation in India seem to spring into existence fluid inter cartifactually into existence fluid and its subsequent decay. Styles in India seem to spring into existence fluid evaluation in India seem to spring into existence fluid into critical to the contract of the co

The stone carving on Mahomedan buildings except where Hindu carvers have been allowed a free hand, is much more restrained than that on Hindu temples. The fact that geometrical forms were almost exclusively used dictated lower relief and greater refinement in the carv-ing; while the innate good taste of the designers prompted them to concentrate the ornament upon certain prominent features, where its effect was heightened by the simplicity of the rest of the building. The invention displayed where its in working out geometrical patterns for work screens, inlay, and other ornamental details appears to be inexhaustible; while won-derful decorative use has been made of Arabic and Persian lettering in panels and their framing. To obtain a rich effect the Hindus relied upon the play of light and shade upon broken surfaces, the Mahomedans to attain the same end used precious materials; veneering the surand used precons index as venerating the straight faces of their buildings with polished marble which they decorated with patterns of measie composed of fade, agate, onyx and other costly stones. Although the art of inlaying and working in hard stones was of Italian origin, it proved to be one eminently suited to the genius of the Indian craftsman; and many wonderful examples of their skill in the form of book rests, tables, thrones, footstools, vases and sword handles are extant to show the height of proficiency they attained.

Wood Work .- With a fine range of timbers suitable for the purpose, wood has played a great part in the construction and decoration of Indian buildings. Unfortunately, much of the ancient woodwork has been destroyed by the action of the climate and the teeming insectivorous life of India; and that which escaped these enemies was wiped out by are and the sword. It is therefore only possible to con-jecture the height of artistic development these buildings and their decorations displayed by the copies in stone which have been preserved. Few if any examples of a date earlier than the these, and specimens of a later date to be seen in towns and cities throughout the country. are masterpieces of design and craftsmanship. The carved timber fronts and inner courtyards of houses in Ahmedabad, Nasik, and other parts of Western India are notable for their picturesqueness and beauty the structural beams, the overhanging balconies, screens and supporting brackets, being carved in a manner which unites richness of effect with good taste and propriety. Of furniture, as the term is now understood, few examples were in use in India before Europeans introduced their own fashions. These were confined to their own manions. These were commed to small tables and stools, book rests, elothes chests and screens, the designs of which con-formed somewhat closely to the architec-tural style of the period. Many of these were decorated with inlays of coloured woods, ivory and metal; while in some cases the wooden basis was entirely plated with copper, brass or silver. In Southern India, where close grained sandalwood is grown, jewel cases and boxes are enriched with carving executed with the attention to detail and the finish generally associated tion to detail and the inisis generally associated with the carving of Yovry. Coloured lac was freely used to decorate many articles of furniture, especially those turned on the lathe; and rich colour effects were obtained in this, perhaps the most distinctive and typically Indian development of decoration as applied to wood work.

Metal Work.—With the exception of wearing, the metal working industry employed and still employs the greatest number of artistic certainment in India. Copper and brass have always been the two metals most which used the adversal been the two metals most which used in the country. They exhibit that sense of variety and touch of personality which are only given by the work of the human band; and the working of the material with the simplest implements. In the technical treatment are tasted and still unsurpassed by those of other nations, except in the department of fine cast-invented and the simple still the simple still the simple simple size of the size of t

to metal work, the less exists for the decoration of its surface. It is equally true that the highest test of craftsmanship is the production of a perfect article without any decoration. The reason being that the slightest technical fault is apparent on a plain sughcest technical fault is apparent on a ham surface, but can be hidden or disguised of one which is covered with ornament. The goldsmiths and silversmiths of India were extremely skilful and industrious, but judged by this test their works often exhibit a lack of care and exactness in the structural portion and a completely satisfactory example of per-fectly plain work from the hands of the gold and silversmiths of India is rarely to be met with Much of the excessive and often inappropriate ornamentation of the articles that they produced owed its application as much to the necessity of hiding defective construction as it did to any purely decorative purpose.

Textiles.—The textile industry is the widest in extent in India and is that in which her craftsmen have shown their highest achieve-Other countries, east and west of India have produced work equal at least in stone, wood, and metal; but none has ever matched that of her weavers in cotton and wool, or excelled them in the weaving of silken fabrics. Some of the products of the looms of Bengal are marvels of technical skill and

perfect taste, while the plum bloom quality of the old Cashmere shawls is an artistic achievement which places them in a class by themselves. Weaving being essentially a process of repetition, was the first to which machinery was applied, and modern science has brought power loom weaving to such a state of perfection that filaments of a substance finer even than those of Dacca, which astonished our ancestors, are now produced in the mills of Lancashire. But for beauty of surface and Variety of texture no machine-made fabrics have ever equalled the finest handwork of the weavers of India. Many of the most beautiful varieties of Indian textile work have disappeared, killed by the competition of the power loom. In other branches of art as applied to textiles India does not hold so pre-eminent a position as in that of weaving The printed silks and calicoes of the seventeenth and eighteenth centuries deservedly held a high place in the estimation of Western nations. whose craftsmen learnt many valuable lessons from the technical skill, and artistic taste they display. Nothing approaching the tapestries made in Europe in the middle ages has been produced in India. The nearest approach to these is in carpets and rugs. This art was in-troduced from Persia; but Indian craftsmen have never succeeded in equalling the finest work of their instructors either in colour or designs,

Archæology.

The aucient monuments of India are as varied | plements and vessels, terracotta figurines and as they are numerous. Until a few years ago, toys, shell ornaments and potteries both painted the earliest known were the brick and stone and plain. erections of the Marrya period, (3rd century Those discoveries establish the existence in B. C.) and some rough stone walls at the Sind and the Punjab during the 4th and 3rd

The tope proper at Barbath has Madras Presidency. No less than twenty exist entirely disappeared, having

inscriptions and thus enable one to identify Stories of the Buddha give it a unique value. The stung at Amravati also no longer exists, and portions of its rail, which is unsurpassed in point of elaboration and artistic merit, are now in the British and Madras Museums. The stupa at Piprahwa was opened by Mr. W. C. Peppe in 1898, and a steatite or soap-stone reliquary with an inscription on it was unearthed. The inscription, according to many scholars, speaks of the relies being of the Buddha himself and enshrined by his kinsmen, the Sakyas. If this interpretation is correct, we have here one of the stupus that were erected over the ashes of Buddha immediately after his demise.

Caves .- Of the rock excavations which are one of the wonders of India, nine-tenths belong to Western India. The most important groups of caves are situated in Bhaja, Bedsa, Karli, Kanheri, Junnar, Nasik and Badami in the Bom-bay Presidency, Ellora and Ajanta in Nizam's Dominions, Bagh in Gwalior State Barabar and Nagarjuni 16 miles north of Gaya, and Khandagiri 20 miles Hdavagiri from Cuttack in Orissa. The caves belong to the three principal sects into which ancient India was divided, viz., the Buddhists. Hindus and Jainas. The earliest caves so far discovered are those of Barabar and Nagarjuni which were excavated by Asoka and his grandson Dasaratha, and dedicated to Alivikas, a naked sect founded by Mankhaliputta Gosala. The next earliest caves are those of Bhaja, Pitalkhora and cave No. 9 at Ajanta and Pitalkhora and cave No. 9 at Apanea and No. 19 at Nasik. They have been assigned to 200 B.C. by Fergusson and Dr. Burgess. But there is good reason to suppose from Sir John Marshall's recent researches and from epigraphic considerations that they are considerably more modern. The Buddhist caves are of two types-the chaityas or chapel caves and viharas or monasteries for the residence of monks. The first are with vaulted roofs and horse-shoe shaped windows over the entrance and have interiors consisting of a nave and side aisles with a small stupe at the inner circular end. They are thus remarkably similar to Christian basilicas. surrounded by a number of cells. In the later viharas there was a sanctum in the centre of the back wall containing a large Image of Buddha. Hardly a chattpa is found without one or more relative adjoining it. Of the Hindu cave temperature adjoining it. Ferhaps, the host preserved among The bas-reliefs on this rail which contain short these are those at Ajanta, which were executed at various periods between 350-650 A.D. the scenes sculptured with the Jalakas or Birth and have elicited high praise as works of art Copies were first made by Major Gill, but most of them perished by fire at the Crystal Palace in 1866. The lost ones were again copied by John Griffiths of the Arts School, Bombay, half of whose work was similarly destroyed by a fire at South Kensington. They were last copied by lady Herringham during 1909-11. Her pictures, which are in full scale, are at present exhibited at the Indian Section of the Victoria and Albert Museum, South Kensington, and have been reproduced in a volume brought out by the India Society. Another group of caves where equally interesting though less well preserved paintings exist is found at Bagh in Gwalier State. These caves form the subject of a monograph issued by the India Society,

Gandhara Monuments .- On the north-west frontier of India, anciently known as Gandhara are found a class of remains, ruined monasteries and buried stupas, among which we notice for the first time representations of Buddha and the Buddhist pantheon. The free use of Corinthian capitals, friezes of nude Erotes bearing a long garland, winged Atlantes without number, and a host of individual motifs clearly establish the influence of Hellenistic art. The mound at reshawar, locally known as Shah-ji-ki-Dheri, which was explored in 1909, brought to light several interesting sculptures of this school together with a reliquary casket, the most remarkable brouze object of the Gandhara period. The inscription on the casket left no doubt as to the mound being the stupa raised over a portion of the body relies of Buddha by the Indo Seythian king Kanishka. They were presented by Lord Minto's Government to the Buddhists o. Burma and are now enshrined at To about the same age belong the Mandalay. stupes at Manikvala in the Puniab opened by Ranjit Singh's French Generals, Ventura and Court, in 1830. Some of them contained coins of Kanishka. There was brought to light at Taxila during the winter of 1932-33 what proved to be the largest monastery so far unearthed in north-west India. In it there was an inscription dated in the year 134 of an unspecified era and The second class consist of a hall roughly corresponding with the year 76 A. D. The record is regarded as important, because of the assistance it gives in dating Gaudhara sculptures in various parts.

pies the first product of the temple but carved out of solid rock. It also is temples at Ajhole in Bijapur, the latter of which dedicated to Siva and was excavated by the cannot be later than the eighth century A.D. Rashtrakuta king, Krishna I, (A. D. 768), The only common characteristic is flat roofs who may still be seen in the paintings in the without spires of any kind. In other respects ceilings of the upper porch of the main shrine, they are entirely different, and already here we callings of the upper porch of the main same, pany are entropy uncrease, and already near we of the Jains caves the earliest are at Kharda-i mark the beginning of the two styles, Indo-girl and Udayagirj those of the medieval type, Aryan and Drawllian, whose diffurences become in Indra Sabha at Ellora; and those of the latest more and more pronounced from the Tute comperiod, at Ankai in Nasik. The ceilings of many larry onwards. In the Indo-Aryan style, the

and in the Dravidian to the horizontal. The salient feature of the former again is the curvilinear steeple, and of the latter, the pyramidal tower. The most notable examples of the first kind are to be found among the temples of Bhubaneswar in Orissa, Khajuraho in Bundelkhand, Osia in Jodhpur, and Dilwara on Mount Abu. One of the best known groups in the Dravidian style is that of the Mamallapuram Raths, or 'Seven Pagodas,' on the seashore to the south of Madras. They are each hewn out of a block of granite, and are rather models of temples than raths. They are the earliest examples of typical Bravidian architecture, and belong to the 7th century. To the same age has to be assigned the temple of Kailasarath at Conjecveram, and to the following century some of the temples at Aihole and Pattadkal of the Bijapur District, Bombay Presidency, and the mono-lithic temple of Kailasa at Ellora, referred to above. Of the later Dravidian style the great temple at Tanjore and the Srirangam temple near Trichinopoly are the best examples. Intermediate between these two main styles

comes the architecture of the Deccan, called Chalukyan by Fergusson. In this style the plan becomes polygonal and star-shaped instead of quadrangular; and the high-storeyed spire is converted into a low pyramid in which the horizontal treatment of the Dravidian is combined with the perpendicular of the Indo-Aryan. Some fine examples of this type exist at Dambal, Rattibali, Tilliwalli and Hangal in Dharwar, Bombay Presidency, and at Ittagi and Warangal in Nizam's Dominions. But it is in Mysore among the temples at Hallebid

Belur, and Somnathpur that the style is found in its full perfection.

Saracenic Architecture.-This begins in India with the 13th century after the permanent occupation of the Muhammadans. Their first mosques were constructed of the materials of Hindu and Jaina temples, and sometimes with comparatively slight alterations. The mosque called Arhai-din-ka-jhompra at Ajmer and that near the Qutb Minar are instances of this kind. The Muhammadan architecture of India varied at different periods and under the various dynasties, imperial and local. The early Pathan architecture of Delhi was massive and at the same time was characterised by and as one same time was constructerised by elaborate richness of ornamentation. The Quib Minar and tombs of Altamish and Ala-ud-din Khiliji are typical examples. Of the Sharqi style we have three mosques in Jaunpur with several tombs. At Mandu in the Dhar State, a third form of Saracenic architecture sprang up, and we have here the Jami Masjid, Hoshang's tomb. Jahaz Mahal and Hindola Mahal as the most notable instances of the secular and ecclesiastical styles of the Malwa Pathans, The Muhammadans of Bengal again developed their own style, and Pandua, Malda, and Gaur teem with the ruins of the buildings of this type, the most important of which are the Adina Masidot

most prominent ones tend to the perpendicular | central area covered over so that what in others would be an open court is here roofed by sixty-three small domes. "Of the various forms which the Saraeenic architecture assumed," says Fergusson, "that of Ahmedabad may probably be considered to be the most elegant. It is notable for its carved stone work; and the work of the perforated atone windows in Sidl Sayyid's mosque, the carved niches of the minars of many other mosques, the sculptured Mihrabs and domed and panelled roots is so exquisite that it will rival anything of the sort executed eisewhere at any period. No other style is so essentially Hindu. In complete contrast with this was the form of architecture employed by the Adil Shahi dynasty of Bija-pur. There is here relatively little trace of pur. There is nere regardent needs are of third forms or details. The principal buildings now left at Bijapur are the Jami Masjid. Gagan Mahal, Mibar Mahal, Ibrahim Rauza and mosque and the Gol Gumbaz. Like their predecessors, the Pathans of Delhi, the Moghuls were a great building race. Their style first began to evolve itself during the reign of Akbar in a combination of Hindu and Muhammadan features. Noteworthy among the emperor's buildings are the tomb of Humayun, and the palaces at Fatelpur Sikri and Agra. Of Jehangir's time his mosque at Lahore and the tomb of Itimad-ud-daula are the most typical structures. "The force and originality of the style gave way under Shah Jahan to a delicate elegance and refinement of detail." And it was during his reign that the most splendid of the Moghul tombs, the Taj Mahal at Agra, the tomb of his wite Mumtaz Mahal, was con-structed. The Moti Masjid in Agra Fort is another surpassingly pure and elegant monument of his time. Inscriptions .- We now come to inscrip-

tions, of which numbers have been brought to light in India and are particularly numerous in South India. They have been engraved on varieties of materials, but principally on stone and copper. The earliest of these are found incised in two distinct kinds of alphabet, known as Brahmi and Kharoshthi, the latter being confined to the north-west of India. Brahmi was read from left to right, and from it have been evolved all the modern vernacular scripts of India. The Kharoshthi script was written from right to left, and was a modified form of the ancient Aramaic alphabet introduced into the Punjab during the period of the Persian domination in the 5th century B.C. It was prevalent up to the 4th century A.D., and was supplanted by the Brahml. The earliest dateable inscriptions are the celebrated edicts of Asoka to which a reference has been made above. One group of these has been engraved on rocks, and another on pillars. They have been found from Shahbaggarhi 40 miles north-east of Peshawar to Nigliva in the Nepal Taral, from Girnar in Kathiawar to Dhauli in Orissa, from Kalsi in the Lower Himalayas to Jonnagiri in Madras showwith the ruins of the buildings of this type, the Lower Himalayas to Jonnagiri in Madras showmas important of which are the Adina Manjadof ing by the way the wast extent of territory held Silandiar Shah, the Egiakhi monque, Barndi by him. The reference in his Rock Edicts of Adinary and Hadra were also greater to the Rock Edicts of the Adinary and Hadra were also greater to the Hornary and Lower and Lowe

the birth-place of Buddha which was for long nent footing and united them together under. disputed. Another noteworthy record is the incontrol of Director-General, provision being inscription of the Besnagar pillar. The pillar also made for subsidising local Governments out had been known for a long time, but Sir John Joi imperial funds, when necessary. The Another had been known for substitutions of the pillar Marshall was the first to notice the inscription on it. It records the erection of this column, which was a Garuda pillar, in honour of the god Vasudeva by one Heliodoros, son of Dion, who is described as an envoy of King Antialkildas of Taxila. Heliodoros is herein called a Bhagavata, which shows that though a Greek he had become a Hindu and a Vaishnava. Another inscription worth noticing and especially in this connection is that of Cave No. 10 at Nasik. The donor of this cave, Ushavadata, who calls himself a Saka and was thus an Indo-Scythian, is therein spoken of as having granted three hundred thousand kine and sixteen villages to gods and Brahmans and as having annually fed one hundred thousand Brahmans. Here is another instance of a foreigner having embraced Hinduism. Thus for the political, social, economical and religious history of India at the different periods the inscriptions are invaluable records, and are the only light but for which we are forforn and blind.

Archaeological Department.—As the archaeological monuments of India must attract the attention of all intelligent visitors, they would naturally feel desirous to know something of the Archeological Department. The work of this Department is primarily two-fold, conservation, and research and exploration. None but spasmodic efforts appear to have been made by Government in these directions till 1870 when they established the Archeological Survey of India and entrusted it to General (afterwards Sir) Alexander Cunningham, who was also the first Director-General of Archaelogy. The next advance was the initiation of the local Survevs in Bombay and Madras three years after. The work of these Surveys, however, was restricted to antiquarian research and description of monuments, and the task of conserving old buildings was left to the fitful efforts of the United Provinces, and soon after appointed a conservator, Major Cole, who did useful work for three years. Then a reaction set in, and his matter was taken by Lord Curzon's Government copied and noticed in the Annual Reports on who established most of the Archaeological South Indian epigraphy and a large number Circles that now obtain, placed them on a perma-published in extension.

Monuments Preservation Act was passed for the protection of historic monuments and relies especially in private possession and also for State control over the excavation of ancient sites and traffic in antiquities. Under the direction of Sir John Marshall, Kt., c.I.E., late Director-General of Archaeology, a comprehensive and systematic campaign of repair and excavation was prosecuted. Under later Directors-General it was continued with equal vigour (the present D. G. is Rao Bahadur K. N. Dikshit) and the result of it is manifest in the presental terediconditions of many old and historic buildings and in the scientific excavation of buriedsites such as Taxila. Pataliputra, Sanchi in the Bhopal State, Sarnath near Benares, Nalanda in Bibar, Pabrapur in Reneal and Nagariunikonda in Madras and in the Indus Valley at Harappa in the Punjab and Mohenjo-daro in Sind. Of all these works those of most general interest are the Mohen jo-daro excavations for here the Archaelogical Department have unearthed remains of prehistoric cities dating back to 3000 B.C. and further. The Archaeologi-cal Survey has devoted considerable attention to the organization and development of museums as centres of research and educations. It maintains the archeological section of the Indian Museum at Calcutta, small museums at the Taj, and at the Forts at Delhi and Lahore, the Central Asian Antiquities Museum at New Delhi and has erected local museums at the excepated sites of Taxila, Sarnath, Nalanda, Mohanjo-daro and Harappa with the object of keeping the small movable antiquities recovered at these sites in close association with the structural remains to which they belong, so that they may be studied amid their natural surroundings and not lose focus and meaning by being transported to some distant place, The epigraphical material dealt with by the

Archaelogical Survey has enabled the history and chronology of the various dynasties of India local Governments often without expert guid-ance or control. It was only in 1878 that the Government of India under Lord Lytton awoke 2nd volume, a revised edition of the Asoka 2 to this deplorable condition, and sanctioned inscriptions has been recently published, while a sum of 3f lakhs to the repair of monuments in the companion volume of post Asokan Brahmi under inscriptions is inscriptions is under preparation along with two others devoted to the records of the Gupta and Kalachuri epochs, The volume of post and that of the Director-General were work done in South India, which is particularly abolished. The first systematic step towards re-rich in lithic records, will be apparent from cognising official responsibility in conservation the fact that over 20,000 inscriptions have been

Indian Time.

For many years Indiantime was in a state of and through them to all local bodies, a long actic confusion. What was called Madras or letter which reviewed the situation and made chaotic confusion. What was called Madras or Railway time was kept on all the railways; and each great centre of population kept its own local time, which was not based on any common scientific principle and was divorced from the standards of all other countries. It was with a view to remedying this confusion that the Government of India took the matter up in 1904, and addressed to the Local Government,

suggestions for the future. The essential point in this letter are indicated below: "In India we have already a standard time

which is very generally, though by no means universally, recognised. It is the Madras local time, which is kept on all rallway and telegraph lines throughout India and which is 5th, 21m. 10s. in advance of Greenwich, Similarly

Rangeon local time is used upon the railways bours faster than that of Greenvich, which telegraphs of Burma, and is 6h. 24m. 47s. would be known as Indian Standard Time: shado of Greenwich But neither of these and the difference between standard and local standards bears a simple and easily remembered then at the places mentioned below would be calation to Greenwich time.

wripe Government of India have several times been addressed by Scientific Societies, both in india and in Engind, and urged to fall into line with the rest of the civilised world. And now the Royal Society has once more returned to the attack. The Committee of that Society which advised with its observatories, writers—"The Committee think that a change from Madras time to that corresponding to a longitude exactly of, hours east of Greenvich would be an improvement upon the existing arrangements; but that for international scientific purposes the hourly of Greenvich up the process the hourly of Greenvich to the process of the first process of the contract of the

"Now if India were connected with Europe by a continuous series of civilised nations with delir continuous series of civilised nations with their continuous railway systems all of which had be imperative upon India to conform and to adopt the second suggestion. But as she is not, and as hie is as much isolated by uncivilised States as Cape Colony is by the occain, it is open to where similarly sthated colonies and to a dopt where similarly sthated colonies and to a dopt

the first suggestion.

"It is believed that this will be the better solution. There are obvious objections to drawing an arbitrary line right across the richest and most populous portions of India, and so as to bisect all the main lines of communication, and keeping times differing by an hour on opposite sides of that line. India has become accustomed to a uniform standard in the Madras time of the rallways; and the substitu-tion for it of a double standard would appear to be a retrograde step; while it would, in all probability, be strongly opposed by the railway authorities. Moreover, it is very desirable that whatever system is adopted should be followed by all Europeans and Indians alike; and it is certain that the double standard would puzzle the latter greatly; while by emphasising the fact that railway differed from local time, it might postpone or even altogether prevent the acceptance of the former instead of the latter by people generally over a large part of India, The one great advantage which the second possesses over the first alternative is, that under the former, the difference between local and standard time can never exceed half an hour: whereas under the latter it will even exceed an hour in the extreme cases of Karachi and Quetta. But this inconvenience is believed to be smaller than that of keeping two different times on the Indian system of railways and telegraphs

"It is proposed, therefore, to put on all the by the Municipalitatiway and telegraph clocks in India by sm. of some ortholox."
50s. They would then represent a time 5 } Time is universal.

hours faster than that of Greenwich, which would be known as Indian Standard Time: and the difference between standard and local time at the places mentioned below would be approximately as follows, the figures represents a standard time is in advance of or belind color time respectively:—Dibrugarh 51 8, Shillong 88, Calcutta 24 S., Allahubad 2 F., Matras 9 F., Laboro 33 F., Bombay 39 F., Pesbawar 44 F., Karachi 62 F., Quetta 62 P., Quetta 62 F.

"This standard time would be as much as 54 and 55 minutes behind local time at Mandalay and Rangoon, respectively; and since the railway system of Burma is not connected with that of India, and already keeps a time of its own, namely, Rangoon local time, it is not suggested that Indian Standard Time should be adopted in Burma. It is proposed, however, that instead of using Rangoon Standard Time as at present, which is 6h. 24m. 47s, in advance of Greenwich, a Burma Standard Time should be adopted on all the Burmese railways and telegraphs, which would be one hour in advance of Indian Standard Time, or 64 hours ahead of Greenwich time, and would correspond with 97° 30' E. longitude. The change would bring Burma time into simple relation both with European and with Indian time, and would (among other things) simplify telegraphic communication with other countries.

"Standard time will thus have been fixed for railways and telegraphs for the whole of the Indian Empire. Its general adoption for all purposes, while eminently advisable, is a match which must be left to the local community in each case."

It is difficult to recall, without a sense or bewilderment, the reception of this proposal by various local bodies. To read now the fear as another than the result of the read and th

Coinage, Weights and Measures

rupee, statements with regard to money are generally expressed in rupees, nor has it been found possible in all cases to add a convers on into sterling. Down to about 1873 the gold value of the rupee (containing 165 grains of pure silver) was approximately equal to 2s., or one-tenth of a £, and for that period it is easy to convert rupees into sterling by striking off the final cipher (Rs. 1,000=£100). after 1873, owing to the depreciation of silver as compared with gold throughout the world, there came a serious and progressive fall in the exchange, until at one time the gold value of the rupee dropped as low as 1s. In order to provide a remedy for the heavy loss caused to the Government of India in respect of its gold payments to be made in England, and also to relieve foreign trade and finance from the inconvenience due to constant and unforeseen fluctuations in exchange, it was re-solved in 1893 to close the mints to the free coinage of silver, and thus force up the value of the rupee by restricting the circulation. The intention was to raise the exchange value of the runce to 1s. 4d., and then introduce a gold standard at the rate of Rs. 15=£1. From 1899 onwards the value of the rupes was maintained, with insignificant fluctuations, at the proposed rate of 1s. 4d. until February 1920 when the recommendation of the Committee appointed in the previous year the Committee appointed in the previous year that the rupee should be linked with gold and not with sterling at 2s. Instead of 1s. 4d. was adopted. This was followed by great fluctua-tions. (See article on Currency System).

Notation .- Another matter in connection with the expression of money statements in terms of rupees requires to be explained. The method of numerical notation in India differs from that which prevails throughout Europe. Large numbers are not punctuated in hundreds of thousands and millions, but in lakhs and crores. A lakh is one hundred thousand (written out as 1,00,000), and a crore is one hundred lakhs or ten millions (written out as 1,00,00,000). Consequently, according to the exchange value of the rupee, a lakh of rupees (Rs. 1.00.000) may be read as the equivalent of £10,000 before 1873, and as the equivalent of (about) £6,667 after 1899, while a crore of rupees (Rs. 1,00,00,000) may similarly be read as the equivalent of £1,000,000 before 1873, and as the equivalent of (about) £666.667
after 1899. With the rupes at 1s. 6d. a lakh
is equivalent to £7,500 and a crore is equivalent to £750,000.

Coinage.—Finally, it should be mentioned that the rupee is divided into 16 annas, a fraction commonly used for many purposes by both Indians and Europeans. The anna was both Indians and Europeans. The anna was formerly reckoned as 11d., it may now be considered as exactly corresponding to 1d. The anna is again sub-divided into 12 pies.

As the currency of India is based upon the The scales used generally throughout Northern mee, statements with regard to money are India and less commonly in Madras and standardized in Bombay Presidency under the Bombay Weights and Measures Act, 1932, may be thus expressed as one maind = 40 seers, one seer=80 tolas. The actual weight of seer varies greatly from district to district and even from village to village in India except in Bombay Presidency. In the standard system the tola is of 180 grains, and seer thus weighs 2.057 lbs and the maund 32.28 lbs. This standard is also used in official reports.

Retail -For calculating retail prices, the universal custom in India is to express them in terms of seers to the runee. Thus, when prices change what varies is not the amount of money to be paid for the same quantity, but the quantity to be obtained for the same amount of money. In other words, prices in India are quantity prices, not money prices. When the figure of quantity goes up, this of course means that the price has gone down, which is at first sight may, perplexing to an English reader. It may, however, be mentioned that quantity prices are not altogether unknown in England, especially at small shops, where pennyworths & many groceries can be bought. Eggs, likewise, are commonly sold at a varying number for the shilling. If it be desired to convert quantity prices from Indian into English denominations without having recourse to money prices (which would often be misleading), the following scale may be adopted-based upon the assumption that a seer is exactly 2 lb., and that the value of the rupee remains constant at 1s. 4d., 1 seer per rupee=(about) 3 lb, for 2s., 2 seers per rupee=(about) 6 lb. for 2s., and so on,

The name of the unit for square measure-ment in India generally is the bigha, which varies greatly in different parts of the country. But areas have been expressed in this work either in square miles or in acres.

Proposed Reforms,—Indian versues are treasures have never been settled upon as organised basis suitable for commerce and organised the modern age. They Proposed Reforms.-Indian vary from town to town and village to village in a way that could only work satisfactorily so long as the dealings of towns and villages so tolig as the dealings of device and value were self-contained and before rouds and rati-ways opened up trade between one and the other. It we take, for instance, the manud-denomination of weight common all over India, we shall find that in a given city there are nearly as many maunds as there are articles to weigh. If we consider the mound as be-tween district and district the state of affairs is worse. Thus in the United Provinces alone, is worse. Thus in the United Provinces alone, the manud of sugar weighs 48; seers 19. Cawnpore, 40 in Mutra, 72; in Gorakhpur, 40 in Moradsbad, 43; in Saharapur, 50 in Barelly, 46 in Syzabad, 48; in Shahanya, 51 in Goshangunge. The manud varies throughout all India from the Hensal and the statement of realisay manud of 82-97 ilsa, to the Factory or realisay manud of 82-97 ilsa, to the Factory. Weights—The various systems of weights manuel of 28 lbs., which apparently answer in India combine uniformity of scales with manuel of 28 lbs., which apparently answer improve variations in the weights of uniform the correct Department manual in use at the maund of 74 lbs. 10 oz. 11 drs., the Hombay maund of 28 lbs., which apparently answers Fuel Depot, and the Madras maund, which ome authorities estimate at 25 lbs. and others at 24 lbs. and so on.

Committees of Inquiry .- These are merely typical instances which are multiplied indefi-There are variations of every detail niteiv. of weights and measures in every part of India. The losses to trade arising from the confusion and the trouble which this state of things causes are heavy, Municipal and commercial bodies are continually returning to the problem with a view to devising a practical scheme of reform. The Supreme and Provincial Governments have made various attempts during 40 years past to solve the problem of universal punits of weights and measures and commerce and trade have agitated about the question for the past century. The Indian railways and Government departments adopted standard tola (180 grains), seer (80 tolas) and maund (40 seers) and it was hoped that this would act as a successful "lead" which would gradually be followed by trade throughout the empire, but the expectation has not been realised.

The Government of India considered the whole question in consultation with the provincial Governments in 1890-1894 and various special steps have at different times been aken in different parts of India. The Government of Bombay appointed a committee in 1911 to make proposals for reform for the Bombay Presidency. Their final report has m 1911 to make proposals for reform for the Bombay Presidency. Their final report has not been published, but they presented in 1912 an aid interim report which has been issued for public discussion. In brief, it points out the practical impossibility of proceeding by compulsory measures affecting the whole of India. The Committee stated that over the greater part of the Bombay Presidency a standard of weights and measures would be heartily welcome by the people. They thought that legislation compulsorily applied over large areas subject to many diverse condi-tions of trade and social life would not result alm bringing about the desired reform so successfully as a "lead" supplied by local legislation based on practical experience. The want of coherence, away faire, or the means of cooperation among the people at large pointed to this conclusion. The Committee pointed to this concusion. In committee pointed out that a good example of the results that will follow a good lead is apparent in the Bast Khandesh District of the Presidency, where the District Officer, Mr. Simcox, gradually, during the course of three years, induced the people to adopt throughout the district unit. form weights and measures, the unit of weight in this case being a tola of 180 grains. But the committee abstained from recommending the committee abstanted from recommending that the same weights and measures should be adopted over the whole Presidency, pre-ferring that a new system started in any area should be as nearly as possible similar to the best system already prevailing there.

Committee of 1913.-The whole problem was again brought under special consideration by the Government of India in October, 1913, when the following committee was appointed to inquire into the ontire subject anew — Mr. A. Y. G. Campbell.

Mr. A. Y. G. Campbell.

Mr. Rustomji Fardoonji.

This Committee reported, in August in favour of a uniform system of weights to be adopted in India based on the 180 grain tola. The report says :-- Of all such systems there s no doubt that the most widespread and best known is that known as the Bengal or Indian Rallway weights. The introduction of system involves a more or less consideration. considerable change of system in parts of the United Provinces (Gorakhpur, Bareilly and neighbouring areas), practically the whole of Madras, parts of the Punjab (rural portions of Amritsar and leighbouring districts), of Bombay (South Bombay, Bombay city and Gujarat), and the North-West Frontier Province, Burma has at present a separate system of its own which the committee think it should be permitted to retain. The systems recommended are :-

The tola is the tola of 180 grains, equal to fixed at 3 60 lbs, or 140 tolas, Government Action .- The Government of

India at first approved the principles of the Report and left the Provincial Governments to take action, but they passed more detailed orders in January, 1922. In these they again, for the present and subject to the restrictions imposed by the Government of India Act and the devolution rules, left it entirely to local Governments to take such action as they think advisable to standardise dry and liquid measures of capacity within their provinces. Similarly, they announced their decision not to adopt all-India standards of length or area.

As regards weights they decided in favour of the standard mentioned under the heading "Weights", near the commoncement of this article, this having been recommended by a majority of the Weights and Measures Committee and having received the unanimous support of the Local Governments. At the same time they provisionally undertook to assist provincial legislation or standardisation and stated that "if subsequently, opinion develops strongly in favour of the Imperial standardisation of weights, the Government of India will be prepared to under-take such legislation, but at present they con-sider that any such step would be premature.

Provincial Government Action.—Amongst the various Provincial Governments in India, Bombay Government is the only one which has taken action to standardize the weights and measures, etc., used in trade in the Presidency.

The Peoples of India.

It is essential to bear in mind, when dealing with the people of India, that it is a continent rather than a country. Nowhere is the complex character of Indians more clearly exemplified than in the physical type of its inhabitants. No one would confuse the main types, such as Gurkhas, Pathans, Sikhs, Rajputs, Burmans, Nagas, Tamils, etc., nor does it take long to carry the differentiation much farther. The typical inhabitants of India—the Dravidians—differ altogether from those of Northern Asia, and more nearly resemble the tribes of Malaya, Sumatra and Madagascar. Whatever may be their origin, it is certain that they have settled in the country for countless ages and that their present physical characteristics have been evolved locally. They have been displaced in the North-West by successive hordes of invaders, including Aryans, Seythians, Pathans and Moghals, and in the North-East by Mongoloid tribes allied to those of Burma, which is India only in a modern political sense. Between these foreign elements political sense. Between these foreign elements and the pure Dravidians is borderland where the contiguous races have intermingled.

The people of the Indian Empire are divided The people of the Indian Empire are divided by Sir Henry Risley (Caste, Tribe and Race, Indian Census Report, 1901; the Gazetterr of india, Ethnology and Caste, Volume I, Chapter 6) into seven main physical types. There would be eight if the Andamanese were included, but this tiny group of Negritos may be disregarded.

The Turko-Iranian, represented by the Baloch, Brahui and Afghans of Baluchistan and the North-West Frontier Province, Probably formed by a fusion of Turki and Persian elements, in which the former predominate. Stature above mean; complexion fair; eyes mostly dark but occasionally grey; hair on face plentiful; head broad, nose moderately narrow, prominent, and very long. The feature in these people that strikes one most prominently is the portentous length of their noses, and it is probably this peculiarity that has given rise to the tradition of the Jewish origin of the Afghans.

The Indo-Aryan occupying the Punjab, Raj-putana, and Kashmir, and having as its charac-teristic members the Rajputs, Khattris, and Jats. This type, which is readily distinguishable from the Turko-Iranian, approaches most closely to that ascribed to the traditional Aryan colonists of India. The stature is mostly tall; complexion fair; eyes dark; hair on face plentiful, head long; nose narrow, and prominent but not specially long.

The Scytho-Dravidian, comprising the Maratha Brahmans, the Kunbis, and the Coorgs of Western India. Probably formed by a mix-ture of Scythian and Dravidian elements. This type is clearly distinguished from the Turko-Iranian by a lower stature, a greater length of head, a higher nasal index, a shorter nose, and a lower orbito-nasal index. All of these characters, except perhaps the last, may be due to a varying degree of intermixture with the Dravidians. In the higher groups the amount of crossing seems to have been slight; in the lower Dravidian elements are more pronounced.

lower by the Chamar. Probably the result of the intermixture, in varying proportions, of the Indo-Arvan and Dravidian types. The head-form is long with a tendency to medium; the complexion varies from lightish brown to black; the nose ranges from medium to broad, being always broader than among the Indo-Aryans; the stature is lower than in the latter group and usually below the average according to the scale. The higher representatives of this type approach the Indo-Arvans while the lower members are in many respects not very far removed from the Dravidians. The type is essentially a the Dravidians. The type is essentially a mixed one, yet its characteristics are readily definable, and no one would take even an upper class Hindustani for a pure Indo-Aryan or a Chamar for a genuine Dravidian. The which gives the real clue to its origin and stamps the Aryo Dravidian as racially different from the Indo-Aryan is to be found in the proportions of the nose.

The Mongolo-Dravidian, or Bengali type of Lower Bengal and Orissa, comprising the Bengal Brahmins and Kayasthas, the Maho-medans of Eastern Bengal, and other groups neculiar to this part of India. Probably a blend of Dravidian and Mongoloid elements, with a strain of Indo-Aryan blood in the higher groups. The head is broad; complexion dark; hair on face usually plentiful; stature medium; nose medium, with a tendency to broad. This is one of the most distinctive types in India, and its members may be recognised at a glance throughout the wide area where their remarkable aptitude for clerical pursuits has procured them employment. Within its own habitat the type extends to the Humalayas on the north and to Assam on the east, and probably includes the bulk of the population of Orissa; the western limit coincides approximately with the hill country of Chota Nagpur and Western Bengal. with the hilly

The Mongoloid type of the Himalayas, Nepal, Assam, and Burma, represented by the Kanets of Lahul and Kulu; the Lepchas of Darjeeling and Sikkim the Limbus, Murmis and Gurungs of Nepal; the Bodo of Assam; and the The head is broad ; complexion dark. Burmese. with a yellow tinge; hair on face scanty; stature short or below average; nose fine to broad, face characteristically flat; cyclids often oblique.

The Dravidian type extending from Ceylon to the valley of the Ganges, and pervading Madras, Hyderabad, the Central Provinces, most of Central India and Chora Nagpur. Its most characteristic representatives are the Paniyans of Malabar and the Santals of Chota Nagpur. Probably the original type of the population of India, now modified to a varying extens by the admixture of Aryan, Scythlan, and Mongo-loid elements. In typical specimens the stature is short or below mean; the complexion very dark, approaching black; hair plentiful, with an occasional tendency to curl; eyes dark; head long; nose very broad, sometimes depressed at the root, but not so as to make the face appear flat. This race, the most primitive of the Indian The Ary Dravilian or Hindustani, formation in the Ary Dravilian or Hindustani, formation in the third Irovinces, in parts of Edgination and the third Irovinces, in parts of Edgination and the Blad and represented in the up-plateau, and undustating plains which stretch updates, and the Blad and represented the sup-plateau, and undustating plains which stretch per strata by the Hindustani Brahman and in its roughly speaking, from the Vindhyas to Cape

Comorin. On the east and the west of the peninsular area the domain of the Dravidian is conterminous with the Ghats, while further north it reaches on one side to the Aravallis, and on the other to the Rajmahal Hills. Where the original characteristics have been unchanged by contact with Indo-Aryan or Mongoloid people, the type is remarkably uniform and distinctive. Labour is the birthright of the pure Dravidian whether hoeing tea in Assam, the Duars, of Ceylon, cutting rice in the swamps of Eastern Bengal or doing scavenger's work in the streets of Calcutta, Rangoon and Singapore, he is recognizable at a glance by his black skin, his squat figure, and the negro-like proportion of his nose. In the upper strata of the vast social formation had taken place.

deposit which is here treated as Dravidian these typical characteristics tend to thin and disappear, but even among them traces of the original stock survive in varying degrees.

The areas occupied by these various types do not admit of being defined as sharply as they must be shown on an ethnographic map. melt into each other insensibly; and although at the close of a day's journey from one ethnic tract to another, an observer whose attention had been directed to the subject would realise clearly enough that the physical characteristics of the people had undergone an appreciable change, he would certainly be unable to say at what particular stage in his progress the trans-

TOWN AND COUNTRY.

The progress of urbanisation in India-if there has been any progress at all-has been very slow during the past thirty years, the whole increase being a little more than one per cent. The percentage of the urban population to the total is only 11, which however shows an increase of 0.8 per cent, since the last census, due partly to the natural increase of the preexisting urban population and partly to migration from rural areas. The percentage of urban appulation ranges from 3.4 in Assam to 22.6

in Bombay which is the most urbanised of the major provinces. Compared to this, the urban population in France is 49 per cent., in Northern | expense of the smaller towns.

Ireland 50.8 per cent., in Canada53.7 per cent. in the U. S. A. 56.2 per cent, and in England and Wales 80 per cent.

The greatest degree of growth has been in the number of towns with a population of from 20,000 to 50,000, the total population of which is now nearly double that of towns of 50,000 to 100,000. All classes of towns have increased in population, except those with populations of between 5,000 and 10,000 and those having under 5,000. Thus the large industrial and semi-industrial towns have benefited at the

S. A.

The Chart below gives at a glance the changes in India's population in the decade 1921-31—the total, sex, urban rural and literacy.

RELIGIONS.

The subject of religion is severely controversial in India, where often it is coloured by politics and racialism. As the Year Book aims at being impartial, all disputed inferences are excluded. As a matter of fact, Dr. Hutton, the Commissioner for the latest census, refers to an excess of zeal on the part of all parties to register as many adherents as possible in view, of the possibility of a communal franchise based on the census returns. "So high did feeling run over the return of religion in the Punjab", The enumerated totals of the India he says, "that disputes as to whether a man are set out in the following table:—

gion) or Sikh added to a number of affrays and at least to one homicide. Speaking broadly, of every hundred persons in the Indian Empire 68 are Hindus, 22 Mahomedans, 3 Buddhists, 3 follow the religion of their tribes, one is a Christian and one a Sikh. Of the remaining 2 one is equally likely to be a Buddhist or a Christian, and the other most probably a Jain, much less probably a Parsi and just as possibly either a Jew, a Brahmo, or a holder of indefinite beliefs. The enumerated totals of the Indian religious

			Religi	on.				Actual number in 1921. (000°s omitted.)	Proportion per 10,000 of population in 1921.	Variation per cent, (Increase + Decrease—) 1911-1921.

Miscellaneo	us (Mi	nor r	eligionsa	nd rel	igions :	ot retu	(rned)	571	16	+3,072.6

A feature of the above table is easily the large increase in the number of those returned as "miscellaneous". This is explained by the fact that the latest census grouped all those who returned their religion as Adi-Hindu, Adi-Dravida, etc., under "miscellaneous"

The Hindus largely predominate in the centre and south of India, and in the Madras Presidency they are no less than 88 per cent. of the population. Hindus are in the majority in Assam, Bihar and Orissa, the United Provinces, the Central India tracts, Rajputana and Bombay, Muhammadans monopolize the North-West Muhammadans monopouze the North-West-Frontier Province, Baluchistan and Kashmir and are considerably in excess in the Funjab and Eastern Bengal and Sind. They form about 32 per cent. of the population of Assam, 15 per cent. in the United Provinces and 10 per cent. in Hyderabad. The Buddhists are almost entirely confined to Burma where they are 84 per cent. of the population. The Sikhs are localized in the Punjab and the Jains in Rajputana, in the Punjao and the dains in Respitana, Ajmer-Merwara and the neighbouring States. Those who were classed as following Tribal Religions are chiefly found in Bihar and Orissa, the Central Provinces and Assam, but Bengal

Burma, Madras, Rajputana, Central India and Hyderabad also returned a considerable number under this head. More than half of the total number of Christians reside in South India including the Hyderabad State. The remainder are scattered over the continent, the larger numbers being returned in the Puniab. the United Provinces, Bengal, Bihar and Orissa, Burma, Bombay and Assam. The Parsis and Jews are chiefly residents of the Bombay Presidency.

Christians .- The Christian community now numbers just 61 millions of persons in India or 1.79 per cent. of the population. This constitutes an increase of 32, 5 per cent, over the last census of which 20 per cent. is ascribed to conversions during the decade 1921-31. Nearly 60 per cent. of Christians are returned from the Madras Presidency and its States, and the community can claim 35 persons in every 1,000 of the population of the British districts of Madras and as large a proportion as 27 per cent. in Cochin and 31.5 per cent. in Travancore. Elsewhere the Christians are scattered over the larger Provinces and States of India, the Punjab and Bihar and Orissa.

MAIN STATISTICS OF THE INDIAN EMPIRE.

The Census of India was taken on the night of February 24th in Burma and on that of 26th in India. The total population of India as thus ascertained is 352,877,778, stz., British Terricov 271,6038 and Indian States 31,810,846 giving an increase of 24,670,742 in British Terricov and 9,224,956 in Indian States

Special causes contribute to the high mortality | on infants in India.

Owing to the custom of early marriage, co-habitation and child-birth commonly take place before the woman is physically mature and this, combined with the primitive and insanitary methods of midwifery, seriously affects the health and vitality of the mother and through her of the child. If the child survives the preher of the child. If the child survives the pre-natal and natal chances of congenital debility and the risks of child-birth, it is exposed to the dangers of death in the early months of life from diarrhea or dysentery. According to the Executive Health Officer of Bombay city, by far the greater number of infantile deaths are due to infantile debility and malformation, including premature birth, respiratory diseases coming next, then convulsions, then diarrhes and enteritis.

has been going on since the beginning of this century. This shortage of females is characteristic of the population of India as compared to that of most European countries. The formale infant is definitely better equipped by nature for survival than the male, but in India the advantage she has at bitth is probably neutralised in infancy by comparative neglect and in adolescence by the strain of bearing children too early and too often. A good deal of recent work on sex ratios has tended to the view that an increase in masculinity is an indication of declining population, but this is not the case in India as a whole. The all-India ratio is 901 females per 1,000 males for Muslims racio is woll temales per 1,000 males for funding and 951 females per 1,000 males for Hindus, The only provinces in which there is actually an excess of women over men are Madras and Bihar and Orissa, though the Central Provinces can be added if Berar be excluded. Where Sex Ratio.—The figures of the population marked in the lower castes and does not always of India by sexes, as recorded by the latest extent to the higher. Among the aboriging full in the proportion of females to make the steady tribes, however, the numbers of the two sexes fall in the proportion of females to make that are approximately equal.

neen unscussed lany in one report of 1911. Both Hindus and Muhammadans are allowed more wives than one, Muhammadans being nominally restricted to four. As a matter of practice polygamy is comparatively rare owing to domestic and economic reasons and has little effect on the statistics. The custom of polyandry is recognized as a regular institution among some of the tribes of the Himalayas and in parts of south India. It is also practised among many of the lower castes and aboriginal tribes. Its effect is reflected in the statistics of a few small communities such as the Buddhists of Kashmir where the proportion of married women to narried men is exceptionally low, but otherwise the custom is of sociological rather than of statistical interest.

The table below shows the percentage for each sex of married persons who are under the age of 15 years: Number per 1,000 of total married who are under

15 years.

Widows and Remarriage.—Infant marriage naturally involves infant widowhood, a feature of no significance where remarriage is allowed on the signment of the strength of the strengt In the 1921 census there were 175 widows in every 1,000 females, a figure which had fallen in 1931 to 155. It is, however, Jains and

Marriage.—The subject of polygamy has Hindus who place an effective ban on widow been discussed fully in the report of 1911. Both remarriage, and in both these communities remarriage, and in both these communities the total ratio of widows has fallen; Jain widows in 1931 were 253 per 1,000 females, but in 1931 only 221, and the 1921 figure of 191 widows in every 1,000 Hindu females has fallen to 169 in 1931. On the other hand, there has already been a very remarkable increase in child widows particularly under the age of 5 years, which can be attributed to the rush of marriages anticipatory to the Child Marriage Restraint Act. a rush which it is to be feared will contribute large numbers of young widows to the figures of the 1941 census unless there is before then a very pronounced change of attitude towards widow remarriage in Hindu society generally In every thousand Hindu women there are still 169 widowed, 22 of whom are under thirty years of age and over a quarter of those under years of age and over a quantum of the second secon widow remarriages, they are still uncommon enough to attract attention in Indian papers whenever they take place.

Proportion of widows in the population per 1.000 of all religions.

SOCIAL AND ECONOMIC CONDITIONS.

Literacy.—The number of persons in India in population and in spite of having started with Literate in the sense of being able to write a a very high ratio, has been able to do more than letter and read the reply.

Literacy, in the sense of ability to write a letter and to read the answer to it, has grown enormously in the past fifty years, although it is at present not very high in comparison with countries in the west. Ninety-five out of every 1,000 of the population are now literate, as against 82 ten years ago and less than 40 half agains 52 ten years ago and tone and the provinces in the matter of literacy; for in that province literacy, even if not of a very high order, is a habit, traditional in both sexes and all classes, both boys and girls being taught in the monasteries of which almost every Burman village has at least one, Cochin, Travancore and Baroda follow Burma in the order of literacy.

a very high ratio, has been able to do more than keep pace with that growth.

Literacy is much more prevalent in towns than in the country, as both the need for, and the opportunities of, acquiring it are greater. An analysis of the population of the cities shows that 348 out of 1,000 males and 149 out of 1,000 females are literate, while the corresponding figures for literacy in English in towns are 1,473 males and 434 females.

The country taken as a whole, female literacy is comparatively absent in India proper except in Kerala. Cochin State has more than one literate female to every two literate males and Travanoore only a little less, while Malabar has nearly one to every three, Coorg a little less than one to every three, Baroda a little fewer Cochin State, in spite of a very rapid growth and Mysore one to every five. Besides the

the primary school leaving certificate.

Treated in communal or religious groups, the greatest progress has been made by Sikhus Jans, Muslims and Hindus, in that order, but the leading literate communities are the Parsis, Jews, Burmans, Jains and Christians. The following table analyses the position of the Indian communities in respect of literacy:—

	Religi	on.		Number per 1,000 who are literate.

of a considerable amount of discussion and suggestion during the last decade and a good deal has been written on the possibility of a lingua franca for India. The combined speakers of Eastern and Western Hindi considerably exceed in number the strength of any other individual language in India, and if we add to these two languages Bihari and Rajasthani,

The necessity of a common medium of concentral India. In their pure forms these four versation and intercourse, which has given rise languages may be scientifically distinct; but to bi-lingualism and the consequent displace- this is not the popular view. There is a common ment of tribal languages, has formed the subject element in the main languages of northern and central India which renders their speakers, without any great conscious change in their speech, mutually intelligible to one another, and this common basis already forms an approach to a lingua franca over a large part of India.

Infirmities .- These are classes under four main heads-insanity, deaf-mutism, blindness which so resemble Hindi as to be frequently re- and leprosy. The appended statement shows turned under that name in the census schedules, the number of persons suffering from each twe get well over 100 millions of speakers of infirmity at each of the last six censuses and the tongues which have some considerable affinities proportion per hundred thousand of the

There had been a continue total number as well as in the proportion of persons recorded as afflicted up to 1901. This fall has been ascribed partly to a progressive improvement in the accuracy of the diagnosis and partly to an actual decrease in the prevalence of the infirmitles, owing to the improvement in the material condition of the people to better sanitation and (especially in the case of blindness) to the increasing number of cures effected with the aid of modern medical and surgical science. In the decade ending 1901 the relatively high mortality of the afflicted in the two severe famines must have been a considerable factor in the decline shown at that census, but the method of compilation adopted in 1901 and in the previous census was defective, and, certainly in 1901, many of the persons afflicted must have escaped notice in the course of tabulation. Compared with the year 1891, there was a slight decrease in the total number of persons recorded as afflicted in 1911, the prorortion per hundred thousand persons falling from 315 to 267. The increase in ratio as well as in numbers since then is attributed to increased accuracy of enumeration.

Occupation.—It is a well-known fact that the majority of the people in India live on agricul-ture. The latest census puts down the number of those engaged in the exploitation of animals and vegetation at 103,300,000, while those and vegetation at 103,300,000, while those engaged in industry number 15,400,000. Thus about 67 per cent. of the country's workers about 67 per cent. of the country a worants are employed in the former and 10 per cent. in the latter. This does not, however, mean that all the 103 millions are land-owners. Rights in land in India are complicated and involved to a degree, incredible to persons familiar only with the simpler tenures of western Europe.

ween the man who cultivates land and the man who nominally owns it there are often a number of intermediate holders of some interest or other in the produce of the land. If a comparison is made between the area of land under crops and the number of agriculturists actually erops and the number of agreements accounty engaged in outlivation in British India, it is that for each agriculturist there are 2.9 acres of cropped land of which 0.65 of an arer is irrigated. The cultivation of special crops occupies under two per cent, of the populations concerned in pasture and agriculture, the greater part of whom are engaged in the production of tea. Forestry employs fewer than special cultivation

In recent years there has been an increase in the number of people living on the production and transmission of physical force, that is, heat, light, electricity, motive power, etc. Silk spinning and weaving, manufacture of chemical products, and the manufacture of tobacco have proved more popular than before. Transport by road has attracted more men, while the use of water for internal transport has decreased, harbours being used more freely for external transport by sea. About five million persons are engaged in organised industry.

It is noteworthy that less than one million people, who man, the army, the navy, the air force, the police, the services, etc., manage the administration of this vast country; in other words, 350 old millions are ruled by one

million servants of the state.

There has of late been increasing unemployment, especially among the educated classes.

An attempt to include these in the last census has not met with success, but it is significant that graduates of Madras University join the police department on Rs. 10 per mensem and are held fortunate in getting even that,

Indian Roads

as follows :--

There exists four great trunk roads, stretching diagonally across the country, which form the framework with which most of the important subsidiary roads are linked. These trunk roads have been in existence for an immense period and are rich in historical association. The most famous is the ancient marching route,-known as the Grand Trunk Road,-which stretches right across the northern part of the country from the Khyber to Calcutta: the other three connect Calcutta with Madras, Madras with Bombay and Bombay with Delhi, and the four of them together account for about 5,000 out of the 69,000 miles of metalled road in British India. None of these roads however can be considered safe "all weather" trunk roads according to modern standards. The Madras-Calcutta road in particular is far from being bridged throughout its entire length, and its improvement even in the Madras Presidency would be likely to absorb a large proportion of their funds for some years to come; whilst further North, where it enters Orissa, it has to cross so many large waterways that it will be quite impossible to make it a complete trunk road in the modern sense within any predictable peroid. And even the other three roads require a great deal of improvement : on the Grand Trunk Road from Calcutta to the North West Frontier, for example, there is as yet no road bridge over the river Sone in Bihar, and on all of them there are places where floods are liable to cause serious interruption to traffic. As regards the subsidiary roads the best and most numerous are to be found in Southern India. As one would expect, the worst served regions are Rajputana, Sind and parts of the Punjab on the one hand, and Orissa and Bengal on the other, the former owing to its aridity and sparse population and the latter because of the numerous unbridged and mostly unbridgeable waterways which dissect it : in addition of course there are numerous other parts of the country. such as the lower Himalayas, where the difficulties of the ground provide obvious reason for the dearth of communications. Besides surfaced roads, there is a very large mileage of "kutcha" roads in India amounting to approximately 200,000 miles, some of which provide good going for motor traffic during the dry weather. On the whole it is reasonable to say that India's road system, even before the advent of motor transport, was altogether insufficient for her needs ; and it is the increasing realisation of this fact that led to the appointment of the special

India's road system may be briefly described (Road Development Committee in 1927 whose functions were to examine the question of the development of road communications in view of the increasing use of motor transport and suggest ways and means of financing it.

> The recommendations put forward by the Committee were carefully considered by the Government of India, whose conclusions upon them were embodied in a resolution and provided that the increase from four to six annas per gallon in the import and excise duties on motor spirit, which had been effected in March 1929, should be maintained for a period of five years in the first instance, and that the additional duty should be allotted as a block grant for expenditure on road development, and credited to a separate Road Development Account, whose unexpended balances should not lause at the end of the financial year.

The original resolution dealing with the disposal of the Road Development Account has since been amended twice, the resolution at present in force having been passed by the Legislative Assembly in February 1937. Its main features may be described as follows: The special tax on petrol introduced in 1929 shall continue to be levied for road development. the proceeds of which, after retaining a reserve of 15% for administration, research and special grants-in-aid, shall be allocated for expenditure in the different provinces, Indian States, etc., in the ratio of the petrol consumption in the various areas. These sums may be spent on the construction, re-construction or substantial improvement of roads and bridges including the cost of preparation of road schemes-but not for ordinary road upkeep or maintenance-on interest and amortization charges on road loans sanctioned bitherto by the Government of India and also on administration of Provincial Boards of Communications and establishment connected with the control of motor transport. A new clause inserted in the present resolution lavs down that "if in the opinion of the Governor-General in Council the Government of any Governor's province has at any time :-

- (a) failed to take such steps as the Governor-General in Council may recommend for the regulation and control of motor vehicles within the province; or
- (b) delayed without reasonable cause the application of any portion of the Road Fund allocated or re-allocated as the case may be for expenditure within the province.

On the administrative side, roads are a Pro-

the Governor-General in Council may resume the | Local bodies. The extent to which the administration of roads has been delegated to Local Bodies varies considerably from Province to Province but in British India as a whole about 80% of the extra-Municipal mileage is under the charge of District Boards or District Councils including a certain mileage, mainly in Madras and the Central Provinces, which is termed "Provincial" but maintained under their agency: and within Municipal areas all roads, other than sections of main roads passing through the towns, are controlled by the respective Municipalities.

Up to the introduction of the Road Fund in 1929 all Provincial roads were financed exclusively from the General Revenues of the Provinces and Local roads from Local Revenue supplemented by Provincial Grants. Since 1929 however the Road Fund is being distributed to Provinces and is available for construction. reconstruction or improvement of roads, but not for ordinary road upkeep. The object of creating the Road Fund was to supplement and not to replace the normal expenditure on "original" road works from Provincial and Local revenue but unfortunately the years following the introduction of the Fund have been marked by acute financial stringency with the result that Provincial Governments and Local Bodies have had to make drastic curtailments in the allotments made for roads from their revenue.

The effect of these curtailments has been to 171.24 starve the construction and development of feeder roads, as the Road Fund was being used exclusively for roads of inter-provincial and inter-861.26 district importance. The Government of India. however, have now laid down that at least 25% of the Provincial shares in the Road Fund should be used on feeder roads and that not more than 25 per cent can be used on roads which compete with the Railways,

Questions affecting roads and road transport were up till recently being dealt with by the Government of India through the Department of Industries & Labour, while Railways came under the Commerce Department, each under a separate Member of the Viceroy's Executive Council, With a view to co-ordinating the different means of communications, however, a portfolio for Communication has been formed with effect from vincial subject and may be divided into two November 1937, the Lember in charge of whice main classes, Provincial Roads under the Public is responsible for Roads and Railways as well a Works Department and Local Roads in charge of Inland Navigation, Aviation, Telegraphs, &c.

The following table shows the sums charged to the revenue of Provincial Governments and Local Boards in 1934-35 as compared to the years 1013-14 and 1928-29 :--

The Government of India.

was not conquest but trade. The Government of India represents the slow evolution from conditions established to meet trading requirements. On September 24, 1599, a few years before the deaths of Queen Elizabeth and Akbar, the merchants of London formed an association for the purpose of establishing direct trade with the East and were granted a charter of incorporation. The Government of this Company in England was vested in a Governor with a General Court of Proprietors and a Court of Direc-The factories and affairs of the Company on the East and West Coasts of India, and in Bengal, were administered at each of the principal settlements of Madras (Fort St. George), Bombay and Calcutta (Fort William), by a President or Governor and a Council consisting of the senior servants of the Company. The three "Presidencies" were independent of each other and subordinate only to the Directors in England.

Territorial Responsibility Assumed.

The collapse of government in India consequent on the decay of Moghul power and the intrigues of the French on the East Coast forced the officers of the Company to assume terri-torial responsibility in spite of their own desires and the insistent orders of the Directors. Step by step the Company became first the dominant, then the paramount power in India. In these changed circumstances the system of government by mutually independent and un-wieldy councils of the merchants at the Presi-dency towns gave rise to grave abuses. Parliament intervened, and under the Regulating Act of 1773, a Governor-General and four councillors were appointed to administer the Presidency of Fort William (Bengal), and the supremacy of that Presidency over Madras and Bombay was for the first time established. The subordinate Presidencies were forbidden to wage war or make treaties without the previous consent of the Governor-General of Bengal in Council, except in cases of imminent necessity. Pitt's Act of 1784, which established the Board of Control in England, vested the administration of each of the three Presidencles in a Governor and three councillors, including the Commander-in-Chief of the Presi-dency Army. The control of the Governor-General-in-Council was somewhat extended,

The impulse which drove the British to India; Crown, The same Act vested the direction of the entire civil and military administration and sole power of legislation in the Governor-General-in-Council, and defined more clearly the nature and extent of the control to be extended over the subordinate governments. After the Mutiny, there was passed, in 1858, an Act transferring the Government of India from the Company to the Crown. This Act made no important change in the administration in India, but the Governor-General, as representing the Crown, became known as the Vicerov. The Governor-General was the sole representative of the Crown in India; he was assisted by a Council, composed of high officials, each of whom was responsible for a special department of the administration.

Functions of Government.

The functions of the Government in India are perhaps the most extensive of any great administration in the world. It claims a share in the produce of the land and in some provinces it has restricted the alienation of land from agriculturists to non-agriculturists. It undertakes the management of landed estates where the proprietor is disqualified. In times of famine it undertakes relief work and other remedial measures on a great scale. It manages a vast forest property and is the principal manufacturer of salt and opium. It owns the bulk of the railways of the country, and directly manages a considerable portion of them; it has constructed and maintains most of the important irrigation works; it most of the important argument works; it owns and manages the post and telegraph systems; it had until 1st April 1926 the monopoly of the Note issue, and it alone can set the mints in motion. It lends money can set the minus in month, at and agri-to municipalities, rural boards, and agri-altariets and occasionally to owners of culturists and occasionally to owners of historic estates. It controls the sale of liquor and intoxicating drugs and has direct indoor and intoxicating origis and has direct responsibilities in respect to police, education, medical and sanitary operations and ordinary public works of the most intimate character. The Government has also close relations with the Indian States which collectively cover more than one-third of the whole area of India and comprise more than one-fifth of its population. The distribution of these great functions between the Government of India and the provincial administrations has fluctuated. It was definitely regulated by the Reform Act of General-in-Council was somewhat extended, provincia, assumustratuus assumustratuus assumustratuus assumustratuus assumustratuus assumustratuus assumustratuus assumustratuus Council Under the Charter Act of 1833 the Company 1019, and the democratic principle the own was compelled to close its commercial business limphartet is greatly developed in the consisting and the beams as political and administrative tions for the Provinces and the centre enacted body bedsing its territories in trust for the by the Imperial Parliament in 1935.

THE REFORMS OF 1919 AND 1935.

Great changes were made in the system of years.) Still vaster changes in the direction government in British India by the Governof Indian Solf-Government and lof Dominion ment of India Act, 1919, which, together with Status were brought about by the Government the rules framed under the -almost as important to India Act, 1935, which received the Royal and Season of India Act, 1935, which received the Royal Lawrence of India Act, 1935, which received the Royal Assent of 1932 and Assent of 1934. The new Act having received the Royal Assent of 1934 Antionomy, with a Government responsible to The Indian Year Book, 1936-37 and preceding lat the centre a Responsible Government

India, based on a federation of British Indian State can be compelled to enter and each State India, gused of a redstance of Databet Provinces and Indian States. Detailed provi-provinces and Indian States. Detailed provi-sions for the whole scheme are made in the Act Instrument of Accession negotiated in relation of 1935, which includes 478 sections and 16 to that State's particular circumstances. of 1935, when induced the largest and most complex settlement of these Instruments requires time. legislative enactment of the kind ever negotiated This was foreseen and hence the Act of 1935

force on 1st April 1937. Over the inauguration of Federation there is inevitable delay. The Indian States have, except for a small minority, indicated their readiness to enter a Federation of the new Constitutional as on the lines proposed by the Act. But, because of their Treaties with the British Crown poi texists prior to Federation.

legislative thresholds on the Act of 1800 on to a startle block on a provision for the regulation of the form and provisions relating to the Provincial Governments were brought into Government of India pending the inauguration of Federation.

In what here follows will be found an account of the new Constitutional arrangements for the Provinces and for the Government of India as

THE PROVINCES.

The following are under the Act of 1935 the The following are under the Act of 1935 the Governors' Provinces of British India (there being besides these Provinces certain Chief Commissioners' Provinces and also certain "Excluded areas" where the population is not yet ripe for the introduction of an advanced Constitution).—Madras, Bombay, Bengal, the United Provinces, the Puniab, Bihar. United Frovinces, the Funjao, Binar, the Central Provinces and Berar, Assam, the North West Frontier Province, Orissa, Sind. The Act recognises Berar as being under the sovereignty of H. E. H. the Nizam of Hyderabad whose Helr Presumptive is elsewhere created Prince of Berar and the Act specially provides for its administration as part of the major Province to which its name is given. The Act creates Orissa and Sind separate Governors' Provinces and provides for the separation of Burma from India and for its constitution as a separate country under the Crown, The Act gives powers for the creation of other Governors' Provinces.

The Provincial Constitution provides for the exercise of the executive authority on behalf of His Majesty by the Governor. It also provides for a "a Council of Ministers to aid and advise the Governor in the exercise of his functions except in so far as he is by or under this them in his discretion." The Governor chooses his Ministers, who hold office during his pleasure and he is directed by his Instrument of Instructions to select such as are likely to have the support of the Legislature and is enjoined to accept their advice except in special cases for which other provision is made in the Act.

The following special responsibilities are laid upon the Governor :--

- (a) the prevention of any grave menace to the peace or tranquillity of the Province or any part thereof; (b) the safeguarding of the legitimate interests
- of minorities :
- (c) the securing to, and to the dependents of, under this Act and the safeguarding of their legitimate interests:

- this Act are designed to secure in relation to legislation (these provisions are concerned with the prevention of legislative discrimination against British subjects in regard to taxation, trade, professional business and qualifications);
- (e) the securing of the peace and good government of areas which by or under the provisions of this Act are declared to be partially excluded areas ;
- (f) the protection of the rights of any Indian State and the rights and dignity of the Ruler thereof; and
- (g) the securing of the execution of orders or directions lawfully issued to him under Part VI of this Act by the Governor-General in his discretion (i.e., concerning agency functions in behalf of the Central Authority, interprovincial co-operation in matters and so forth).

"If and in so far as any special responsibility of the Governor is involved he shall in the exercise of his functions exercise his individual judgment as to the action to be taken." the Governor is required by the Act to act in his discretion or to exercise his individual judg-ment he is placed under the control of the Governor-General in the latter's discretion.

The Provincial Legislatures.-The Act provides that there shall for every Province be a Provincial Legislature consisting of His Majesty represented by the Governor and (a) in the Provinces of Madras, Bombay, Bengal, the Provinces of magnas, somenay, beingal, one United Provinces, Bihar and Assam two Chambers and (b) in the other Provinces one Chamber the two Chambers being called the Legislative Council and the Legislative Assembly and where there is only one Chamber the Legislative Assembly. where there is only one chalmer the Legislature Assembly. Every Legislative Council is to be a permanent body not subject to dissolution but as near as may be one-third of its members persons who are or have been members! are to retire in everything var. Every Legisla-of the public services of any rights of the public services of the public services of them by or dissolved is to continue for five years.

The Houses of Legislature are electoral bodies: their legitimate interests;
(d) the securing in the sphere of executive and other particular interests, and communal action of the purposes for which the on a considerably wider franchise than was provisions of chapter III of Part V of I provided by the Act of 1919. the Governor finds himself unable to assent to be carried on in accordance with the provisions Rills passed by the Legislature,

The Governor of a Province is given power to promulgate ordinances if, when his Legislature is not in session, he is satisfied that circumstances necessitate immediate action and under certain other conditions, and in certain circumstances and under prescribed conditions to enact Acts in his discretion.

Governor is satisfied that a situation has arisen discretion.

Special provisions are made for cases in which | in which the government of the Province cannot of the Act

Chief Commissioners' Provinces .- The following are by the Act constituted as Chief Commissioners' Provinces—British Baluchistan. Delhi, Ajmer-Merwara, Coorg, the Andaman and Nicohar Islands, Panth Piploda. is made for the possible creation of others. Chief Commissioner's Province is to be adminiin his discretion.

Provision is further made to enable the such extent as he thinks fit, through a Chief Government to be carried on if at any time the Commissioner to be appointed by him in his

DIVISION OF POWERS.

The Act provides for the institution of a persons detained therein; arrangements with, Federal Court constitute of a Chief Justice of other units for the use of prisons and other India and such other judges as His Majesty institutions.

may deem necessary, the seak of the Court being 5. Public debt of the Pravince. Delhi and its original jurisdiction extending to disputes between the Federation, any of the Provinces or any of the Federated States, its appellate jurisdiction to include certain classes. of appeals from the High Courts of British of appeals from the High Courts of British India and of the Indian States and appeals lying from it to His Majesty in Council. The Federal Court held its first sitting on 6th December 1937: Chief Justice Sir Maurice Gwyer, two other Judges Sir Shah Mahomed Sulaiman and Mr. M. R. Jayakar.

The Act also prescribes that the Executive authority of the Federation in respect of railway construction, maintenance and operation shall be exercised by a Federal Railway Authority, for the establishment and activities of which it provides.

Provisions are made in the Act in relation to the recruitment and control of the Public Services and for the appointment of a Public Service Commission for the Federation and of one for each Province. The duties and powers of these Commissions in regard to the Services are laid down in the Act, which also provides that two or more Provinces may agree to have one Commission between them.

Provincial Legislation.—The Act provides for a new division of functions between the Central and Provincial authorities and the following is the new Provincial Legislative List, which came into operation on 1st April 1937 :-

 Public order (but not including the use of His Majesty's naval, military or air forces in aid of the civil power); the administration of authorities for the purpose of la justice; constitution and organisation of all ment or village administration courts, except the Federal Court, and fees taken therein; preventive detention for reasons con-nected with the maintenance of public order; persons subjected to such detention.

Jurisdiction and powers of all courts except the Federal Court, with respect to any of the matters in this list; procedure in Rent and Revenue Courts.

3. Police, including railway and village police.

- 5. Public debt of the Province.
- 6. Provincial Public Services and Provincial Public Service Commissions.
- Provincial pensions, that is to say, pensions payable by the Province or out of Provincial revenues.
- 8. Works, lands and buildings vested in or in the possession of His Majesty for the purposes of the Province.
- 9. Compulsory acquisition of land. 10. Libraries, museums and other similar institutions controlled or financed by the Province.
- 11. Elections to the Provincial Legislature subject to the provisions of this Act and of any Order in Council made thereunder.
- 12. The salaries of the Provincial Ministers, of the Speaker and Deputy Speaker of the Legislative Assembly, and, if there is a Legislative Council, of the President and Deputy President thereof, the salaries, allowances and privileges of the members of the Provincial Legislature; and, to such extent as is expressly authorised by Part III of this Act, the punishment of persons who refuse to give evidence or produce documents before Committees of the Provincial Legislature.
- 13. Local government, that is to say, the constitution and powers of municipal corporations, improvement trusts, district boards, mining settlement authorities and other local authorities for the purpose of local self-govern-
- Public health and sanitation; hospitals and dispensaries; registration of births and deaths. 15. Pilgrimages, other than pilgrimages to
- places beyond India. 16. Burials and burial grounds.
 - 17. Education.
 - 18. Communications, that is to say, roads,

police.

4. Prisons reformatories, Borstalinstitutions tions not specified in List I; minor railways and other institutions of a like nature, and subject to the provisions of List I with respect

to such railways; municipal tramways; rope | 35. Theatres, dramatic performances and ways; inland waterways and traffic thereon clinemas, but not including the sanction of subject to the provisions of List III with regard clinematograph films for exhibition. to such waterways; ports, subject to the provisions in List I with regard to major ports: vehicles other than mechanically propelled vehicles.

to Water, that is say, supplies, irrigation and canals, drainage and embankments, water storage and water power, 20. Agriculture, including agricultural educa-

tion and research, protection against pests and land records, survey for revenue purposes and prevention of plant diseases; improvement records of rights, and alienation of revenue of stock and prevention of animal diseases; veterinary training and practice, pounds and the prevention of cattle trespass.

taken in any Court.

THE CENTRAL GOVERNMENT.

The structural changes made by the Act of a legislature with all the inherent powers 1919 in the system of government outside ordinarily attributed to such a body save such the "Governors' provinces" were of compara-ies are specifically withheld by the terms of tively minor scope, though the sprit of the the Act. It consists of two Chambers. The Act required considerable modifications of the "Council of State" was constituted a body of of State in Council on the other. The Act of when the Indian States accede to Federation established by the Act of 1919 prevails, subject of the statutory bar to the appointment of more of either Chamber, but each of them has to be of the statutory part to the appointment of more of either Chamber, but each of them has to be than six members of the Governor-General's appointed a member of one or other Chamber, that the said can vote only in the Chamber of which he is a far-reaching consequence that there was the said can vote only in the Chamber of which he is far-reaching consequence that prove the said can vote only in the Chamber of the Chamber of the Council are now Indiana) Councilmay, however, space, in either Chamber and the reconstitution in a much more enlarged The President of the Upper Chamber is a consequence of the Council and Council for a Governor-General. So also, extend legislature. This became, like the for the first four years after the constitution of Legislative Council in a Governor's province, the Chamber, was the President of the Legis

relationship hitherto subsisting between the 00 members, including 34 elected (including Provincial Governments on the one hand and one member to represent Berar, who, though the Government of India and the Secretary lecthically nominated, was to be nominated. as the result of elections held in Berar) and 26 1935 provides for extensive further changes at nominated, of whom not more than 20 might the centre, but these will only come into force be officials. The "Indian Legislative Assembly" was constituted with 144 members, of whom and meanwhile, at the Centre, the constitution | 105 to be elected (including in the case of the Council of State one Berar member who, though to certain modifications required to bring it actually elected, had technically to be a nominee), into harmony with the new conditions in the Of the 40 nominated members, not fewer than Provinces. The only concrete changes made one third were required to be non-officials. In the constitution of the Central Government The members of the Governor-General's Expers by the 1919 Constitution were the removal livic Council were not made ex-officio members.

elected its own Deputy-President from the outset. The normal lifetime of each Council of State is five years, and of each Legislative Assembly three years ; but either Chamber, or both simultaneously, may be dissolved at any time by the Governor-General.

part indirect franchise established under the Act of 1909 for the unicameral central legislature which no longer exists. Generally speaking, the electoral scheme for the Lower Chamber is on the same model as that which the Act of 1919 prescribed for the Provincial Councils already described except that, firstly, the property qualification for voters (and consequently for candidates) is higher in order to obtain manageable constituencies, and past service with the colours is not per se a qualification for the franchise, and secondly, that the constituencies necessarily cover a considerably larger thences mesessiny cover a considerably larger area than constituencies for the Provincial Council. The distribution of seats in both Chambers, and the arrangement of constituencles, are on a provincial basis; that is a fixed number of the elective seats in each Chamber is assigned to representatives of each province and these representatives are elected by constituencies covering an assigned area of the province.

The following table shows the original allotment of the elective seats plus one since added for the North-West Frontier Province :-

	Legislative	Counc
	Assembly.	Stat
Madras	16	5
Bombay	16	6

Burma members. Since the area which returned perhaps 80 members to a Provincial Council is the same

as the area which returns perhaps 12 members to the Legislative Assembly—namely, the entire province in each case—it follows that on the direct election system this area must be split into constituencies which are much larger than the constituencies for the local Councils, and just as it is generally correct to say that the normal area unit for those rural constituencies for the latter which are arranged on a territorial basis was made in the district, it of India. Act, 1935, affecting the Government may be said that the normal area unt. in the of India, were described in an earlier part of this case of the Legislative Assembly is the Division chapter.

active Assembly. But after that period the (the technical term for the administrative group Lower Chamber elected its own President and it of districts controlled by a Divisional Commissloner).

The Franchise .- The general result of the first franchise arrangements under the Act was thus that there was in each province a body of electors qualified to vote for, and stand for elec-tion to, the Provincial Council, and that a selected number of these voters were qualified to vote Election.—The method of election for ed number of these voters were qualified to vote both Chambers is direct, and although the Indian Legislative Assembly which were asminer of electors is considerably smaller than signed to the province. The qualifications for for the Provincial Councils, it is a great candidature for the Indian Legislative davance on the very restricted and for the most Assembly were made the same in each province, for and stand for election to those seats in the Assembly were made the same in each province, mutatis mutandis, as for candidature for the Provincial Council, except that in all provinces, so long as the candidate can show that he resides somewhere within the province, no closer connection with his particular constituency was insisted upon.

The franchise for the Council of State differs in character from that for the Provincial Council and the Indian Legislative Assembly. The con-cern of the framers of the Act and rules was to secure for the membership of this body a character as closely as possible approximating to a "Senate of Elder Statesmen" and thus to constitute a body capable of performing the function of a true revising Chamber. With this object, in addition and as an alternative to a high property qualification—adopted as a rough and ready method of enfranchising only persons with a stake in the country—the rules admit as qualifications certain personal attributes which are likely to connote the possession of some past administrative experience or a high past administrative experience or a high standard of intellectual attainment. Examples of these qualifications are past membership of either Chamber of the Legislature as now constituted, or of its predecessor, or of the Pro-vincial Legislature, the holding of high office in local bodies (district boards, municipalities and corporations), membership of the governing bodies of Universities, and the holding of titles conferred in recognition of Indian classical learning and literature.

Powers.—The powers and duties of the Indian Legislature under the 1919 Act differed but little in character within the "central" sphere from those of the provincial Councils under the same act within their provincial sphere, and it acquired the same right of voting supplies for the Central Government, But as no direct attempt was made to introduce responsible government at the centre, the step in that direction having been avowedly confined The Government of India Act 1935 by to the provinces, and as consequently the separating Burma from India eliminated the Executive Government of India remained legally responsible as a whole for the proper fulfil-ment of its charge to the Secretary of State and Parliament, it followed that the powers conferred on provincial Governors to disregard an adverse vote of the Legislative Council on legislation or supplies were, as conferred on the Governor-General in his relationship with the Indian Legislature, less restricted in their operation than in the provinces; that is to say, they covered the whole field and were not confined in their application to categories of subjects.

The new provisions, made in the Government

THE INDIA OFFICE.

the administration of Indian affairs. Slight alterations were effected in the number and tenure of office of the members of the Secretary of State's Council, and some relaxations were made in the statutory rigidity which formerly bound their procedure and that of the Office in general. But provi-sions were made which undoubtedly as time went on had a material effect on the activities of the Office. A High Commissioner for India was appointed for the purpose of taking over, as the direct agent of the Government of India, that portion of India Office functions which is of the nature of agency, as distinct from administrative supervision and control. The process of separation of staff and func-The process of separation or stair and runc-tions for the purpose of this transfer was necessarily somewhat slow, but a sub-stantial beginning was made by handling over to the direct control of the High Commissioner the large departments which are concerned with the ordering and supply of stores and stationery in England for Government through the Secretary of State to Parliament.

The Act of 1919 made no structural use in India, with the payment of pensions to changes in the role of the India Office in retired members of Indian services resident in the United Kingdom, and with the assistance or Indian students in England. Concurrently with this change, it became possible to defray from British revenues the salaries of the Secretary of State and of the Parliamentary Under-Secretary, and that portion of the cost of salarles of India Office staff and general maintenance which was attributable to the exercise of its administrative as distinct from purely agency functions.

The Act of 1935 provides for the appointment by the Secretary of State of not less than three nor more than six persons whose duty it shall be to advise him on any matter relating to India on which he may desire their advice, also prescribes that the salary of the Secretary of State and the expenses of his Department shall be paid out of monies provided by Parlia-ment. The Governor-General is given in his sphere of responsibility reserve powers corresponding with those already mentioned as being vested in the Governors of Provinces in theirs and in respect of them he is made responsible

PERSONNEL AND PROCEDURE.

The Governor-General and the "Executive" | may assemble at any place in India which embers of his Council are, under the Govern the Governor-General appoints. In practice ent of India Act 1919 as continued by the Act | it meets only in Delhi and Simla except for members of his Council are, under the Government of India Act 1919 as continued by the Act of 1935, pending the establishment of Federation, appointed by the Crown. No limit of time is specified for their tenure of office, but custom has fixed it at five years. There are seven Executive Members of Council. These members under the Government of India Act 1919 hold respectively the portfolios of Defence; Education, Health and Land; Home; Finance; Commerce and Labour; Industries and Labour; Law; and Labour; Industries and Labour; Jaw; Communications. The Commerce Department deals generally with commerce, industries, industrial property, insurance and actuarial work and with blue water shipping. The department of Communications deals with posts and telegraphs, broadcasting, civil aviation, meteorology, ports, inland navigation and roads. Railways form a separate depart-ment, but are under the same member of the Council as the Communications Department. The Secretary for Communications attends the meetings of the Railway Board as an ex-officio member. The department of Labour deals with labour subjects. In addition it assumes responsibility for labour in docks and for the administration of certain statutes affecting labour on the railways. It deals also with public works and irrigation, mines, technical education so far as that concerns industry, printing and stationery and various items of safety legislation and administration. Reclesiastical affairs are placed under the Defence Department.

The Viceroy acts as his own member in

a meeting or two in Calcutta after Christmas, when the Viceroy is usually in residence in the Bengal Capital.

In regard to his own Department each Member of Council is largely in the position of a Minister of State, and has the final voice in ordinary departmental matters. But any question of special importance, and any matter in which it is proposed to over-rule the views of a Local Government, must ordinarily be referred to the Viceroy. Any matter originating in one department which also affects another must be referred which also affects enother must be referred to the latter, and in the event of the Departments not being able to agree, the case is referred to the Viceroy. The Members of Council meet more or less frequently as a Cabinet to discuss questions which the Viceroy desires to put before them, or which a member who has been over-ruled by the Viceroy has asked to be referred to Council. If there to a difference of opinion in the Council the decision of the majority ordinarily prevails, but the Viceroy can over-rule a majority if he considers that the matter is of such grave importance as to justify such a step. Each departportaine as to justify such a seep. Lach uppart-mental office is in the subordinate charge of a Secretary, whose position corresponds very much to that of a permanent Under-Secretary of State in the United Kingdom; but with these difference—that the Soordary is present though does not speak, at Council meetings at which cases under his cognisance are discussed: that he attends on the Viceroy, The Viceroy acts as his own member in mechanics at which the charge of External Afairs. The Commander are discussed; that he attends on the Viceroy, in Chief in practice always is an "Ordinary" usually once a week, and discusses with him member of the Council. He holds charge all matters of importance arising in his particular and the control of the council and the control of the council and the council of the council of the council is which the council of the Council meets within their Presidencies. The Council concurrence should be obtained to action

proposed by the Department includer of of the Frontier Governments, and officers Council; and that his tenure of office is nominally serving under the Government of India are Council; and that he seems the Secretaries have limited to three years. The Secretaries have under them Deputy, Under and Assistant under them Deputy, Under and Assistant Secretaries, together with the ordinary cierical establishments. The Secretaries and Under-Secretaries are often, though by no means exclusively, members of the Indian Civil Service. The Government of India has no civil Service of its own as distinct from that

proposed by the Departmental Member of of the Provincial Governments, and officers borrowed from the Provinces, or, in the case of Specialists, recruited direct by contract. It is proposed shortly to institute a special cadre of I.C.S. and other Officers for service in the Finance and Commerce Departments, now that the senior posts in these Departments require specialist knowledge and training.

COVERNMENT OF INDIA.

VICEROY AND GOVERNOR-GENERAL OF INDIA.

The Bombay Presidency.

Consequent on the separation of Sind from regions, and in the south the Dharwar cotton

an area of o, to a square mines and a population of 2,443,007. There are no States in politi. for tributation has made the people more self-cal relations with the Government of Bom-

of soil, climate and people. In the Presidency there are the rich plains of Gujarat, watered by the Nerbudda and the Tapti, whose fertility by the Nerbudda and the Tapti, whose certifity as omarked that it has long been known as the Garden of India. South of Bombay City the Garden of India. South of Bombay City the Western Ghats, a range of hills around by the Detricts, south of these come the Karnatic Districts, south of these come the Karnatic Bonda, Other son side of the Ghats is the Control of the creeks which make communication difficult.

The People.

The population varies as markedly as soil and climate. Gujarat has remained true to Hinduism although long under the dominion of powerful Mahomedan kings. Here there is an amplitude of caste divisions, and the people, who although of cases divisions, and the people, who astrongs softened by prosperity, are amongst the keenest trading races in the world. The Deccan peasant has been seasoned by adversity; the saying goes has been seasoned by adversary, the saying goes that the Decean expects a famine one year in every three, and gets it; the population is much more homogeneous than in Gujarat, and thirty per cent. are Mahrattas. The Karnatic is the land of the Lingayets, a Hindu reforming sect of the twelfth century, and in the Konkan there is a large proportion of Christians. Four main languages are spoken, Sindi, Gujarati, Marathi and Kanarese, with Urdu a rough lingua franca where English has not penetrated. The main castes and tribes number five hundred.

Industries

The principal industry is agriculture; which the principal municity is assuming, running supports sixty-four per cent of the population. In Gujarat the soils are of two classes, the black cotton soil, which yields the famous Broach cottons, the finest in India, and alluvial, which under careful cultivation in Ahmedabad and Kaira makes splendid garden land. The dominant soil characteristic of the Deccan is dominant for characteristics of the Local in the black soil, which produces cotton, wheat, gram and millet, and in certain tracts rich crops of sigarcane. The Konkan is a rice land, grown under the abundant rains of the submontane

Consequent on the separation of Sind from the Bombay Presidency as from April 1, 1965, view with Broach as the best in India. There and otherwise. The following details relate to Bombay minus Sind:

The Bombay Presidency now stretches along the west coast of India, from Grijerat in the South, It has an area the region of unfailing rainfall fluid works are the second rainfall of the region of unfailing rainfall fluid works. Of 2001 sommer miles and a normalization of Eradaulto being commercial and a few distributions of the second rainfall and the second rainfall a the west coast or must, aroun superactions are the region of unfailing rainfall in the Ghats, in North to Kanara in the South. It has an area the region of unfailing rainfall in the Ghats, in 1,221 square miles and a population of gradually being completed, and this will ship of the control bay, as they are all now under the Govern-synchronising with a certain development of industry, has induced a considerable rise in the standard of living. The land is held on what The Presidency embraces a wide diversity is known as the ryotwari tenure, that is to say, each cultivator holds his land direct from Government under a moderate assessment, and as long as he pays this assessment he cannot be dis-

Manufactures.

Whilst agriculture is the principal industry, Whits agriculture is the principal industry, others have no inconsiderable place running and the property of the Presidency is amount of the presidency is amount of the presidency is a property of the presidency in the presidency is a property of the presidency of the presidency in the presidency of exquisite kincobs of Ahmedabad Bombay silverware has a place of its own, as well as the brass work of Poona and Nasik. But the tendency is to submerge the indigenous But the tendency is to summerge the indigenous handicrafts beneath industry organised on modern lines. Bombay is the great centre in India of the textile trade. This is chiefly found in the headquarter city, Bombay.

Number of Looms in Bombay Island. Number of Spindles in Bombay Island. 28,89,509

Number of hands employed in the Textile Industry in Bombay Island (daily average) Consumption of Cotton by the Mills in

Bombay Island (in candies of 784 lbs.)

Number of Spindles in Ahmedabad. 19,76,370 Number of Looms in Ahmedabad ... Number of Spindles in Sholapore Dist. 2,86,004 Number of Looms in Sholapore Dist.

Number of Spindles in the Bombay Presidency (excluding Bombay Island and Ahmedabad) 12,34,332

Number of Looms in the Bombay Presidency (excluding Bombay Island and Ahmedabad)

Administration.

With the introduction of Provincial Autonomy on April 1, 1937, the administration of the province has been largely altered at the top. There is now a Governor and a council of four Ministers to aid and advise him in all matters except in so far as he is required by the Government of so far as he is required by the Government of India Act, to exercise his function in his discretion. The executive power of the province extends to all matters in which it may legislate. The Ministers are appointed and dismissed by the Governor in his discretion, he fixes their salaries until determined by the legislature. The Governor, as in other Provinces, has certain special responsibilities and these extend to (a) the prevention of menace to the peace or tranquility of his province or any part thereof;
(b) the safeguarding of the legitimate interests of minorities; (c) the safeguarding of the rights of civil servants past and present and their dependants; (a) the securing in the executive sphere of protection against discrimination; (e) s meas on protection signifies classification, (e) the securing of the peace and good government of areas declared to be partially excluded areas; (f) the safeguarding of the rights of states and the rights and dignity of any ruler; and (f) the securing of the execution of orders given to him under Part VI of the Act (dealing with adminis-trative relations) by the Governor General in his

The Governor is assisted by a special secretariat staff presided over by a Secretary whose emolu-

ments are fixed in his discretion.

In the legislative sphere the Governor is assisted with two chambers, known as the Bombay Legislative Assembly and the Bombay Legislative Council. The Council is a permanent body. One-third of the members retire each three years and the Assembly, unless sconer dissolved, lasts for five years. The strength of dissolved, lasts for five years. The strength of the Assembly is 175 members of whom 30 are Muslims, 3 Indian Christians, 2 Angio-Indians, 3 Europeans, 2 landholders, 7 Commerce and Industry, 7 Labour, 1 University and the remaining 120 are Hindus including 15 Scheduled castes and 7 Marathas. There are also six

The Legislative Council will contain not less than 29 and not more than 30 members of whom not less than three and not more than four shall be nominated by the Governor. Twenty will be elected by the General Constituencies, 5 by Muslims and 1 by Europeans. The senior of the Civilian Secretaries is entitled the Chief Secretary. The Government is in Bombay from November to the end of May; and in Poons from June to November; but the Secretariatis always in Bombay. Under the Local Government the Presidency is administered by three Commissioners, namely, the Commissioner for the Northern Divi-sion; with headquarters at Ahmedabad, the Sion; with neadquarters are Animouspach, succeptual Division at Poons, and the Southern Division at Beigaum. Each district is under a Collector, usually a Covenanted Civilian, who has under him one or more Civilian. as Assistant Collectors, and one or more Deputy Collectors. A collectorate contains on an average from eight to ten talukas, each consisting of from one to two hundred villages

head of the village both for revenue and police purpose; the talati or kulkarni, clerk and purpose; the cause or ameann, clerk and accountant; the messenger and the watchman, Over each Taluka or group of villages is the mamlatdar, who is also a subordinate magistrate. The charge of the Assistant or Deputy Collector contains three or four talukas. The Collector and Magistrate is over the whole District. The Commissioners exercise general control over the Districts in their Divisions

Justice.

The administration of justice is entrusted to the High Court sitting in Bombay, and comprising a Chief Justice, who is a barrister, and nine pulsne judges, either Civilians, Barristers, or Indian lawyers. Of the lower civil courts the court of the first instance is that of the Subordinate Judge recruited from the ranks of the local lawyers. The administration of justice is entrusted The Court of first appeal is that of the District or Assistant Judge, or of a first class subordinate judge with special powers. District and Assistant Judges are Indian Civilians, or members of the Provincial Service or the Bar. In cases exceeding Rs. 5,000 in value an appeal from the decision of the Subordinate or Assistant Judge and from the decision of the District Judge in all original suits lies to the High Court. Dis-trict and Assistant Judges exercise criminal jurisdiction throughout the Presidency but original criminal work is chiefly disposed of by the Executive District Officers and Resident and City Magistrates. Capital sentences are subject to confirmation by the High Court, In some of the principal cities Special Magistrates exercise summary jurisdiction augustrates exercise summary jurisdiction (Bombay has six Presidency Magistrates, as well as Honorary Magistrates excreising the functions of English Justices of the Peace) and a Court of Small Causes, corresponding to the English County Courts.

Local Government. Local control over certain branches of the administration is secured by the constitution of local boards and municipalities, the former exercising authority over a District or a Taluka. and the latter over a city or town. These bodies are composed of members either nominated by Government or elected by the people, who are empowered to expend the funds at their disposal on education, sanitation, the construction of roads and tanks, and general improvements. Their funds are derived from cesses on the land revenue, the toll, ferry funds and local taxes. The tendency of recent years has been to increase the elective and reduce the nom nated element, to allow these bodies to elect their own chairmen, whilst larger grants have been made from the general revenues for water supply and drainage.

The Bombay Municipal Boroughs Act of 1925 works further advance in the matter of local Self-Government in the Presidency. The Act provides more adequate basis for Municipal Adminis-tration in the larger cities of the Bombay Presidency. The larger municipalities are now styled as Municipal Boroughs which are now 30 average from eight to ten tallings each in number. The executives of these normal consisting of from one to two funder dilings Municipalities are invested with large powers whose whole revenues belong to the State, than litherto exercised. Another important The village officers are the patel, who is the change introduced by the dct was the excension of municipal franchise to occupiers of dwellings Sub-Inspectors are the officers in charge of or buildings with anoual rental values of Rs. 12 Police Stations and are primarily responsible

control of a Chief Engineer who acts as Secretary to the Government. Under him are Superintending Engineers in charge of Circles and Executive Engineers in charge of divisions, and the Electrical Engineer.

There is a chain of protective irrigation works. There is a chain of protective irrigation works, originating in reservoirs in the Ghat regions. The principal works are the Nira Ganals fed by Lake Whiting impounded by the Lloyd Dam at Bhatgar, the Pravara Ganals fed by Lake Arthur Hill, impounded by Wilson Dam at Bhandardara, the Mutha Ganals fed by Lake Arthur Hill, impounded by Wilson Dam at Bhandardara, the Mutha Ganals fed by Lake Arthur Hill, indexing, the Godavar Ganals fed by Alex Kandarwana, the Godavar Ganals fed by Godavar and the Golak Ganal. The Mutha Ganals fed by Alex Canal was completed in Stocker. wal and the Gokak Canal were completed in 1896-97, the Nira Left Bank Canal in 1905-06, the Godavari Canals in 1915-16 and the Pravara Canals in 1926-27. The Nira Right Bank Canal which has been under construction since 1912 is practically completed. The Wilson Dam at Bhandardara, the second highest vet constructed by Engineers the world over, was opened by His Excellency the Governor on 10th December 1926. The Lloyd Dam at Bhatgar which is 5,333 feet in length, 190 feet in height and 124 feet in width was opened by H. E. Sir Leslie Wilson on 27th October 1928. It cost Rs. 172 lakhs. It is remarkable as being the largest Dam in volume hitherto constructed and contains 21; million cubic feet of masonry. The Assuan Dam in Egypt is popularly supposed to be the largest Dam in existence but that contains 19 million Schools and 327 Special schools. cubic feet. It cost also nearly 50 per cent. more than the Lloyd Dam. An idea of the magnitude that the Boyd Dam. An area of the magnitude of the Lloyd Dam can be gathered from the fact that if a wall 6 feet high and 15 inches thick were constructed from the masonry in the Dam it would stretch a distance of 520 miles, say from Bombay to Nagpur. These projects will irrigate certain tracts most liable to famine.

Police.

The Police Force is divided into 3 categories, viz., District Police, Railway Police and the Bombay City Police. The District and Railway 1827. District Folice, Evaluary Folice and safe applied bombay Gity Police. The District and Railway Police in the Presidency proper are for the purpose of control under the Languetor-General of Police who is assisted by three Deputy Inspectors-General, of whom two are in charge of Ranges and the third is in charge of the Criminal Investigation Department and the Finger Print Bureau. The executive management of the Police in each district and on Railways in the Presidency proper as well as in Sind is vested in a Superintendent of Police under the general direction of the Magistrate of the District concerned except in the case of the Railway Police. For the purposes of effective supervision over the investigation and prevention officians, some of the larger districts are divided at the district of the larger districts are divided at the state of th

or buildings with annual rental values or 18.12 (2002) Scanous and are primarily responsible or with capital value of not less than Rs. 200. under the law, for the Investigation of offences Public Works.

Public Works.

The Public Works Department is under the Superinductated of Police, beparts Superinductated of Police, beparts Superinductated or Police, beparts Superinductated or Police, beparts Superinductated or Police. tendents of Police, Inspectors and Sub-Inspectors undergo a course of training at the Central Police thacing a course of training as one center concernations. Training School at Nasik before belag posted to Districts for executive duty. The Bombay City Police is a separate force under the Commissioner of Police who is directly responsible to Government.

Education.

Education is imparted partly through direct Government agency, and partly through the medium of grants-in-aid. Government maintain Arts Colleges at Bombay, Andheri, Ahmedabad and Dharwar; the Grant Medical dabad and Dharwar; the Grant Medical College, the Poona College of Engineering, the Agriculture College, Veterinary College, School of Art, Law College and a College of Commerce. Most of the secondary schools are in private hands. The primary schools are maintained by Local Authorities, with a grant-in-aid. The Bombay Municipality is responsible for primary education in Bombay City (q, v, Education).

The total number of institutions including those in Sind at the end of the year 1935-36 was 17,314. Of these 16,097 were recognised and 1,217 unrecognised. Of the recognised 14,116 are for males and 1,981 for females. The recognisfor males and 4,001 for lemants. All recognized institutions consisted of 17 Arts and Science Colleges excluding the University School of Economics and Sociology, 13 Professional Colleges, 787 Secondary Schools, 14,952 Primary

There are 26,859 towns and villages in this Presidency. Of these, 10,757 possessed schools as compared with 10,658 in the preceding year, The area served by a town or village with school was 11.5 square miles as against 11.6 square miles in the preceding year.

There were 1,476, 404 pupils under instruction at the end of the year 1935-36 as compared with 1,422,146 in the preceding year. The number of pupils in recognised institutions was 1,430,465 and in unrecognised institutions was 45,939 as and in unrecognised institutions was account as compared with 1,881,447 and 40,699 respectively in the preceding year. The percentage of pupils in recognised institutions to the total population In recognised institutions to use total population of the Presidency increased from 6.34 to 6.57, Of the 1,430,465 pupils under instruction in recognised institutions, 1,909,057 were boys and 340,408 were girls. The increase in the case of boys was 31,327 and of girls was 17,091 as compared with the increase of 32,802 and 16,121 respectively in the preceding year.

The total expenditure on Public Instruction increased from Rs. 4,10,86,354 to Rs. 4,21,65,908 during the year 1935-36. Out of this amount 42.1 per cent was met from Provincial Revenues, 18.8 from Local Funds, 24.6 from fees and

1928. This Act altered the whole constitution institutions for the treatment of the University so as to make it adequately representative with a view to bringing into Presidency to enable it to provide greater facili-ties for higher education in all branches of ties for higher education in all branches of The problem of providing a more satisfactory learning including Technology and to undertake system of Medical relief for rural areas is under on a larger scale than heretofore post-graduate teaching and research, while continuing to exercise due control over the teaching given by colleges affiliated to it from time to time. The new University Department of Chemical Technology was formally inaugurated by His Excellency the Governor of Bombay on 15th November 1933. The authorities of the University, as now constituted, are chiefly the Chan-cellor, Vice-Chancellor, the Syndicate, the Academic Council and the Senate. The Senate consisting of fellows is the supreme governing body of the University. The number of fellows is 144 of whom 40 are nominated by the Chanis 144 of which 40 are nonmarked by the Chair cellor and 11 are ex-officio. The Academic Council consisting of educational experts deals with all purely academical questions. This body works in collaboration with the Syndicate which is the principal executive of the University.

Medical.

The Medical Department is in the charge of the Surgeon-General who is a member of the I. M. S., and Public Health in that of the Director of Public Health, who is usually a non I.M.S. Officer. Civil Surgeons stationed at each district headquarters are responsible for the medical work of the clastic: whilst annitation is ing emercialments a minisments. Little mode entrusted to one of the Assistant Directors of gambling; cesses on the entry of goods into a Public Beatish. Four large hospitals are maintain-local area; dues on passengers and goods carried by the Government in Bombay, and the ion inland waterway; tolk; stamp duties in accommodation in them has been recently respect of documents not included in the federal increased. The total number of beds available list.

PRINCIPAL HEADS OF REVENUE.

Higher education in the Presidency is con- in all the City Hospitals including private Trait. Fulled by the Bornaby Uleviently which was tutions is 2,280 roughly. Well-equipped has established in 1857. The constitution of the pitals exist in all important up-country stations. University, has recently undergone, however, Over 2,886,100 persons including 1,06,00° inconsiderable changes in virtue of a new enact-ment known as the Bombay University Act of Presidency contains 6 Lunatic Asylums and 16 of Lepers. Vaccination is carried out by a staff under the direction of the Director of Public Health. closer association with the public the industrial, Sanitary work has received an immense stimulus commercial and civic life of the people of the from the large grants made by the Government from time to time.

consideration.

Finance.

With the introduction of Provincial Autonomy the financial arrangements have been revised There is a clear cut division between the finances of the Federation and those of the Provinces.

The provincial sources of revenue in addition to grants from federal taxation now include taxes raised by the local Government on land, as land revenue; taxes on land and buildings, hearths and windows ; taxes on agricultural income and duties in respect of succession to agricultural land, duties of excise on goods manufactured or produced in the province and countervailing duti-es on goods produced or manufactured elsewhere in India, being alcoholic liquors for human

consumption; opium, Indian hemp, and other narcotic drugs and narcotics; non-narcotic drugs; medicinal and toilet preparations, containing alcohol or any of the above substances. other excises being federal; taxes on mineral rights subject to any federal restrictions imposed in respect of mineral development; capitation taxes; taxes on professions, trades, callings, and employments; taxes on animals, boats, the sale of goods, advertisements, on luxuries includ-

Sind.

basis from three older proviness, Sind was a and the infant in respect of development loans compact unit and was considered a provine a learned during the joint family period. Lands, within a province even before its separation. From the point of view of geography, ethnology province where they are situated. Arears of and language, Sind has greater affinity to the taxes will belong to the province where the taxed

started as a bargaining point in inter-communal to the province where the works are located. negotiations has now become an accomplished

The Muslim delegation at the first Round Table Conference put forward the demand in London in the winter of 1930. The question was referred to a committee which accepted the principle of separation, suggested an expert inquiry to ascertain the financial aspect of the separation, and threw the burden of proving the feasibility of separation on those who asked for it. An expert inquiry was held and it drew a gloomy picture of the financial future of Sind. Its findings can best be sum-marised by its remark, "There is thus marised by its remark, "There is thus obviously no question of Sind standing surety for the Barrage-the problem is whether the Barrage can stand surety for Sind."

Demand for Separation.

A conference of representatives of the people of Sind met in 1932 to devise measures to meet the financial objections to the separation. Wide divergence of opinion prevailed at this conference, whose chairman eventually submitted a report according to which the annual deficit of the new province for the first six years of its life would be Rs. 80 lakhs, the revenue from the Barrage being eaten up by interest charges, Barrage being eaten by interest energies. Roughly from 1945 onwards, there would be a surplins from the Barrage to help the province. Based on this assumption the authorities set about perfecting the administrative machinery in preparation for the inauguration of the new regime.

With the stage set for the advent of the new province, an Order-in-Council was issued in January, 1936, announcing that the new province

Sind is one of the two provinces created in . Of a permanent character are those provisions 1986, the other being Orissa. Unlike the lof the Order-in-Council which sover Sind from latter, which has been carred out on a linguistic Bombay and settle the Habilities of the parent and language, Sind has greater affinity to the taxes will belong to the province where the taxed been attached to the Bombay. Nevertheless it has property is situate or the taxed transactions been attached to the Bombay Presidency administrative ever almost its conquest by Sir Charles Rapher in 1843.

The demand for its separation into a distinct political entity is of comparatively recent bombay. Of the dobt incurred on account of the loyd Barrage and Canaba system, will be borne by Sind, and the rest by Borrigh. It was only about a dozen years age of the Lloyd Barrage and Canaba system, will so borne by Sind, and the rest by Borrigh. It was only about a dozen years age of the Lloyd Barrage and Canaba system, all that Muslim leaders started the demand that except the portion relating to the Nasirabad Sind, where the Muslims are in an overwhelming section (which is chargeable neither to Bombay majority, should have separate administrative nor to Sind) will be borne by Sind. The outmachinery under the next reformed constitution, standing Bombay debt on account of the Bombay so that it might be a counterplast to provinces Development Scheme will be the debt of Bombay where the Hindus are in a majority. What was alone. Other loan works will be chargeable

The temporary provisions of the Order-in-Council relate to the period between April 1, 1936, and the inauguration of provincial autonomy. During this period the Governor will carry on the administration, assisted by two Advisers and a Council which will be purely advisory in character and will comprise members nominated by the Governor. Such provisions of the Government of India Act of 1919 as relate to the composition and functions of the provinclal legislative councils, the separation of provincial subjects into transferred and reserved subjects, the Ministers and Executive Councillors will not apply to Sind during the transitional period.

It is also understood that the Central Government will have to come to the rescue of Sind by providing the funds to meet the deficit in the first few years. In order to make arrangements for such a subvention to Sind and Orissa and for other weak provinces and generally to adjust the financial relations between the Central and the provinces under the provincial autonomy scheme, Sir Otto Niemeyer, a financial expert, was asked to conduct an inquiry. He has completed his investigations and submitted his report, according to which Sind will get a cash subvention of Rs. 105 lakhs for a period of ten years, after which the aid will be progressively decreased. While on the subject of help from the centre, it may be mentioned that, according to the Niemeyer recommendations, Sind will get after the first five years of provincial autonomy 2 per cent. of the distributable portion of the income-tax revenue.

Population.

Sind has an area of 46,378 square miles and Sanday, 1906, announcing masses may province of the creating transitional machinery for the conduct (inclining schedulid castes) number 1,015,000 and the management of holds authonous shaded in accordance with the provisions population is made up of 1,300 Anglo-Indians, 6,578 Europeans and 6,627 Indian Olivitians. The language of the province, Sindhi, though | The total quantity of earthwork involved, it hears many marks of Arabie and Persian excluding that for the watercourses was 569 influence and is written in a form of Perso-crores cubic feet of earthwork which means a Arabie sorigh, is nearer the original Sanskris solid; column measuring 100 feet by 100 feet Arabic script, is neater that original constitution any other Indian language. Few, however, are capable of writing it, for only 70 out of every 1,000 people in Sind are literate. The average are capable of writing it, for only 70 out of every 1,000 people in Sind are literate. The average for males is 106 per 1,000, that for females being aslow as 21 per 1,000. The Hindus are far more advanced than the Muslims and enjoy a virtual monopoly of the trade of the province. against 263 Hindu literate males per 1,000, only 44 Muslims per 1,000 are literate; 51 per 1,000 literate Hindu females compare against five literate Muslim females. The number of those literate in English are 119 per 10,000-186 per 10,000 males and 34 per 10,000 females.

Out of every 100 workers in Sind 59 are engaged in agriculture and animal husbandry. per cent. are engaged in manufacturing indus-tries, most of which are, however, of the cottage type, there being very few factories in Sind.

The cultivable area of the province is mostly commanded by the recently constructed Sukkur Barrage and Sind canals, which, with other canals and the Indus river itself, supply water to 7,500,000 acres. The Barrage works have cost nearly 24 crores of rupees. The Sindhi agriculturist is gradually becoming alive to the perennial regulated supply of irrigation and his outlook is becoming brighter. The rapidity outlook is becoming brighter. The rapidity with which lands supplied by the Barrage system are being taken up augurs well for the success of the scheme and the prosperity of the province as a whole. Already there has been a growth in the production of long staple cotton, all of which is easily absorbed by Indian textile mills.

Lloyd Barrage.

The Barrage owes its existence largely to the The intringer over the extraction of the property of the prope dream of many an engineer and an almost incredible boon to the cultivator, who formerly carried on his agricultural operations in a haphazard manner, being unable to depend on the proverbial vagaries of the Indus. What it means to the Sindhi the Sindhi alone knows. for the Barrage has converted-or hopes to convert—a waterless desert into a smiling garden flowing with milk and honey.

The magnificence of the achievement that is the Lloyd Barrage can be imagined when it is realised that it is a huge water regulator consisting of 66 spans, each sixty feet wide, the sisting of do jame, can't shay the water, and openings being regulated by steel gates, each weighing fifty tons. The Barrage is about a mile long, about five times the length of London Bridge. Thousands of miles of new channels were excavated varying in width from 346 feet in the case of main canals to only two or three The total feet in the case of water courses. length of Government channels which were angung of vertices and the state of the stat

extending to a height of over 550 miles.

The function of the Barrage is to lead up the river and store the water at Sukkur and from that to distribute it all the year round according to requirements of cultivators. The distribution is made through seven great canals, regulated through regulators on both banks of the river four on the left bank, three on the right. Those on the left bank are Rohri, the Eastern Nara, the Khairpur Feeder East and the Khairpur Feeder West. Those on the right bank are the Perennial, the Central Rice and the South-Eastern Perennial or Dadu.

The total number of openings in all the canal Head Regulators is 55, each being of 25 feet span and each opening being equipped with three electrically operated gates. The total discharge of water into all the canals is approximately 45,750 cusecs or 457,500 gallons per second. The total length of the main and branch canals is about 4,700 miles. To accomplish this staggering feat, excavation of earthwork to the extent of 8.000.000.000 cubic feet was involved, as much as would fill a drain 15 feet wide and four feet deep, dug round the equator. It was estimated that the ultimate area of annual cultivation on the scheme would be over 5,000,000 acres and this would be under various crops approximately as follows :

Wheat 2,440,000 acres; cotton 790,000 acres: rice 625,000 acres; jawari, bajri, etc., 695,000 acres; pulses 53,000 acres; and oilseeds 410,000

This denoted in produce would mean the following approximate quantities:

Wheat 1,133,000 tons; cotton 592,500 bales;

Inter-communal Co-operation.

Politically, the province is backward. the Hindu minority is politically minded, the Muslims owning allegiance to personalities rather than to principles. The Hindus are openly afraid of Muslim dominance and of being outed from public life. They have already communicated this fear to the new Governor, Sir Lancelot Graham, who has assured them of his sympathy and determination to safeguard their legitimate interests. On the other hand, there is growing evidence of a desire on the part of the Muslim community to reassure the minority in regard to the continued enjoyment of its rights. Leaders of both communities are working for the creation of an understanding between the two which will bring about an era of inter-communal co-operation and goodwill so necessary for the successful working of the reformed constitution under unfavourable financial conditions,

Karachi.

facts it was as recently as 1729 that a few traders of the neighbouring State of Kalat migrated to the "Kalachi" the land of the sand-dunes. It was several years later that its potentialities as a harbour were realised by the British—Sir as a narroour were realised by the British—Sir Charles Napier, the Conqueror of Sind, is said to have forecast that Karachi would some day become the "Glory of the East." Recent developments in Karachi hold out fresh hopes of this prediction being fulfilled, for with the growth of aviation, Karachi, which is on the main line of imperial aerial communication between London and Australia right across India, is bound to become a vital airport, if the is not already one. In addition to being the capital of Sind, Karachi is the outlet for the products of the Punjab. If the Barrage becomes all that is expected of it, Karachi may have to handle in 1960 nearly 1,133,000 tons of wheat 500,000 bales of cotton, 447,000 tons of rice, 298,000 tons of jowar, bajri, etc. 15,000 tons of pulses and 117,000 tons of oilseeds. That this is not altogether Utopian is evident from the fact that within four years of the commencement of Barrage operations, that is, by the end of 1935, the following areas were under cultivation in Sind . 850,000 acres under wheat, 500,000 acres under cotton and 50,000 acres under rice.

The Madras Presidency.

ment of indus, has on the ast, on the Bay of Ben. In the running of a college at Coimbatore gal, a coast line of about 1,250 miles; on the affiliated to the University of Madras, three farm South on the Arabian Sea, a coast line of about labourers, 450 miles. however, there is not a single natural harbour nowever, there is not a single natural narbour of any importance; the ports, with the excep-tion of Madras, and perhaps of Cochin and Vizaganatam are merely open roadsteads. A plateau. varying in height above sca-level from about 1.000 to about 3,000 feet and stretching northwards from the Nilgiri Hills, occupies the central area of the Presidency; on either side are the the Nilgiris The height of the Western mountain-chain has an important effect on the rainfall. Where the chain is high, the intercepted to 150 inches on the seaward side, but comparatively little rain falls on the landward side of the range. Where the chain is low, rain-clouds are not checked in their westward coast the rainfall is small and the heat in sum-localities of the rainfall is small and the heat in sum-localities by means of both selection of different one excessive. The rivers, which flow from zation. Side by side with an increase in the west to east, in their carlier occurse drain rather area under cotton, from existing good staple than irrigate the country; but the deltas of largest the country of states of largest the country of the largest the largest larg are the only portions of the east-coast where is the large industry which the phanting agriculture is not dependent on a rainfall community have built up, contributing tarely exceeding 40 inches and apt to be substantially to the economic development without of the province. They have organised untimely.

Population.

The population of the Presidency was returned at the census of 1931 as 47,193,602, an increase of 10.4 per cent, over the figure of 1921. The increase was not uniform. The districts which had suffered most in 1921 tended to show large increases in 1931-Bellary and Agencies were marked illustrations. As a natural corollary marked inustrations. As a hattiral coronary to an increase in population the Presidency density has risen. Hindus account for 88 per cent. of the Madras population, Muhammadans 7 per cent. and Christians 3.8 per cent. The actual number in other communities is inconsiactualnumber in other communities is Inconsiderable. The vast majority of the population is of the Dravidian race and the principal Dravidian languages, Tamil and Telugu are spoken by 19 and 18 million persons respectively. 40 per cent. of the population talk Tamil, 37½ per cent. Telugu, 79 per cent. Majayalam, Oriya, Kanarcee, Hindustani, Tulu follow in that order with percentages above 1.

Government.

The Madras Presidency occupies the whole cholam, ragi and kambu. The Industrial crops southern portion of the Peninsula, and, exclud- are cotton, sugarcane and groundants. The ing the Indian States, all of which have now agricultural education is rapidly progressing in come under the direct control of the Govern- the Presidency. The activities of the Agricultural confidence of the Agricultural programment of India, has an area of 124,363 square jurnal Department in matters educational consist schools numerous demonstration coast. farms. As it was found that the present course of middle school education does not satisfy the needs indule sonoil education does not satisfy the needs of the ryots, the only school maintained by the department at Tailparamba was closed with effect from 1st April 1982. A Middle School is however now maintained by the District Board of Midras at Usilampati. The institution of of mures at Oshampath. The institution of short practical courses in farm management and allied subjects in the Agricultural College at Coimbatore have been sanctioned. While naddy which is the staple food of the population, occu-pies the largest cultivable area, cotton and sugarcane are hy no means inconsiderable crops of the province and are receiving close attention at the hands of the local agricultural authorities. hands of the local agricultural authorities. Line area under cotton irrigated and unirrigated is estimated at 2,372,725 acres and, as in the case of paddy, efforts are being made to produce better strains of cotton suited to different have organised the province. They have organised themselves as a registered body under the title of "The United Planters' Association of South India." on which are represented coffee, tea. rubber and a few other minor planting products. The aggregate value of seaborns trade of the Fresidency which was Rs. 76,98,36,552 in 1934-35 and Rs. 76,09,9,326 in 1935-36 increased to Rs. 82,57,56,596 during 1936-37. As in other provinces, the forest resources are exploited by Government. There are close upon 18,533 square miles of reserved forests. Forty-seven spinning and weaving mills were

Forty-even spinning and weaving mills were at work during the year and they enaphyed 65,97 operatives. The number of Jute mills at 65,97 operatives. The number of Jute mills at the number of the other factories in the Fresidency was 1,651. These consisted of oil mills, rope works, the works, etc. Tanning is one of the principal industries of the Fresidency and there is consistentle export trade in stims and The manufacturing activities which are hides. under the direction of the Department of Indus-tries are mainly confined to the production of Government.

The Madras Presidency is governed on the system generally similar to that obtaining in spending some parally similar to that obtaining in seminary similar to that obtaining in seminary similar to the containing in seminary similar to the sound the sound sound so the sound sound so the sound sound so the sound sound so the sound

cultivation and that the several deep-rooted cultivation and that the several ucer-robust varieties of cane which have been evolved at Coimbatore and require very little water are especially suited for the conditions which obtain in several areas of the Presidency where they grow better than in the north. The departgrow better than in the north. ments of Industries and Agriculture assist the development of the sugar industry by demonstration of the methods of manufacture of white sugar by centrifugals by getting trained sugar technologists, by the award of scholar-ships and by investigating schemes for starting sugar factories.

The Victoria Technical Institute continued receive annual subsidy of Rs. 3,000 in to receive connection with the appointment of an agent in London for the sale of products of Madras cottage industries in European markets.

Education.

The Presidency's record in the sphere of education has been one of continuous progress. There are at present about 48,300 public institutions, ranging from village primary schools to arts and professional colleges, their total strength being about 3,181,900. Special efforts are being made to provide education for boys belonging to the Scheduled Classes, The Legis-lative Council passed a resolution in the year 1929 that poor girls reading in any educational institution in the province—Government, local fund, Municipal or aided—should be exempted from School fees in any Standard up to III Form. The total expenditure of the province on Education is in the neighbourhood of Rs. 547 lakhs. The injühe jneighbourhood of Rs. 547 lakis. The principal educational institutions in the province are the Madras, Andhra and Amamalal Universities, the Fresidency College, the Christian College, the Lavis College, the Lavis College, the Lavis College, and the Queen Mary's College for Women, Matris; the St. Toseph's College, Trichinopoly; the American College Madrium; the St. Onesph's College, Trichinopoly; the American College Madrium; the Coded Districts College, Avantagement the Government College Ratha-Anantapur; the Government College, Rajah-mundry; the Agricultural College, Colmba-tore; the Medical Colleges at Madras and Vizagapatam, the Engineering College at Madras (Guindy), the Teachers' College, Saidapet and the Government Training College, Rajahmundry.

Cochin Harbour Scheme.

The importance of this project lies in the fact that a good harbour at Cochin would lead to the development of a valuable hinterland and provide a ready outlet for agricultural and other produce from an area which is at present not adequately served by a convenient or well-equipped harbour, The scheme involved cutting a passage through the bar, which previously blocked the entrance from the sea, to an extensive backwater; and then, by dredging and reclamation, forming a sheltered harbour, giving full protection and facilities at all seasons of the year. An agreement was reached in 1925 between the Governments of Madras, Travancore and Cochin indicating how the work was to be carried out and outlining the financial arrangements necessary. A trial cut was made in 1922-23 and the effects of the monsoon thereon was observed. results recorded were examined by a Committee of Harbour Engineers in England who reported favourably on the prospects of the scheme.

The first cut through the bar 400 feet wide by 321 feet deep was completed on 30th March 1928. The channel through the outer bar is now 3 miles long by 450 feet wide and during now 3 miles long by 460 feet wide and during 1984-35 a minimum depth of 30 feet at L. W. O. S. T. was maintained throughout except for a small patch which had a depth of 29½ feet the dredging of the Mooring area has been completed. Since March 1980 the Harbour has been in constant and regular use by all ships and a regular passenger service has been inaugurated.

Proposals have been formulated for the next stage of the works which include the construction of deep water jetties with railway connections. construction of godowns and transit sheds, the installation of rapid handling cranes and other transport facilities. These improveother transport accitates. These improve-ments are to be made on the new reclamation of which about 300 acres have been formed already by dredging from the harbour. It is intended to connect this to the mainland by a railway bridge across the backwater. Reclamation, when completed, will provide sufficient space for about 20 or 30 large vessels to load or unload at the same time. The execution of the further work at the port has been held over pending settlement of certain questions connected with the harbour administration. The matter was discussed at a Conference held in November 1935 and in 1936 and an agreement was reached. The administration of the port has been taken over by the S. of I. with effect from 1-8-36. The Shoranur Ernakulam line has been converted from metre to broad-guage and opened for traffic. The line is to be extended to the wharves at the reclamation. These develop-ments will enhance the utility of the port to the planting and agricultural areas in that part of the Presidency. To facilitate navigation during the night, the channels have been lighted and, a hotel has been constructed to provide there accommodation for passengers calling at the

Local Administration.

Local bodies in the Madras Presidency are administered under the following Acts :-The Madras City Municipal Act, 1919, was

amended by a comprehensive Amendment Act in 1936 and the main changes effected by the Amending Act which was brought into force on 21st April 1936 were as follows :-

(1) the redistribution of the existing thirty divisions into forty territorial ones:

(2) the provision for a Deputy Mayor : (3) the provision for aldermen;

(4) the increase in the maximum strength of the council from 50 to 68 members consisting of 60 elected councillors, five aldermen elected by the council and not more than three special councillors appointed by Government for special subjects;

(5) the reservation of three special seats for Adi Dravidas and two for Labour :

(6) the widening of the franchise :

(7) the abolition of the system of representa-tion of minority communities by nomination (8) the provision for better control over theri and hutting grounds; (9) the provision for the levy of a tax on

advertisements:

(10) the fixing of the minimum and maximum rates of levy of the property tax at 15\frac{1}{2} and 20 per cent. respectively of the annual value of buildings and lands, and

(11) the constitution of a new Taxation Appeals Standing Committee with a Chairman appointed by Government.

The Madras District Municipalities Act. 1920 as amended by Madras Act X of 1930; and

The Madras Local Boards Act, 1920, as amended by the Madras Act XI of 1930.

The amending Acts of 1930, which came into force on the 26th August 1930, provide, inter alia, for the abolition of the system of nominations to local bodies, for the inclusion of village tions to local bodies, for the inclusion of vininge panchayats within the scope of the Madras Local Boards Act with a view to making the village the unit of local self-government, for direct elections to district boards, for the creation of a municipal and local boards service for the Presidency of Madras, for the removal of the disqualification of women as such in respect of elections to municipal councils and for the esections to municipal councils and for the board or Chairman of a Municipal Council on a motion of non-confidence being passed against him by a prescribed majority. The Acts have undergone subsequent amendments. Taluk Boards have been abolished with effect

from the 1st April 1984. In the interests of administration, commissloners have been appointed to all the Municipalities in the presidency and these have replaced non-official chairmen as executive anthorities.

Under an Amending Act of 1934, the taluk boards were abolished with effect from 1st April boards were adoptised what effect from its April 1934. This stop was undertaken as these bodies became financially embarrassed. Their functions have been entrusted to district boards; with a view to avoid extreme centralisation of administration of district boards, it was decided to bifurcate them. Up to the end of 1935, the number of district boards bifurcated was four. Right district boards were bifurcated in 1936.

But, it was actually found later on that many of the bifurcated district boards were financially unstable so much so that the Government had to have recourse to a reversal of the policy of bifurcation and to amalgamate some of the bifurcated district boards.

By an Act of 1935, the local boards in the presidency have been divided into three groups for the purpose of elections, so that elections will be held to a third of the local boards every The object of this legislation was vear. administrative convenience.

By an Act of 1936 ordinary courts of law have by an axe or reso trumery course of new have been debarred from issuing injunctions restrain-ing proceedings which are being or about to be taken for the conduct of elections to local bodies and preparation of electoral rolls in connection therewith.

local bodies in the Province of Madras, with a view to widen the franchise of local bodies and to effect economy in the cost of preparation

of the electoral rolls of local bodies.

Local bodies are now enabled under the
Madras Local Authorities Entertainments Tax Act, 1926, to levy a tax on entertainments given within their jurisdiction.

Irrigation.

In March 1925, the Secretary of State sanctioned the Cauvery Reservoir Project, the esti-mated cost of which amounted to about £ 41 millions. The project has been framed with two main objects in view. The first is to improve the existing fluctuating water supplies for the Cauvery Delta irrigation of over a million Carrery Deta Hrigation of over a ministrator acres; the second is to extend irrigation to a new area of 301,000 acres, which will, it is estimated, ad 150,000 tons of rice to the food supply of the country. The scheme while was completed in 1949 provides was completed in 1949 provides of the country of th for a canal nearly 88 miles long with a connected distributary system. Owing to the necessity for providing adequate surplus arrangements to dispose of floods similar to the phenomenal floods of 1924 and to other causes the estimate had to be revised and the revised estimate was about £5½ millions. The Project was however completed with a saving of nearly £½ million. Another important project is the Periyar project. Taking its rise in the Western Ghats, the river flows into the Arabian Sea through Travancore State territory. After prolonged negotiations, the Travancore Durbar consented to the water being caught and stored in the Travancore hills for being diverted towards the East. Some three thousand feet above sea-level a concrete and masonry dam has been constructed and nearly 50 feet below the crestlevel of the dam a channel through the summit of the range carries the waters into the eastern ot use range carries the wavers into the castern water-shed where they are led into the river Valgai. The total quantity of water impounded to crest level is 15,600 million cubic feet. By this work, a river ordained by Nature to flow into the Arabian Sea has been led across the Peninsula into the Bay of Bengal irrigating on its way well over 100,000 acres of land. The irrigable area commanded by the Periyar system is 143,000 acres, while the supply from the lake was sufficient only for 130,000 acres. To make up for this deficit, the effective capacity of the up for ans queues, ane enective capacity of the lake was increased in 1938 by lowering the water-shed cutting. The area already under irrigation in the Markas Fresidency total about 7.5 million acres. Of this over 3 million acres are served by petty irrigation works numbering about 88,000.

Electric Schemes.

The first stage of the Pykara Hydro Electric project which was under construction by the Government of Madras has been completed and is in operation from 1st April 1988. It consists in utilising a fall of over 3,000 feet in the Pykara river as it descends the Nilgiris Plateau for the By an Act of 1988 the franchise of the generation of electrical constituencies of the Madras Legislamiasion for mply were assimilated to that of the circ, the Migras and Colmbstore, and parts of tire Assembly were assimilated to that of the

Malabar, Salem, Trichinopoly and Tanjor, additional securities were obtained in respective for the Morgan scheme steret in 1920-epith, of locus amounting to Ra. 10.77 laths which the main were like the main were like construction works of the Pyrkara project has for loans aggregating Ra. 298. 25 laths given by as been merged with it. In its present completed many as 6,364 societies has so far been examined, form the project consists of the main power The strong reserves built up by contral banks house at Singara with an installed plant capacity of 32,700 B.H.P. and the transformer station, generated during the year ending March 1937 was over 75,500,000. Owing to the rapid increase in the demand for power steps have been taken to provide additional storage of water at Mukurti to supplement any shortage of water at the forebay during dry months. The revenue rough estimate is expected to 22,000,000 units. Besides the Trichinopoly and Tanjore districts to be transferred from the Pykara system, the area to be supplied by the Mettur scheme will cover Salem, South Arcot, North Arcot and Chittoor districts.

Co-operation.

The slight improvement in the economic The loan transactions of agricultural societies The policy of rectification and consolidation of existing societies was continued. As many as against 211 in the previous year, a good number being non-credit societies. The registration of

The strong reserves built up by central banks will enable them without detriment to their financial stability to write off ultimately some of 32_VIU M.H.F. and the transformer stateon, innament scaonicy write of unlittinery been the receiving station at Combistore, 14 other bad and irreceiverable debts which have been sub-stations, 400 miles of 60 K.V. lnc, 318 miles brought to notice. The first stage in the rectification, 400 miles of 60 K.V. lnc, 318 miles brought to notice. The first stage in the rectification of the combistion of 12 K.V. lnc and 278 miles of 11 K.V. lnc, fication programme riz, examination of individuo become of 12 K.V. lnc and 1387 km lnc fiscaling programme riz, examination of individuo become of 12 K.V. lnc and 1387 km lnc fiscaling local community and 1388 km lnc fiscaling lnc second stage of work viz., revival of dormant societies, with a liberal scheme of relief to borrowers. The Central Land Mortgage Bank recorded another year of steady and sustained progress. Thanks to cheap money, the Bank was able to float debentures at low rates of interest at the forebay during dry months. The revenue able to float dependence at low rates of interest realised during 1986-37 is about Rs. 24.5 lakhs and no dependence carry interest exceeding 4 per against Rs. 7.93 lakhs estimated at the time cent. As in the past years, the benefit of low against Rs. 7.03 lakhs estimated at the time (cent. As in the past years, the benefit of low the scheme was submitted for sanction. The interest was passed on to ultimate borrowers and construction of the Mettur Hydro Electric no loan bears more than six per cent. Deben-mence supply in 1937. The estimated capital is against Rs. 40,57,900 in the previous year, investment on the scheme is about Rs. 81 lakh Primary land more tages banks which numbered excitating the cost of the Hydro Electric plays the control of the property of the property of the control of the property of the proper excluding the cost of the Hydro Electric pipes 193 advanced loans to the extent of Rs. 38.10 inserted in the Dam and the cost of the trans-llakhs during the year as against Rs. 31.4 lakhs mission lines and substations in the Trichinopoly in the previous year. Land Mortzago Banks and Tanjore districts which are now included have up to 30th June 1937 contributed a sum in the Pykara System and which are proposed of Rs. 141.24 lakhs towards the redemption to be transferred to the Metter System when it of debts by the tryots. There were 111 lonn and begins operations. The initial generation on a sale societies at the end of the year against 74 count of the previous three were 111 lonn and begins operations. Besides the Trichinopoly and Tanjore dembers to the excited of Rs. 20.16 lakhs. 1935-36 is still feeling its way. The Provincial Handloom Weavers' Society made a net profit of Rs. 1,747 during the year. Law and Order.

The Superior Court for Civil and Criminal condition of the people reflected in the record Judicial work in the Presidency is the High Court of the progress of the co-operative movement at Madras, which consists of a Chief Justice and during 1935-36 was maintained during 1936-37. thirteen pulsnejudges, The existing law provides thirteen puisne judges. The existing law provides for a maximum of 15 High Court Judges. For steadily increased from the year 1934-35 and the administration of criminal justice there are steadily increased from the year 1908-90 and the samining request or criminal instruction amounted during the year 1908-97 to Rs. 120, 90 22 Sessions Judges in the Mufassal, (including lakis which was about the level of 1930-31, two for agency tracts) Additional and Excepting a slight increase in the overdness under Assistant Sessions Judges being provided to arrear interest in agricultural societies, there assist Courts in which the work is heavy. Then was a marked fall in overdness in all societies, there are the District Magistattes, the Subordinate Magistrates and Honorary Magistrates. The administration of civil justice is carried on 326 societies were registered during the year as by 26 District Judges, and 37 Subordinate against 211 in the previous year, a good number Judges and 141 District Munsiffs. In The Presidency Town there are a City Civil Court 195 societies was cancelled as compared with 334 consisting of two Judges and Small Cause in 1935-36. Liquidation was resorted to only Court consisting of a Chief Judge and two when all attempts proved futile to revive societies other Judges. Madras is a litticious province when all attempts proved futile to revive societies jother Judges. Madras is a littigous province citizen by supersession of committees under and the records show one sult for every 85 centers become the property of the province of the previous province of the provinc Rs. 2.80,562 from their funds on this work. The sanctioned strength of the Permanent During the year, the Registrar's scheme of recti-police force is about 27,639 including the fleation was pursued by all central banks and Malabar Special Police.

The Bengal Presidency.

Chittagong Divisions. dency is 82 955 square miles, with a population of 51,087,338. Included in the geographical unit of Bengal are the Indian States of Cooch Behar and Tripura, which are in direct political relationship with the Government of India. The relationship with the toverlament of India. The area of the British territory is 77,521 square miles. The general range of the country is very low, and a great fertile plain extends southward from Jalpaiguri to the forests and swamps known as the Sunderbans, which lie between the area of cultivation and the Bay of Bengal.

The People.

Of the inhabitants of the Presidency 27,810,100 or 54.44 per cent, are Mahomedans and 22,212,069 Hindus. These two major religions embrace all but 2.09 per cent. of the population, Christians, Buddhists and Animists combined, number 1,043,049.

Bengali is spoken by ninety-two per cent. of the population of the Presidency and Hindi and Urdu by 3.7 per cent.

Industries.

According to the returns of the census of 1931 According to the recurs of the consists of the 10,698,384 persons or 20.7 per cent. of the population derive their support from pasture and agriculture, and of these 6,041,495 are cultivators, and 2,718,939 are agricultural labourers. The area under jute in 1936 is estimated at 2,180,800 acres against 1,917,500 in 1935. Bengal is the most important rice-producing 87 per cent. of the cultivated area of the Presi- 1936-37.

The Presidency of Bengal comprises the idency is devoted to its production. Other crops Brardwan and Presidency Divisions, the district include barley, wheat, pulses and oil-seeds. Sugar of Darjeeling and the Rajshahl, Dacca and continuous Divisions. The area of the Presidence is produced both from the sugar-care and from Chitagong Divisions. consumption in nearly every district of Bengal. The area under tea in 1933 was 209,688 acres. There were 440 plantations employing a daily average of 184,762 permanent and 7,841 temporary hands.

> Manufacture and Trade.—Agriculture is the principal industry of Bengal. In addition to this there are the jute mill industry, the tea industry (confined to the districts of Jalpalguri including the Dooars and Darjeeling), the coal mining industry and the sugar industry. The jute mills in and around Calcutta and in the triparian tracts of the districts of Howrah and Hooghly constitute the principal manufacturing industry of the Presidency.

> There was some improvement in the jute trade of Bengal (which began to decline since the year 1928-29) owing to a rise in the price of raw jute, as a result of the policy of voluntary restriction of jute crop, undertaken by the Government of Bengal.

The trade of Bengal during 1936-37 showed an improvement over the previous year owing to the gradual lifting of the world-wide depression. The aggregate value of the total trade of the province (excluding treasure) with foreign countries and other Indian ports increased from Rs. 1,23.57 crores in 1935-36 to Rs. 1,32.01 crores in 1936-37. Imports of private merchandise decreased from Rs. 37.74 crores in 1935-36 to private merchandise locreased from Rs. 61.76 crores in 1936-37, while exports of private merchandise locreased from Rs. 61.22 area in Northern India, and it is computed that crores in 1935-36 to Rs. 69,94 crores in

Administration.

Administration.

The present form of administration in Bongal the Province was raised from the status of a date of the Province translated from the status of a date of the Province translated from the status of a manufacture of the Province translated and important of the Province translated with the Production of the State of the State of the Province with the Production of the State of the tion of His Majesty the King-Emperor at Delhi,

members of the Executive Council who are in charge of the "reserved subjects". and three charge of the "reserved subjects", and three Ministers, who are in charge of the "transferred subjects." With the enforcement of the Government of India Act of 1935 on April 1, 1937, complete provincial autonomy came into being. The entire administration vests in the Governor who is assisted by a Council of Ministers holding office during his pleasure but answerable to a wholly elective legislature comprising two houses. Except in regard to his answerance to a whony elective legislature comprising two houses. Except in regard to his special responsibilities, the Governor corresponds to a constitutional monarch. The services no to a constitutional monarch. The services no longer find a place in the legislatures and are subordinate to the Ministers. Dyarchy has disappeared and there is complete responsible Covernment

The unit of administration is the District Magistrate and Collector. As Collector he supervises the ingathering of the revenue and is the head of all the Departments connected with it, while as District Magistrate he is responsible for the administration of criminal justice in the district.
The immediate superior of the District Magistrate is the Divisional Commissioner. Commissioners are the channels of communication between the local officers and the Govrnment. In certain revenue matters they are, in their turn, subject to the Board of Revenue in Calcutta; in other matters they are under the direct control of Government.

Justice.

The administration of justice is entrusted to the High Court of Calcutta which consists of the Chief Justice who is a Barrister and 18 Puisne Judges including three additional judges who are Barristers, Civilians or Vakils, Below the High Court are the District and Additional Judges, the Small Causes Court and Subordinate Judges and Munsifs. Of these officers, the District and Additional Judges and a certain number of Subordinate Judges are also endowed with the powers of a Criminal Court wille the remainder have jurisdiction in Civil matters only. Criminal Justice is administered by the High Court, the Courts of Session and the Courts of the various classes of Magistrates. Courts or the various classes of Anguistroes.

On its appealate side, the High Court disposes of appeals from the order of a Court of Session, and it also confirms, modifies or annuls sentences of death passed by Sessions Courts. Calcutta has six Stipendiary Presidency Magistrates, including one temporary Additional Magistrate in charge of the Traffic Court. One of the Presi-dency Magistrates is in charge of the Children's Court, is helped by Hony. Women Magistrates. It has also two Municipal Magistrates and it possesses a Court of Small Causes with Judges who dispose of cases of the class that are usually heard in County Courts in England. In addition a number of Union Benches and Courts have been established in selected rural areas for the disposal by honorary agency of petty criminal cases and civil disputes.

Local Self-Government.

hodies in the interior, the powers of Commissioner garding roads, bridges, etc.

under the Reform Scheme, the Local Government | of municipalities were increased and the elective was reconstituted, certain of the departments [ranchise was extended. Bengal Act III obling placed under the control of Ministers [1834 was repeated by A of ΔX^{*} of 1922 by which below the terms of the terms of the terms of the second property of the terms of the being placed under the control of aninsters (1884 was repeased by Act Av of 1902 by White appointed from among elected members of the material changes have been introduced, e.g., Legislative Council. There are normally four the franchise of the electors have been further the franchise of the electors have been entranchised, the widened, women have been entranchised, the proportion of elected commissioners has been increased and the term of office of the Com-missioner has been extended from three to four missioner has been expenditure now comprises a large number of objects, including veterinary a large number of objects, including veterinary institutions, employment of health officers. vaccinators and sanitary inspectors, the training and employment of female medical practitioners, the provision of model dwelling houses for tha working classes, the holding of industrial, sanita-ry and health exhibitions and the improvement of breed of cattle. The Commissioners also have large nowers in regard to the water sunniv and the regulation of buildings.

The Municipal Government of Calcutta is governed by Act III of 1923. This Act, which replaces Act III of 1800, makes the Corporation paramount in matters relating to municipal paramount in matters relating to municipal administration. The Act provides for the appointment of a Mayor, who replaces the chairman of the old Act, a Deputy Mayor, and Executive Officer, and Deputy Executive officers. all elected by the Corporation. The appoint. ment of the Chief Executive Officer is subject to the approval of Government. The total to the approval of Government. The total number of councillors, after the enactment of the Calcutta Municipal (Second Amendment) Act, 1932, is 91 with 5 Aldermen elected by the Councillors. Of the 91 seats, 81 are elected, of which 21 are reserved for Muhammadans. Ten of the councillors are nominated by Government and the rest elected by the general or special constituencies. In order to improve the insant, tary and congested areas of the city, the Calcutta Improvement Trust has been created with extensive powers. In the mofussil, district and local boards exercise considerable powers, with regard to public works, education and medical relief.

Bengal Act V of 1919 introduces the new system of self-government by the creation of village authorities vested with the powers and duties necessary for the management of village affairs and entrusted with powers of self-taxation. The new village authority, called the union board, replaces gradually the old chaukidari panchayats and the union committees and deals with the village police, village roads, water supply, sanitation, primary schools and dispen-saries. The Act also empowers Government saries. to create out of the members of the union boards. village benches and courts for the trial of petty criminal and civil cases arising within the union. The Act has been extended to all districts in the Presidency and up to March 1934 over 4,737. Union Boards were actually constituted.

Public Works.

The Public Works Department consists of Public Works and Railway Departments and is under the charge of Secretary to Government in the Department of Agriculture and Industries,

The Public Works Department deals with By Bengal Act III of 1884, and its subsequent questions regarding the construction and amendments, which hitherto regulated municipal maintenance of public buildings and also rese regarding acquisition of lands required by the several Railways, the alignment of new lines of Railways, and with Tramway projects,

There is a Chief Engineer who is the principal professional adviser of Government.

N. B .- Under the New Constitution. present organisation of Public Works (including Railways) together with Irrigation as well as Road Fund and Bengal Motor Vehicles Act transferred from the Local Self-Government Department will form the Department of Communication and Works.

Morino

The Marine Department deals with questions connected with the administration of the port of Calcutta and the Government Dockyard, Narayanganj, and inland navigation, including the control and administration of Government launches except the police launches.

Irrigation.

The Irrigation Department deals with irrigation, navigation, flood protection by means of em-bankments and drainage, the latter including relief from congestion of drainage by regulating the available supplies of water to suit the requirements of agriculture combined with the supply of water for irrigation in cases in which a supply is available.

Police.

The Bengal Police force comprises the Military Police, the District Police, and the Railway Police. The Bengal Police are under the control of the Inspector-General of Police. the present Inspector-General being a member of the Imperial Police Service. Under him or the imperial Folice Service. Under him are Deputy Inspectors-General for the Dacca range, the Baishahl range, the Presidency range, the Burdwan range and the Bakarganj range and also one Deputy Inspector-General in Charge of the C.I.D. and the Intelligence Branch, Each district is in charge of a Superintendent, and some of the more important districts have one or more Additional Superintendents. The Railway Police is divided into three distinct under a Superintendent. charges. each The cadre comprises Assistant Superintendents, Deputy Superintandents, Inspectors, Sub-Inspectors, Sergeants, Assistant Sub-Inspectors, head constables and constables. There is also a Village Police, composed of daffadars and chowkidars, who receive a monthly salary which is collected from the villages or unions by the Panchayat or Union Board. There is a training college and school at Sardah in the district of Rajshahl where newly appointed officers and men of the Bengal Police learn their duties. The Calcutta City Police is a separate force maintained by Government under a Commissioner who is responsible direct to Government. The Commissioner has under him Deputy Commissioners, Assistant Commissioners, Inspectors, Sub-Inspectors, Sergeants, Assistant Sub-Inspectors, head constables and constables. A school for the training of recruits for the Calcutta Police force has been established at Calcutta. annual cost of the Police is over 228 lakhs,

The head of the Medical Department is the Surgeon General with the Government of Bengal. In the districts the Civil Surgeons are responsible assisted by Government grants-in-aid.

The Railway Department deals with questions) for medical work. There are 44 hospitals and dispensaries in Calcutta, 11 of which are supported pensines in Cacatas, 1.1 or which are supported by the Government and 850,540 persons were treated at these institutions of whom 57,177 were in-patients. In the Mofussil districts there are 1,200 hospitals and dispensaries, the number of patients treated in them as well as in several huts, fairs, melas, subsidised and temporary dispensaries and in various medical centres was 9.083,248.

Education.

In the Presidency of Bengal education is imparted partly through Government agency and partly through private bodies, assisted to some extent by Government grants-in-aid. Government maintains four Arts Colleges in Calcutta (of which one is a college for ··· calcutus (or which one is a college for women, one is for Mahomedans and one the Sanskrit College), one at Hughli, one at Krishnagar, three, including the Islamic Inter College, at Dacca, one at Rajshahi and one at Chittagong. It also maintains two training colleges, one at Calcutta and one at Dacca, for teachers who teach in secondary schools through the medium of English, and 5 normal schools, one in each division, for the training of teachers In secondary schools who teach through the medium of the vernacular : also an engineering college at Sibpur and an engineering school at Dacca, two medical colleges, a veterinary Dacca, two medical college, a school of art and a commercial school in Calcutta, and a weaving school at Serampore. It also provides at the headquarters of all districts except Burdwan and Midnapore, and also at certain other mofussil centres, English high schools for the education of boys, while to some Government Arts Colleges high schools are attached. In Calcutta there are five Government high schools for boys, two of which are attached to the Presidency College and one to the Sanskrit College. Government high schools for girls exist only in the headquarters stations of Calcutta, Dacca, Mymensingh, Comilla and Chittagong. The other secondary schools, with the exception of a few middle schools managed either by Government or by municipal and district boards, are under private control. The administration of primary education in all areas, which are not under municipalities, rests with the district boards, grants being given from provingilar response to the boards. cial revenues to the boards, which contribute only slightly from their own funds. Only in backward localities are such schools either entirely managed, or directly aided, by Government. Apart from the institutions referred to above, 80 institutions called Guru Training Schools are maintained by the Department for the training of primary school teachers. For the education of Mahomedans, there are senior Madras as at Calcutta, Dacca, Chittagong, Hughli and Rajshahi which are managed by Government. There are also certain Government institutions for technical and industrial education. institutions for technical and industrial education (except B. E. Collego, the Assamillah Sohool of Brgineering, Dacea, the Government Commercial Institute and the Government School of Art, Calcutta) are now under the control of the Director of Industries, A large proportion of educational work of every grade is under the control of various missionary bodies, which are

The municipalities are required to expend a number of Additional or Second Inspector and certain proportion of their ordinary income on Assistant Inspectors for Mahommedan Educaeducation. They are mainly responsible for primary education within their jurisdiction, but schools in these areas are eligible also for grants from Government. These bodies maintain a high school at Burdwan, a high school at Santipur, a high school at Kushtia and a high school at Chittagong.

In 1935-36 there were in the Presidency :-RECOGNISED INSTITUTIONS FOR MALES.

The Department is administered by a The Education of Europeans is mainly con-Director of Public Instruction, assisted by an ducted by private agency, assisted by Govern-

tion according to the requirements of the several tion according to the requirements of the several divisions. Similarly the administrative charge of the primary education of each district is in the hands of a District Inspector assisted by Sub-Divisional Inspectors and Sub-Inspectors of Schools, the latter class of officers being in some instances helped by officers of humbler status called Assistant Sub-Inspectors and Inspecting Pandits and Maulvis. High education is controlcalled Assistant Sub-Inspectors and Inspecting Pandits and Mauvis. High education is controlled by the Universities of Calcutta and Daces established in 1857 and 1921, respectively controlled by the Universities of Calcutta and Daces (Calcutta maintains a Law College, called University of Bangal), the Vileo-Channellor (appointed by Government) and a number of ex-officio, elected and nominated fellows. The University of Calcutta maintains a Law College, called University Law College, Calcutta. Dacco University also has a Law Department attached to it. Calcutta University is mainly an examining also has a Law Department attached to it. Calcutta University is mainly an examining advanced teaching for which surpose its munova advanced teaching for which surpose its munova. advanced teaching for which purpose it employs an agency which is mainly distinct from the staffs of the affiliated Colleges.

The University at Dacca is of the residential type. There is a Board for Secondary and Intermediate Education at Dacca. It conducts the Matriculation and Intermediate Examinations for the students of Institutions at Dacca and also the Islamic Matriculations and Intermediate Examinations.

Director of runne insertence, assisted by an duteen by private agency, assisted by Govern-Assistant Director, a special office appointed ment grants. Government however maintain temporarily, an Assistant Director for Muham-a special Inspector, and also a school for boys, madan Education and a Director of Physical a school for girls (both residential) at Kurseong, Education. Each division is in charge of a and attached to the latter a Training College Divisional Inspector assisted by a certain (for women only).

THE FINANCES OF BENGAL.

After a sequence of deficit budgets for several years, Bengal is now looking forward hopefully to an improvement in her financial position. This improvement is a direct result of the special steps taken by the Central Government and by Parliament through the India Act to allevinte Sengal's plight. Under Provincial Autonomy she is better off to the extent of Rs. 70 lakhs a year than before. In the year 1935-36, despite the grant from Central revenues of an amount equal to half the proceeds of the jute export duty, the budget showed a deficit of Rs. 51 lakhs. The Niemeyer report, however, as subsequently implemented, gave a further sum of Rs. 42 lakis annually from an increased share in the jute export duty, and also an annual relief of Rs. 33 lakis by cancelling the province's accumulated debt to the Centre. Thus Bengal was able to face the future with more confidence. The Budget for the year 1937-38 was a surplus Budget. The revised estimates for the same year as presented, along with the Budget for 1938-39, showed, a however, an lupprovement of Rs. 53 takhs over the original estimates. Despite this improvement the Budget for 1938-39 has again shown a deficit of Rs. 11 lakhs.

The United Provinces.

the north by Tibet, on the north-east by i Western districts of the Province. Most of Negal, on the east and south-east by Bihar, the people, however, show a mixed Arya on the south by two of the Chota-Nagpur Dravidian origin. Two languages are spoken to the chota-Nagpur Dravidian origin. Two languages are spoken be Suggor district of the Central Provinces, Urdu, and Bihall. The Dravidian origin, and on the west by the States of Gwallor, long the Biharatpur, Sirmor, and Jubba, relationship with Persian and Arabid on the and by the provinces of Debli and the one hand and Hindi on the other, forming the Dravidian origin. square miles, to which may be added the area of the three Indian States of Rampur, Tehri-Garhwal and Benares with an area of 5,943 square miles, giving a total of 112,191 square miles. The total population is 49.614.833.

The Province, originally termed the North-Western Provinces and so amalgamated in 1877, was named the United Provinces of Agra and Oudh in 1902 and received its present designation on April 1937. It includes four distinct tracts of country: portions of the Himalayas, including the Kumaon division which consists of three hill districts, greater population pressure on the soin take any other Province in India save Delhi and Bengal. In the south there are low rocky hills, broken spurs of the Vindiyan mountains, covered with stanted trees and jungle, and in the north the lower slopes of the Himalayas, clothed with dense forest, affording excellent. big and small game shooting, and rising beyond big and small game shooting, and rising beyond in a tangled mass of ridges, ever higher and higher, until it reached the line of the sternal snows, but the greater part of the province consists of lovel plain, teeming with highly-cultivated fields and watered by three rivers the Ganges, Jumna, and Gogra.

The People.

The population is mainly Hindin, 84 - 4 per cent. In ranking as with whilst Mahomedan number is the total area in Outh. The province is not rich in manufactures. Being 0.6 per cent. composed of Christians (Europeans and Indians), Jains, Sikhs, Parais, and Europeans and Indians), Jains, Sikhs, Parais, and Europeans and Indians), Jains, Sikhs, Parais, and copper are found in the Hindians fewer and the composition of the Hindians of the Parais and Levi and the Composition of the Hindians of the Parais and the Composition of the Hindians and Hindians and the Hindians and t The population is mainly Hindu, 84.4 per cent.

The United Provinces lies in practically the the former to South Mirzapur and Bundelkhand, centre of Upper India. It is bounded on whilst the high-caste Aryans frequent the the north by Tibet, on the north-cast by Western districts of the Province. Most of

Agriculture.

The chief industry is agriculture, which is the principal source of livelihood of 71.1 per cent. of the population and a subsidiary source cent. of the population and a subsidiary source of income to a further 8.2 per cent. The soils of the Province fall into three groups: the valley soils of the Himalayas, the main alluvium and the Central Indian alluvium; the chief characteristic soil or the Central Indian alluvium is the black soil, with a lighter variant, though here also there are light loams and gravel. The Himalayan soils are of local origin and vary ulysion which consists of three hill districts, with the analyze of the rock from which they have two of which are entirely in the bills and one been formed, whilst the main alluvium soils is half in the submontane belt, the sub-Himse large and the submontane belt, the sub-Himse protections of the hill systems of central India protected by the submontane of central India including Bundelkhand. The Gangeite plain is protected by an extensive Ganal system, which though somewhat liable to run short of clark, the submontane which though somewhat liable to run short of clark. The greater part of the Province of the submontane which though somewhat liable to run short of clark. The greater part of the Province of the submontane which though somewhat liable to run short of clark. The greater part of the Province of the submontane which is the submontane with the nature of the rock from which they have ly infertile, though better populated. The soul khand and the Agra Divisions. In the past, of the Gangetic plain, however, possesses an improved frainage and irrigation facilities extreme fertility and here the density of population are formed to the common ser square multiple the latter area, however, shortage of water in in the west to 555 in the centre and 753 in the the canals and the general lowering of the water east, which gives the Province as a whole a table still continue to react against full agriculgreater population pressure on the soil than tural returns. Steps are being taken to increase any other Province in India save Delhi and the amount of water passing down the canals, The commodity prices generally showed appreciable improvement over those prevailing in 1936 upto November 1937. Figures for Decem-ber 1937 indicate a fall as compared with the corresponding period of 1936 except in the case of arkar dal. The area under important crops also increased, with corresponding increase in production except cotton. The position of the agriculturist, however, remains more or less the same. Land is held on zemindari tenure in Agra and taluqdari tenure in Oudh. The princi-pal land-owners in Oudh are the Taluqdars, some of whom own very large estates. The area held in talugdari tenure amounts to 54 per cent, of

Cotton is ginned and snun throughout the Western districts of the province as a home western districts of the province as a nome industry; and weaving by means of handlooms is carried on in most districts. Campore is the chief centre for cotton spinning and weaving mills. According to the census of 1931, 45.128 persons were employed on cotton ginning, cleaning and pressing and 408,033 on spinning and weaving. Silk weaving used to be confined to Reneres (where the famous 'Kimkheh' brocade is made) but considerable work is now done at Etawah. Sandila and Man and some at Agra and Shahiahanpur as well. Embroidery work is done at Lucknow, where the noted 'Chikan' work of cotton on muslins is produced. and in Benares, where gold and silver work on Benares uses local gold thread for embroidery work and 'Kimkhab' weaving. The glass industry is important at Firozabad, Bahjoi, Balawali,Sasni,Hathras, Harangau, Shikohabad, Makhanpur and Naini (Allahabad). Morada-bad is noted for its lacquered brass-work, Benares for brassware-engraving and repousse. Farrukhabad and Plikhawa (in Meerut district) for their calico prints and Agra for its carnets and marble and alabaster articles : glazed pottery is made at Chunar and Khuria and clay figures of men and fruits at Lucknow and carnets at Mirzapur.

The making of brass utensils at Mirzapur, Farrukhabad and Oel (District Kheri; the carving and inlay work of Nagina and Salarapur, the art silk industry of Tanda, Bilari (Moradabad) and Mau, the lock and brass tittings industry of Aligarh, the copper utensil industry of the control of the c

also deserve mention.

Cawapore is the chief Industrial centre. It has tanneries, soap factories, old mills, cotton, woollen and other mills. The woollen mill is the largest in India. Lucknow possesses an India the Company of the Company o

There is a card board manufacturing factory and a olgarctic factory at Saharanpur. Hrs. and perfumes are made at Locknow, Kansulj tannery, a distry and a factory for making door boits, inaterns, electrical goods, fountain pens, chemical balances, etc. Fountain pens are shown to be successful to the same control of the same c

The largest trade centres are Cawnpore, Allaha bad, Mirzapur, Benares, Lucknow, Meerut, Allgarh, Hathras, Mutta, Agra, Farrukhabad, Moradabad, Chandausi, Bareilly, Saharanpur, Muzzifarnagar, Ghaziabad, Khurja, Gorakhpur, Ghazipur, Pilibihit and Shahishanpur,

Administration.

The Province was until the close of 1920 administered by a Lieutenant-Governor, chosen from the ranks of the Indian Civil Service Under the Reform scheme the Province was raised to the status of a Governor-in-Council the Governor being assisted by two members of the Executive Council in charge of the Reserved Subjects and two Ministers in charge of the Transferred Subjects. With effect from April 1, 1937, provincial autonomy was in-augurated in this Province and a Cabinet of Ministers to assist the Governor formed, under the G. I. Act of 1935, present Cabinet consists of 6 Ministers medium for the transaction of public business is the Secretariat, the staff of which consists of 7 Secretaries (including Chief Secretary), and 8 Deputy Secretaries including the Director of Public Instruction and the Deputy Legal Remembrancer who are ex-Officio Legal Remembrancer who are ex-Officio Deputy Secretaries in the Education and Judicial Departments respectively. There is also 1 Under-Secretary (the Deputy Director of Public Instruction who is ex-Officio Under-Secretary in the Education Department) and 4 Assistant Secretaries. The Chief Secretary is in charge of Appointment, General Administration. Secretarial Administration Political. Newspaper and Police Departments: the Finance Secretary deals mainly with the Finance Department: the Revenue Secretary is in Department; the Revenue Scarcitary is in charge of the Revenue Scarcity, Ecclesiastical and Forest Departments; the Education, Secretary is in charge of the Education, Indus-tries, Agriculture and Excise Departments; the L. S. G. Secretary is in charge of the Local Self-Government, Municipal, Medical and Public Health Departments and the Judicial Scoretary is in charge of the Judicial and Legislative Departments. The seventh Secretary is in charge of Public Works Department (Buildings and Roads) and (Irrigation), Government spends October to April, in Lucknow October to April, in Lucknow and Allahabad, mostly in Lucknow, though the Secretariat remains throughout the year at Lucknow. The Governor and the Secretaries spend the hot weather in Naini Tal, but during the monsoon the Governor tours the plains. as he does also in the cold weather. The Board of Revenue is the highest court of appeal in revenue and rent cases lying within its jurisdiction, being the chief revenue authority in the province. There are forty-eight British districts, thirty-six in Agra and twelve in Oudh, average area 2,200 square miles and average population a million. Each district is in charge of a District Officer, termed a Magistrate and Collector in Agra and a Deputy Commissioner in Oudh and Kumaon, The districts are grouped together in divisions. Each division is under a Commissioner. except the Jhansi and Kumaon divisions the charge of which is held by the Collector of Jhansi and that of Kumaon by the Deputy Commissioner, Naini Tal, in addition to their duties. There are ten divisions having an average area of nearly 10,600 square miles and an average population of nearly 5 millions. The districts are sub-divided into tahsils, with an average area of 500 square miles and an average population of 236,000. Each

Tahsil is in charge of a Tahsildar, who is res-|suits, and village munsifs whose jurisdiction is ponsible for the collection of revenue, and also fixed at Rs. 20. possible for the collection of revenue, and also discident secretises yndicined powers. Once it discoveractly, but me bounds attain nates, who may be covenanted civilians (followed contents) and desistant Magistrates and Collectors) or administration. The district boards obtain members of the Provincial Service (Deputy Collectors and Magistrates).

14.8% of their income from Government grants. The other chief sources of moome is the logal rate lovied from the landowners. Some of the boards have recently imposed a tax on circumstances and property.

therefore it in the uses. District Officer and purious administrative officer is a Chief chief assistant, including shalleds, preside in linguiser. The Province is divided into circles orbininal courts as magistrates and as cultectors and divisions. Each circle is in charge of a and assistant collectors, in runt and revenue. Superintending Engineer and each division courts and dispose of a good deal of the work, is in charge of a mixed and the court of the funds and construction of all buildings costing more than Rs. 5,000 are in charge of the Buildings and Roads branch.

(b) The Irrigation branch administers the various irrigation works, of the province as well as Ganges Canal Hydro-electric Grid,

Senior Judge of Small Causes at Lucknow is including distributaries, drainage outs and empowered to try suits of a civil nature of which excapes. Is 5,928 miles, and the area firigated the value does not exceed Rs. 1,000. There is over 10 laths of acres annually including over are also honorary munists limited to Rs. 200 [2] lakis acres of Sugarcane.

(b) The Ganges Canal-Upper and Lower. The head works of the former are situated at Upper Ganges canal came into operation in the year 1855-56, and its total mileage of channels is 5,905 miles. The area irrigated annually is nearly 12 lakhs of acres. The lower Ganges canal was opened in 1879-80 and the total mileage of its channels is 5,029 miles. This syst 10 lakhs of acres. This system also irrigates nearly

4. (a) The Ganges Canal Hydro-electric Grid supplies power at attractive rates for domestic, industrial and agricultural purposes to 14 districts in the west of province. and to Shahdara in Delhi province. Seven of the ten falls available for electrification have been developed and a stand-by steam power station at Chandausi of 9,000 kilowatts has been constructed. During 1938 no less than 29,700 kilowatts in all will be available. Besides supplying some 75 towns with cheap current for light and fans and minor industries, the grid pro- 8 vides energy for irrigation pumping from remainder are under private management and rivers and open and tube wells. The Ganges are aided by Government. Valley State well Scheme comprises about 1,500 sman and Augari, incrondents in saction of the volumetric system over approximately one million acres hitherto without any source of irgriation. This supply of cheap power from some 2,000 sub-stations is already having an important bearing on the economic disposal of crops and the development of minor industries in the urban centres.

(b) The steam power house at Sohwal is capable of supplying 1800 kilowatts. The energy will be used to electrify Fyzabad and Ayodhya and to pump 160 cusees from the Gogra into the Fyzabad canal system 120 miles in length.

1937, are under consideration.

Police.

four Assistant Superintendents and sixty Deputy Superintendents excluding five temporary officers. There is a Police Training College at Moradabad under a Superintendent of Police as Principal, There is a C. I. D. forming a separate department, under a Deputy Inspector-General with three Assistants. The The 476 musaces and the Sarram Henri rine naving is avalance. Incre is a covernment angle formed their previous armament. The ad- neering College at Boorkee (Thomason College), ministration of the Jail Department is in a School of Art and Crafts in Lucknow and charge of an Inspector-General of Prisons, who an Agricultural College, and a Technological is a member of the Indian Medical Service. Institute at Cawppore; and an Agricultural

Education.

Education is maintained in part by the State Hardwar in the Saharanpur district and of the latter at Narora in the Aligarh district. The latter at Narora in the Aligarh district. are five universities, the four residential univer-sities of Allahabad, Lucknow, Aligarh (Muslim) and Benares (Hindu) and the affiliating University of Agra. The last named was established in 1927 and consists, besides six affiliated colleges situated outside the United Provinces, of the eight colleges, formerly associated with Allahabad University on its external side, viz., the Agra and St. John's College at Agra, the Christ Church, D.A. V. and Sanatan Dharam College at Cawnpore, the Meerut College, Meerut, the Barelly College, Barelly and St. Andrew's College, Gorakhpur. There are Intermediate Colleges and anglo-vernacular high and middle schools which prepare boys for the high school and intermediate examinations conducted by the Board of High School and Intermediate Education, which prescribes courses for high school and intermediate education.

There are 48 Government High Schools and Government Intermediate Colleges:

The Isabella Thoburn College at Lucknow and tube wells, covering the districts of Moradobad the Crosthwate Girls' College at Alfahabad Biljnor, Budaun Muzafarnagar, Meerut, Budand-linpart university education to Indian girls and slahr and Aligarh, introducing irrigation on the Theosophical National Girls' School and Women's College at Benares, the Muslim Girls' Intermediate College at Aligarh, Mahila Vidyalaya Intermediate College at Luck-now, Pratap Singh Hindu Girls' Inter-mediate College, Mordabad, Muslim Girls Intermediate College, Lucknow and Balika Yidyalaya Intermediate College, Cawnpore teach up to the intermediate stage. In teach up to the intermediate addition to these there are A. V. High Schools, English Middle and vernacular Lower Middle schools and primary schools throughout the province for the education of Indian Girls; they are controlled by a Chief Inspectress of Girls schools under the Director of Public Instruction. The St. George's Intermediate College, Mussoorie, (c) Investigations into the electrical and the Philander Smith College, Naini Tal, the financial possibilities of a Grid Project for St. Joseph's College, Naini Tal, Sherwood Interthe eastern districts of the province have been mediate College, Natin Tal, and La Martin-completed and the recommendations of an liere College, Lucknow, are the well-known expert Committee, appointed in November Institutions for European and Anglo-Indian children in the province which teach upto the intermediate stage. Besides these, there are many excellent educational institutions for European boys and girls both in the hills and plains which are attended by students from all The Police Force is administered by an over India. Government maintain Training Inspector-General, with three Deputies and three Colleges for teachers in Lucknow, Allahabad Assistants. forty-seven Superintendents, fortyto Christian Intermediate College, Lucknow. There are training departments attached to the Aligarh Muslim University and the Be-nares Hindu University. There is a College of Mining and Metallurgy in the Benares Hindu University where four-year courses of training are provided, leading to degrees in the two armed police of the three police ranges have subjects. This is the only uliversity in India recently been rearmed with the '410 musket, the where training in these two industrial subjects. '476 musket, and the Marthii Henri rife having is available. There is a Government high

School at Bulandshahr, there is also a non-Government Agricultural Institute at Maini, Allahabad. Education in law is given at four restiential universities and at the Agra and Merrut colleges, and at the Dayanand Anglo-Vedic and Sanatan Dharma Colleges at Cawnpore and at the Bardilly College, Instruction in commerce for the B. Com. degree of the Agra University is given in the Sanatan Dharma and the D. A. V. Colleges at Cawnpore and in the St. John's College at Agra; a commerce department for B. Com. degree is also attached to Allahabad and Lucknow Universities. The Allahabad and Lucknow Universities. The King George's Medical College, Lucknow, now merged in the Lucknow University, prepares candidates for the M.B.B.S. degree of the Luck-now University. Besides this there are two medical schools at Agra for men and women, and also a College of Ayurveda and Tibbiya is attached to the Benares Hindu and the Aligarh Muslim Universities respectively. Public schools for secondary and primary vernacular education are almost entirely maintained or aided by district and municipal boards and vernacular education is administered through them and the expenditure of grants for vernacular education is in their hands. Government maintains eight Normal Schools and seventeen Central Training Schools for the training of vernacular teachers. Each district has a deputy inspector of schools who is the Secretary of the Education Committee of the district board, assisted by several sub-deputy inspectors. There are seven inspectors who supervise both angio-vernacular and vernacular education in their circles.

Medical.

The Medical Department is in charge of an Inspector-General of Civil Hospitals, the charge of a large of the charge of the charge of the charge of the charge of the Dufferin fund affairs. A post of Personal Assistant to the I. G. Civil Hospitals has also VI Sancher of the Company of the Dufferin fund affairs. A post of Personal Assistant to the I. G. Civil Hospitals has also VI Sancher of the Company of the

medical work of each district and in a few of the larger stations he has an assistant. In two stations (Ranikhet and Rockee) Medical Officers in military employ hold collateral civil charge. There are 104 Provincial Medical service officers in charge of important Mofinal dispensaries and on the collateral civil charge. There are 104 Provincial subordinate medical service officers. Lady doctors and women sub-assistant surgeons visit pardanashin women in their own homes and much good work is done in bihs manner.

blis manner.

The best equipped hospitals for Indian patients are the Thomson Hospital at Agra, King George's Hospital and the Bairmann King George's Hospital and the Bairmann Hospital at Algand Hospital at Algand Hospital, Cawnpore, King Edward VII Hospital, Cawnpore, King Edward VII Hospital Agranges, the Civil Hospital at Allahabad (for Europeans, Anglo-Indians and Indians living in European style) and Satin Mary's Coltage European, Alussoche, The Baumst Mary's Coltage European, Alussoche, The Baumst Mary's Coltage European, Alussoche, The Baumst Mary's Coltage European, Allasoche, The Baumst Mary's Coltage European, Allasoche, The Baumst Mary's Coltage in the country, with a stat of lighty efficient procuping the Coltage and provides and indighty efficient procuping the Coltage and provides Clinical marcelal for the patial for women and children, completed in 1632; a slas attached to the King George's Medical College and provides clinical marcelal for the patial for women and children, completed in 1632; a slas attached to the King George's Medical College and provides clinical marcelal for the female and the standard of Medical Officers and the Standard of Medical Officer

The Punjab.

The Punjab or land of the five rivers, is so tion in comparison with the western Punjab called from the five rivers by which it is enclosed, namely, the Jahelum, Chenab, Ravel an area of 58,000 square miles, with a popules and Sutist. Together with carried an area of 58,000 square miles, with a popules and Sutist. Together with call the state of 58,000 square miles, with a popules and Sutist. Together with contain State for Jammu and Kashmir which lie to the north, cast and decreasing towards the west and south the Punjab occupies the extreme north-west-ren corner of the Indian Supine, and with the severywhere so scandy that cultivation is only exception of the above-mentioned the possible with the aid of artificial rirelation or exception of the above-mentioned the severywhere so scandy that cultivation is only and Rajputana and west of the river Junna-tance, these tracts find their security against and Rajputana and west of the river Junna-stance, these tracts find their security against sendancies embraced an area of 198,300 pendent of rain, a failure of which means square miles and the security of frontier Baluchis), that is to say, about one- occurs so seldom that the crops may be said

Physical Features.

spurs of the Aravalli mountain system traverse the extreme south-east and terminate in the Ridge at Delhi. The Punjab may be divided in the Political charge of the Punjah Governinto five natural divisions. The Himalayan ment. In 1921, however, the thirteen most tract includes an area of 22,000 square miles, important States, including Patiala, Bahawaipur, tract includes an area of 22,000 square miles, important States, including Patiaia, Ishawaipur, with a seanty population living scattered in Jind and Natha, were formed into a separate thiny mountain hamlets. The Satt Range "Penjah States Agency" under the control the lates the districts of Attock, Rawal- of the Agency of the Governor-General, Punjah Interpretation of the Punjah Governor-General, Punjah Ita physical configuration is broken and control of the Punjah Government were the Shini state and the mountainous tracts of Murrer Hill States, for which the Deputy Commissioner and Kabuta approximate closely in characteristics of the Hillmalayan tract. Except in the States in the Ambala Division, Kabia, Patand Italia States in Hillmalayan tract. Except in the States in the Ambala Division, Kabia, Patand and irrigation is almost unknown. Skitting with the formation of a new Political Agency at the base of the hills and including the low range Sofundal Hills and the Punjah States Agency of the Siwalika, runs the narrow sub-mountained the Punjah States Agency at the States have been transferred to of the Siwalia, runs the narrow sub-mountained the Punjah States Agency. tract. This tract, secure in an ample rainfall, and traversed by streams from the hills, com-prises some of the most fertile and thickly popuhated portions of the province. Its popular means, hence summer than the province into of over four millions is almost Sikh. Socially the landed classes stand high, agricultural and pastoral but it includes one and of these the Jats, numbering nearly five large town in Sialkot. Of the plains of the millions, are the most important. Roughly Punjah, the eastern portion covers an area of speaking, one-half the Jats are Mahomerian, some 36,600 square miles with a population one-third Sikh and one-suth Hindu. In disor 10 p millions. East of Labore, the rainfail irribution they are ubiquitous and are equally is everywhere so far sufficient that cultivation divided between their weld wisions of the province. It is also shown without Irrigation in arity favour. Next in importance come the Raiputs, who is assemble that were the greater part of the number over a million and as a half. The lated portions of the province. Its popula- medan, three-eighths Huidu and one-eighth tion of over four millions is almost Sikh, Socially the landed classes stand high.

frontier Bolunchis), that is to say, about one- loccurs so seldom that the crops may be said that tententh of the area and population of the never to fail from this cause. The western ladan Empire. But the formation of a separate province of Delhi reduced the area and appulation of the Punjab by about 450 square emiles and 380,000 souls, respectively. The total challenge the title of the eastern plains as miles and 480,000 souls, respectively. The total challenge the title of the eastern plains as miles and 180,000 souls, respectively. The total time for the title of the eastern plains as the Baloch tribes on the border of the Delha fertile, we althy and populous portions of the province. Multan and Lyndhur and Hard Challenge and the control of the province of the provinc rainfall and cloudless skies, and perhaps to its wide expanse of untilled plains, the climate of the Punjab presents greater extremes of The greater part of the Punjab consists of india. The summer, from yocker portion of one vast alluvial plain, stretching from the bar, is scorphingly bot, as an india to the west. The north-east is occupied by a section of the Himalayas and the Salt Range of the Punjab in the west. The north-western angle. A few small spurs of the Arayalli mountain system transports of the Punjab in the cold weather almost ideal, spurs of the Arayalli mountain system transports.

The Indian States of the Punjab were formerly

The People.

Of the population roughly one-half is Mahois possible without irrigation in fairly favour. Next in importance come the Ralputs, who also easons, but over the greater part of the number over a milition and a half. The also easons, but over the greater part of the number over a milition and the same part of the p Indian Army. In fact all the agricultural classes of the Putijsh, except in the south-western districts, made a magnificant response to the appeal for recruits in the great war and 400,000 men to the man power of the Empire speaks for tested. The Gujar are an important arricultural and paternal tribe; chiefly found in the castern half of the province and in the extense and the state of the province and in the extense and the state of the state

Languages.

The main language of the province is Punlabl, which is spoken by more than half the
population. Western Punjabi may be classed
as a separate language, sometimes called
Lahndi, and is spoken in the north and west.
the next most important languages are Western Hindi, which includes Hindustant and
Protection of the property of the proprotection of the property of the profree of the property of the prodiagrams. Believil, Pusito, Sindhi and
Tibeto-Burman languages are used by small
sections of the population.

Agriculture.

Agriculture is the staple industry of the province affording the main means of subsistence to 60% per cent. of the population. It is province affording the main means of subsistence to 60% per cent. of the population. It is a subsidiary of the control of the province of

colonies large areas of American cotton are grown but in the other cotton-growing districts the short-staple indigenous varieties are predominant. The country being preponderanily agricultural, a considerable proportion of the wealth of the people lites in live-stock. Large profits are derived from the eattle and dairy traces and and throughout the plants generally. The production of hides and skins is also an important industry.

Industries.

The mineral ventiles and the Punjah is small rock salt, an interior for conductive and the punjah is man interest or conductive and interest or conductive and interest or conductive and interest or without renumerative results. Iron and copper orea are also and the punjah is man interest or conductive and interest or

Administration.

Prior to the amendment of the Government of India Act in 1919 the head of the administration was a Lieutenant-Governor, drawn from the Act of 1919 the province was raised to the status of a Governorship, with an Executive Goundl and Allisitests, the Governor Executive Goundl and Allisitests, the Governorship, with an executive Goundl and Allisitests, the Governor Exception of the Transferred Subjects. With the introduction of part 111 of the Governor of the Transferred Subjects. With the introduction of part 111 of the Government of India Act, 1085, this Executive Council has been and the Legislative Council by an enlarged and the Legislative Council by an enlarged and the Legislative Goundl by an enlarged and the Legislative Assembly with wide powers of legislation and control. The business of legislation and control. The business of legislation and control. The business of legislative Assembly with wide powers of legislation and control. The business of the Council Covernment of the Council Covernment of the Council Covernment and (4) Molfel and Local Government Departments, (6) Electricity and Industries Secretaries, and two Assistant Secretaries, In the Public Works Department, there are law Chief Engineers (Secretaries, and two Assistant Secretaries, Intime Public Works Department, there are law Chief Engineers (Secretaries, and two Assistant Secretaries, Intime Public Works Department, there are law Chief Engineers (Secretaries, and the Assistant Branch), while

the Legal Remembrancer is also the Secretary to Government in the Legislative Department. The head of the Police Department is Joint Secretary and of the Education Department an Under Secretary to Government. The Govern-Under Secretary to Government. The Government winter in Lahore and summer (from the middle of May to the middle of October) in Simla. Under the Governor, the province is administered by five Commissioners (for Ambala, Jullundur, Lahore, Rawalpindi and Multan) who exercise general control over the Deputy Commissioners-29 in number-each of whom is in charge of a district.

The principal heads of Department in the province are the two Financial Com-missioners (who are the highest Court of Revenue jurisdiction, and heads of the departments of Land and Separate Revenue and of Agriculture and the Court of Wards), the five Chief Engineers, the Inspector-General of Police, the Director of Public Instruction, the Inspector-General of Prisons, the Inspector-General of Civil Hospitals, the Director of Public Health, the Chief Conservator of Forests, the Directors of Agriculture and Industries, the Inspector-General of Registration, the Registrar of Co-operative Credit Societies and Joint Stock Companies and the Legal Remembrancer.

Justice.

The administration of justice is entrusted to a High Court, which is the final appellate authority in civil and criminal cases, and has powers of original criminal jurisdiction in cases where European British subjects are charged with serious offences and original civil juris-diction in special cases. The Court sits at Lahore and is composed of a Chief Justice and ten Puisac Judges (either civilians or barristers), Subordinate to the High Court are the District and Sessions Judges (25 in number) each of whom exercise civil and criminal jurisdiction in a civil and session division comprising one or more districts. In districts in which the Frontier Crimes Regulation is in lores the Deputy Commissioner on the finding of a Council of Elders (Jirga) may pass sentence up to seven years' imprisonment.

Local Self-Government.

Local Self-Government is secured in certain branches of the administration by the constitution of District Boards, each exercising authority over a district; of Municipal, Town, and Notified Area Committees each exercising authority over an urban area, and of Pancha-yats, each exercising authority over a revenue estate or a compact group of revenue estates. The funds of District Boards are derived from a cess on the land revenue of the district supplemented by Government grants, profession a cess of the state revenue of the distressipple-mented by Government grants, profession taxes and miscellaneous fees, and those of Municipal, Town, and Notified Area Com-mittees from octrol or terminal tax and other forms of taxation from Government grants and from rents and miscellaneous fees. The Panchayat system is an attempt to revive the elected committee or Panchayat possessing certain powers in respect of taxation, local option, civil and criminal justice, the abatement of nuisances and other matters. Most of Service (Countess of Dufferin Fund).

the members of practically all local bodies are now elected and elections are as a rule keenly contested. In the case of Notified Area Committees, however, all Members are appointed.

Police.

The Police force is divided into District Police, Railway Police and Criminal Investigation Department. The combined force is under the control of the Inspector-General, who is a member of the gazetted force and has under him three Deputy Inspectors-General in charge of ranges comprising several districts and a fourth Deputy Inspector-General in charge of the Criminal Investigation Department and of the Finger Print Bureau at Phillaur. There is a Police Training School at Phillaur controlled by a Principal of the rank of Superintendent of Police. The Railway Police are under Assistant Inspector-General. The Dist District Police are controlled by Superintendents, each of whore is in charge of a district and has under him one or more Assistant Superintendents or Deputy Superintendents.

Education.

The strides which have been made in the past decade especially in the concluding years of the period, have brought the Punjab into line with the older and more forward provinces. The advance has not been confined to any one ferm of education but is spread over all grades and varieties. In addition to institutions main-tained in all parts of the province by private enterprise, Government Itself maintains sixteen arts colleges (including one for Europeans and three for women), three normal schools for males, twenty-one training classes, and combined institutions for females, one hundred twenty-six secondary schools for boys hundred and and girls and sixty-one centres for vocational training. The department started 2 Vernacular training classes for wives of teachers. Apart from these institutions for general education, Government maintains eight higher grade professional insti-tutions, viz., the King Edward Medical College, de Montmorency College of Dentistry and Veterinary College at Lahore, the Agricultural College at Lyallpur, the Engineering College at Moghalpura, the Central Training College, Lahore the Lady Maclagan Training College for women, Labore, and the Chelmsford Training College at Ghoragali, and two schools, viz., the Medical School at Amritsar and the Engineering School at Rasul. In addition there are thirty-six technical and industrial schools (thirty-two for males and four for females) scattered over the province.

The Department of Education is in the charge of the Minister for Education who is assisted in the work of administration by the Director of Public Instruction.

Medical.

The Medical Department is controlled by the Inspector-General of Civil Hospitals, who is an officer of the Indian Medical Service holding the rank of Colonel. He is assisted by an officer designated the Assistant Inspector-General of traditional village community organisation, the Givil Hospitals, who is at present an oilicer of elected committee or Panchayat possessing the Provincial Medical Service of the rank of a Civil Surgeon. He also has a Lady Assistant who is a senior Member of the Women's Medical

Public Health.

The Department of Public Health is controlled by the Director of Public Health who has, working under him, Four Assistant Directors of Health and Wentz-eight Directors of Health, and Wentz-eight District Sanitary Inspectors. In addition there is a permanent staff of 10 Sub-Assistant Health Officers and 15 Sanitary Inspectors for assistance in communication diseases. The ancillary acritics communication of the second classes. The ancillary acritics communication of the second classes.

(1) A Vaccine Institute which is in charge of the Assistant Director of Public Health, Punjab (Technical) Vaccination, assisted by a Superintendent and which prepares sufficient vaccine lymph to meet the needs not only of the Punjab, but of the Army in Northern India and of several provinces and Indian States in and beyond the confuse of India.

(2) An epidemiological bureau, which is in charge of the Epidemiologist to Government where, in addition to routine bacteriological examination, research work in matters bearing upon public health problems is carried out.

(3) An Education Bureau, to which is attached a photographer and a draftsman.

(4) A Chemical Laboratory in charge of a fully trained chemist whose duties comprise the chemical analysis of water samples and food stuffs.

(5) A Public Health Equipment Depot which supplies Government Institutions, Iceal bodies, etc., with reliable disinfectants, vaccine sera, etc.

(6) A Public Health School, the staff of which is responsible for the training of health vicitors. The Principal, who is also Inspectress of Health Centres, supervises the maternity and child welfare work throughout the province.

In matters connected with sanitary works the Director of Public Health works in closs toneh with the Superintending Engineer, Public and Artister of the Public Health Department in engineering matters. This officer and the Director of Public Health are also the technical activities of the Sanitary Bond whose thirty it public was a superintendent of the Sanitary Bond whose thirty it public Health are also that technical activities of the Sanitary Bond whose thirty it public was not supported by the Sanitary Section Sanitary Section 1997.

THE FINANCES OF THE PUNJAB.

A realised surplus of Rs. 23 lakhs, as against a budgeted deficit of Rs. 15 lakhs in 1932-37, and also a small anticipated surplus of Rs. 1,7-200 for 1937-38 were amounted by Mr. Mundarital, the Finance Minister in his first Budget presented in June 1937 to the newly constituted Punjab Legislative Assembly. Revenue receipts for 1937-38 were expected to be 48, 10,00,3300 and the 18, 10,00,330 and 19, 10,00,3300 and 19, 10,00,330

Forests play an important part in the inof 1931 was 14,667,146. There were 9,092,214 dustrial life of the Province. The forest reserves cover some 22.081.943 acres while unclassed Government extracts some 31,722 tons of teak annually, private firms, of whom the Bombay Burma Trading Corporation and Steel Brothers are the chief. extract over 4.52.439 tons. Other timber extracted by licensees amounts to 4.36,672 tons and firewood 11.62,679 tons.

Tin and wolfram are found chiefly in the bluriant, who form the suk of the popularity and the property of the popularity of t been a decline in the price of tin.

The improvement in the output of tin and The output in 1936 was 4,689.45 tons as against 4,268.16 tons in 1935. Silver, lead and zinc ore are extracted by the Burma Corporation at Bawdwin in the Northern ures 18 most distinctive and cx. Shan States. Copper is small quantities is also continuty controtable. It consists of a slik found there. There are small deposits of Molybjacket on list body and a laborated, a Booss dentle in Tavov and Meaning and Control facket on list body and a laborated. turban bound round his forehead, a loose denite in Tavoy and Mergul and of plathum jacket on his body and a long skirt or longyi tied Mytikyina. Mining for precious stones in the round his waist, reaching to his ankies. The Mogok Stone Tract of the Katha District conti-Burmese women, perhaps the most pleasing type inted to be carried out under extraordinary of womanhood in the East, lead a free and open licenses and by native miners working under little, playing a large part in the household eco-ordinary licenses. The output of rubies during

1936 was 141,490 carats as compared with 107,915) carats in 1935. The output of amber in 1936 was 32.33 cwts. The output of Burmese Jadeite during 1936 compared with that of the previous year showed an increase of too of the total output of petroleum in Burma during showed an increase of 408.61 owts 1936 was 2651 million gallons against 2511 million gallons during 1935. The oldest and largest Oilfield in the province is at Yenangyaung largest officed in the province to the Burmah Oil Company has its chief wells. There has been a gradual decrease in the output from the wells in this Oilfield as evidenced by the output of nearly 1844 million gallons in 1921 and nearly 130 million gallons in 1936. The next largest of field is at Chauk in the same District. There has been a gradual decrease in the output here also but there was a slight recovery in 1936 with an output of 100 million gallons. There has been an increase in the output from the wells in the Upper Chindurin District. There were decreases in the output from the wells in the Minbu Thavetuvo and Pakokku Districts. The Burmah Oil Company take their oil to the refineries at Rangoon by pipe line from the Yenangyaung and Cluek Oilfields. Other Companies take it down by river flats. The area under rubber is 107,248 acres.

Manufactures.

There are 1,035 factories, more than half of which are engaged in milling rice and nearly one-seventh are saw mills. The remainder are chiefly engineering works, exton ginning mills, oil mills for the extraction of oil from groundants, and oil retineries connected with the petroleum industry. The total number of persons employed in establishments under the Factories Act in 1936 was 89,230. Peremutal factories employed 33,452 and seasonal factories 5,773. At the Census of 1931, 1950,75 or 5,750, at the class of 1931, 1950,75 or 1950, 1

"Public opinion amongst the Burneses appears to have now verred round in favour of the locally made article in preference to the important of article and the preference to the important of the important for men and women's wear so much in densard for men and women's wear so much in densard for men and women's wear burners. But the men and many artists in siture still remain, the finish of whose work is sometimes very fine. Basselin and many artists in siture still remain, the finish of whose work is sometimes very fine. Basselin much admired in Burne. But perhaps the most famous of all hand-made and indigenous industries is the lacquer work of Pagan with its delicate patterns in black, green, and yellow made and the patterns which is the product of the control of the first of their models, breaking away from the conventionalized forms into which their silver to their models, breaking away from the conventionalized forms into which their silver or their models, breaking away from the conventionalized forms into which their silver work in and crystallized and the new figures display a vigour and life that make thom by recolutes.

Administration.

Burma, which was originally administered as a Lieutenant-Governorship, was deliberately excluded from the operation of the Reform Act of 1919. It was felt that the Province differed

so markedly from the other Provinces in the Indian Empire that its requirements should be separately considered. After reneated discussions the question was referred to a special Burma Reforms Committee, which in 1922 re-commended that all the essential provisions of the Reform Act should be applied to the Province. This recommendation was accepted and its proposals became law. Under this Act Burma became a Governor's Province, with a Governors council and ministers, and council and ministers, and under an executive council and ministers, and conforms to the provinces recreated under the Act of 1919 (q.v.). The main difference was in the size of the electorate. Under the franchise accepted, the rural electorate was estimated at 1,979,450 and the urban electorate had been put as high as 99,882. The Legislative Council consisted of 103 members, of which 80 were elected and the balance nominated. Owing to the special status of women in Burma, female franchise was adopted from the beginning.

Burma was constitutionally separated from India with office from the ist of April 1937 on which date the Government of Burma Act Burma Legislature consists of His Majesty, represented by the Governor and two Chambers Known as the Senate and the Horse of Representatives. The Senate consists of Consists of 122 members.

Burma is divided administratively into Upper Burma (including the Shan States, the Kachin and Chin Hills) and Lower Burma. The Shan States are administered by the Chiefs of the States, subject to the supervision of the Commissioner, Federated Shan States, who is also Superintensient for the Southern Shan States were formed into a Federation on the Shan States. The Northern and Southern Shan States were formed into a Federation on the 1st October 1992, and are designated the F. S. States. The other Shan States in Burma are subject to the supervision of the Commissioner, Sagning Division, The Civil, Candther the Chief State of the State, subject to the restrictions contained in the sanad. The law administered is the customery law of the State.

Under the Governor are eight Commissioners of divisions, three in Upper, four in Lower Burma, and one in the Federated Shan States.

Justice.

The administration of Civil and Criminal Justice is under the control of the High Court of Judicature at Rangoon, which consists of a Chief Justice and the other permanent Judges. The Superior Judical Service consists of District and Sessions Judges; there are also separate Provincial and Subordinate Judical Services.

All village headmen have limited magisterial powers and a considerable number are also invested with civil jurisdiction to a limited axient. It is a supervised to the control of the cont

Public Works.

The P.W.D. comprises two Branches, viz., the Buildings and Roads Branch and the Irrigation Branch.

officers of the administrative rank.

Those of the executive rank are the Executive Engineers and Assistant Executive Engineers one inspective of Beauton States. who number 23 (twenty-three), including the Personal Assistant to the Chief Engineer, on the cadre of the Indian Service of Engineers. Besides this there is also the Burnia Engineering Service (Class I) which has been constituted for the purpose of gradually replacing the Indian Service of Engineers in the B. & R. Branch; so far 19 appointments have been made to the latter service. There are 17 officers in service at present.

The Irrigation Branch of the P.W.D., which is under the control of the Hon'ble Minister of Lands and Revenue, is administered by the Chief Engineer, P.W.D., Burma Irrigation Bratich, who is assisted by a Personal Asstt. There are two permanent Superintending Engineers in charge of Circles, one of whom is stationed at Rangoon and the other at Maymyo. These are officers of the Administrative rank.

Those of the Executive rank are the Executive Engineers and Asst. Executive Engineers who number 17 on the cadre of the Burma Service of Engineers, Class I, Irrigation Brauch. sides this there is also the Burma Service of

Engineers, Class II, Further, there are a River Training Expert and a Temporary Engineer, the latter being engaged on contract for work of a special nature.

Police.

The Police Force is divided into: Civil, Military and Rangeon Town Police. The first two are under the control of the Inspector-General of Police, the latter is tunder the orders of the Commissioner of Police, Rangeon, an officer of the rank of Deputst Inspector-General, There are Jour other Deputy Inspectors-General, one each for the Northern, Southern and Western Ranges. and for the Railway and Criminal Investigation Department.

A special feature of Burma is the Military Police. Its officers are seconded from the British or Indian Army and its rank and file are recruited from natives of India and Burma. The experiment of recruiting Burmese on a small scale has been moderately successful, The organisation is military, the force being divided into three Battalions. The object of the force is to supplement the Givil Police in the maintenance of law and order. Their duties duties, apart from furnishing columns for active operations against dacoits, etc., are to provide escorts for specie, prisoners, etc., and guards for treasuries, jails, lockups and courts.

Education .

Under the Minister of Education there is the Director of Public Instruction with an Assistant Director, both belonging to the Educational Service and an Adtion Branch.

The B. & R. Branch of this Department Land Branch of the present of Indian one Asstt, Inspector of School Physical Training, appointed on a Temporary basis. There is also one Inspectress of Schools. There is a Chief

> A centralized, teaching and residential University for Burma has been established in Rangoon. It now provides courses in Arts, Science, Economics, Law. Education. Engineering. Medicine and Agriculture.

> English and A. V. Schools are controlled by the Education Dept. A remarkable feature of edu-cation in Burma is the system of elementary education evolved, generations ago, by the genius of the people. Nearly every village has a monastery (hpoongyl-kyaung); every monastery is a village school and every Burman boy must, in accordance with his religion, attend that school, shaving his head and for the time wearing the vellow robe. At the hoongyi-kyaungs the boys are taught reading and writing and an elementary indigenous system of arithmetic. The result is that there are very few boys in Burma who are not able to read and write. Vernacular education is in the hands of Local Educational authorities.

Among special institutions, the Government Technical Institute, Insein, provides courses in Mechanical, Civil and Electrical Engineering, the Burma Forest School of Symmana, courses in Forestry, the Agricultural College, Mandalay, courses in Agriculture and the Veterinary College, Insein, courses in Veterinary science, The Mary Chapman Training College for Teachers and School for the Deaf exists in Rangoon and schools for the blind, at Moulmein and Rangoon

A liberal scheme of State Scholarships provides for the despatch of 6 to 12 scholars to Europe each year. Medical.

The control of the Medical Department is vested in an Inspector-General of Civil Hos-pitals. Under him are 37 Civil Surgeons, There are also a Director of Public Health, two Assistant Directors of Public Health, and a Director. Harcourt Butler Institute of Public Health, at which there is now a Public Analyst (which post is at present held in abevance for purposes of economy) and to which is also attached a Malaria Bureau. There are also an Inspector-General of Prisons, three whole-time Superintendents of Prisons, a Chemical Examiner and Bacteriologist and a Superintendent of the Mental Hospital. There is also a post of Hygiene Publicity Officer, which for the present is held in abevance.

The Pasteur Institute was opened in Rangoon July 1915. The Director is a member of the Indian Medical Service.

As in the case of Bombay Presidency, the province known hitherto as Bihar and Orissa has suffered a territorial diminution owing to the constitution of the Orissa Division as a separate province. The following details thereseparate province. The following details there-fore appertain to the new Bihar province after the separation of Orissa as from April 1, 1936.

Bihar lies between 20°-30' and 27°-30' N. latitude and between 82°-31' and 88°-26' E. latitude and between \$2-31 and \$3-20 H.
longitude and includes the provinces of Bihar
and Chota Nagpur, and is bounded on the
north by Nepal and the Darjeeling district
of Bongal; on the east by Bengal and the Bay of Bengal; on the south by the new province of Orissa; and on the west by the United Provinces of Agra and Oudh and the Central

Provinces. The area of the territories which constitute the Governorship of Bibar is 69,348 square miles. The States in Chota Nagpur which were included in the Province have since the 1st April 1933 been transferred to the control of the Resident Eastern States and no longer form part of the Province. Chota Nagour is a mountainous region which separates them from the Central Indian Plateau, Bihar comprises the valley of the Ganges from the spot where it issues from the territories of the Governor of the United Provinces of Agra and Oudh till it enters Bengal near Rajmahal. South of Bihar lies Chota Nagour. Following the main geographical lines there are four Civil Divisions with headquarters at Patna, Muzaffarpur (for Tirhut), Bhagalpur and Ranchi (for Chota Nagpur). The head-quarters of Government are at Patna. The new capital which lies between the Military Cantonment of Dinapore and the old civil station of Bankipore is known as "Patna," the old town being called "Patna City."

The People. The Province has a population of 32,558,05 persons. Even so with 467 persons per square mile, Bihar is more thickly populated than Germany. There are only four towns, which can be classed as cities, namely, Patna, Gaya, Jamshed pur and Bhagaipur. During the last ten years the population of Patna has been steadily increasing. Hindus form an over-whelming majority of the population. Though the Muhammadans form about one-tenth of the total population they constitute more than one-fifth of urban population of the province. one-fith of urnan population of the province.

Animists account for 5°9 per cent. These are inhabitants of the Chota Nagpur plateau and the Santal Parganas, the latter district being a continuation of the plateau in a northeasterly direction.

Industries.*

The principal industry is agriculture, Blhar, more especially North Bihar, being the "Garden of India." Rice is the staple crop but the spring crops, wheat, barley, and the like are of considerable importance. It is estimated that the normal area cultivated with rice is 15,094,000 acres or about 48 per cent. of the cropped area of the Province. Wheat is grown on 1,221,800 acres, barley on 1,307,400 acres,

maize or Indian-corn on 1,697,300 the latter being an autumn crop. Oil-seeds are an important crop, the cultivation having been estimated by the demand for them in Europe. It is estimated that 1,820,800 acres of land are annually cropped with oil-seeds in the Province. There is irrigation in Shahabad, Gaya, Patna and Champaran districts. The Indigo industry is steadily on the decline, the total area sown having decreased from 342,000 acres in 1896 to 500 acres in 1933. The principal cause of this was the discovery of the possibilities of manufacturing synthetic or chemically prepared indigo on a commercial scale. Its place as a cron manufactured for export has been largely taken by sugarcane, the cultivation of which has been considerably extended owing to the high prices given by sugar factories. In the district of Purnea and parts of the Tirhut Division jute is grown, but the acreage varies according to the price of jute. The last serious famine was in 1895-96, but there was a serious shortage of foodstuffs in the south of the Province in 1919. In any year in which monsoon currents from either the Bay of Bengal or the Arabian Sea are unduly late in their arrival or cease abruptly before the middle of September the agricultural situation is very grave. It may be said that for Bihar the most important rainfall is that known as the hatia, due towards the end of September or up to middle of October. Rain at this time not only contributes materially to an increased outturn of the rice crop, but also provides the moisture necessary for starting the spring or rabi crops.

Manufactures.

Opium was formerly, with indigo, the chief manufactured product of Bihar, but in conse-quence of the agreement with the Chinese Government the Patna Factory has been closed. At Monghyr the Peninsular Tobacco Company have erected one of the largest cigarette factories in the world and as a result tobacco is being grown much more extensively. The Tata Iron and Steel Works at Jamshedour in Singbbhum district are also one of the largest in the world and numerous subsidiary industries are springing up in their vicinity. The most important of these are the Tinplate Company of India, Agricultural Implements, Ltd., Enfield Cable Company of India, Enamelled Ironware, Limited, and Indian Steel Wire Products. The nonulation of Jamshedpur is rapidly approaching 100,000 and it consumes 11 million tons of coal annually. This part of the province has also some of the richest and most extensive iron mines in the world and supplies the Iron and steel works in both Bengal and Bihar with raw materials, but the raising of coal is still the most important of the mineral industries in the province. The coalfields in the Manbhum District have undergone an extraordinary development in the past twenty years, while valuable new fields are being developed valuable new neids are being developed at Ramagarh, Bokaro and Karanpure in Hazaribagh. This same district is the most important mics mining centre in the world both on account of the quality as well as the size

^{*} The figures given in this paragraph relate to British territory only.

Santal Parganas and Gaya are also the chief centres for the production of lac and the manufacture of shellac, the latter of which is exported from India to the value of ten crores annually.

Administration.

The Province on first constitution was administered by a Lieutenant-Governor-in-Council, thus being unique in India as the only Lieutenant Governorship with a Council. Under the Reform Act of 1919 it was raised to the status of a Governorship, with an Executive Council and Ministers. The principles of the provincial administration are fully explained elsewhere. The Provincial Governorships, where the division of the administration into Reserved Subjects, in charge of the Governor and his Executive Council, and Transferred Subjects, in charge of the Governor and Ministers chosen from the Legislative Council, is set out in detail. In all these respects Bihar is on the same plane as the other Provinces in India.

Public Works.

The Public Works Department in the Province of Bihar consists of two separate branches, viz. :-(1) the Buildings and Roads which includes Railways and the Public Health Engineering Branches and (2) Irrigation. There was only one Chief Engineer, in charge of both the branches up to the 15th October 1937, who was also Secretary to the Local Government with an Engineer Officer as Under-Secretary in the Buildings and Roads branch and a non-professional Assistant Secretary and a Deputy Chief Engineer in the Irrigation branch under him. The Chief Engineer was also Chief Inspector of Local Works, Bihar. An additional post of temporary Chief Engineer and Deputy Secretary to Government was restored with effect from the 16th October 1937 and the Irrigation Branch was placed under direct charge of this officer, leaving Buildings and Roads Branch under the Chief Engineer and Secretary to Government from the above date. The Electrical work of the Province is carried out by an Electric Inspector and Electrical Engineer and a staff of subordinates.

Justice. The administration of justice is con-trolled by the High Court of Judicature at Patna. In the administration of civil justice at Patna. In the administration of civil justice below the High Court are the District Judges as Courts of Appeal, the Subordinate Judges and the Munsiffs. The jurisdiction of a District Judge or Subordinate Judge extends to all original suits cognizable by the Civil Courts. It does not however, include the powers of a Small Cause Court, unless these be specially contered. The ordinary jurisdiction of a Munsif extends to all suits in which the amount or value of the subject matter in dispute does not exceed Rs 1,000 though the limit may be extended to Rs. 4,000. On the criminal side the Sessions Judge hears appeals from Magistrates exercising first class

of its output. Manbhum, Palamau, Ranchi, the | being referred to the District Magistrate who is responsible for the peace of the district. In the non-regulation districts the Deputy Commissioner and his subordinates exercise civil powers and hear rent suits.

Land Tenure.

Almost the whole of the province of Bihar was covered by the permanent Settlement of 1893. A number of estates are held direct by Government, having come into the direct management of Government in various ways. Other estates are managed temporarily by the Board of Revenue under the Court of Wards Act, while in Chota Nagpur a number of estates are managed by Managers appointed under the Chota Nagpur Encumbered Estates Act. There are two Tenancy Acts in force in the Province;— In Bihar the Bihar Tenancy Acts is in force. This is the same as the Bengal Tenancy Act, 1885, with a number of important differences consequent on recent amendments of the Act. In Chota Nagpur, which is largely inhabitated by aboriginal peoples, the Chota Nagpur Tenan-cy Act, an Acts pecially adopted to their requirements, is in force. There is a third tenancy system in the Santal Parganas where the tenancy law is contained in Regulation III of 1872 and II of 1886 and the record-of-rights prepared in the settlement. Finally in a small part of South Bihar where there is a large aboriginal population a special chapter of the Bihar Tenancy Act designed to prevent alie-nation of land by aborigines is in force.

Throughout the province a system of periodic settlements is in vogue. In these settlements the maps and cadastral ledgers are revised and In these settlements fair rents may be settled. In many districts the settlement records are now out of date and

in one or two it is nearly 40 years since the last settlement was undertaken

In the greater part of the Santal Parganas and in many parts of Chota Nagpur the head-men system prevails. The usual practice is that the headmen are responsible for the collection of the rents and their payment to landlords after deduction of a percentage as their remuneration. Special steps have been taken in the settlements to record the rights and duties of the headmen, and the special rights and privileges of certain privileged classes of tenants among the aboriginals.

Police.

The Departments of Police, Prisons and Registration are each under the general direction of Government, supervised and inspected by an Inspector-General with a staff of assis-tants. The Commissioner of Excise and Salt is also Inspector-General of Registration.

Under the Inspector-General of Police are three Deputy Inspectors-General and 24 Super-intendents. There are also 25 Assistant Super-intendents of Police and 28 Deputy Superintendents. The force is divided into the District Police, the Railway Police and the Military Police. A Criminal Investigation Department appeals from Magistrates exercising first class [Polles, the Mailway Fource and one muons) provers while the District Magistrate is the Polles. A Criminal Investigation Department appellate authority for Magistrates exercising has also been formed for the collection and second and third class powers. The District distribution of information relating to professional experiments of the collection and the processing has been formed for the collection and the processing the companion of the companion of the collection of information relating to professional experiments of the collection of the collectio police reports, cases of difficulty or importance action which its assistance may be invoked.

There are three companies of Unmounted stationed. 60 Dispensaries are maintained by Military Police and one company of Mounted Government in addition to 630 Dispensarios Military Police which are maintained as reserves to deal with serious and organised disturbances persons, etc. 7,191,877 patients including and perform no ordinary civil duties. There are 882,680 in-natients were treated in all the dispenalso five plateons of armed police stationed at saries in 1935. The total income of the dispen-patha to serve as a provincial reserve.

Education.

The position of education in the Province, tutions amounted to Rs. 34,01,716. with the numbers attending schools, is set out in the section Education and the tables attached

of the Inspector-General of Civil Hospitals who established at Patna. Centres for anti-rable is a Member of the Indian Medical Service. treatment have been started at Patna. fuside the administrative boundary of Bombay Presidency, the new province of Orissa is the result of the amalgamation of various Oriya speaking peoples who had till then belonged to three separate provinces, viz., Bihar and Orissa,

Madras and the Central Provinces.

The Oriyas are an intensely patriotic people who bear great love for their culture and language. They have always opposed any move to dismember the Oriya-speaking tracts for political or administrative considerations. The Orivas trace their traditions far back to the days of minority in Madras, Bengal, Bihar and Orissa Mahabharata, when there was the unclent and the C. P. kingdom of Utkal embracing a wide territory now known as Orissa. Through successive conquests and annexations in known history, the Oriyas passed through varying fortunes, until at the time of the Moghul conquest the Orissa country was broken up, and the people gradually lost race consciousness, although common language and literature continued to act as a link.

Race consciousness was revived with the spirit of education under the British regime and after the great famine of 1866, Sir Stafford Northcote suggested the separation of Orissa from Bengal. The proposal was turned down, but the patriotic fervour underlying the new

move persisted and gave rise to a series of demands.

History of Separation.

The agitation for the unification of Oriva tracts first obtained official recognition in 1903 when the Government of India accepted the principle of bringing in the scattered sections of the Oriya speaking population under a single administration. About the same time, there was brought into existence the Utkal Union Confer-

ence, which carried on a sustained agitation to unify the Oriyas.

The first stage of success was achieved in 1912 when the area of modern Orissa was separated from Bengal and amalgamated with Bihar to form what came to be known as the province of Bihar and Orissa. Although the status of Orissa in the province of Bihar and Orissa was much better than before, the advocates of Oriya unity continued to press their claim for the formation of Orissa into a distinct admini-strative unit, The late Mr. Montagu and Lord Chelmsford saw the justice of the Oriyas' claim and generally favoured the redistribution of provinces on a linguistic basis for the success of responsible government. They left it, however, in 1920.

The Bihar and Orissa Legislative Council endorsed the idea of amalgamation, but the Madras Council held an inconclusive debate. The Madras Government was against the

The Magras Government was against one surrender of any of its territory, while the C. P. Government had an open mind.
The Government of India then appointed what is called the Philip-Duff Committee to make local inquiries with a view to ascertaining the attitude of Oriya speaking people in the

Like Sind, Orissa was constituted a separate their union with Orissa. Messrs. C. L. Phillip province on April I, 1936. If Sind was a separate and A. C. Duff reported that there was "a segaraphical, ethnological and linguistic unit genuine, long standing and deep seated deep. on the part of the educated Oriya classes of the Oriva speaking tracts for amalgamation of these tracts with Orissa under one administration' The next stage came with the appointment

of the Simon Commission in 1927. A subcommittee of the commission presided over by Major Attlee recommended the creation of a separate administrative unit for Orissa, agreeing with the Orivas' contention that, under the autonomous conditions proposed by the Com-mission, the Oriyas would be an ineffective

Round Table Conference.

When the idea of a federation of autonomous units dawned at the first Round Table Confer-ence, the Oriyas' demand was presented in a crystallised form by the Maharaja (then Raja) of Parlakimedi, who asked for a separate province for Orissa. "We want a province of our own," he said, "on the basis of language and race so that we can be a homogeneous unit with feelings of contentment and peace, to realise, and be benefitted by, the projected reforms and look forward to the day when the federated States based on common language and

The Orivas' demand derived adventitions support from the strength of the Muslim claim for the constitution of Sind as a separate province. Those who backed up the case of Sind could not oppose Oriyas' claim, which, therefore, came to be recognised at the Round Table Conference.

In September 1981, the Government of India appointed the O'Donnell Committee to examine and report on the financial and other consequences of setting up a separate administration for Orissa and to make recommendations regarding the boundaries in the event of separation. The Committee recommended the creation of a new province including the Orissa division, Angul, the Khariar Zamindari of the Raipur district and the greater part of the Ganjam district and the Vizagapatam agency tract. According to the Committee, the new Orissa province was to have an area of 32,681 square miles and a population of about 8,174,000 persons. On the question of financial and other consequences of separation, the Committee made recommenda-

tions generally on the lines of the Sind Committee, In January 1936, an Order-in-Council was issued by His Majesty's Government constituting to the provincial governments concerned to Orissa as a separate province to be brought formulate opinions and make concrete proposals into line with other provincial units on the after the advent of the Montford constitution inauguration of Provincial Autonomy on April 1, 1937.

Extent of Province.

The following are the areas comprised in the new province of Orissa:—
1. That portion of the Province of Bihar

 That portion of the Province of Bihar and Orissa which was known as the Orissa Division thereof. 2. Areas transferred from the Presidency

of Madras :--

(i) The Ganjam Agency Tracts; (ii) The following areas in the non-Agency

north of Madras Presidency on the question of portion of the Ganjam district, viz., the taluks

of Ghumsur, Aska, Surada, Kodala and Chatra-pur, so much of the taluks of Ichapur and Berhampur as lies to the north and west of the houndary line ;

(iii) So much of the Parlakimedi Estate as lies to the north and east of the said line; and (iv) The following areas in the Vizagapatam district, that is to say, the Jeypore (Impartible)

Estate and so much of the Pottangi taluk as is not included in that estate. 3. Areas transferred from the Central

Provinces :--

(i) The Khariar Zamindari in the Raipur district; and

(ii) The Padampur Tract in the Bilaspur district, that is to say, the detached portion of that district consisting of 54 villages of Chandrapur-Padampur estate and also of the following villages, viz., Kuhakunda, Badimal, Panchpudgia (Soda), (Malguzari). Barhampura Panchpuragia (Palsada), Jogni and Thakurpal, (Jogni.)

Agriculture.

Agriculturally and industrially, Orissa is a backward region. It has suffered as the result of being tacked to one or other of many provinces for administrative purposes. This explains why there are no big factories in Orissa, although there are a large number of indigenous cottage industries bespeaking the people's artisanship. Among the cottage industries may be mentioned handloom industries, brass, bell metal, silver filigree, cutlery, wood and paper pulp and horn articles. Sugarcane and jute are two important commercial crops in Orissa, and areas under both these are already increasing. The Orissa forests can supply a large quantity of valuable timber and fuel. Fisheries too are an important industry of Orissa. The two valuable sources of supply are the extensive Chilka lake and Puri where on an average 9,000 maunds of cured fish and 50,000 maunds of uncured fish respectively are exported to Calcutta every year.

The chief mineral resources of Orissa are iron, coal, limestone, manganese and mica. Iron ore is mostly found in Mayurbhanj, Keonjhar, and lond, all States. The deposits in this area are remarkable for the enormous quantity extremely rich ore they More than 60 per cent, of the ore extracted in India comes from these areas of Orissa for which there is a ready demand from the Tata Iron and Steel Works in Janishedpur and Messrs. Bird & Co. of Calcutta. Orissa cannot boast of such extensive coal mines as those of Bengal and lihar, but coal has been found in Angula, Sambalpur and in the states of Gangpura, Talcher and Athmallik. Talcher has the largest coalfields and they are being progressively exploited. The Agricultural and the Industries Departments which remained under the control of the Revenue Commissioner till November 1936 was taken over by the Director of Development. A Deputy Director of Agriculture was Rs. 13,11,000 of which Rs. 3,70,000 were not appointed for Orissa. By the amalgamation receipts (including opening balance) on account of the ex-Matras and ex-Central Provinces of State Provident Funds, General Police Fund areas 15 additional factories were added to and Local Fund and Civil Deposits, those already in Orissa Division and four fish curing yards with their staff were transferred begin with an opening balance of Rs. 12,55,000 from the Madras Presidency.

Administration.

Sir John Austin Hubback, K.C.S.I., was appointed to be the first Governor of the infant province of Orissa.

Under paragraph 10 of the Order in Council, the Patna High Court is the High Court for the Province. To enable the High Court to hear on Circuit, cases of the Ex-Madras and ex-Central Provinces areas, Clause 35 of the Letters Patent was amended by Regulation XII of 1936. A new Court of an Agency Sub-Judge at Jeypur, a Munsif's Court at Nawapara and three additional Criminal Courts, consisting of a District Magistrate's Court and two subdivisional Magistrate's Courts, were established in 1936. The Cadre of the Indian Civil Service was

provisionally fixed at 17 including 13 superior posts and 4 inferior posts. As it was considered undesirable to form a separate Cadre for such a small number the Cadre is joint with Bihar. In the elections under the new Reforms the

Congress secured complete majority of seats in the Assembly. The first general elections under the constitution which established Orissa as a separate

province resulted in a clear majority for the Congress Party. In a house of 56 the Congres counted 36 as its adherents. The Governor thereupon summoned the leader of the Congress Party to form a Ministry, but the latter, in obedience to the directions of the party headquarters, declined unless he were given certain assurances by the Governor, (See chapter on Indian National Congress). After a prolonged controversy this point was amicably settled, and the Congress Party leader formed a Cabinet, Late in 1937, the legislature decided that Cuttack should be the capital of the province.

For the first six months the Governor authorised the revenue and expenditure of the province, but in September 1937 the new Ministry formally presented a budget for the remaining half of the year. The real handiwork of the Cabinet is to be seen in the budget for 1938-39 which was presented on March 1, 1938, by the Hon, Mr. Blswanath Das.

The following is a summary of the budget :-(In Thousands of Rupees) Deficit.

Receipts Expenditure + Surplus 1937-38 (Budget Estimates) 1,89,57 1,84,37 + 520

1937-38 (Revised Estimates) +4811,90,53 1,85,72 1938-39 (Budget

1.94.56 -- 248 Estimates) 1,92,08 Expenditure charged to revenue was expected to amount in 1938-39 to Rs. 1.94,56,000. principal expenditure heads were "civil works". Rs. 32,10,000; "General Administration" Rs. 32,10,000; "General Administration" 30,42,000; "Education" Rs. 26,50,000; and 30,42,000; "Education "Police" Rs. 23,61,000,

Receipts other than revenue were estimated at Rs. 2,99,14,000 and expenditure not charged to Revenue at Rs. 2,86,03,000, the net receipt being

It was estimated that the year 1937-38 would Actually the year opened with a balance of Rs. 22,21,000, including a balance of Rs. 3,12,000,

earmarked for particular items of expenditure The revised estimate of revenue for 1937-38 was Rs. 1,90,53,000 against the budget estimate of Bs. 1,89,57,000 or Rs. 96,000 more than was anticipated. On the other side of the account, the revised estimate of expenditure debitable to revenue was Rs. 1,85,72,000 against Rs. 1,84,37,000 originally estimated, i.e., expenditure is Rs. 1.35 lakhs more than was originally

estimated The revised estimate of closing balance for 1937-38, was 1,53,000.

The closing balance for 1938-39 was expected to be Rs. 9,10,000, the total receipts and expenditure being Rs. 4,89,69,000 and Rs. 4,80,59,000 respectively. The closing balance includes de-posit account for fund for Orissa Buildings,

Famine Relief Fund, etc. Some of the features of the budget for 1938-39 (which showed a deficit of Rs. 2 lakhs and 48 thousand) are grants for Rural Reconstruction (Rs. 4,50,000 for three years); stipends for Harijans and hill tribes, (recurring expenses of Rs. 4,645); recurring grants to local bodies for primary education as compensation for the abolition of fees in North Orissa Primary Schools (Rs. 5,155); non-recurring grants for the improvement of cocount cultivation (Rs. 1,850) a lump sum grant of Rs. 24,000 to the All-India Villago Industries Association for the Cottage Industries Institute: creation of a temporary division for drainage and flood control work (Rs, 29,400) and grant for the Flood Enquiry Committee in Orissa (Rs. 10,000).

Excise account, as it is part of the policy of the Government to reduce consumption of opium and in this connection, the anti-opium cam-paign will be taken up in the district of Balasore.

The Ministry also granted a remission of As. 12

"We are now exploring the possibility of diverting the Mahanadi water for the purposes of irrigation; if found feasible it will be useful both in increasing the productivity of soil and minimising floods," said Mr. Biswanth Das, in presenting the budget. "Bigger industries have not escaped our attention. An carnest endeavour is being made to start a sugar factory An earnest in the flood-affected area to encourage cultivation of sugar-cane, proved to be flood-resisting. Opening of a paper factory in Sambalpur District by Messrs. Birla Brothers and a factory for on manufacturing chemicals at Cuttack will no doubt absorb many unemployed hands and will give impetus to industrialisation. One and half lakis have been allotted in current budget to help these endeavours.

Referring to rural developments the Premier Reterring to rural developments are rremor said: "A three-year programme has been chalked out to provide annually one thousand wells. Necessary provision had been made in the budget. The question of reviving village services and putting them on statutory basis is under examination. Steps have been taken to train village cow-herds for improving animal husbandry in rural areas. The Chaukidari It is the desire of the Government to see that this smallest unit of village administration is ascertained and the same is vested with responsibilities of village welfare, sanitation and upkeep of village ser-vices. Time has come when important villages should have village courts,

The Government have reduced irrigation cess which affects existing income from irrigation in North Orissa by Rs. 1,38,000. Grazing fees A smaller revenue is expected on the Provincial throughout the province have been reduced by half. School fees in all elementary schools in North Orissa will be abolished so as make pri-

mary education free. Legislation calculated to improve the lot of the agriculturists, to reform the land tenure and per user in water notes in North Orisas, curtailed its promote the welfare of the innesses was under-tended the under the head "Police" and taken by the Ministry in the past year, It has provided more money for Education, Public Health, Agriculture and Civil Works,

The Central Provinces and Berar.

from H.B.H. the Avam and the remained held by Feudatory Chiefs. The population (1931) is 15,323,058 in C. P. British Districts and Berar. Various parts of the Central Provinces passed under British control at different times in the wars and tumult in the first half of the 19th century and the several parts were amalgamated after the Mutiny, in 1861, into the Chief Commissioner-ship of the Central Provinces. Berar was, in 1853, assigned to the East India Company as part of a financial arrangement with H.E.H. the Nizam for the maintenance of the Hyderabad Contingent, and was leased in perpetuity to the Central Provinces in 1903, as the result of a fresh agreement with H.E.H. the Nizam.

The Country.

The Central Provinces may roughly be divided into three tracts of upland, with two intervening ones of plain country. In the north-west, the Vindhyan plateau is broken country, covered with poor and stunted forest. Below its precipitous southern slopes stretches the rich wheat growing country of the Nerbudda valley. Then comes the high Satpura plateau, characterised by forest-covered hills and deep water-cut ravines. Its hills decline into the Nagpur plain, whose broad stretches of "deep" black cotton soil make it one of the more important cotton tracts of India and the wealthiest part of the C. P. proper. The Eastern half of the plain lies in the valley of the Wainganga and is mainly a rice growing country. Its numerous irrigation tanks have given it the name of the "lake country" of Nagpur. Further east is the far-reaching rice country of Chattisgarh, in the Mahanadi basin. The southeast of the C. P. is again mountainous, containing 24,000 square miles of forest and precipitous ravines, and mostly inhabited by jungle tribes. The States of Bastar and Kankar lie in this region. Berar lies to the south west of the C. P. and its chief characteristic is its rich black cotton-soil plains,

The People.

The population of the province is a comparatively new community. Before the advent of the Aryans, the whole of it was peopled by Gonds and other primitive tribes and these aboriginal inhabitants fared better from the Aryans than their like in most parts of India because of the rugged nature of their home. But successive waves of immigration flowed into the province from all sides. The early inhabi-tants were driven into the inaccessible forests and hills, where they form nearly a quarter of the whole population of the Central Provinces being found in large numbers in all parts of the province, particularly in the South-east. The main divisions of the newcomers are indicated by the language divisions of the province. Hindi | the working population is female.

The Central Provinces and Berat compose a brought in by the Hindustani-speaking peoples great triangle of country midway between Bom-io of the North, prevails in the North and Bass, bay and Bengal, Their area is 131,557 sq. miles, Marathi in Berar and the West and Centre of which 80,637 are British territory proper, the Central Provinces, Hindi is applied by Spoken by bay and Bongal, Their area is 131,000 sec. units of which Sol37 are British territory proper the Central Provinces. Hindl is spoken by which Sol37 are British territory properties 1,388 (viz. Berar) held on perpetual base 56 per cent, of the population and is the linguist from H.E.H. the Nizam and the remainder frames. Marathiby 31 per cent, and Gondition (1931) 7 per cent. The effects of invasion are curiously 1, 2 per cent. The operation of Moslems illustrated in Berar, where numbers of Moslems have Hindu names, being descendants of for-mer Hindu officials who on the Mahomedan invasion adopted Islam rather than lose their positions. The last census shows that a gradual Brahmanising of the aboriginal tribes is going The tribes are not regarded as impure by on. The tribes are not regarded as impure by the Hindus and the process of absorption is more or less civilising.

Industries.

When Sir Richard Temple became first Chief Commissioner of the C. P. the province was landlocked. The only road was that leading in from Jubbulpore to Nagpur. The British administration has made roads in all directions, the two trunk railways between Bombay and Calcutta run across the province and in the last few years a great impetus has been given to the construction of subsidiary lines. These developments have caused a steady growth of trade and have aroused vigorous progress in every department of life. The prime industry is, of course, agriculture, which is assisted by one of the most admirable agricultural departments in India and is now receiving additional strength by a phenomenal growth of the co-operative credit movement. The land tenure is chiefly on the malguzari, or landlord system, with numerous variations, from the great Feudatory chief ships, which are on this basis, to holdings of small dimensions. of land legislation has gradually been up to protect the individual cultivator. Berar is settled on the Bombay raiyatwari system. 16,090 square miles of the C. P. is Government Reserved forest; in Berar the forest area is about 3,339 square miles. the total forest area being one-sixth of the whole Province. The rugged nature of the greater part of the country makes forest conservation difficult and costly. Excluding forest and waste 67 per cent. of the total land is occupied for cultivation; for the two most advanced districts in the Central Provinces. the proportion averages 83 per cent., while the average figure for the Berar Districts is as high as 93 per cent. The cultivated area has extended almost continuously except for the tempor-ary checks caused by bad seasons. Rice is the most extensive single crop of the Central Provinces, covering nearly 30 per cent. of the cropped area. Wheat comes next with over 15 per cent., then pulses and other cereals used for food then pulses and other cereaus used for food and oil-seeds with nearly 50 per cent, and cotton nearly 6 per cent. In Berar cotton occupies 41 per cent. Next comes juar and then pulses and other cereals and oil seeds of the cropped area, jowar covers 36 per cent., then wheat and oilseeds. In agriculture more than half

Commerce and Manufactures.

Industrial life is only in its earliest development except in one or two centres, where the introduction of modern enterprise along the introduction of modern enterprise along the large control of the province. Nagpur is the chief centre of a busy cotton spinning and weaving industry. The Empress Mills, owned by Tarin manners in the control of the control of the province. The choice that has led to the addition of many mills here and in other parts of the province. The botal amount of Indian yarn experted from the Province during the province that the chief the province of the province o

The largest numbers engaged in any of the modern industrial concerns are employed in manganese mining which in 1936 employed 41,834 persons and raised 568,806 tons. Then follow coal mining with an output of 1,507,986 tons and 12,731 persons employed, the Jubbulpore marble quarries and allied works, the limestone quarries and the mines for pottery clay,

soapstone, etc.

The total number of factories of all kind legally so described was 1,033 in 1936, the latest period for which returns are available and the number of people employed in them 63,188. The same oconomic influences which are operated in the control of the control o

Administration.

The administration of the Central Provinces and Berat is conducted by a Governor who is appointed by the Crown. He is assisted by seven Secretaries and four Under Secretaries. Under the provisions of the Govt, of India Act, 1935, the administration is conducted of the Control of the Control

This Province which has a unicameral Legislature, consists of 112 members distributed as follows:— Class of constituency or constituencies—

General Urban .. 10 \ No seats. LRA GeneralRural Muhammadan Urban ... 12 Muhammadan Rural Women -Anglo-Indian 1 seaf European .. Backward areas & Tribes. . Commerce 2 seafs. 3 Landholders . . . Labour University .. 1 scat.

Of the 84 General seats 20 seats are reserved for members of the Scheduled castes.

The C.P. are divided for administrative below the Dis purposes into three divisions and Berar consticutes a division. Each of these is controlled by a second class.

Commissioner. The divisions are sub-divided into districts, each of which is controlled by a Deputy Commissioner, immediately subordinate to the Commissioner. The principal heads of Provincial departments are the Commissioner of Settlements and Director of Land Records, the Chief Conservator of Forests, the Inspector-General of Civil Hospitals, the Director of Public Health, the Inspector General of Police, the Inspector-General of Prisons, the Director of Public Instruction, the Excise Commissioner and Superintendent of Stamps and Inspector-General of Registration, and Registrar-General of Births, Deaths and Marriages, the Director of Agriculture, the Registrar of Co-operative Societies, the Director of Industries, the Legal Remembrancer, the Director of Veterinary Services and a Chief Engineer, Public Works Department, Buildings and Roads and Irrigation Branches. The Deputy Commissioners of districts are the chief revenue authorities and District Magistrates and they exercise the usual powers and functions of a district officer. The district forests are managed by a forest officer, over offests are managed by a forces whom the Deputy Commissioner has certain powers of supervision, particularly in matters affecting the welfare of the people. Each district has a Civil Surgeon, (except Mandla, Drug and Balaghat where there are Assistant Surgeons) who is generally also Superintendent of the District Jall except at Central Jalls at Nagpur and Jubbulpore and District Jails at Raipur, Narsinghpur, Amraoti and Akola where there are whole time Superintendents and whose work is also in various respects supervised by the Deputy Commissioner. The Deputy Commissioner is also Marriage Registrar and manages the estates of his district which are under the Court of Wards. In his revenue and criminal work the Deputy Commissioner is assisted by (a) one or more Assistant Commissioners, or members of the Indian Civil Service; (b) one or more Extra Assistant Commissioners, or members of the Provincial Civil Service, including a few Anglo-Indians and (c) by Tabildars and Naib Tabildars, or members of the Subordinate service. The district is divided for administrative purposes into tabsils, the average area of which is 1,500 square miles. In each village a lambardar or representative of the proprietary body is executive headman.

Justice.

The High Court of Judicature at Nagpur, which was established in January 1838, is the highest court of appeal in civil cases, and also the highest court of criminal appeal and revision for the Central Provinces and Berar including proceedings against European British subjects and persons Jointly charged with European British subjects.

Subordinate to the High Court are the District and Sessions Judges (9 in number) each of whom exercises civil and criminal jurisdiction in a Civil and Sessions district comprising one or more Revenue districts. The civil staff below the District and Sessions Judge consists of Subordinate Judges of the first and second class.

Local Self-Government.

Municipal administration was first introduced under the Punjab Municipal Act and the Municipality of Nagpur dates from 1804. Several revising Acts extend its scope and the C. P. Municipalities act passed towards the end of the year 1922 has considerably increased the power of the Municipal Committees. The C. P. Municipalities are proposed to the passed to the power of the Municipal Committees. The C. P. Municipalities was been proposed to the passed of the proposed to the passed of the power of

Under the Central Provinces Local Self-Gerernment Act passed in 1920 as amended in 1931 there is a local Board for each tabil and a local Board for each tabil and a Echangabad, Ohlindiwara and Sausor districts each of which has two district councils. The local board consists of elected representatives of circle and nominated members other than Government the board, and the constitution of the district council is a certain proportion of elected representatives of local boards, of members solected by those representatives and or nominated by Governments.

The district councils in the Central Provinces have power of taxation within certain limits and local boards derive their funds in allotments from the District Councils. The new Central Provinces Local Self-Government Act has also been applied to Berar. The Office Bearers of all the district councils and with few exceptions of local boards also are non-officials.

Rural education, sanitation, medical relief and rural communications are among the primary objects to which these bodies direct their attention, while expenditure on famine relief is also a egitimate charge upon the District Council funds.

The Central Provinces Village Panchayat Act was passed in the year 1909. So far 945, Panchayats have been established. As the result of a recommendation of a Commistee appointed in 1925 to look into the question of Panchayats a Village Panchayat Officer was appointed to guide the developments of the Panchayats years. This post was kept vacant on account 18 has now been filled in with effect from the 24th May 1925.

Public Works.

The Public Works Department, which comprises Buildings and Roads and Irrigation Branches, is under the control of the Chief Engineer are two Superioral tigo forerments. For the Public Work of both branches them supervise the work of both branches The Province is well served by a network of roads, but in a number of cases they are not fully than the public work of the public traffic at times during the rails.

State irrigation was introduced early in the present century mainly as a result of the resource with a state of the recommendations of the Irrigation Commission in the Middle and High Schools. The Scondary School as Wennedia (1901-03). During the last hirty-seven years be either Vernacular Middle Schools in which a sum of Rs. 7.25 cores has been expended on the construction of irrigation works, of which in colo mainly in the vernacular with an option

the more important are the Wainganga, Tandula, Mahanadi, Kharung and Maniari canals.

Three works, vic., the Mahanadi and Wanganga. Canals and the Asola Mendha tank, were sanctioned originally as productive works and the remainder were all sanctioned as unproductive to the control of th

Police.

The police force was constituted on its present basis on the formation of the Province, the whole of which including the Cantonments and the Municipalities, is under one force. The strength is equal to one man per nine square miles of area. The superior officers comprise an Inspector-General, whose jurisdiction extends over Berar, three Deputy Inspectors-General, for assistance in the administrative control and supervision of the Police force, including the Criminal Investigation Department, and the usual cadre of District Superintendents of Police, Assistant and Deputy Superintendents and subordinate officers. On railways special Railway Police are employed under control of two Superintendents of Railway Police with headquarters at Raipur Hoshangabad. A Special Armed Force of 924 men is distributed over the headquarters of eight districts, for use in dealing with armed listurbers of the peace in whatever quarter they may appear. There is a small force of Mounted Folice. The Central Provinces has an rural police as the term is understood in other parts of India. The village watchman is the subordinate of the village headman and not a police official and it is considered very desirable to maintain his position in this respect.

Education.

The Education Department of the Central Provinces and Beraria administered by a Director of Public Instruction, a Registrar, Education Public Instruction, a Registrar, Beneath Department of the Public Instruction, a Registrar, Beneath Department of the Public Instruction, a Registrar, Beneath Department of the Public Instruction Board of the Public Instruction Instruction Board of the Public Instruction Board Instruction Board of the Public I

to take English as an additional language, or Anglo-Vernacular Middle Schools in which instruction is given both in English and the Vernacular. In the High School classes instruction until recently was given in English but the verna-cular was adopted as the medium of instruction at the beginning of the school year 1922-23. For the convenience of pupils whose mother tongue is not a recognised vernacular of the locality a few English medium classes maintained, For administrative purposes schools are further divided according to their management into schools (under public management and schools controlled by private bodies). The former consist of (a) schools conbodies). The former consist of as sensors con-trolled by Government and (b) schools controlled by Local Bodies or Boards. The latter consist of (a) Schools which are aided by grant from Government or from Local Funds and Municipal Funds and (b) unaided schools. All schools under public management, all aided schools and all unaided recognized schools conform in their courses of study to the standards prescribed by the Education Department or by the High School Education Board. They are subject to inspection by the Department and to the general rules governing schools of this type.
They are "recognised" by the Department
and their pupils may appear as candidates for any prescribed examination for which they are otherwise eligible. Unrecognized schools do not follow the rules of the Department, nor are they subject to inspection by the Depart-ment. They are mostly indigenous schools which have been too recently opened to have acquired " recognition," Their pupils may not appear as candidates at any of the prescribed examinations without the previous sanction of the Department.
Primary Education is under the control of
District Councils and Municipal Committees. The Primary Education Act empowers local authorities to introduce compulsion and this is in force in several areas.

Higher Education is under the control of Nagpur University of which the following are constituent colleges:—at Nagpur, Morris College, City College, Office, Chillego, Children, College, Children, College, Children, College, Children, Carlon, College, Children, Child

Secondary Education is under the control of the Board of High School Education, on which the University is represented. The High School certificate awarded by the Board qualifies for entrance to the University.

Medical.

The medical and public health services of the province are respectively controlled by an Inspector-General of Civil Hospitals and Inspector-General of Civil Hospitals and Director of Public Health. The medical department has made some progress since the year medical repairment has made some progress since the year medical repairment of the property of the province of the province

medical institutions are the Mayo Hospitca at Nagur, opened in 1874 with accommodation for \$22 in-patients; the Victoria Hospitcal at Jubbulprox, opened in 1886 with accommodation for \$22 in-patients; the Victoria Hospitcal at Jubbulprox, opened in 1886 with accommodation for the Victoria Hospitcal and the Mulit Memorial Hospitcal at Nagur and the Mulit Memorial Hospitcal and the Orump Children's Hospitcal singular theorem of the Mulit Memorial in-patients. In addition to the existing hospitcal in-patients. In addition to the existing hospitcal for women and Muritzapur a new Hospitcal for women hospitcal exists. Sections have been opened at the hospitcals exists. Sections have been opened at the hospitcals exists. Sections have been opened at the hospitcals exists. Sections have been opened at the lospitcal section. The Mayo Hospitcal, Nagur, was a Armootin 1925, the Victoria Hospitcal at Jubbulpore in 1926, and the Silver Jubilee Hospitcal stalipur in 1928. In accordance with recent policy, 1930 out of 100 local fund dispensarios and exceutive control of local bodies. The Province has one Mental Hospitcal at Nagur. Vacchaation is compulsory in nearly all Municipal towns in the Province. The Central Province in the Province in the Province of the Nagur was opened in 1913.

Finances.

Under the Niemever Settlement accompanying the new constitution the province derives a net benefit of about Rs. 184 lakhs a year, which has been taken into account in the section of the estimates. The Niemeyer benefit is in the shape of (1) remission of outstanding debt for past revenue deficits (Rs. 67.34 lakhs); (ii) remission and cancellation against decentralised balances of pre-1921 Irrigation debt (Rs. 371.61 lakhs) and (iii) and accommodation by consolidation of outstanding balances of pre-autonomy debt due to the Central Govt, on long term repayment (3.30 crores). This is the first year in which the province has raised a permanent public loan of Rs. 50 lakhs forming part of the combined issues of five provinces for repaying short term loan of 1936-37 from the Central Govt, and financing a part of the current capital programme. As a result of the debt remission and cancellation and decentralisation of balances, the province has been relieved of a total liability of about Rs. 439 lakhs out of the outstanding pre-autonomy debt of Rs. 815 lakhs, leaving a balance of Rs. 376 lakhs. Including the fresh loan of Rs. 50 lakhs contracted during the year the total outstanding debt at the close of the year will be Rs. 426 lakhs. In addition the province has an unfunded liability of Rs. 214 lakhs consisting of provident fund deposits of local funds and civil deposits etc. In view of the continued fall of Stamp revenues, ascribed to the operation of debt conicliation boards, steps have been taken to increase revenue and have resulted in an improvement of Rs. 3 lakhs. The search for administrative economy also continues, Al-though the budget is balanced, the dependence of the province on one or two major sources of revenue is a point of weakness and schemes of new taxation necessary for financing prohibition and other ameliorative and development measures are being worked out,

North-West Frontier Province.

broken line of mountains runs almost due south, the Sulaiman Range eventually closes the south of the Province from Baluchistan. The greatest length of the province is 408 miles, its greatest benefit and the province is 408 miles, its greatest benefit as a guare miles. The territory falls into three main geographical divisions: the Cis-Indus district of Hazara; the narrow strip between the Indus and the Hills, containing the Districts of Peshawar, Mardan, the Tribal area. Kohat, Bannu and Dera Ismail Khan, and the rugged mountainous regions on the north and west between those districts and the border line in the second division contain 13,518 square miles. The mountain regions, north and west, are occupied by tribes subject only to the political control of the H. E. the Governor in his the political agencies severally known as the Mala-kand, Khyber, Kurram, North Waziristan and tribes across the frontier. A few hundred miles of the trans-border Territory are interallowances are paid to many of them.

The area of the Province is a little more than the local officer; half that of Bombay (excluding Sind and Aden) signed to secure and amounts to more than three-fifths of the of references and the utilisation of

The North-West Frontier Province, as its the two great waves of Muhammadan invasion amm denotes, is situated on the north-west Last came the Sikins invasion beginning in frontier of the Indian Empire. It is in form 1818. The Frontier Territory was annexed an irregular strip of country lying north by by the British in 1849 and placed under the cast and south by week and may generally be control of the Punjah Government. Frequent east and solut by west of many general vectors and the reaction of the Punjab Government. Freequent described as the tract of country, north "warfare occurred with the protect Freequent Baluchistan, lying between the Indust and most serious phases of the disturbances were the Durand boundary line with Afghanism-the wur provoked by the aggression of Afghanism to the Hubdu Kush. From this range a long against the Waziris in 1919-1020. These have resulted in the establishment at Razmak, a posidividing the province from Afghanistan, until tion dominating the Mahsud Waziri country, of a permanent garrison of 10,000 troops drawn mostly from stations lying in the Plains immediately below the hills. A circular road from Bannu, through Razmak to Sararogha, Jandola and back to the Derajat provides communica-tions transport with this force and facilitates its mobility. The effect of this measure has been a marked improvement in the internal peace of

The division of the Frontier Province from

the Punjab was frequently discussed, with of Afghanistan. Hazara and the four districts the double object, in the earlier stages of these debates, of securing closer and more immediate control and supervision of the Frontier by the Supreme Government and of making such alterations in the personnel and duties capacity as Agent to the Governor-General of frontier officials as would tend to the esta-The area of this tract is roughly 22,828 square blishment of improved relations between the miles and in it are situated, from north to south, local British representatives and the independent tribesmen. The province was eventually removed from the control of the Punjab ad-South Waziristan Agencies. Each of the Deputy ministration in 1901. To it was added the commissioners of the six administered districts political charge of Dir. Swat and Ghiral, the is responsible for the management of political political dagent of which had never been subtract the charge of the cha ordinate to the Punjab. The new Province was constituted under a Chief Commissioner and Agent to the Governor-General, with headand Agents and Agents, and Age is free from any internal interference, so long as offences are not committed and so long as interest of the tribes observe the conditions on which province, in political questions there is the tribes observe the conditions on which province, in political questions there is no many conditions on which province, in political questions there is no many conditions of the political questions there is no many conditions of the political questions there is no many conditions of the political questions there is no many conditions of the political questions there is no many conditions of the political questions there is no many conditions of the political questions there is no many conditions of the political polit no intermediary between the Governor and an arrangement deboth prompt disposal size of England without Wales. The density expert knowledge of frontier conditions of population throughout the Province equals for which the head of the administration is 90 persons to a square mile, but in the more selected. The advisability of re-uniting the favoured portions the pressure of population Province with the Punjab was much discussed is much greater. In the Hazara, District there in certain Indian political circles and as a result is much greaker. In the Hazara District there lare 20 persons to a square mile and in the of the views expressed upon the matter in the trans-indus plains tract the number is 156, Legislative Assembly the Government of India Density for the Grenter Districts 6,179 persons in 1923 appointed a Committee of collection and persons in 1923 appointed a Committee of Relicular and persons in 1923 appointed a Committee of Relicular and persons in 1923 appointed a Committee of Relicular and Francisco and Committee of Relicular and Persons in 1923 appointed a Committee of Relicular and Relicula Mahomedans and Hindus on communal lines. unknown to men. The evils of unskilled mid-the Hindus, allied in sympathy with their wifery and early marriage are among them. co-religionists in the Punjab, demanded the both the birth and death-rates of the Province reunion of the administered districts of the are abnormally low. The birth-rate in the Province with the Punjab or, if that were not administered districts, according to the last attainable then the placing of the judicial administration of the Province under the Pupiab High Court at Lahore. The Mahomedans on to a status corresponding with that enjoyed by other Provinces of India and to immediate reforms initiating and providing for progress along that line. The Hindus argued that a separate Pothan Province on the Frontier would cause a dangerous sentimental division from the rest of a dangerous senamental division from the rest of India, with leanings towards the allied racial elements outside British India. The answer to that was that a contented Pathan Province would be a valuable buttress against hostile feeling across the Border. The Committee's deliberations ended in disagreement, the two Hindu mambars writing each a separate report favourable to the Hindu viewpoint already explained. and the majority of the Committee, comprised of all its other members, recommending advance on a Provincial basis. Their principal recommendations were for-

Retention of the Settled Districts and Tribal Tracts as a separate unit in charge of a minor administration under the Government of India:

Early creation of a Legislative Council for the Settled District and appointment of Member of Council and Minister .

Appointment of a second Judicial Commissioner which has since been sanctioned and of the indicial administration in various directions, including interchange of officers with the Punjab, so that the members of the Service in the smaller Province should have the advantage of experience in the larger one.

"If (concluded the Majority) the Pathan nationality is allowed self-determination and given scope for that self-development within the Indian Empire under the Reforms Scheme after which it is now striving we are assured that with a contented Frontier population India can face with calm resolution the future that the Frontier has in store for her."

The People.

The total population of the N.W. F. P. (1931) is 4.684.364, made up as follows:-

.. 669,636 .. 1,755,440 Trans-Indus Districts Trans-Border Area .. 2,259,288 . . .

This last figure is estimated. There are almost entirely. only 561.3 females per 1,000 males in the towns and 872.2 females per 1,000 males in rural

This disproportion of the N.-W. F. P. any practically without manufactures. There is more than in other parts of Northern India no considerable surplus of commencial importance where it also appears. The discrepancy is greater ducts for export. Any commercial importance

available official reports, is 25°8 and the deathrate 91 0

The dominant language of the Province Pashtu and the population contains several lingual strata. The most important sections of the population, both numerically and by social position, are the Pathans. They own a very large proportion of the land in the administered districts and are the ruling race of the tribal area to the west. There is a long list of Pathan, Baluch, Raiput and other tribal divisions. Gurkhas have recently settled in the Province. The Mahomedan tribes constitute almost the whole population, Hindus amounting to only 5 per cent, of the total and Sikhs to a few thousands. The occupational cleavage of the population confuses ethnical divisions

(Under the North-West Frontier Province Law and Justice Regulation of 1901), custom Law and Justice Kegulation of 1901), custom governs all questions regarding successions, betrothal, marriage, divorce, the separate property of women, down, wills, gifts, partitions, family relations such as adoption and guardianship, and religious usages and institutions, provided that the custom be not contrary to justice, equity or good conscience.
In these matters the Mohammadan Law where
the parties are Mohammadans, and Hindu Law. where the parties are Hindus, is applied in so far as that law has not been altered or abolished by any legislative enactment and is not opposed to the provisions of the Regulation and has moreover not been modified by any custom

The climatic conditions of the N.W.F.P. which is mainly the mountainous region, but includes the Peshawar Valley and the river in tracts of the Indus in Dera Ismail Khan District, are extremely diversified. The latter district is one of the hottest areas of the Indian continent, while on the mountain ranges the continent, while on the mountain ranges the weather is temperate in summer and intensely cold in winter. The fair is generally dry and hence the annual ranges of temperature are two west seasons, one the S.W. Monason season, when moisture is brought up from the Arabian Sea and the Bay of Bengal; the Arabian Sea and the Bay of Bengal; the other in winter, when storms from Mesopotamia, Persia and the Caspian Districts bring widesgread rain and snowlful. Both sources of supply are precarious and not infrequently either the winter or the summer rainfall falls

Trade and Occupations

The population derives its subsistence almost This disproportion of the sexes cannot at wholly from agriculture. The Province is resent be explained in the N.-W. F. P. any practically without manufactures. There is one than in other parts of Northern India no considerable surplus of commercial prowhere means appears. ane discrepancy is greater (unce for expert. Any commercial importance here than in any other Province of India. There which the province possessess it owes to the isno ground for believing that the neglect of fact that it lies across the freat trade route girls in infancy has any effect in causing the which connect the trans-border trial terriphenomenon. On the other hand, the founds tortes and the marte of Afghanisan and Cospilation has to face many trials which are trail asia with India, but the influence of rail-

ways is diminishing the importance of these trading interests. Special mention may be made of the railway comparatively recently opened linking Baluchistan, in the south-west of the N. W. F. P., via Nushki with south-east Persia. The line connects with the north-west railway system of India and extends 343 miles to Duzdap, within the Persian border. Two weekly trains run each way and the freight carried largely consists of carpets, wool and dates, from Persia and of tea, sugar and piece-goods from the Indian side. Though the railway is primarily strategic in purpose its commercial and political effects will be considerable. The travelling traders (or Powindahs) from the trans-frontier area have always pursued their wanderings into India always pursued their wanderings into india and now, instead of doing their trading in towns near the border, carry it by train to the large cities in India. The Railway line from Pir to Lankitshina which is complete and traffic now will similarly, open to public in course of time, develop both the manner and amount of transport communications and trade. The new roads in Waziristan are already largely utilised by the Tribal inhabitants for motor traffic. Prices of agricultural produce nave in recent years been high, but the agriculturists, owing to the poverty of the means of communication, have to some extent been deprived of access to Indian markets and have therefore been unable to profit by the rates prevailing. On the other hand, high prices are a hardship to the non-agricultural classes. The effects of recent extensions of irrigation have been important. Land tenures are generally the same in the British administered districts as in the Punjab. The cultivated area of the land amounts to 25 per cent. and uncultivated to 75 per cent.

The work of civilisation is now making steady progress, both by the improvement of communications and otherwise. Relations with the tribes have improved, trade has advanced, free medical relief has been vastly extended, police administration has been reformed and the desire of people for education has been judiciously and sympathetically fostered, though in this respect there is complaint against the limitations imposed by financial embarrassments. In the imposed by financial embarrassments. In the British administered districts the total male projudiation is of and that of female Scholars to the total male population is of 1 and that of female Scholars collectorates in charge of taskildras, who are projudiation is of 1 and that of female scholars collectorates in charge of taskildras, who are for the year 1985-36. 25 per cent. males and 7 per cent. females of the total population who exercise only criminal and revenue powers are returned as literates. The figures for males dende a very narrow diffusion of the control of the property of the control o

Administration.

The administration of the North-West Frontier Province is conducted by H. E. the Governor and Agent to the Governor-General. The administration comprises

The Hon'ble the Chief Minister.
The Hon'ble Minister for Finance.

The Hon'ble Minister for Education. (4) (5) The Hon'ble Minister for Industries, The Political Resident on the N.-W. Frontier.

The Hon'ble the Speaker, Legislative Assembly, Officers of the Political Department of

the Government of India. Members of the Provincial Executive and Judicial Service.

Members of the Subordinate Civil Service. (10) Superintendents and Assistant Super-

intendents of Police. (11)Officers recruited for the service of departments requiring special knowledge-Militia. Engineering.

Education, Medicine and Forestry. The cadre posts reserved for officers coming under the fourth head above are :-

The Pol. Resident on the N. W. Frontier. Secretary Chief Revenue and Divl. > 5 Commr. Secretary, Development

Departments. Home Secretary. Dy. Commissioners Political Agents Senior Sub-Judge Asst. Commissioners and Asst. Political >14 Agents. The Hon'ble Judicial

Commissioner Hon'ble the Judi-The Hon'ble Addl, Judicial Commissioners' Court & District cial Commissioner. Two District and Judges. Sessions Judges One Additional District and Sessions Judge.

of kinship and ancient ancestry, real or imagither imagingation of a system of light valveys of cluship and another shoestly, read of imaging a state of the system of the sys was completed in 1014, and the bases which the supermonant of the supe connected with both Irrigation and Buildings & Roads. It is organised in two circles (in all seven Divisions) under a Chief Engineer, P.W.D. who is also ex-officio Secretary to H. E. the who is also ex-opino Sectedary of H. H. the Governor. The administration of the civil police force of the districts is vested in an Inspector-General. There is a special force of Frontier Constabulary. Of the Agencies only Kurram and Tochi Valley pay land revenue to the British Government. The only Kurram and Tochi Valley pay revenue to the British Government. revenue administration of all five administered districts is controlled by the Revenue and Divisional Commissioner. For the administra-tion of civil and criminal justice there are two Civil and Sessions districts, each presided over by a District and Sessions Judge. The two Judicial Commissioners are the District and Sessions controlling authority in the Judicial branch of the administration, and their Courts are the highest criminal and appellate tribunals in this The improvements needed to bring Province. the indicial administration up-to-date, in accord with the growth of the business of administration, are dealt with in the Inquiry Committee's report to which reference was made above.

FINANCES.

In order to meet the excess in expenditure over the income of the Provinces a subvention of Rs. one crore per annum is given by the Government of India out of Central Revenues,

The Administration.

Administration are :-

The principal officers in the present

H. E. the Governor and Agent to the Governor-General.—H. E. Sir George Cunningham, K.C.S.I., K.C.I.E., O.B.E. (Assumed charge 2nd March 1937).

Secretary to Governor-Captain A. J. Dring, Aide-de-Camp-Capt. J. Grose.

North-West Frontier Province Landholders	Sardar Muhammad Aurangzeb Khan.

a iministered and unadministered tracts on its northern and ageturn borders comprises an area of some 67,334 square miles. It includes the of some 67,334 square miles. It includes the Assam Valley Division, the Surma Valley and Hill Division and the State of Manipur. It owes its importance to its situation on the north-east frontier of India. It is surrounded by mountainous ranges on three sides while on the fourth (the west) lies the Province of Bengal on to the plains of which debouch the two valleys of the Brahmaputra and the Surma which form the plains of Assem. These two valleys are separated from each other by the Assam Range, which projects westward from the hills on the eastern border.

Population.

The total population of the Province in 1931 was 9,247,857, of whom 445,606 were in Manipur. Of the population in 1031, nearly 51 millions were Hindus, over 23 millions were Muslims a million belonged to tribal religious and a quarter of a million were Christians.

43 per cent. of the population speak Bengali, 21 per cent. speak Assamese: other languages spoken in the province are Hindi, Uriya, Mindari, Nepali and a great variety of languages classified under the general heading of the Tibeto-Burman languages. Owing to the great areas of waste and rivers the density of the province is only 137, which compared that of most other parts of India is low. compared with

Agricultural Products.

It has agricultural advantages for which it would be difficult to find a parallel in any part of India, climate, soil, rainfall and river sys-tems all being alike favourable to cultivation. Rice is the staple food crop, nearly 5,439,696 neres being devoted on this grop. Except in the Himalayan Terai irrigation is unnecessary. Tea and jute are the most important crops grown for export. The area under tea consists of 4,38,925 export. The area under tea consists of a consists wheat and tobacco are also grown and about 40.181 acres are devoted to sugarcane.

Meteorological Conditions.

Rainfall is everywhere abundant, and ranges from 23:39 to 241.76 inches. The maximum is reached at Cherrapunji in the Khasi Hills, which is one of the wettest places in the world, having a rainfall of 520'09 inches. The temperature ranges from 59 at Sibsagar in January to 84'8 in July. Earthquakes of considerable severity have taken place, by far the worst being that which occurred in 1897.

Mines and Minerals.

The Province of Assam, emitting the partly/Surma. This belt is traceable over a distance Surma. This delt is traceable over a distance of some 800 miles from N.E. Assam through Cachar and Chittagong to the Arakan coast, where it has a S.S.E. trend.

Manufactures and Trade

Silk is manufactured in the Assam Valley, the weaving being done Cotton weaving is also largely proction. by the women, and almost every house contains a loom; the cloth is being gra-dually displaced by imported goods of finer texture and colour. Tea manufacture is the most important industry of the province. Roat most important industry of the province. Boat building, brass and metal and earthenwares, and limestone burning are the other industries apart from agriculture, which itself employs about 89 per cent. of the population. Assam carries on a considerable trade with the adloining foreign tribes and countries.

Communications

Much of the trade of Assam is carried by river. The excellence of its water communicariver. The excellence of its water communica-tions makes the province less dependent upon roads than other parts of India. A large flect of steamers maintained by the India General Navigation Company and the Rivers Steam Navigation Company piles on the rivers in both Valleys. An alternate day service of passenger-boats runs between Goalundo and Dibrugarh, In recent years the road system has developed There are two trunk roads on either bank of the Brahmaputra parts of which are metalled or gravelled and the rest unmetalled and excellent metalled roads from Shillong to Gauhati, Shillong to Sylhet and to Cherrapunice and also between Dimapur, on the Assam Bengal Railway, and Imphal, the capital of the Maninur State. The Government of Assam had in 1928 carried out a considerable programme of road improvement and another programme which aims at the improvement of nearly 300 miles of road either by metalling or gravelling and the construction of 12 big bridges is nearing completion. A further programme of improvement is at present under consideration of the Government of India for financing from the Road Fund. Kutcha roads are being main-tained by means of mechanical plant which tained by meeting of mechanical plant which has proved successful in maintaining, through-out the year, a surface fit for motor vehicles. Motor traffic has increased on all sides and the demands for better roads has been insistent. The open mileage of railway has also shown a steady improvement and several branch lines to the Assam Bengal Railway system have been added in recent years. The Mines and Minerais.

The only minetals in Assam worked on a commercial scale are coal, limestone and Chittagong Fort, in Bengal, through the North a commercial scale are coal, limestone and in the North Chittagong Fort, in Bengal, through the North Chitagong Sert, in Bengal, through the North Chitagong Sert, in Bengal, through the North Chitagong Sert, in Bengal, was a state of the North Chitagong Sert, in Bengal, was a state of the Samar Valley and another runs through and Jaintia Hills, Petroleum is worked only in the West of the Assam Valley from Lumding the Chitagong Sert, in Bengal, was a state of the Samar Valley and another runs through the west of the Assam Valley from Lumding to Ganhait where it effects a junction with the main Assam Bengal Railway line runs from An econard of the petroleum courrenced to country in the state of the petroleum courrenced to country in the state of the

THE FINANCES OF ASSAM.

In common with the other Provinces of India, Assam secured substantial financial autonomy under the Reform Act of 1919. The present financial position for 1937-38 is set out in the following table:—

Administration.

The province of Assam was originally formed in 1874 in order to relieve the Lieutenant-Governor of Bengal of part of the administration of the huge territory then under him. In 1905, as the result of further deliberations, it was decided to add to the small Province of Assam the castern portion of its gawledy neighbour and to consolidate those territories under a Lieutenant-Governor. The Province of Eastern Bengal and Assam as then constituted was again broken up on the 1st of April, 1912: the Eastern Bengal Districts were united with the Bengal Commissionerships of Burdwan and the Presidency to form the Presidency of Bengal under a Governor-in-Council, Bihar, Chota-Nagpur and Orissa were formed into a separate province, while the old Province of Assam was re-constituted under a Chief Commissioner.

Under the Indian Reforms Act of 1919 the Province was raised in status to that of administration by a Governor-in-Council and was thereby ranked, with certain minor provinces, to suit its undeveloped character with the older

major provinces of India.

The capital is Shillong, a town laid out with great taste and judgment among the woods on the slopes of the Shillong Range which rises to a height of 6,450 feet above the sea. It was destroyed in the earthquake of 1897 and has been rebuilt in a way more likely to withstand the shocks of earthquake.

GOVERNOR.

His Excellency Sir Robert Niel Reid, K.C.S.I., K.C.I.E., I.C.S.

Raluchistan.

occupying the extreme western corner of the Indian Empire. It is divided into three main divisions: (1) British Baluchistan with an area of 9,476 square miles consisting of tracts assigned to the British Government by treaty in 1879: (2) Agency Territories with an area of 44.345 square miles composed of tracts which have, from time to time, been acquired by lease or otherwise brought under control and placed directly under British officers; and (3) the Native States of Kalat and Las Bela with an ores of 80 410 square miles. The Province embraces an area of 134,638 square miles and according to the census of 1931 it contains 868.617 inhabitants.

The country, which is almost wholly mountainous, lies on a great belt of ranges connecting the Safed Koh with the hill system of Southern Persia. It thus forms a watershed the drain-age of which enters the Indus on the east and the Arabian Sea on the south while on the north and west it makes its way to the inland lakes which form so large a feature of Central takes which form so large a reasure of Central Asia. Rugged, barren, sun-burnt mountains, rent by high chasms and gorges, alternate with arid deserts and stony plains, the pre-vailing colour of which is a monotonous sight. But this is redeemed in places by level valleys of considerable size in which irrigation enables much cultivation to be carried on and rich grons of all kinds to be raised.

The political connection of the British the outbreak of the First Afghan War in 1839 : the outbreak of the First Afghan War in 1889; it was traversed by the Army of the Indius and was afterwards occupied until 1842 to protect the Fidish lines of communication, or the protect that the product of the Fidish lines of communication, were handed over to the Amir of Afghanism and Political Officers were appointed to administer the country. At the close of the First Afghan War, the British whidrew and these districts were assigned to the Khan of Kelat. The founder of the Rajuchistan Ervoluce as it now exists was Sir Robert Sandeman who broke down the close border system and welded the Baluch and Brahui Chiefs into a close confederacy. In the Afghan War of 1879 Pishin, Shorarud, Sibi Zawara Valley and Thal-Chotlall were handed over by Yakub Khan to the British Government and retained at Sir Robert Sandeman's strenuous insistence.

Industries.

Baluchistan lies outside the monsoon area and its rainfall is exceedingly irregular and scanty. Shahrig, which has the heaviest

Rainchistan is an oblong stretch of country rainfall is about 5 inches, decreasing in some cases to 3. The majority of the indigenous population are dependent for their livelihood on agriculture, care of animals and provision of transport. The majority of the Afghan and the Baluch, as a rule, cultivate their own lands. The Brahuis dislike agriculture and prefer a pastoral life. Previous to the advent of the British, life and property were so insecure that the cultivator was fortunate if he reaped his harvest. The establishment of peace and security has been accompanied by a marked extension of agriculture which accounts for the increase in the numbers of the purely cultivating classes. The Mekran Coast is famous for the quantity and quality of its fish and the industry is constantly developing. Fruit is extensively grown in the highlands and the export is increasing.

> Education is imparted in 109 public schools of all kinds with 7.372 scholars. There is a distinct desire for education amongst the more other centres; but on the whole education or the desire of it has made little or no advance in the outlying districts. Coal is mined at Sharigh and Harnai on the Sind-Pishin Railway and in the Bolan Pass. The output of coal in 1936-37 was 7,133 tons. Chromite is extracted in the Zhob District near Hindubagh. I stone is quarried in small quantities. output of chromite during 1936-87 amounted to 21.428 tons.

Administration.

The head of the local administration is the officer styled Agent to the Governor-General Resident and Chief Commissioner. Next. in rank comes the Revenue Commissioner Next, who controls the revenue administration and exercises the functions of a High Court as Judicial Commissioner of the Province. The keynote of administration tion in Baluchistan is self-government by the tribesmen, as far as may be, by means of their Jirgas or Councils of Elders along the ancient customary lines of tribal law, the essence of which is the satisfaction of the aggrieved and the settlement of the feud, not retalistion on the aggressor or the vindictive punishment of a crime. The district levies play an unob-trusive but invaluable part in the work of the Civil administration not only in watch and ward and the investigation of crime, but also in the carrying of the mails, the serving of processes and other miscellaneous work. In addition to these district levies there are ordinarily three Irregular Corps in the Province; the Zhob scanty. Shahrig, which has the heavier Millita, the Merkran Levy Corps and the Chaparlanindal, records no more than 14.72 inches in a Levy Corps. Fundamentally the Province is not year. In the highlands few places receive more self-supporting, the deficit being met from than 10 inches and in the plains the average Imperial Funds.

ANDAMAN AND NICOBAR ISLANDS.

This is a group of islands lying in the Bay of Bengal. Port Blair, the headquarters of the Administration, is 780 miles from Calcutta, 740 miles from Madras, and 360 miles from Rangoon, with which ports there is regular communication by Government chartered steamer.

The total area of the Andaman Islands is 2,508 square miles and that of the Nicobar Islands 635 square miles.

The total area under cultivation on 31st March 1927 was 10,560 acres and the remaining area being dense forest.

The population enumerated at the Census of 1931 was 29,463 of whom 7,552 were convicts. The number of convicts excluding terrorist Ohief Commissioner, The Hon, Mr. A. C. prisoners, on 1st April 1937, was 5,999.

Lothian, C.S.I., C.I.E., I.C.S.

PORTS :- Port Blair and Bonington in the Andamans and Car Nicobar and Camorta in the Nicobars. Timber and coconuts are exported from the Andamans, and coconuts and their products from the Nicobars.

The Islands are administered by a Chief Commissioner. A penal settlement was esta-blished at Port Blair in 1858 and is the largest and most important in India.

Chief Commissioner, C. F. Waterfall, C.S.I..

COORG.

Coorg is a small petty Province in Southern Coorg is a sman petry rrowner in Southern India, west of the State of Mysore. Its area is 1,593 square miles and its population (163,327 according to the census of 1931.) Coorg came under the direct protection of the British Government during the war with Sultan

Tippu of Seringapatam. In May 1834, owing to misgovernment, it was annexed. The Province is directly under the Government of India and administered by the Chief Commissioner of Coorg who is the Resident in Mysore with his headquarters at Bangalore. In him are combined all the functions of a local government and a High Court. The Secretariat is at Bangalore where the Assistant Resident is styled Secretary to the Chief Commissioner of Coorg. In Coorg the chief authority is the Commissioner whose headquarters are at Mercara and whose duties extend to every branch of the administration. A Legislative Council con-sisting of 15 elected members and five nominated members was created in 1924. The chief wealth of the country is agriculture and especially the growth of coffee. Although owing to overproduction and insect pests coffee no longer commands the profits it once enjoyed, the Indian output still holds its own against the severe competition of Brazil. The bulk of the output is exported to Europe

Chief Commissioner, Coorg, The Hon. Lt.-Col. J. H. Gordon, C.I.E., O.B.E., M.C.

AJMER-MERWARA.

Ajmer-Merwara is an isolated British Proin Rajputana. The Hon'ble vince Rajputana administers it as Resident for Commissioner. The Province is divided Chief into the Sub-divisions of Ajmer and Kekri and the Tehsils of Beawar and Todgarh, the two latter forming the Merwara Sub-division with a total area of 2,711 square miles and a population of 560,292. the Pindariwar Daulat Rao Scindla, by a treaty, dated June 25, 1818, ecded the district to the British. Sixty-two per cent. of the population are supported by agriculture, the industrial population being principally employed in the cotton and other industries. The principal crops are maize, millet, barley, cotton, oilseeds and wheat.

Aden.

the Empire after the accession of Queen Victoria. Its acquisition was the outcome of an outrage committed by local Arabs upon the passengers and erew of a British Indian buggalow wrecked in the neighbourhood. Negotiations having ni the negionalmora. Negociations having failed to secure satisfactory reparation the Government of Bombay despatched a force under Major Baillie which captured Aden on January 19th, 1839.

Aden is an extinct volcano, five miles long and three broad, jutting out to sea much as Gibraltar does, having a circumference of about 15 miles and connected with the mainland by a narrow isthmus of flat ground. The highest peak on the wall of precipitous hills that sur-rounds the old Crater which constitutes Aden is 1,725 feet above sea level. Rugged spurs, with valleys between, radiate from the centre to the circumference of the crater. The peninsula of Little Aden, adjacent to Aden proper, was obtained by purchase in 1868 and the adjoining tract of Shaikh Othman, 39 square miles in extent, was subsequently purchased when, in 1882, it was found necessary to make provision for an overflowing population. Attached to Aden is the island of Perim, 5 square miles in extent, in the Straits of Bab-el-Mandeb at the entrance to the Red Sea. Kuria Muria islands, which were acquired from the Sultan of Muscat in 1854, are included in the Aden Colony, but for administrative pur-poses were transferred to the control of the British Resident in the Persian Gulf in 1931.

The whole extent of the Aden Settlement, including Aden, Little Aden, Shaikh Othman and Perim, is approximately 80 square miles. The 1931 census showed Aden, with Little Aden, Shaikh Othman, and Perim to have a population of 48,338.

The language of the Settlement is Arabic, but several other Asiatic tongues are spoken. The population is chiefly Arab. The chief industries are salt and cigarette manufacture and dhow building. The crops of the tribal low country adjoining are jowar, sesamum, a little cotton, madder, a bastard saffron and, a little indigo. In the hills, wheat madder, fruit, coffee and a considerable quantity of wax and honey are obtained. The difficult problem honey are obtained. The difficult promeum of water supply of has been solved. An artesian supply of fresh water has been obtained at Shelkh Othman. Early in 1924 a start was made with a deep bore and sweet water was found at a depth of 1,645 feet. The artesian flow of water now rises from this bore at 750 gallons per hour. A second bore was started in 1928-29 and proved more productive than the first. Five more bores have since been sunk, but two bores only are in operation at present and are sufficient to meet the requirements of the public and shipping. Bore water ments of the public and snipping. Bore water has practically replaced condensed water, is the must easierly area in the Aden Protection of the condensed water is the most easierly area in the Aden Protection of the Condensed water by pipe lorate for it is bounded on the East by the conjection; to houses awe been laid at Circler Sultanate of Miscack and Oman. The Sultana

Aden was the first new territory added to have been connected to the mains. Drainage systems at Tawahi and Crater have completed.

> Climate.—The average temperature of the station is 87 degrees in the shade, the mean range being from 75 in January to 98 in June, with variations up to 102. The lulls between the monsoons in May and September are very oppressive. But Aden is usually free from infectious diseases and epidemics, and the absence of vegetation, the dryness of the soil and the purity of the drinking water constitute efficient safeguards against many maladies common to tropical countries. The annual rainfall varies from 1 inch to 81 inches, with an irregular average of 3 inches.

> Aden Protectorate.-The Aden Protectorate to the West of approximate Longitude 46° is bounded on the East by the Qara country which is part of the dominions of the Sultan of Muscat and Oman, and on the North and West by the Great Desert and the Kingdom of Yemes. whose Southern boundary was temporarily fixed by Article III of the Treaty of San'a (February 1934) by which His Majesty's Government and the Yemen Government are to maintain the status quo frontier as it was on the date of the signature of the treaty. The coastline of the Aden Protectorate, which is about 600 miles long, starts in the West from Husn Murad, opposite the Island of Perim, and it runs eastwards to Ras Dharbat 'Ali where it meets the Sultanate of Muscat and Oman,

> The total area of the Aden Protectorate is about 112,000 square miles, and the population (of which no census has ever been taken) is estimated to be about 600,000,

> The Aden Protectorate can be more conveniently described by dividing it into two areas, the Western and the Eastern. The former consists of the following Sultanates, the chiefs of which are all in protective treaty relations with His Majesty's Government: the Abdali Sultanate of His Highness Sultan Sir 'Abdul Karim Fadhl who is the premier chief of the Western area, Fadhli, etc.

> Eastern area comprises the Hadhramaut, (consisting of the Qu'aiti State of Shihr and Mukalla and the Kathiri State of Seiyun), the Mahri Sultanate of Qishn and Soqotra, and the Wahidi Sultanates of Bir 'Ali and Balihaf, all of which are in protective treaty relations with His Majesty's Government. His Highness Sultan Salih bin Ghalib al Qu'aiti, Sultan of Shihr and Mukalla, is the premier chief of the Eastern Aden Protectorate, and the Hadhramaut is the most important and best organised of these areas. It is bounded on the West by the Wahidi Sultanates and on the East by the Mahri Sultanate.

The Mahri Sultanate of Qishn and Sogotra and Tawahi and several of the private houses of Qishn and Sogotra resides on the island of Soqotra (area 1400 square miles) which lies 150 miles from Cap Guardafui. The island was occupied by the East India Company in 1834 and it came under British protection in 1886 when the treaty with the Mahri Sultan was concluded.

Scotta.—An island situated about 150 miles E.N.E. of Cape Guardarii, in 12° 19'-12° 42°N. lat., and 53°21-53°30°E long. and lying in the direct route to India has been since 15°6 under the Government of Aden, which spays a small maintained, to whom if belongs. It is famous for its alocs. The population of the island is about 12,000. It is rather less than 100 miles from east to west and about 30 miles broad. Its interior is mountainous, It was formally placed interior is mountainous. It was formally placed Suitan in October, 1886, together with the neighbouring Aboul Kuri and Bromers Islands.

THE HADBRAMAUY SPATES.— The Qu'ait Rulers of Shift and Mukalla entered into a treaty with His Majesty's Government in 1882 in which they bound themselves not to ede any parts of their territories to any person or proven the control of the provent of the provent of the provent of the provent of the province of the pro

Prior to this treaty the Qu'ait Jemedar of Shihr and the Kasadi Nakib of Mukalla had entered into agreement for the abolition of the slave trade in 1873 and an even earlier agreement (1863) had been made with the latter on the same subject. The treaty of 1882 was strengthened in 1888 by the conclusion of a Protectorite in the common form of the treaties with Protector of the Common of the treaties with Protecco of the Hadhramaut made an agreement with the Qu'aiti Suitan whereby the former acknowledged that this treaty was binding on them. This agreement provided for the conduct of rolations between the Qu'aiti and Kathiri This agreement provided full the Province of Hadhramaut should (and the Province of Hadhramaut should (and the Province of Hadhramaut should (and the Province appanage of the British Empire under the Suitan of Shiltr and Mukalla.)

SHIHR AND MUKALLA SULTAN.—His Highness Sultan Salih bin Ghalib al Qu'aiti, K.C.M.G. Heir apparent. Prince 'Awadh bin Salih al Qu'aiti.

The Qu'aiti State of Shihr and Mukalla on the Gulf of Aden is bounded on the West by the Wahidl and 'Aulaqi Sultanates and the Kingdom of Yemen, on the North by the Great Desert and on the East by the Mahri Sultanate. The Kathiri State forms an enclave on the North.

The Qu'atit dynasty was established by 'Abdulla and 'Awadh sons of 'Umar al Qu'atit in 1881 and 'Awadh bin 'Umar was recognised as Sultan in 1902. The present Ruler's the grandson of Sultan 'Awadh and the fourth Sultan.

The country is large in extent but the greater part of its surface consists of barren mountains intersected by Walds some of which are fertile intersected by Walds Some of which are fertile are the Wadis Meiß, Hajr, Du'an, Leissr, and part of the Wadi Hadhramaut. The principal crops are millet, sesume, beans and when the same all consumed locally but Hamumi These are all consumed locally but Hamumi Theo their cynoris are principally fish products.

The Capital and the Residence of the Sultan is Mutalia (repulsation about 16,000). Shift is also an important port and both are visited by ocean going slips. The country is divided into five provinces. There are several hundred miles of motorable tracks, including the 4l Kar divided to the contract of the contract of

The population is estimated at about 202,000 and the revenue and expenditure are about 7 and 6 lakhs of rupees respectively.

The relations between the Qu'aiti State and Great Britain are governed by the Treaties referred to above and by a Treaty of 1937 by which Great Britain agreed to appoint a Resident Adviser.

Resident Adviser .. W. H. Ingrams, O.B.E. £1000, £400 personal, £200 entertainment and quarters.

Assistant .. £700—£800 Secretary .. £350—£500

Military Officer attached, Captain B. H. Hopkins. State Secretary . Sheikh Ahmed bin

Sa'id al Haddadi, SEIYUN SULTAN.—Sultan 'Ali bin Mansur al Kathiri.

The Kathiri State of Seiyun is bounded on the North by the Great Desert and on all other sides by the Qu'aiti State.

The Kathlri dynasty is of considerable antiquity being founded in 1489 by Sultan' Abdulla bin Ja'fer al Kathlri. The present Ruler is the direct descent from Sultan 'Abdulla and his famous son Bedr Bu Tuweirak.

The Kathiri country was formerly of great extent: it still includes the most fertile portion of the Wadi Hadhremaut and its tributary Wadis such as Wadis Adim and Bin'All. Its crops are mainly grain and dates which are all consumed locally, but cotton grows well and this may develop into an export.

The Capital and Residence of the Sultan is Seign (population about 18,000) but Tarim is also a large and important city which is joined with the port of Shift by the Al Kaf Road, constructed by the Al Kaf Selyids who spend large sums on the advancement of the country. Kathiri towns and villages are mostly accessible by motor.

The population is estimated at about 58,000 and contains a large number of extremely well to do people, who live mostly on remittances form the East Indies.

The relations between the Kathiri State and | His Excellency the Governor and Commander-in-Great Britain are governed by the Qu'aiti Treaty of 1886 and the Kathiri agreement of 1918.

Resident Adviser .- W. H. Ingrams, O.B.E.

Administration.—Aden was transferred from the administrative control of the Govern-ment of India to that of the Colonial Office with effect from 1st April 1937, from which date it

assumed the status of a Crown Colony. The Administration is vested in His Excellency the Governor and Commander-in-Chief who is assisted by an Executive Council.

In spite of the transfer in control it is intended that there should be as great a degree of contionlity as possible in the machinery and methods of Government. This will involve the retention of the spirit and in most cases of the letter of existing laws and regulations, the preservation in judicial cases of the right of appeal to the High Court of Bombay, the continued use of Indian postage rates and Currency and the maintenance of the port as a free port.

The management of the port is under the control of the Board of Trustees formed in 1888. The principal business of the Port Trust in recent as to allow vessels of large size to enter and leave at all states of the tide.

armed Police.

The Executive Committee of the Aden Settlement performs all municipal functions in Aden. Names and Designations of Officers.

KAMARAN.—The Island of Kamaran in the Red Sea about 200 miles north of Perim was taken by the British from the Turks in 1915, and is administered by the Government of India vears has been the deepening of the harbour so through a Civil Administrator under the control of the Government of the Colony of Aden. has an area of 22 square miles and a population The Police Force, consists of land, harbour and of about 2,200. A quarantine station for pil-med Police. maintained on the Island under the joint control of the Government of India and the Government of the Dutch East Indies.

Civil Administrator, Captain D. Thompson.

The Home Government.

The Home Government of India represented for sixty years the gradual evolution of the governing board of the old East India Company. The affairs of the company were originally managed by the Home Government of India repression of superintendence, direction and control over for sixty years the gradual evolustic government and revenues of india, subject, the government board of the old of course, to a large measure of delegation. The Court of Directors and the General Court of Proprietors. In 1784 Parliament established a Board of Control, with full power and authority to control and direct all operations and concerns relating to the civil and military government, and revenues of India. By degrees the number of the Board was reduced and its powers were exercised by the President, the lineal precursor of the Secretary of State for India. With modifications this system lasted until 1858, when the Mutiny, followed by the assumption of the Government of India by the Crown, demanded a complete change. Under the Act of 1858 (merged in the con-solidating measure passed in 1915) the Secretary of State is the constitutional adviser of the Crown on all matters relating to India. crown on all matters relating to India. He inherited generally all the powers and duties which were formerly vested either in the Board of Control, or in the Company, the Directors and the Secret Committee in respect of the government and revenues of India.

The Secretary of State.

Secretary of State and the Secretary of State in of purely Indian interest where the Government Council had, and exercised, the fullest powers and the Legislature of India are in agreement.

Secretary of State was the statutory heir of the East India Company and the Board of Control, and it was as such that the generality of his powers were exercised.

The Act of 1919 transferred a substantial share of power and responsibility in relation to the Government of the Provinces to the Provincial Legislatures and Ministers, while it greatly increased the elected element in, and the influence of, the Central Legislature at Delhi. In the sphere so affected the power and responsibilities of Parliament and its representative, the Secretary of State, were correspondingly curtailed, but outside the field of administration so transferred the responsibility of Parliament for the good government of India remained unimpaired. No statutory change in the rela-tions between the Secretary of State and the Central Government was made, but there was a very marked alteration in the balance of authority corresponding with the enhanced status and influence of the Indian Legislature. The Report of the Joint Select Committee on the Bill of 1919 recommended that a convention should be allowed to grow up that only in exceptional circumstances should the Secretary Until the Act of 1919 came into force, the of State be called upon to intervene in matters

The Council of India

The Act of 1858 established besides the Secretary of State the body known as the Council of India, which was associated with the Secretary of State in the exercise of many of his powers and, in particular, held control of the revenues of India and was charged with the conduct of the business transacted in the United Kingdom in relation to the Government of India and the correspondence with India. Members of the Council, originally appointed for life, now hold office for five years, and receive a statutory salary of £1,200 with an additional subsistence allowance of £600 per annum for those domiciled in India. The Act of 1919 established their members at a minimum of 8 and a maximum of 12, one half of whom were required to have served or resided in India for at least ten years. Lord Morley opened the door of the Council to Indians, and since 1917 the usual number of Indian Members has been three.

The India Office.

The Secretary of State, like other Ministers of His Majesty's Government in the United Kingdom, is served by a body of officers and servants known in this case as the India Office. Its staff are recruited through the same source and serve on the same conditions as Civil Servants in corresponding positions in the other Govern-ment Offices in London. Until 1919, the whole cost was borne by Indian revenues, except that the revenues of Burma in respect of the expenses the Home Government made certain grants and remissions, in lieu of a direct contribution, amounting to £50,000 a year. The Act of 1919 transferred the salary of the Secretary of State ment is to perform. to the Treasury, and, in accordance with its provisions, an arrangement was devised whereby a contribution from the Treasury of about £ 115,000 was made to the total cost, which now stands at about £ 230,000. The basis of the contribution was that Home estimates should bear the outlay needed for the controlling and political functions of the India Office ; Agency functions being still an Indian charge.

The Government of India Act. 1935.

Substantial changes in the machinery described above result from the Government of India Act. 1935. The Secretary of State will be no longer the final Authority upon whose superintendence, direction and control depend the Acts of the Government of India and all grants. payments and charges out of the revenues of India. The powers of the Executive in India will run in the name of the Governor-General and the Governor, to whom they will flow direct from the Crown, and there will be no delegation powers through the Secretary of State. In so far as the Executive Governments in India will function on the advice of Ministers responsible to the new Legislatures, the responsibility of the Secretary of State to Parliament, and consequently his control, will be at an end. Where, however, the Governor-General or the Governors are empowered to act in their discretion or on their individual judgment, they will be subject to direction by the Secretary of State who will remain in these matters the channel of their responsibility to Parliament. During the interim period between the 1st April, 1937, and the establishment of the Federation, the Secretary

of State will have power to issue directions to the Governor-General in Council, and such directions, if they are with respect to the revenues of the Governor-General in Council, will require the concurrence of his Advisers. The Council of India ceased to exist from the 1st April, 1937. Some of its functions, particularly in relation to Service matters, pass, however, to a body of Advisers with the same numerical limits during the interim period, reduced after Federation to a minimum of 3 and a maximum of 6. The position of the India Office as the Department erving the Secretary of State will remain, but the change brought about by the Act is to be marked by the transfer of the whole cost to a Parliamentary vote with a contribution from Indian revenues, based on the cost of Agency functions still performed by the Secretary of State for the Government of India. There will be no constitutional change in the position of the High Commissioner.

To some extent the working of the Home To some extent the working of the Home Government will be affected by the separation of Burma, involving as it does the separatic exercise in respect of Burma of the functions of the Secretary of State. The Government of Burma Act provides also for the appointment of not more than three Advisers to the Secretary of State in relation to Burma, whose status and functions will be analogous to those of the Advisers established by the Government of India Act. Provision is also made for payment from attributable to the performance on behalf of the Government of Burma of such functions as the Secretary of State may agree that his Depart-

INDIA OFFICE.

The Indian States.

The area enclosed within the boundaries of administration during a long minority; but India is 1.808.679 square miles, with a popula- always with the undeviating intention of retion of 352,837,778 of people-nearly one-fifth of the human race. But of this total a very large part is not under British Administration. The area covered in the Indian States is 712,508 square miles with a population of 81,310,845. the widest The Indian States embrace variety of country and jurisdiction. They vary in size from petty states like Lawa, in Raiputana, with an area of 19 square miles. and the Simla Hill States, which are little more than small holdings, to States like Hyderabad, as large as Italy, with a population of over as large as Italy, with a population of control millions. They include the inhospitable regions of Western Rajputana, Baroda, part of the Garden of India, Mysore, rich in agricultural wealth, and Kashmir, one of the most favoured spots on the face of the globe,

Relations with the Paramount Power.

So diverse are the conditions under which the Indian States were established and came into political relation with the Government of India, that it is impossible even to summarise But broadly it may be said that as the British boundaries expanded, the states came under the influence of the Government and the rulers were confirmed in their possessions. To this general policy however there was, for a brief period, an important departure. During the regime of Lord Dalhousie the Government introduced what was called annexation through lapse. That is to say, when there was no direct heir, the Government considered whether public interests would be secured by granting the right of adoption. Through the application of this policy, the states of Satara and of Nagpur fell in to the East India Company, and the kingdom of Oudh was annexed because of the gross misgovernwas annexed occasion of the gross misgovern-ment of its rulers. Then came the Mutiny, It was followed by the transference of the dominions of the East India Company to the Crown, and an irrevocable declaration of policy toward the Indian States. In the historic Proclamation of Queen Victoria it was set out that "We desire no extension of our present territorial possessions; and while we will permit no aggression on our dominions or our rights to be attempted with impunity, we shall allow no encroachments on those of others. We shall respect the rights, dignity and honour of the Native Princes as our own; and we

storing the territories as soon as the necessity for intervention passed. Almost all states possess the right of adoption in default of heirs.

Rights of Indian States.

The rights and obligations of the Indian States are thus described by the Imperial Gazetteer. The Chiefs have, without exception, gained protection against dangers from without and a guarantee that the protector will respect their rights as rulers. The Paramount Power acts for them in relation to foreign Powers and other Indian States. The in-habitants of the Indian States are the subjects of their rulers, and except in case of personal jurisdiction over British subjects, these rulers and their subjects are free from the control of the laws of British India. Criminals escaping to an Indian State must be handed over to it by its authorities; they cannot be arrested by the police of British India without the permission of the ruler of the State. The Indian Princes have therefore a suzerain power which acts for them in all external affairs, and at the same time scrupulously respects their internal authority. The suzerain also intervenes when the internal peace of their territories is seriously threatened. Finally they participate in all the benefits which the protecting power obtains by its diplomatic action, or by its administration of its own dominions, and thus secure a share in the commerce, the railways, the ports, and the markets of British ways, the ports, and the markets of British India. Except in rare cases, applied to mari-time states, they have freedom of trade with British India although they levy their own customs, and their subjects are admitted to most of the public offices of the British Government.

Obligations of Indian States.

On the other hand, the Indian States are under an obligation not to enter into relations with foreign nations or other states; the authority of their rulers has no existence outside their territories. Their subjects outside their dominions become for all intents and purposes British subjects, Where foreign purposes British subjects. Where foreign interests are concerned, the Paramount Power must act so that no just cause of offence is given by its subordinate allies. All Indian States alike are under an obligation to refer Of the management well as our own supers, to the state. Institute as the insume coarse desired that they may be a superstant of the supers internal petics and good government. Since than for poices, or display, or 10f 00-0peration the issue of that producation there has been with the Imperial Government, their millitary no encroachment on the area under Indian forces, their equipment and armanent are rule by the Government of India. On the prescribed by the Paramount Power. Although contrary, the movement has been in the op-old and unaltered treaties declare that the posite direction. In 1881 the State of Mysore, British Government will have no manner of posito direction. In 1881 the State of Mysore, British Government will have no manner of which had been so long under British admin-concern with any of a Maharajala's dependents and the state of the s vent gross misgovernment, or to carry on the part of the country with anarchy or disturbof a Native State when there shall be sufficient to the Governor-General, assisted by local reason to do so." Of this necessity the Residents or Political Agents. These Officers Governor-General in Council is the sole Judge Corn the sole channel of communication subjects to the control of the sole for the sole channel of communication subjects to the best indicated of the control of the sole for the sole of the sole for the sole of th by the British courts which possess it. The subjects of European Powers and the United States are on the same footing. Where cantonments exist in an Indian State, jurisdiction both over the cantonment and the civil station is exercised by the suzerain power.

Political Officers.

area, nor from assuming temporary charge by a Resident, in groups of states by an Agent of a Native State when there shall be sufficient to the Governor-General, assisted by local be consulted. Political Agents are similarly employed in the larger States under the Proemployed in the larger states under the Pro-vincial Governments but in the petty states scattered over British India the duties of the Agent are usually entrusted to the Collector or Commissioner in whose district they lie. The powers of the British Government are All questions relating to the Indian States excreted through Pollitical Officers who, as are under the special supervision of the a rule, reside in the states themselves. In the Sapreme Government, and in the personal charge larger states the Government is represented of the Governor-General.

AIDES-DE-CAMP TO HIS MAJESTY,

His Majesty the King has approved the appointment of the following Indian Princes as Hon. Aides-de-Camp to the King :-

Hon, Major-Gen, the Maharaja of Ratlam.

Hon, Col. the Maharaja of Jodhpur.

Hon, Lt.-Col. the Nawab of Palanpur.

Hon, Lt.-Col, the Jam Sahib of Nawanagar,

The following have been appointed Hon. Aides-de-Camp to the King (extra):-Hon. Lt.-Gen. the Maharaja of Bikaner.

Hon, Lt.-Gen, the Maharaja of Patiala, Hon. Major-Gen. Sir Umar Hayat Khan.

Hon. Major-Gen, the Maharaja of Jammu and Kashmir.

These were all A.D.C.s to King Edward VIII and have been reappointed collectively.

HYDERABAD AND BERAR.

His knaited Highness the Nixam exercises maintains his own army consisting of 18,489 dull sower-simply in all internal affairs. He troops of all ranks of which H1,281 are Irregular grants titles and is the fountain head of all appears retained by him or delegated to fail cavalry regiments for Imperial Service, 1,062 viduals or institutions. Before 1919, the Government consisted of a Prime Minister responsible to the Nizam, with Assistant Ministers, but an Executive Council was established in that year which now consists of seven members. A Legislative Council consisting of 20 members of whom 12 are official, six nonofficial, and 2 extraordinary, assists in considering bills and recommending them for sanction by the Ruler. The administration is carried on by a regular system of Departments on lines similar a regimer system of Fernandisca in the state of the second to those followed in British India. By the 1936 Berar Agreement, the sovereignty of the Nizam over Berar was re-affirmed, the Berar rent was to continue as before to be paid by the British Government to the Nizam, but the administration of Berar was to continue as before as part of the Province of Central Provinces and Berar.

the strong.

Finance,-Hyderabad State is by far the wealthiest of the Indian States, having a revenue in its own currency of about 9 crores, which is approximately the same as that of the Central Provinces and Berar and more than double that of any other of the larger States. After many vicissitudes, its finances are at present in a prosperous condition and it enjoys an annual surplus of revenue from which a total reserve of surplus of revenue from which a total reserve of 11 corors has been built up. This is comprised of separate Reserve Funds for Debt Redemption, Famine Relief, Industrial Development, O. S. Currency Stabilization and Deposits. The Budget Estimates for the present year show a revenue of 013,66 lakhs and an expenditure of tion of Borar was to continue as before as part of twenne of 913,86 lakhs and an expenditure of the Province of Central Provinces and Berra, 806.00 lakhs, inclusive of large sums set aside of the province of the province of large sums set aside of the province of the province of large sums set aside of the province of the province of the province province of the province province of the province province province of the province of the province province of the province of t

administered by the State. The rest consists of private estates of His Exalted Highness the Nizam which comprise about one-tenth of the total area of the State, and the estates of the Jagirdars and Paigah nobles. The total land revenue is over 3 crores. The principal food crops are millet and rice; the staple money-crop is cotton, which is grown extensively on the black cotton soils, and oil seeds. Hyderabad is well known for its Gaorani cotton which is the finest indigenous cotton in India. The total area under cotton exceeds 3 million acres (1345-1346 Fasli-Forecast). Hyderabad possesses the most southerly of the Indian coal mines and the whole of Southern India is dependent on it for such coal as is transported by rail. The chief mine is situated at Singareni, which is not far from Bezwada junction on the Calcutta-Madras line. The chief manufacturing industry is based on the the cutes manufacturing mausery is passed on the cotton produced in the State. There are 6 large mills in existence and others are likely to be established while about nearly one-half of the cloth worn in the Dominions is produced on local hand-looms. There are about 391 ginning, pressing and decorticating factories in the cotton tracts and also a number of tanneries and flour mills, the total number of factories (as defined in the Hyderabad Factory Act) of all kinds in the State being 519. The Shahabad Cement Co., which has been established at Shahabad on the Great Indian Peninsula Railway not far from Wadi, supplies the whole of Southern India with cement and has at present an annual output of 1,25,945 tons (for 1345 Fasli).

Taxation.—A part from the land revenue which, as stated above, brings in about 3.25 crores, the main sources of taxation are Excise and for the present part of the present part of the present part at 184 kabs and 105 lakbs respectively. After these come interest on investments (30 lakbs), Railways (122 lakbs) and Berax Reni (29 lakbs), The Customs Revenue than 5 per cent. on all imports and exports.

Communications—One hundred and thirty-two miles of broad-gauge line from mombay to Madras traverse the State; also 30 miles of metre gauge in the Masulipatan of the Nama Common Marmagos line. At Wadl, on the Bounday—Marmas State Rallway takes off and running cast through Hyderabad City and Warangal reaches the Calcutta-Madras line at Beward, and the Rallway takes off and running cast through Hyderabad City and Warangal reaches the Calcutta-Madras line at Beward and the Rallway State of the Rallway takes of and running cast through Hyderabad City and Warangal reaches the Calcutta-Madras line at Beward Rallway. Broad Marmado nite main line of the Great Indian Penhasia Rallway are to the border and is now linked up with Dronachailland on the Madras and Southern Mahratfa Rallway. Branch lines exist from Purns 16 (f. Mackenzie. 6)

Production and Industry.—The principal industry of the State is agriculture which maintains 67 per cent, of the population of the State is agriculture to Kothagudian and Vikarabad to Bidar whiled The common system of land tenure is properly in the state of the population of the state of the

From June 1032 the Rallway is running motor bus service in the city and suburbs of Hyderahad and on some district roads, Administration of the control of th

Co-ordination of road rail services has been achieved by the opening of many out-agencies in the districts for through booking of goods and by arranging for the collection and delivery of goods are comonic rates from merchants' godowns to railway stations.

LAHWAY SULLIONS,

Education.—In 1935-36 the total number of educational Institutions were 4,800, the number of Primary schools in particular having been largely increased.

The Osmania University which was established at Hyderaload by a Charler in 1918 marks a new departure in Indian education as it imparts instruction in the faculities of Arts, Science, Law, instruction in the faculities of Arts, Science, Law, and the Charles of the Charles of

British Resident:—Hon'ble Sir Duncan G. Mackenzle.

MYSORE.

sides by the Madras Presidency except on the north and the north-west where it is bounded by the districts of Dharwar and North Canara respectively and towards the south-west by Coorg. It has two natural divisions each with a distinct character of its own-the hill country (or malnad) on the west and the wide spreading vaileys and plains (the maidan) on the east. The Valleys and plants (the installar) of a treess. The State has an area of 29,483 square miles including that of the Civil and Military Station of Bangalore and a population of 6,55,302 of whom over 92 per cent. are Hindus. Kannada is the language of the State.

History .- The ancient history of the country is varied and interesting. Tradition connects the tableland of Mysore with many a legend enshrined in the great Indian epics, the Ramayana and the Mahabharata. Coming down to historic times, the north-eastern portion of the country formed part of Asoka's Empire in Mysore was ruled by three dynasties, the north-western portion by the Pallavas and the central and the southern portions by the Gangas. In the eleventh century, Mysore formed part of Chola dominion, but the Cholas were driven out early in the twelfth century by the Hoysalas, an indigenous dynasty with its capital at Halebid. The Hoysala power came to an end in the early part of the fourteenth century. Mysore was next connected with the Vijayanagar Empire. At the end of the fourteenth century Mysore became associated with the present ruling dynasty. At first tributary to the domi-nant empire of Vijayanagar, the dynasty attained its independence after the downfall of Vijayanagar in 1565. In the latter part of the eighteenth contury, the real sovereighty passed into the hands of Hyder Ali and then his son, Tippu Sultan. In 1799, on the fall of Seringa-patam, the British Government restored the State comprised within its present limits, to the ancient dynasty in the person of Maharaja Sri Krishnaraja Wadayar Bahadur III. Owing to the insurrections that broke out in some parts of the country, the management was assumed by the British Government in 1831. In 1881, the State was restored to the dynasty in the person of Sri Chamarajendra Wadayar Bahadur under conditions and stipulations laid down in an Instrument of Transfer. That ruler with an Instrument of Transfer. Trast ruler with assistance of Mr. (afterwards Sir K. Seshadri lyer, K.O.S.I., as Dewan, brought Mysore to a state of great prosperity. He died in 1804, at the easy age of 31, and was succeeded by the present ruler His Highness Sir Krishnaniendra present ruler, O.S.I., O.S.I., C.B.R., who was installed in 100 duty. O.S.I., O.B.R., who was installed in 100 duty. O.S.I. O.B.R. he make the meant of Transfer was present property. ment of Transfer was replaced by a Treaty which indicates more appropriately the relation subsisting between the British Government and the State of Mysore. In 1927, the Government of India remitted in perpetuity Rs. 101 lakhs of the annual subsidy which till then had stood at Rs. 35 lakhs.

The State of Mysore is surrounded on all Administrative headquarters. His Highness the Maharaja is the ultimate authority in the State, and the administration is conducted under his control, by an Executive Council consisting of the Dewan and two Members of Council. The High Court consisting of the Chief Justice and three Judges is the highest Judicial tribunal in the State. There are two constitutional Houses in the State— the Representative Assembly and the Legislative Council. The Representative Assembly was established in 1881 by an executive order of Government, and its powers and functions have been increased from time to time by similar orders of Government. Under the scheme of constitutional developments announced October 1923, the Representative Assembly has been placed on a statutory basis and given a definite place in the constitution by the promulgation of the Representative Assembly Regulation, XVIII of 1923. The franchise has been the third century B.C. Mysore then came extended and the disqualification of women on under the rule of the Andhra dynasty. From the ground of sex, from exercising the right to about the third to the eleventh century A.D., vote and standing as candidates for election orde and standing as candidates for election has been removed. The privilege of moving resolutions on the general principles and policy underlying the budget and on matters of public administration has been granted in addition to those already enjoyed of making representations about wants and grievances and of interpellating Government. The Assembly is also to be consulted on all proposals for the levy of new taxes and on the general principles of all measures of legislation before their introduction into the Legislative Council. Besides the Budget Session (formerly Birthday Session) and the Dasara Session, provision has been made for a special session of the Assembly summoned only for Government business.

The strength of the Legislative Council has been mised from 30 to 50 by Act XIX of 1923, of whom 20 are official and 30 are non-official members. The Council which exercised the privileges of interpellation, discussion of the State Budget and the moving of resolutions on all matters of public ad-ministration is, under the reformed constitution, granted the power of voting on the demands for grants. The Dewan is the ex-ordicio President of both the Representative Assembly and the Legislative Council.

The Legislative Council has a Public Accounts Committee which examines the audit and appropriation reports and brings to the notice of the Council all deviations from the wishes of the Council as expressed in its Budget grant.

Standing Committees .- With a view to enlarge the opportunities of non-official representatives of the people to influence the everyday Administration of the State, three Standing Committees consisting of members of the Representative Assembly and the Legislative Council, have been formed, one in connection with Railway, Electrical and P. W. Departments, the second in connection with Local Self-Government and the Departments of Medicine, Administration.—The City of Mysore is the Sanitation and Public Health and the third in Capital of the State, but Bangalore is the connection with Finance and Taxation.

Santa Troops -The combatant strength of the Military Force at the end of Dec. 1927 was 1 380 of which 465 were in the Mysore Lancers. 1.500 01 Which 403 Were in the Mysore Labers, in the Infantry. Besides, there is a Mechanical Transport Corps which consists of saven leansport corps which consists of seven lorries, two six wheeler and five commercial, with the necessary staff. The total cost during 1936-37 was about 15 lakhs of runees. The cost of the Police Administration during 1025-98 was about 90 lakhs of rutiess.

Agriculture.-Nearly three-fourths of the nopplation are employed in agriculture, and the general system of and tenure is ryotwari. general system of and tenure is ryotwari. The principal food crops are ragi, rice, job, millets, gram and sugarcane, and the chief fibres are cotton and sun-hemp. The Sericultural industry is the most important subsidiary industry practised by the agriculturists.

As elsewhere in India the industry is passing through one of the gravest crises in the course of its history owing to the competition of cheap foreign silk. The area under mulberry during 1935-36 had shrunk to 28,500 acres. The Department of Agriculture is popularising agriculture on scientific lines by means of demonstrations, investigations and experiment. There are 7 Government Agricultural Farms at Hebbal, Babbur, Marthur, Nagenahally, Hunsur, Mandya and the coffee experimental station at Balehonnur. A live-stock section has been organised which has been asking necessary steps for the improvement of live-stock. A cattle breeding station has been established at Parvatharayanakere, near Aijampur in the Kadur District with a sub-station at Basur. A Scrum Institute has been opened at Bangalore for the manu-facture of scrum and virus for inoculation against rinderpest and other contagious dis-eases. There are 64 Veterinary Dispensaries and Hospitals in the State under the control of the Civil Veterinary Department.

Industries and Commerce.—A Department of Industries and Commerce was organised in 1913 with a view to the development of Industries and Commerce in the State. Its functions are stimulating private enterprise by the offer of technical advice and other assistance for starting new industries, undertaking experi-mental work for pioneering industries and developing existing industries and serving as a general bureau of information in industrial and commerthe Government Soap Factory, Government as below:-

Porcelain Factory Government Silk Weaving Factory Government Electric Factory and Factory, Government Electric Factory and the Central Industrial Workshop. The Department has a well-equipped Govern-ment Industrial and Testing Laboratory, with a section devoted to the manufacture of a section devoted to the maintacture of pharmaceutical drugs and preparations. The Well-Boring Section which is engaged in the drilling of horeholes for meeting the requirements of drinking water in the rural areas is now under the control of the Bureau of Santary Engineering Department of Public Health, Wysore is the largest producer of silk in India. Mysore is the largest producer of silk in India, and the care and development of this industry is entrusted to a Department of Scientification charge of a Superintendent subject to the general control of the Director of Industries and Commerce. Arrangements have been made for the supply of disease-free seed and a central and five taluk popular schools have been doing good work.

With a view to demonstrate and impart instructions in the utilisation of the high grade silk produced in the State, Government have established a Silk Weaving Factory and Dyeing and Finishing Works at Mysore. The Sandalwood Oil Factory started on an experimental basis is now working on a commercial scale. A factory is working at commercial scale. A factory is working at Mysore. A large plant at a cost of more than 170 lakhs of rupees has been constructed at Bhadravathi for purposes of manufacturing charcoal, pig-iron, distilling wood-alcohol, and developing subsidiary industries. A new Pine Foundry was opened there for the manufacture of pipes which are in great demand in several towns in India. The steel plant attached to the works is now working successfully and is worked by electricity. The Government Cement Factory and the Paper Mills under crection at Bhadravati are expected to commence operations shortly. The Works are on the borders of an extensive forest area and practically at the foot of the hills containing rich deposits of iron. manganese and bauxite, and are not far from the Gersoppa Water-Falls estimated to be capable of producing 100,000 horse-power of electric energy. A Trade Commissioner in London has been appointed to look after the interest of the trade and industry of the State.

Finances.-The actual total receipts and disbursements charged to Revenue for the past cial matters. The department has under its five years together with the revised budget esticontrol the following demonstration factories: - mate for 1936-37 and budget for 1937-38 were

Hydro-Electric and Irrigation Works.— The river Cauvery in its course through the State, possesses a natural fall of about 380 feet near the island of Sivasamudram, and this fall was harnessed in the year 1902 for the development of electric power, to the extent of about 12,000 H.P. for supplying power mainly to the Kolar Gold Mining Companies and incidentally for lighting the cities of Mysore and Bangalore.
In course of time, the demand for power increased and with a view to protecting the existing supply and augmenting the generation of additional power to meet the growing demands, the "Krishnarajasagara Reservoir" called after the name of the present Maharaja was constructed. The storage from the reserwas constructed. The storage from the reservoir besides enabling the generation of electric power up to 46,000 H.P. will also bring under irrigation about 1,20,000 acres of land situated in an area subject to more or less continuous drought. The new Canal Works were started in 1927, and the main canal is named the "Irwin Canal" after Lord Trwin the there?" after Lord Irwin the then Viceroy. An area of about 13 thousand acres under this Canal has been brought under sugarcane cultivation mas peen brought under sugarantae cultavation and a Sugar Factory with a crushing capacity of about 1,400 tons of cano per day has been established nearby at Mandya. An up-to-date Distillery has been erected as an adjunct to the Sugar Factory. Full advantage is being taken of the available electric power for small industries and the electrification of towns and lift Irrigation.

The construction of a reservoir across the river Kumadvathi near Anjanapur, Shikaripur Taluk, was completed at a cost of Rs.18 lakhs and the reservoir was opened for irrigation. The area expected to be irrigated is about 10,000 acres. In addition to large new irrigation works in progress, the work of constructing a Reservoir across the river Shimsha at Marconahalli, Kunigal Taluk, which is estimated to cost Rs.22 lakhs to irrigate an extent of about 10,000 acres, has been started.

With a view to meet the additional demand for power in the coming years, the Government have sanctioned a Hydro-Electric scheme have sanctioned a Hydro-Electric scheme costing about Rs. 56 lakhs for generating about 23,000 H.P. at the Shimsha Falls. The existing power channel from the Cauvery at Sivasamudram is proposed to be continued to the Shimsha Falls, a distance of about seven miles, as a head of 600 feet is available at the Shimsha Falls against 400 feet available at Sivasamudram.

There are 3,747 power installations, 31,777 lighting installations and 630 irrigation pumping installations. The total number of towns and villages electrified so far is 165.

Education.—A separate University for Mysore was established on the 1st July 1916. It is of the teaching and residential type composed of the Central and Engineering Colleges at Bangalore and the Medical, Maharaja's and Maharani's Colleges at Mysore, and three Intermediate Colleges with headquarters at Mysore. The colleges are efficiently equipped and organised and there is a training college for men located at Mysore. men located at Mysore. The Maharani's College at Mysore is a College for Women.

There are 39 High Schools of which 7 are for girls, 328 Middle Schools of which 35 are for girls. Provision has been made for teaching several vocational subjects in general school with a view to giving a bias towards the vocations and in order to enable the pupils to take to such vocations after their High School life. are 11 Training Institutions for training teachers in Middle and Primary Schools; 3 of them are for women. The control over Primary Education has been made over to the Local Bodies under the Elementary Educational Regulation of 1930 and the Local Bodies are responsible for making due provision for extension of Primary Education in accordance with a definite programme spread over 10 years. There are also schools for imparting instruction in Agricultural, Commercial, Engineering and other Technical subjects. There Engineering and other recumical subjects. There were altogether 7,692 schools on Sist March 1934 with a strength of 3,11,957 pupils. This gives one school to every 3.8 square miles of the area, and to every 855 persons of the population. The total expenditure on Education was Rs. 66,42,196 yielding an average of Rs. 1-0-7 per head of population.

Dewan,-Amin-ul-Mulk Sir Mirza M, Ismail: K.C.I.E., O.B.E.

Resident in Mysore and Chief Commissioner of Coorg .- The Hon. Col. J. H. Gordon, C.I.E., 0.B.E., M.C.

BARODA.

The State of Baroda is situated partly in | the district of Amreli, formed of scattered tracts Gujerat and partly in Kathiawar. It is divided into four district blocks : (1) the southern district on Navari near the mouth of the Appli river, and mostly surrounded by British territory; (2) central district north of the Narbada, in which lies Baroda, the capital city; (3) to the north of Ahmedabad, the district of Mehsana;

of land. The area of the State is 8,164 square miles; the population is 2,443,007 of whom over four-fifths are Hindus.

History.—The history of the Baroda State is such dates from the break-up of the Mughal Empire. The first Maratha invasion of Gujerat and (4) to the west, in the peninsula of Kathiawar took place in 1705. In later expeditions Pilaji

in Gujerat. His son Damaji finally captured Baroda in 1734, since then it has always been in the hands of the Gackwars; but Mughal authority in Gujerat did not end until the fall of Ahmedabad in 1753, after which the country was divided between the Gaekwar and the Peshwa. In spite of the fact that Damaji was one of the Maratha chiefs defeated at Panipat by Ahmed Shah, he continued to add to his territory. He died in 1768, leaving the succession in dispute between two rival sons. He was succeeded in turn by his sons Sayaji Rao I, Fattesing Rao, Mannaji Rao and Govind Rao. The last died in 1800 and was succeeded by Anand Rao. A period of political instability ensued which was ended in 1802 by the help of the Bombay Government, who established the authority of Anand Rao at Baroda. By a treaty of 1805 between British Government and Baroda, it was arranged inter alia that the foreign policy of the State should be conducted by the British, and that all differences with the Peshwa should be similarly arranged, Baroda was a staunch ally of the British during the wars with Baji Rao Peshwa, the Pindari hordes and Holkar, But from 1820 to 1841, when Sayaji Rao II was Gaikwar, differences arose between the two Governments dinerences arose between the two Governments which were settled by Sir James Carnac, Governor of Bombay, in 1841. Ganpat Rao succeeded Sayaji Rao II in 1847. During his rule the political supervision of Baroda was transferred to the Supreme Government. His successor, Khande Rao, who ascended the gadi in 1856, introduced many reforms. He stood by the British in the Mutiny. He was succeeded by his brother Malhar Rao in 1870. Malhar Rao was deposed in 1875 for "notorious misconduct" and "gross misgovernment," but the suggestion that he had instigated the attempt to poison Col. Phayre, the Resident, was not proved. Sayaji Rao III, a boy of 13 years of age, who was descended from a distant branch of the family was adopted as heir of Khande Rao in 1875 and is the present Maharaja. He was invested with full powers in 1881.

Administration.—An executive council consisting of the principal officers of the State carries on the administration, subject to the control of the Malaraja, who is assisted by a Dewan and other officers. A number of decrease of the control of the Malaraja, who is assisted by a Dewan and other officers. A number of decrease of the control of the con

Guckwar, who may be considered as the founder possesses jurisdiction over the whole of the State of the war of the property of

forces.

Finance.—In 1935-86, the total receipts of the
State were Rs. 2,9,04,000 and the disbursements Rs. 9,17,789,000. The principal Revenue
heads were:—Land Revenue, Rs. 1,38,39,000;
Askarf, Rs. 2,47,8600; Opinian, Rs. 2,68,000;
Askarf, Rs. 2,47,8600; Opinian, Rs. 3,68,000;
Tribute from other States, Rs. 5,23,000. British
Currency was introduced in 1901.

Production and Industry—Agriculture and rastare support 65 per cent, of the people. The principal crops are rice, wheat, grain, castor-city, rapsesed, poppy, cotton, san-hemp, tohoaco, sugarcane, maize and garden crops. The greater part of the State is held on ryoteer's tenure. The State contains rew minerals, except sand-stone, which is quarried at Someti, and a variety of the state of the s

Capital City.—Baroda City with the cantonment has a population of 112,860. It contains a public park, a number of fine public buildings, palaces and offices; and it is crowded with Hindu temples. The Cantonment is to the north-west of the city and is garrisoned by an infantry bathalino of the Indian Army.

Ruler.—His Highness Farzandi-I-K has-i-Dowlat-I-Englishia, Mahuraja Sir Sayaji Kao III Gaekwar, Sena Khas Khel, Samsher Ba hadur, G.O.S.I., G.O.LE., LLD. (Benares), Hon. LLD. (Cantal.), Maharaja of Baroda.

Resident.—Lieut.-Col. J. L. R. Weir, C.I.E. Dewan.—Sir V. T. Krishnamachari, K.C.I.E.

GWALIOR.

The House of Scindia traces its decent to a | G.O.S.I., G.B.E., A.D.C., to the King. He succeeded the family received a patent of rank from Aurangthe family received a patent of rank from Aurang-zabe. The founder of the Gwallor House was Ranoij Scindia who held a military rank under the Peshwa Baji Rao, In 1726 the Peshwa granted deeds to Puar, Holkar and Scindia, ampowering them to levy "Chauth" and "Sardesmukhi" and retain half the payment to "Sardesmukhi", and retain half the payment to their troops. In 1736 Ranoji Scindia accom-panied Baji Rao to Delhi where he and Malhar Rao Holkar distinguished themselves in military exploits. Ranoji fixed his headquarters at the ancient city of Ujjain, which for the first time became the capital of the Scindia dominions. During the time of Mahadji Scindia and Daulat Rao Scindia Gwalior played an important part in shaping the history of India. Despite partial reverses which Mahadji Scindia's troops suffered at the hands of the British in 1780, reverses which led to the treaty of Salbai (1782), Scindia's he was now recognised by the British as an independent sovereign and not as a vassal of girls. the Peshwa.

In 1790 his power was firmly established in Delhi. While he was indulging in ambitious hopes he fell prey to fever which ended his remarkable exter on 12th February 1794. Himself a military genius, Mahadii Scindia's armies reached the zenith of their glory under the disciplined training of the edebrated French adven-While he was indulging in ambitious ture De Boigne. Mahadji was succeeded by his grand nephew Daulat Rao in whose service Perron, a military commander of great renown played a leading part. The strength of Scindia's army was, however, considerably weakened by the reverses, sustained at Ahmednagar, Assaye, Aslgarh and Laswari. Daulat Rao Scindia died in 1827. Till his death he remained in undisputable possession of almost all the territory which belonged to him in 1805.

Daulat Rao was succeeded by Jankoji Rao who passed away in the prime of life. On his demise in 1843 intrigues and party spirit were rampant and the army was in a state of mutiny with the result that it came into collision with the British forces at Maharajpur and Pannihar.

Jankoji Rao was succeeded by Jayaji Rao Jamou And was succeeded by Jayali Rao Scindla whose adherence to the British cause during the dark days of Muthy, when his own troops descreted him, was unshakable. In 1861 he was created a Knight Grand Commander of the Most Exalted Order of the Star of India and the most examen order of the Star of Henica and I way of wathout source in India Transport Coming 1877 was made a Councillor of the Empress, pany, and those corners which were unconnected Subsequently he received other titles. He are being only to the other world this important lighways, entered into treatiles of mutual exchange of To bring closer to the outer world this Highness deritories with the Brinish Government. He has considered to the outer world this Highness deleted on 20th June 1886 and was succeeded. He has considered the construction of a died of 20th June 1886 and was succeeded by the state of the contraction of the construction of the constru

The House of Scinion traces are the statement of the House of Scinion and S 1925 and was succeeded by his son His Highness the Maharaja Jivaji Rao Seindia, Alijah Bahadur. During His Highness' minority the administration of the State had been conducted by a Council of Regency. His Highness assumed full ruling powers on November 2, 1936.

> In matters of administration, His Highness is assisted by a Council consisting of eight Ministers and the Huzoor Secretary. The new constitu-tion came into force from March 1937, when with a view to improve the efficiency of the Government, the distribution of work among various Ministers was revised and redistributed. The State has a Legislative Assembly called Majlis-i-Am, to which members are both elected and nominated. The State maintains an efficient army consisting of Cavalry, Infantry and Artillery units. It has its own Postal system. Besides possessing a number of schools the State maintains two Colleges for boys and one for The State runs a public school on European lines to impart education to the children of nobles and well-to-do people.

The State has an area of 26,397 sq. miles and population of 3,523,070 according to census of 1931. Its average rainfall varies from 25 to 36 inches. The average revenue is two and half crores

There is a well equipped State workshop in Gwalior, the Capital of the State; there are electric power house, Leather Factory, Tannery and Pottery Works. There are cotton mills in Gwalior and Ujfain. The State has its own Light Railway. The portion of the G.I.P. Railway which passes through a major portion of the State territories is owned by the Gwalior Darbar.

The Ruler of the State enjoys a salute of 21 guns. The State is in direct relations with the Government of India.

Since the present Ruler assumed powers vigorous impetus has been given to an all-round moral and material progress. The construc-tion of the Harsi reservoir costing about one and half crores, a proposal to construct an up-to-date Female Hospital and the sanction of one crore of rupees for rural reconstruction are the land-marks in the history of Gwalior. The network of roads have been utilised by the motor service run by Gwalior Northern India Transport Com-

BALLICHISTAN AGENCY.

In this Agency lies the State of Kalat with its | Government Official of Provincial service. The feudatory State of Las Bela.

Kalat is bounded on the North by the Chagai district, on the East by Sindh and the Marri-Bugti tribal territories, on the South by the Arabian Sea and on the West by Persia.

The Kalat State, unlike the other Indian States, is a confederacy of partially independent chiefs, whose head is the Khan of Kalat. The divisions of the State are Sarawan or the Highlands, Jhalawan or the Lowlands, Kachhi, Mekran and Kharan. The inhabitants are, for the most part Muhammadans of the Sunni sect. The area is 73,278 square miles and the

population 3,42,101 (1931).

The relations of Kalat with the British Government are governed by the treaties of 1854 and 1876, by the latter of which the independence of Kalat was recognized, while the Khan agreed to act in subordinate co-operation with the British Government. There are also agreements with Kalat in connection with the construction of the Indo-European telegraph line, the cession of jurisdiction on the railways and in the Bolan Pass, and the permanent leases of Quetta, Nushki and Nasirabad.

The Khan is assisted in the administration of the State by a Wazir-i-Azam, at present a retired

Governor-General's Agent in Baluchistan con-ducts the relations between the Government of India and the Khan, and exercises general political supervision over the State through the Political Agent in Kalat. The revenue The revenue of the State is about Rs. 14, 5 lakbs, out of which the Khan retains a civil list of Rs. 3.00,000 per annum. The present Khan is Captain His Highness Beglar Begi Sir Mir Ahmad Yar

Khan, G.C.I.E., born in 1904.

Las Bela is a small State under the suzerainty of Kalat. The Hab river for the Southern part of its course forms the Eastern boundary with Sind, and the greater part of the State consists of the valley and the delta of the Purali river. Area 7,132 square miles; population 63,008 (1931), chiefly Sunni Muhammadans. The estimated average revenue is about Rs. 3, 7 lakhs. The ruling chief of Las Bela, known as the Jam is Mir Ghulam Qadir Khan a minor son of late Jam Mir Ghulam Muhammad Khau, 1920, The young Jam is at present : The young Jam is at present studying at the Aitchison College, Lahore. The administrative control of the State is exercised by the Hou'ble the Agent to the Governor-General and Chief Commissioner in Baluchistan through the Political Agent, Kalat. The Jam also employs a Wazir to assist him in the administration of the State.

RAJPUTANA AGENCY.

Raiputana is the name of a great territorial circle with a total area of about 1,35,091 square miles, which includes 21 Indian States, one Chiefship, one estate, and the small British district of Amer-Merwara. It is bounded on the west by Sind, on the north-west by the Punjah State of Bahawalpur, on the north and north-east by the Punjab, on the east by the United Provinces and Gwalior, while the southern boun-dary runs across the central region of India in an frregular zigzag line. Of the Indian States. Chiefship and estate 19 are Rajput, 2 (Bharatpur and Dholpur) are Jat, and two (Palanpur and Tonk) are Mahomedan. The chief administrative control of the British district is vested ex-officio in the political officer, who holds the post of Resident for Rajputana for the supervision of the relations between the several Indian States of Raiputana and the Crown Department. and has his headquarters at Mount Abu. For administrative purposes they are divided into the following groups:—Bikaner and Sirohi in direct relations with the Resident for Rajputana, Eastern Rajputana States Agency 6 States (Bharatpur, Bundi, Dholpur, Jhalawar, Karauli and Kotah); Jaipur Residency 5 States (Alwar, Jaipur, Kishangarh, Tonk, Shahpura and Lawa Estate); Mewar Residency, and Southern Rajputana States Agency 4 States (Mewar, Dangarpur, Banswara and Pratabgarh and the Kushalgarh Chiefship); Western Rajputana States Residency 4 States (Jodhpur, Jaisalmer Palanpur and Danta).

The Aravalli Hills intersect the country almost from end to end. The tract to the north-

and unproductive, but improves gradually from being a mere desert in the far west to comparatively fertile lands to the north-east. To the south-east on the Aravalli Hills lie higher and more fertile regions which contain extensive hill ranges and which are traversed by considerable

Communications .- The total length of railways in Rajputana is 3,250 miles, of which about 1,000 are the property of the British Government, The B. B. & C. I. (Metre-gauge) (Government) runs from Ahmedabad to Bandikui and from there branches to Agra and Delhi, Of the Indian State railways the most important are the Joshpur and Bikaner lines from Marwer Junction to Hyderabad (Sind) and to

Inhabitants .- Over 50 per cent, of the population are engaged in some form of agriculture : about 20 per cent. of the total population are maintained by the preparation and supply of material substances; personal and domestic service provides employment for about 5 per cent. and commerce for 21 per cent. of the population. The principal language is Rajasthani.

Among castes and tribes, the most numerous are the Brahmans, Jats, Mahajans, Chamars, Rajputs, Minas, Gujars, Bhils, Malis and Balais. The Rajputs are, of course, the aristo-Balais. The resignment are no course, one arrows or the country, and as such hold the land to a very large extent, either as receivers of rent or as cultivators, by reason of their position as integral families of pure descent. as a landed nobility, and as the kinsmen of ruling chiefs, they are also the aristocracy of west of the hills is, as a whole, sandy, ill-watered India; and their social prestige may be measured

(as distinguished from a caste) in India which does not claim descent from, or irregular connection with, one of these Rajput stocks.

Udaipur State (also called Mewar) was founded in about 646 A.D. The capital city is Udaipur, which is beautifully situated on the slope of a low ridge, the summit of which is crowned by ow ringe, side sulmine or writer is crowned by His Highness the Maharana's palaces, and to the north and west, house extend to the banks of a beautiful piece of water known as the Pichola Lake in the middle of which stand two island palaces. It is situated near the terminins of the palaces. It is addaed the action of Burbay. His Highness Maharajadhiraj Maharana Sir Bhupal Singhiji Bahadur, G.C.S.I., K.C.I.B. who succeeded his father the late Maharana His Highness Maharajadhiraj Maharana His Highness Maharajadhiraj Maharana Sir Fateh Singhji Bahadur, G.O.S.L., G.O.J.R., G.O.Y.O., in 1930, is the Premier Ruling Prince of Rajputana. The revenue and

by observing that there is hardly a tribe or clan expenditure of the State are now a about numerous, and stone inscriptions dating from the third century have been found.

Banswara State is the southernmost State of Rajputana within the Political Agency of the Southern Rajputana States. The area of the State is 1,946 square miles and the population 2,60,670 souls. It is thus in regard to size eleventh among the States of Rajputana. Banswara with among the States of Rajputana. Banswara wun Dungarpur originally formed a country known as Bagar, which was, from the beginning of 1529, held by certain Rajput Rulers of the Ghelot or Sishodya clan, who claimed descent from an elder branch of the family nor ruling in Udalpur. After the death of the Ghelot or Sishodya clan, who claimed a ruling and the state of the country of the second to the state of the state of the country of the second to the state of about 1529, his territory was divided between his two sons Jagmal Singhji and Prithvi Rajji, and the descendants of the two families are now the Rulers of Banswara and Dungarpur respectively. Where the town of Banswara now stands, there was a large Bhilpal or colony under a powerful Bhil Chieftain, named Wasna, who was defeated and slain by Maharawal Jagmal Singhji about 1530. The name of Banswara is by tradition said to be accorruption of Wasnawara or the country of Wasna. Others or wishawara of the country of washa. Others assert that the word means the country (wara) of bamboos (bans). Nearly three centuries after its foundation by Maharawal Jagmal Singhij, Maharawal Bijai Singhij anxious to get rid of the supremacy of the Mahrattas offered to become a tributary to the British Government. In 1818, a definite treaty was made with his successor, Maharawal Umed Singhii. Banswara successor, Maharawal Umed Singhji. has been described as the most beautiful portion of Rajputana; it looks at its best just after the rains. The principal rivers are the Mahi, the Anas, the Eran, the Chap and the Haran

The present Ruler is His Highness Rayan Rai Tile present attent is alle Highness Astyan Maharayadi Sahib Shree Sir Pirthi Singhji Bahadur, K.C.I.E., who was born on July 15, 1888, and is the 21st in descent from Maharawal Jagmal Singhji. His Highness was educated in the Mayo College and succeeded his father in 1914. His Highness is entitled to a salute of 15 guns. The State is ruled by His Highness the Maharawalji Sahib Bahadur with the assistance of the Diwan and the Home Minister, and the Judicial and the Legislative Councils of which the Diwan is the President and the Heir Apparent, Maharaj Baj Kumar Sahib Shri Chandraveer Singhji Sahib, is Senior Member. The revenue of the State is about 7 lakhs and the expenditure is about the same.

Diwan .- Mr. Jitendra S. Mehta, B.A.,

Home Minister,-Mr. Nand Lal Banerjee,

Dungarpur State, with Banswara, for-merly comprised the country called the Bagar, It was invaded by the Mainrattas in 1818. As in other States inhabited by hill tribes, it became necessary at an early period of British supremacy to employ a military force to corere the Bhits. The State represents the Gadi of the eldest branch of the Sisodlas and dates its separate existence from about the close of the 12th Century. Samant Singh, King of Chitor, when driven away by Kirtipal of Jaior, fled to Bager and Rilled Chowneshmal, followed the State of Relative State of State

Partubgarb State, also called the Kanthal, was founded in the sixteenth contury by a descendant of Rana Mokal of Mowar. The Kown of Partabgarh was founded in 1688 by Fartab State, in Counties were supported by the state of the State State. In the State State, in County was overall state, in County was overall state by agreeing to pay Holkar a tribute of Salim Stable Rs. 72,700 (which then being coined in the State Bint was legal tender through solid to the State State with the British Government was formed in 1894; but the treaty then entered into was subsequently cancelled in 1818. The tribute used to be paid to Holkar is being paid to the British Government was formed in 1894; but the treaty then entered into was subsequently cancelled the state of the State with the British Government was formed in 1894; but the treaty then entered into was subsequently cancelled the state of the State with the British Government was formed in 1894; but the treaty then entered to Rs. 30,300 British currency. The terms of the treaty of Mandasur, and in 1904 has converted to Rs. 30,300 British currency. The Eran Singhili Bahadur, Ko. Cat., who was born in 1908 and succeeded in 1929. The State enjoys pleasy jurisdiction. The highest administrative and executive office is termed. "Mandaxma of the State. There is a duly graded Judiciary under a High Court. Revenue about 54 lakhs; expenditure nearly 55 lakhs."

W Anderson, O.I.E., Vice-President, State Council and Finance Member; (2) Khan Bahadur Sz. Mohammad Adbul Tawwab Khan, Home Member; (3) Khan Bahadur Shelkh Halim Bakhah, O.B.S., Judicial Member; (4) M. Selekh Ghulam Mohammad Bahaddin, Kevenne Member: (5) Maulvie Mohammad Maula Bakhsh, M.A. (Oxon.), F.L.S., Development Member.

Revenue .. Rs. 24,24,869. Expenditure Secretary:-M. Hamid Husain, B.A.

Shahpura State.—The ruling family belongs to the Secsodia clan of Rajpuis. The State came into existence about 1629 when family: the Parganah of Phulia was granted by the Mughal Emperor Shah-I-Jehan to Maharaj Sujan Singh, son of Maharaj Surajmal, the second son of Maharaj Surajmal, the Later on Raja Ran Singhji received the par-ganah of Kachhola from the Maharana of Udaipur and was recognised as a great noble of the Mawar State.

The present Ruler is Rajadhiraj Srl Umaid Singhji Bahadur, The State enjoys permanent honour of nine guns salute.

Bharatpur State.—Consists largely of an immense alluvial plain, almost 2,000 Sq. miles in size watered by the Banganga and other monsoon rivers.

The present ruling family of Bharatpur are Jats, of the Sinsinwar clan who trace their pedigree to the eleventh century. The family derives its name from its old village Sinsini. Bharatpur was the first State in Rajoutana that made alliance with the British Government in 1803. It helped Lord Lake with 5,000 horses in his conquest of Agra and the battle of Laswari wherein the Maratha power was entirely broken and received 5 districts as reward for the service. In 1804, however, Bharatpur with Jaswant Bao Holkar against the British Government which resulted in a war. Peace was re-established in 1805 under a treaty of alliance re-seamined in 1905 ander a steamy of annatic and it continues in force. The Gali being usurped by Darjan Sal in 1825, the British Government took up the cause of the rightful heir Maharaja Balwant Singh Sahib. Bharatpur was besieged by Lord Combermere, and as the faithful subjects of the State also made common cause with the British Army the usurper was quickly disposed of, and Maharaja Balwant Singh, the rightful heir to the Throne, came into his own. Bharatpur also rendered valuable service to the British Government during the Mutiny. During the Great War the Bharatpur Durbar gave valuable help to the Imperial Government. The Bharatpur Imperial Imperial Government. The Bharatpur Imperial Service infantry served in East Africa and the Mule Transport Corps served in all theatres of war except Africa. The present Ruler is His Highness Shri Maharaja Brijendra Saugh Bahadur, Bahadur Jung, who was born in 1918 and succeeded his Adher, Maharaja St 1920 and Succeeded Andrey Maharaja on the 27th of March 1929. During his minority the State is administered by a Council presided over by Major C. P. Hancock, O.B.E., M.C., 1 .A.

Revenue Rs. 35,96,000.

Dholpur State.-The family of the ruling Chiefs of Dholpur belongs to the Bamrolian Jats, the adopted home of one of their ancestors. The family took the name of Bamrolia about The tamily took the name of Damroin account the year 1367. They next migrated to Gwallor, where they took the part of the Rajputs in their struggles against the Emperor's Officers. Eventually the Bamrolia Jats settled near Gohad and in 1505 Surian Deo assumed the title of Rana of Gohad. After the overthrow of the Mahrattas at Panipat, Rana Bhim Singh in 1761 possessed himself of the fortress of Gwalior but lost it six years later. In order to bar the encroach-ments of the Mahrattas, a treaty was made area of \$13 square miles, yielding a revenue of

with the Rana in 1779 by the British Government under Warren Hastings, and the joint forces of the contracting parties re-took Gwalior. In the treaty of the 13th October, 1781 between the British Government and Scindia, it was stipulated that so long as the Maharaj Rana observes his treaty with the English, Scindie serves his treaty with the English, Schiqla should not interfere with his territories. The possession of Gohad however led to disputes between the British and Schidla, and in 1805 the Governor-General transferred Gwallor and Gohad to Scindia, and that of Dholpur, Bari, Baseri, Sepau and Rajakhera to Maharaj Rana Kirat Singh. Maharaj Rana Kirat Singh died in 1836 and was succeeded by his son Maharai an 1500 and was succeeded by his son Maharaj Rana Bhagwant Singh on whose death in 1870 his grandson, the late Chief Maharaj Rana Nehaj Singh, succeeded to the Gadi. Lt. Col. His Highness Rads-ud-Daula Sipahdar-ul-Mulk Saramad Rajhai Hind Maharajadhiraj Sri Sawak Maharaj Rana Sir Udai Bhan Singh Lokindra Bahadur Diler Jang Jai Deo, G.C.L.E., K.C.S.L. K.C.V.O., the present ruler, is the second son of Maharaj Rana Nehal Singh and was born on the 12th February, 1893. On the death of his brother Maharai Rana Ram Singh, His Highness succeeded to the gadi on March 1911.

Karauli State. -- A State in Rajputana under the Political control of the Resident for Rajputana, tying between 26° and 27° north latitude and 76° 30' and 77° 30' east longitude, 1,242 square 1 forms the miles. Bikaner State in point of area is the seventh largest of all the Indian States and the second largest in Rajputana. The population of the State is 9,36,218 of whom 77 per cent. are Hindus, 15 per cent. Mahomedans, 4 per cent. Sikhs and 3 per cent. Jains. The capital city of Bikaner, with its population including the suburbs of 85,927, is the third city in Rajputana.

The northern portion of the State consists of level loam land, whilst the remainder is for the most part sandy and undulating. The average rainfall is about 12 inches. The water level over most of the State is from 150 feet to

300 feet deep.

The Reigning Family of Bikaner is of the Rathore clan of Rajputs, and the State was found-Rathoro clan of Rajputs, and the State was found-de in 1465 A.D. by Hao Bitsal, the cldest son of Rao Jodhaji, Ruler of Marwar (Jodhpur), Sate are named. Rai Rai Singhil, the first for receive the title of Rajah, was "one of Akhar's most distinguished Generals" and it was during his reign that the present fort of Bikaner was bulk in 1593. The title of Maharajah was conferred on Rajah Anup Singhii by the Mughal Emperor in 1687 in recognition of his distinguished services in the capture of Golconda. The consplcuous ser-vices of Maharajah Sardar Singhji who in the Indian Mutiny of 1857 personally led his troops to appearte with the British forces in the field on the outbreak of the Mutiny was acknowledged by the Government of India by the transfer of the Sub-Tehsil of Tib, consisting of 41 villages from the adjoining Sirsa Tehsil in the Punjab to the Bikaner State.

The present Ruler, General His Highness Maharajadhiraj Raj Shiromani Maharajah Rajeshwar Narendra Sri Ganga Singhji Bahadur, G.C.S.I., G.C.I.E., G.C.V.O., G.B.E., K.C.B., A.D.C., LL.D., is the 21st of a long line of distinguished rulers renowned line of distinguished rulers renowned for their bravery and statesmanship. He was born on the 13th October, 1880. and assumed full ruling powers in December, 1898. He was awarded the first class Kaisar-Hind Medal for the active part he took in relieving the famine of 1899-1900, and soon after he went on active service to China in connec-tion with the China War of 1900-1901 in commend of his famous Ganga Risala and was men-tioned in despatches and received the China Medal and K.C.I.R. The State Forces consist of the Army Headquarters with a strength of 7 Army Headquarters with a strength of 7 Camel Corps, known as 'Ganga Risala.' whose sanctioned strength is 466 strong an Infantry Battalion known as Sadul Light Infantry 619 strong, a Regiment of Cavalry known as Dungar Lancers 342 strong, including

His Highness' Body Guard, a Battery of Artillery (4 guns 2.75"), 236 strong, two sections of Motor Machine Guns 100 strong and State Band 35 strong. The total strength of the Bikaner Army thus, excluding the Camel Battery 20 strong, armed with Machine Loading Guns and a Militia regiment 600 strong, the raising of which is under consideration, totals 1805. At outbreak of the Great War in 1914, His Highness immediately placed the services of himself and his State forces and all the resources of the State at the disposal of His Imperial Majesty the King-Emperor, and the Ganga Risala reinforced by the Infantry Regiment which became incorporated in the Camel Corps in the field, rendered very valuable services in Egypt and Palestine. An extra force was also raised for internal security. His Highness per-sonally went on active service in August 1914 and enjoys the honour of having fought both in France and Egypt, and thus has the distinc-tion of having fought for the British Crown on three Continents, viz., Asia, Europe and Africa. He was mentioned in despatches both in Egypt and France. His Highness also played a very conspicuous political part during the period of the War when he went twice to Europe as the Representative of the Princes of India. once in 1917 to attend the meetings of the Imperial War Cabinet and Conference, and again in 1918-19 to attend the Peace Conference where he was one of the signatories to the treaty of Versailles. His Highness led the Indian Delegation to the 11th Assembly of the League of Nations at Geneva and represented the Indian States at the Imperial Conferences in 1930. His Highness played a conspicuous part in the Indian Round Table Conference and the Federal Struc-Round Table Conference and the Federal Struc-ture Sub-Committee both in 1930 & 1931 and attended the Sliver Jubilee of the Reign of His Majesty King George V and the Coronation of His Majesty King George VI in 1935 & 1937 respectively.

His Highness enjoys a salute of 19 guns (personal) whilst the permanent local salute of the State is also 19. His Highness has also had the honour of being elected the first Chan-cellor of the Chamber of Princes, an office which he filled most creditably for 5 years till 1925,

Her Highness Maharaniji Sri Bhatlaniji received the Imperial Order of the Crown of India on New Year's Day, 1935.

His Highness is assisted in the administration by a Prime Minister and an Executive Council. The post of Prime Minister is held by Colonel Sir Kailas Narain Haksar, Kt., C.I.E. LL.D. A Legislative Assembly was inaugurated in 1913, and consists of 45 Members, 20 out of whom are elected Members: it meets twice a VEAT.

The revenues of the State are over a crore of rupees and a quarter. The State owns a large Railway system, the total mileage being 795.85. Work has started on a further extension from Sadulpur to Rewari, a distance of 86 miles, sanction to the construction of which was received from the Government of India in March 1937. This extension will form an important connection towards Delhi. Another project under contemplation is that from Sri Kolayatji to Sind via Jaisalmer, an approximate distance of 300 miles,

Hitharto there was practically no irrigation i Hitherto their was practically no irrigation in the State, the crops depending only on the scanty rainful; but the construction and opening in 1927 of the Gang Canal taken out from the Sutlej River has helped to protect about 0,20,000 acres of land in the northern part of the State against famine from, which it has or the state against famine from which it has suffered in the past. 3,34,977 bighas of the Canal land have already been sold and further sale is going on. Even larger expectations are held out from the Bhakra Dam Project from which it is hoped that the remaining level lands in the north of the State will be irrigated

A coal mine is worked at Palana, 14 miles south from the Canital.

Alwar State is a hilly tract of land in the East of Rajputana. The Alwar House is the liead in India of the Naruka clan who are descendants of 'Rush', the eddest son of Shri was the common airestor of both the Alwar and Jaipur Houses. Bar Singh, the eldest son of Udal Karanji of Amber, renounced his right of succession in favour of his vounger brother Nar Singhji. Nar Singhji's line founded Jaipur while in Bar Singhji's line Makarai Pratap Singh established the Alwar State. Before his death in 1791 Maharaj Pratap Singh secured possession of large territories. His successor sent a force to co-operate with Lord Lake in the War of 1803. An alliance of mutual friendship was concluded with the British Government in that year. Normal revenue is about 32 lakbs. Resident .- Major G. V. B. Gillan, C.I.E.

Alwar State stood first in recruiting in Rajputana at the time of the Great War. The present Raler is His Highness Sewai Mahares Tei Singhii Bahadur

Palanpur.—Palanpur is a first class State with an area of 1,774.64 square miles and a population of 2,65,424. The net revenue of the State calculated on the average of the last five

years is about Rs 11 34 000

Lieut,-Colonel His Highness Zubd-tul-Mulk med Khan Bahadur, G.C.I.E., K.C.V.O., A.D.C. med Khan Bahadur, G.C.I.E., E.C.V.C., Nawah Saheh of Palanpur, rules the The Ruling Family is of Afghan origin belonging to the Lohani Stock, and had established their principality in Rajputana in the 14th century.

The connection with the British may be said to have definitely begun from 1817 A.D., when Dewan Fatch Khan II entered into relations with the East India Company. A considerable trade in cloth, wheat, ghee, wool, hides, castor and rapsseeds, sugar and rice is carried on in and raposeeds, sugar and rice is carried on in the State. The capital city of Palanpur is situated on the B. B. & C. I. Railway and is the junction station of the Palanpur State Railway. Palanpur is a very old settlement of which mention was made in the 8th century

BAJPUTANA.

The Hon'ble the Resident in Rajputana.—The Hon Mr. A. C. Lothjan, C.S. L. C.I.E. 1.C.S. WESTERN RATETITANA STATES

CENTRAL INDIA AGENCY.

Central India Agency is the name given to the country occupied by the Indian States grouped together under the supervision of the Political Officer who is designated the Resident for Central India with head-quarters at Indore. As constituted in 1921that is, after the separation of the Gwalior Residency-it is an irregularly formed tract lying in two sections, the Eastern comprising Sying in two sections, the Lastern comprising Bundelkhand Agency between 22"-83" and 26"-19" North and 78"-10' and 83"-0" East and the Western consisting of the Bhopal and Malwa Ageneies between 21"-22" and 24"-47" North and 74"-0" and 78"-50" East. The British districts of Jhansi and Sauger and the Gwallor State divide the Agency into two sections. The total area covered is 51,651,11 square miles and the population (1931) amounts to 6,635,737.
The great majority of the people are Hindus.
There are 28 Salute States of which the following 10 have direct treaty engagements with the British Government:—Indore, Bhopai, Rewa, Orchia, Datia, Dhar, Dewas Senior Branch, Dewas Junior Branch, Samthar and Tarra. All of these are Hindly growt bland. Branca, Jowas Junor Dianon, command and Jaora. All of these are Hindu except Bhopal, Jaora and Baoni which are Muhammadan. Besides these there are 61 Minor States and Guaranteed Estates. Excluding the Indore and Guaranteed Estates, excitioning the Indore and Rewa States and the Hirapur and Lalgarh the Estates are divided into following groups for administrative purposes:—Bhopal Agency, 12 States and Estates (principal States Bhopal Dewas Senior Branch, Dewas Junior Branch); Bundelkhand Agency, 33 States and Estates (principal States Orchha and Datia); Malwa Agency, 40 States and Estates (principal States

Dhar, Jaora and Ratlam). The Agency may roughly be divided into two natural divisions. Central India West comprising the former Plateau division with such billy land as lies on this side and Central India, East comprising the former low-lying area and the Eastern hilly tracts. The hilly tracts lie along the ranges of the Vindhyas and Satours. They consist of forest areas and agriculture is They consist of lorest areas and agriculture is little practised there, the inhabitants being mostly members of the wild tribes. The territories of the different States are much intermingled and their political relations with the Government of India and each other are very varied.

The following is the size, population and revenue of the ten treaty States mentioned above:-1 Area in 1

Indore.—The founder of the House of the Holkar of Indore was Malhar Rao Holkar, born in 1603. His soldierly qualities brough him to the front under the Peshwa, who took him to the front under the reshwa, who took him into his service and employed him for his conquests. When the Maratha power was weakened at the battle of Panipat in 1761, Malhar Rao had acquired territories stretching from the Deccan to the Ganges as a reward for his career as a Military Commander. He was succeeded by his grandson. On his death without issue his mother Ahilya Bai became the Ruler and her administration is still looked upon with admiration and reverence as that of a model ruler. She was succeeded by Tukoji Holkar who had been associated with her to carry the Military Administration and had in course of it distinguished himself in various buttles. Tukoji was succeeded by Kashirao, who was supplanted by Yeshwant Rao, his step-brother, a person of remarkable daring strategy as scholated in a number of engagements in which he had taken part. The brilliant success he obtained at the battle of Poona against the combined armies of Peshwa and Scindia made him a dictator of Poona for some time and he declared in consequence the inde-pendence of Holkar State. During 1804-5 he had a protracted war with the British, closed by a Treaty which recognised the independence of Holkar State with practically no diminution of its territories and rights. Yeshwant Rao of its territories and rights. Yeshwant Rao showed signs of insanity from 1808 onwards and succumbed to that malady in 1811, when he was succeeded by his minor son Malhar Rao II. During the Regency which followed, the power of the State was weakened by various causes, the most important of which was the refractory conduct of the Military Commanders. On the outbreak of the war between the English and the Peshwa in 1817, some of these Commanders, with a part of the army, rebelled against the authority of the State and were disposed to befriend the Poshwa, while the regent mother and her ministers were for friendship with the British. There was a battle between the British Army and this refractory portion of the Holkar Army which culminated in the latter's defeat. Holkar had to come to terms and to cede exten-Holkar had to come to terms and to case exten-sive territories and rights over the Rajput Princes to the British, but the internal sovereignty remained unaffected. The Treaty of 1818 which embodied these provisions still regulates the relations between the British Government and the State.

ment. The Maharja died in 1886 after having effected various reforms in the administration and raised the position of the State to a high degree of prosperity and honour. He was degree of prosperity and honour the was all the state of the

During the war of 1914 the State placed all its resources at the disposal of the British dovarment. Its teorogatok part in the various that the state of the state of the state of the State towards the war and charitable runds in money was 41 lakhs and its subscriptions to the War Loans amounted to Rs. 82 lakhs, while war Loans amounted to Rs. 82 lakhs, while the state of the State of the State of the State ed to over our error. This or supple amounted ed to over our error.

His Highness Maharaja Tukoji Rao III. addicated in favour of his son. The present Ruler, His Highness Maharajaching Raj Rajeshwar Sawai Shree Yeskwant Rao Holkar Bahadur, G.G.I.K., was born on 6th September 1908. He received his education in England during 1929-25 and again at Christ Church 1929. He married a daughter of the Junior Chief of Kagal (Kolhapur) in February 1924. Cotton excise duty at 31 per cent, ad valorem has been abolished from 1st May 1926 and an industrial tax is levied on the cotton mills from the same date.

The City has a well equipped Power house and an aerodrome.

Bhopal.—The principal Mahommedan State in Central India ranks next in importance to Hyderabad among the Mahommedan States of India. The ruling family was founded by Sardar Dost Mohammad Khan, Diler-Jung, a Tirah Afghan, who, after having served with distinc-tion in the army of the Emperor Aurangzeb, obtained the pargana of Berasia in 1709. With the disintegration of the Moghal Empire, Bhopal became an independent State. In the early part of the 19th Century the Nawab successfully withstood the inroads of Scindia and Bhonsla, and by the agreement of 1817 Bhopal undertook to assist the British with a contingent force and to co-operate against the Pindari bands, In 1818, a permanent treaty succeeded the agreement of 1817.

The present Ruler of the State, His Hignness Sikander Saulat Nawab Iftikharu-Mulk, Moham-Sikander Saume Pawau Ittikuaru-aluk, aionam-mad Hamidullah Khan Bahadur, G.C.S.I., G.C.I.E., C.V.O., B.A., succeeded his mother, Her late Highness Nawab Sultan Jahan Begam, on her abdication in May 1926. He had pre-

educational and 76 medical institutions. An iviously actively participated in the administra-Secretary and afterwards as Member for Finance and Law and Justice.

His Highness is assisted in the work of administration by an Executive Council consisting of the following five Members and a Secretary :-

All-Martabat, Motamid-us-Sultan, Rai Bahadur Raja Oudh Narain Bisarya, B.A., President and Member, State Council.

Members, State Council.—All-Martabat,

Abbasi; All-Martabat, All-Qadr, Mohammad
Shaalb Qureshi, M.A., Ll.E., BAR-AT-LAW,

Secretary .- Mir Dabir, Dabirul-Insha, Kazi Wali Mohammad (Offg.).

The work of legislation with the right of discussing the Budget, moving resolutions and interpellations rests with a representative interpellations rests with a representative Legislative Council inaugurated in 1927. The raiyatwari system in which the cultivator holds his land direct from Government has lately been introduced. The State forests are exten-sive and valuable, and the arable area which comprises more than two-thirds of the total area consists mostly of good soil, producing cotton, wheat, other cercals, sugar-cane and tobacco. The State contains many remains of grent archæological interest including the famous Sanchi Topes, which date from the 2nd Century B. C. and which were restored under the direction of Sir John Marshall, Sanchi Station on the G. I. P. main line to Delhi adjoins the Topes.

Among other troops, the State maintains one full strength Infantry Battalion. The Capital Bhopal City, beautifully situated on the northern bank of an extensive lake, lies on the main broad-gauge line between Bombay and Delhi and is the junction for the Bhopal-Uilain

Section of the Great Indian Peninsula Railway, Rewa .- Is the largest State in Central India Agency with an area of 13,000 square miles and a population of 1,587,445 (1931). The Rulers are Baghel Rajputs descended from the famous Solanki clan which ruled over Guirat from the 10th to 13th Century. During the mutiny, the Durbar rendered meritorious services to the Crown for which various parganas which had been seized by Marathas were restored to the Maharaja. The present ruler is His Highness Bandhvesh Maharaja Sir Gulab Singhji Bahadur, G.C.I.E., K.C.S.I., who was born in 1903. His Highness was married in 1919 to the sister of the Maharaja of Jodhpur. Upon the death of his father, Lt. Col. Sir Venkat Raman Singhji Bahadur, G.C.S.I., on 30th October 1918, His Highness Bandhvesh Maharaja Sir Gulah Singh Bahadur succeeded to the Gadi on 31st October as a minor. His Highness Maharaja Sir Gulab Singh Bahadur attained majority in 1922 and Singh Bahadur attained majority in 1022 and was invested with full rulling nowers by His Excellency the Viceroy. The Maluraja exercises full sovereignty within his State and the administration is now carried on by him with the help of a State Council of which His Highness himself is President. His Highness is very much interested in all-round progress of the

State. He takes a keen interest in administration and development of agriculture and mineral resources. He has opened extensive tracts by construction of roads and bridges throughout the State. A State Bank-Bank of Baghelkhand—has recently been instituted. which has its branches all over the State. Highness is a keen sportsman and the number of tigers bagged by him totals over 500. His Highness has got a son and heir named Sri Yuvraj Maharai Kumar Martand Singhji born on 15th March 1923.

His Highness' second marriage with the daughter of H.H. the Maharaja of Kishengarh was performed on the 18th February 1925.

Dhar.-This State, in the Agency for Southern States in Central India, takes its name from the old city of Dhar, long famous as the capital of the Parmar Rajputs, who ruled thirteenth over Malwa from ninth to the century and from whom the present Rulers of Marathas-claim descent. In Dhar-Puar 18th century the the middle of the Ruler of Dhar, Anand Rao, was one of the leading chiefs of Central India, sharing with Holkar and Scindia the rule of Malwa. The State came into treaty relations with the British Government in virtue of the treaty of 1819. Lt. Colonel H. H. the Maharaja Sir Udaji Rao Puar Sahib Bahadur, K.C.S.I., K.C.V.O., K.B.E., died on 30th July 1926. There are 13 Fendatories and 9 Bhumias of whom 13 hold a guarantee from the British Government. The population of the State according to the latest Census figure is 243,521 and the average Income and Expenditure are about 17 and 16 lakhs respectively.

The present Ruler, His Highness the Maharaia Anand Rao Puar Saheb Bahadur being minor, the Government of State is carried on by a Council. Dewan Bahadur K. Nadkar is Dewan and President of the Council of Administration.

The famous and the ancient hill fort of Mandu the capital of several ancient and medieval kingdoms, with its beautiful mansoleums, tombs and palaces and high hills and deep dales is situated in the State at a distance of 24 miles from the city of Dhar.

State is the only State.-This Treaty State in the Malwa Political Agenc covering an area of about 601 square miles with a total population of 1,00,204, and has its head-The Rulers of Jaora quarters at Jaora Town. claim descent from Abdul Majid Khan, an Afghan of the Tajik Khel from Swat. The first Navab was Abdul Ghafoor Khan who obtained the State about the year 1808. The present Ruler is Lieuteant-Colonel His Highnes Fakhrud-Danlah Navab Sir Mohammad Iftikhar Ali Khan Sahib Bahadur, Saulat-e-Jang, G.B.B., K.C.I.E., who was born in 1883. - 5. Mr. M. N. Zutshi, B.A., Home Secretary 6. Pandit R. S. Shukla, M.A., LL.B., Political & Judicial Secretary.

SIKKIM.

by Tibet, on the south-east by Bhutan, on the south by the British district of Darjeeling and south by the British district of Darjeening and on the west by Nepal. The population consists of Blutias, Lepchas, and Nepalese. It forms the direct route to the Chumbi Valley in Tibet. The main axis of the Himalayas, which runs cast and west, forms the boundary between Sikkim and Tibet. The Singallia and Chola chain, separate Sikkim from Nepal on the west, and from Tibet and Bhutan on the east. On the Singalila range rise the great snow peaks of Kinchinjunga (28,146 feet), one of the highest mountains in the world. The Chola range which is much lofter than that of Singalila, leaves the main chain at the Dongkva La.

Tradition says that the ancestors of the Rajas of Sikkim originally came from eastern Tibet. The State was twice invaded by the Gurkhas at the end of the eighteenth century. On the outbreak of the Nepal War in 1814, the British formed an alliance with the Raia of Sikkim and at the close of the war the Raja was rewarded by a considerable cession of territory. In 1835 the Raja granted the site of Darjeeling to the British and received Rs. 12,000 annually in lieu of it. C.M.G., C.I.E.

Sikkim is bounded on the north and north-east | The State was previously under the Government y Tibet, on the south-east by Bhutan, on the of Bengal, but was brought under the direct supervision of the Government of India in 1906. The State is thinly populated, the area being 2,818 square miles, and the population 109,651. z,313 square linies, and the population 103,031, chiefy Buddhists and Hindus. The most im-portant crops are maize and rice. There are several trade routes through Sikkim from Darjeeling District into Tibet. In the convenranges, which run southwards from the main tion of 1890 provision was made for the opening of a trade mart but the results were disappointing, and the failure of the Tibetans to fulfil their obligations resulted in 1904 in the despatch of a mission to Lhasa, where a new convention was signed. Trade with the British has increased in recent years, and is now between 40 and 50 rooms years, and is now between 40 and 50 lakin yearly. A number of good roads have been constructed in recent years. The precent rules, the constructed in recent years. The precent rules, the construction of the construction ary 1923. The average revenue is Rs. 5,20,422.

Political Officer in Sikkim: - B. J. Gould.

For these services he was made authorities. But since entertained the Britania aute. The military force of tish Agent hospitably at his capital. The levies under the control of the ruler is now known as H.H. the Maharaja of They are of no military value.

Bhutan, Sir Uggen Wangchuk, K.C.S.I., K.C.I.F. At the head of the Bhutan Government, there are nominally two supreme authorities; the Dharma Raja, known as Shapting Renipoche, the spiritual head; and the Deb or Depa Raja, the temporal ruler. The Dharma Raja is regarded as a very high incarnation of Buddha, far higher than the ordinary incarnations in Tibet, of which there are several hundreds. On the death of a Dharma Raja a year or two is allowed to clapse. and his reincarnation then takes place, always in the Choic, or royal family of Bhutan,

Cultivation is backward and the chief crop is maize. The military force consists of local levies under the control of the different chiefs.

NORTH-WEST FRONTIER STATES.

The Indian States of the North-West Frontier Provinces are Amb, Dir, Swat and Chitrai. The area of the latter three is 3,000, 1,800 and 4,000 square miles and population 250,000, 216,000 and 99,000 respectively.

Amb.—Is only a village on the western bank of the Indus in Independent Tanawala.

Chitral.—Runs from Lowarai top to the south of the Hindu-Kush range in the north, and has an area of about 4,000 square miles. The ruling dynasty has maintained itself for more than three hundred years, during the greater part of which the State has constantly been at war with its neighbours. It was visited in 1885 by the Lockhart Mission, and in 1889, on the establishment of a political agency in Gilgit, the ruler of Chitral received an annual subsidy from the British Government. That subsidy was increased two years later on condition that the ruler, Amen-ul-Mulk, accepted the advice of the British Government in all matters connected with foreign policy and frontier defence. His sudden death in 1892 was followed by a dispute as to the succession. The eldest son Nizam-ul-Mulk was recognised by Government, but he was mur-dered in 1895. A war was declared by Umra-khan of Jandul and Dir against the infidels and the Agent at Gilgit, who had been sent to Chitral to report on the situation, was besieged with his escort and a force had to be despatched April 1, 1895) to their relief.

The valleys of which the State consist are extremely fertile and continuously cultiare extremely lettile and continuously culti-vated. The internal administration of the country is conducted by His Highness Capt. Molid. Nasi-rul-Mulk, the Mehtar of Chitral and the foreign policy is regulated by the Political Agent at Malakand.

Dir.-The territories of this State, about 3,000 square miles in area, include the country drained by the Panikora and its affluents down to the junction of the former river with the Bajaur Rud. The Nawab of Dir is the overlord of the country, exacting allegiance from the petty chiefs of the clans. Dir is mainly held by Yusufzai Pathans, the old non-Pathan inhabitants being now confined to the upper portion of the Panjkora Valley known as the Dir Kohistan. A motor road has been construct-

ed to Dir from Malakand.

Swat -The Ruler of the State, Miangul Gulshahzada Sir Abdul Wadood, K.B.E., is a descendnt of the famous Akhund Sahib of Swat. He consolidated his rule in Swat from 1917 to 1922, and was recognized by the Government of India as Wali of Swat in 1926. The area of the State is 4,800 square miles and population 300,000. The Headquarters of the State is at Saidu Sharif about 38 miles from Malakand and connected with Malakand by motor road.

Political Agent for Dir. Swat and Chitral-Major E. H. Cobb, C.I.B., I.A.

STATES IN THE MADRAS PRESIDENCY.

The Madras Presidency Includes Indian States covering an area of 10,644 square miles. Of these, the States of Travancore and Cochin represent ancient Hindu dynasties. Pudukottai is the inheritance of the chieftain

Name.	Area sq. miles.	Popula- tion.	Estimated Gross Revenue in lakhs of rupees.
Travancore	7,625	5,095,973	240.25

Banganapalle .	275	39,239	3.56
Sandur	167	18,583	1.59

These States were brought into direct relation with the Government of India on October 1st,

1923. Travancore.-This State, which has an Cochin represent anolent Hindu dynasties. Produkotai is the inhoritance of the chief than the produkotai is the inhoritance of the chief than the called the Tondiman, Banganapalle and Sandur of two petty States, of which the first is ruled by a Nawab, lie in the centre of two British districts, Name.

| Area | Fertilde | Fertild exercised sovereignty at one time in Southern India. The petty chiefs, who had subsequently set up as independent rulers within the State, were all subdued, and the whole country, in-cluded within its boundaries, was consolidated and brought under one rule, by Maha-raja Marthanda Varma (1729-58). The English

of Trivandrum, and built a factory there in Company were engaged in Madura and Tinnevelly, in the middle of the 18th century, the Travancore State gave assistance to the British authorities. Travancore was reckoned as one of the staunchest allies of the British Power and was accordingly included in the Treaty made in 1784 between the East India Company and the Sultan of Mysore. To protect the State from possible inroads by Tippu, an arrangement was come to in 1788 with the East India Company, and in 1795 a formal treaty was concluded, by which the Company agreed to protect Travancore from all foreign enemies. In 1805 the annual subsidy to be paid by Travancore was fixed at 8 lakhs of rupees.

H. H. the Maharaja (b. 7th November 1912) ascended the masnad on the 1st September 1924. During the minority the State was ruled by Her Highness Maharani Setu Lakshmi Bai, C.I., aunt of the Maharaja, as Regent on his behalf. His of the minimum, as regent on his denar. His Highness was invested with rulling powers on the 6th November 1931. The work of legisla-tion was entrusted to a Legislative Council established as early as 1888. The Legislature was last re-constituted in January 1933, when a was last re-constituted in January 1933, when a bleameral body was instituted. The new Chambers, viz., the Sri Mulam Assembly and the Sri Chitra State Council have a predominant elected non-official majority. Both Chambers possess the right to vote on the annual Budget, to move resolutions and ask questions. Both Chambers have also the right to initiate legislation. The elections to the Assembly are based on a wide franchise. Differences of opinion between the two Chambers will be settled by a Detween the two channels will be steaded by a Joint Committee consisting of an equal number of members selected by each Chamber. Women are placed on a footing of complete equality with men in the matter both of franchise and membership in the Legislature.

Local Self-Government on a small seale exists in the more important towns. The State has joined the Indian State Forces Scheme and supports a military force of 1,000 men. H. H. The Maharak is Colonel-in-Chief of the Travancore Education has at an experience of the Colonel-in-Chief of the Travancore Education has at an experience of the Colonel-in-Chief of the Travancore in the Colonel-in-Chief of the Travancore in the Colonel-in-Chief of the Travancore in the Colonel-in-Chief of the Colonel-in-Chief of the Chief of the the State has a leading place among Indian States and the British Indian Provinces. According to the consus of 1931, the number of literates per 100 of the population excluding children under 5 years of age is 28.9. For males the figures are 40.8 per 100 and for female 16.8. The principal food-grain grown is rice, but the main source of agricultural wealth is the cocoanut. Other crops are pepper, areca-nut, jack-fruit, sugar-cane and tapioca. Rubber and tea are among other important products. Cotton weavamong other important products. Cotton weaving and the making of matting from the State we colv are among the chief industries. Within recent years a fillip has been given to the days subseque longment of industries as well as the arts and crafts of the State. The Pallwasal Hydre East Indicated works, the Rubber factory in Trivand drum, the contemplated Chins clay and in the Prorelain factory and the addition of an Art in the gollery named Chilthraleyam at Trivanductum subsidy.

first settled at Anjengo, a few miles to the north are the results of the new policy initiated by of Trivandrum, and built a factory there in His Highness the Maharaja, In November 1936 1684. In the wars in which the East India His Highness the Maharaja issued the historic Temple Entry Proclamation which has been Temple Entry Procumation which has been halled all the world over as a great piece of social and religious reform. His Highness eviness great interest in matters connected with art and culture and his recent tour of the Duteb East Indies was undertaken primarily with the purpose of studying the cultural and artistic influences of ancient India on the people of the Islands of Java, Bali and Sumatra.

By another Proclamation in the November of 1937, a University designed in addition to ordinary studies specially to promote technological studies and research logical studies and research has been esta-blished. The Government of His Highness have taken in hand the first instalment of a scheme of nationalising the transport system of the State and have established a statutory Land Mortgage Bank for extending long-term loans to the agriculturists and small industrialists of the State. The Andhra and Benares Universities have conferred Honorary degrees on His Highness and His mother Her Highness Maharani Sethu Parvathi Bai. The State is well provided with roads, and with a natural system of back-waters, besides canals and rivers navigable for country crafts. One line of railway about one hundred miles in length cuts across the State from east to west and then runs along the Coast to the Capital. More Railway lines are in contemplation. The capital is Trivandrum.

Dewan-Sachivottama Sir C.P. Ramaswamy Iyer, K.O.I.E.

Cochin. This State on the south-west coast of India is bounded by the Malabar District of the Madras Presidency and the State of Travancore. Very little is known of its early history. According to tradition, the Rajas of Cochin hold the territory in right of descent from Cheraman Perumal, who governed the whole country of Kerala, including Travancore and Malabar, as Vicercy of the Chola Kings about the beginning of the ninth century, and afterwards esta-blished himself as an independent Ruler. In 1502, the Portuguese were allowed to settle in what is now British Cochin and in the following year they built a fort and established commercial relations in the State. In the earlier wars with the Zamorin of Callcut, they assisted the Rajas of Cochin. The influence of the Portuguese on the west coast began to decline about the latter part of the seventeenth century, and in 1663 they were ousted from the town of Cochin by the Dutch with whom the Raja entered into friendly relations. About a century later, in 1759, when the Dutch power began to decline, the Raja was attacked by the Zamorin of Calicut, who was expelled with the assistance of the Raja of Travancore. In 1776, the State was conquered by Hyder Ali, to whom it remained tributary and subordinate, and subsequently to his son, Tippu Sultan. A treaty was concluded in 1791 between the Raja and the East India Company, by which His Highness agreed to become tributary to the British Government for his territories which were then in the possession of Tippu and to pay a

His Highness Shri Sir Rama Varmah, G.O.I.E. who ascended the throne in January 1915 having demised on 25th March 1932, His Highness Shri Sir Rama Varma, G.C.I.E., who was born on 30th December 1861 succeeded to the throne and was duly installed as Maharaja on 1st June 1932. under the The administration is conducted control of the Maharaja whose chief Minister and Executive officer is the Dewan, Sir R. K. Shannukham Chetty, K.O.I.B. The forests of Cochin form one of its most valuable assets. They abound in teak, ebony, blackwood, and other valuable trees. Rice forms the stable of cultivation. Cocoanuts are largely raised in the sandy tracts and their products form the chief exports of the State. Communications by road and back-waters are good, and the State owns a line of railway from Shoranore to Erna-kulam, the capital of the State, and a Forest Steam Tramway used in developing the forests. The State supports a force of 113 officers and 573 men.

Resident for Madras States.—C. P. Skrine, Esq., o.B.R., I.C.S.

Pudukkottai.-This State is bounded on the north and west by Trichinopoly, on the south by Ramnad and on the east by Tanjore. In early times a part of the State belonged to the Chola Kings and the southern part to the Pandya Kings of Madura. Relations with the Inglish began during the Carnatic wars. During the siege of Trichinopoly by the French in 1752, the Tondiman of the time did good service to the Company's cause by sending them provisions, although his own country was on at visions, association are country was on at least one occasion rayaged as a consequence of his fidelity to the English. In 1756 he sent some of his troops to assist Muhammad Yusuf, the Company's sepoy commandant, in settling the Madura and Tinnevelly countries. Subsequently he was of much service in the wars with Haidar Ali. His services were rewarded by a grant of territory subject to the conditions that the district should not be alinated (1806). Apart from that there is no treaty or arrangement with the Raja. His Highness Sri Brihadamba Das Raja Rajagopala Tondiman Bahadur, the present ruler, is a minor. He was installed as Raja on 19-11-28. The administration of the State is carried on by an Administrator. The various departments are constituted on the British India model. The principal food crop is rice. The forests which cover about one-seventh of the State, contain only small timber. There are no large industries, The State is well provided with roads, but Pudukkottai is the only municipal town in the State.

Resident for the Madras States, -C. P. Skrine, Esqr., O.B.B., I.O.S.

Banganapallo—This is a small State in two detached portions which in the eighteenth conterport of the state of the state of the control over it was ceeded to the Hyderabad. The Nawah pays no tribute and maintains no military force. The revenue of the State is over 3 lakhs. The Nawah enjoys a saint of 9 guns.

Resident for the Madras States .- C. P. Skrine, Esqr., o.B.E., i.C.S.

Sandur.-Sandur is the only Mahratta State in South India and in political relations with the Government of India through the Resident at Trivandrum. The State was conquered in early eighteenth century by Siddoji Rao, ancestor of the present Ruler from a poligar of the Bedar tribe. During the time of his son and successor, Morar Rao, the State reached the zenith of its territorial expansion. In the Carnatic and Mysore wars Morar Rao was the staunchest ally of the British The State came into political relations with the British in 1818. The Ruler exercises powers of life and death. In 1876 the proper style of address of the Ruler was acknowledged by the Government of India. This is one of the 146 important States which received Canning's Sanad of Adoption in 1862. The Ruler also has vested interests in Gajendragad, a jaghir in Bombay Presidency, held on his behalf by certain junior members of his family. The State pays no tribute to the Crown. The Ruler is the pays no tribute to the Grown. The Maner is the founts in-head of all authority—judicial, legisla-tive and executive. He has established an independent Chief Court presided over by the seniormost member of the Madras judicial service, whose services have been lent to the State under a special arrangement with the Madras Government. There is a State Council to initiate all legislative measures and an Executive Council in charge of the administration.

The State has mineral deposits of the first quality, especially manganese. The forests abound in sandalwood which is as rich in oilcontent as that of Mysore.

The present Ruler is Raja Shrimant Yeshwant Rao Hindurao Ghorpade Mamlakatmadar Senapathi,

President of the Executive Council:—Shrimant Sardar B. Y. Raje Ghorpade.

Resident: - C. P. Skrine, Esq., O.B.E., I.C.S.

STATES OF WESTERN INDIA.

Western India States Agency.—Kathlawar in which the majority of the States in this time of the states in the state of the

The political organistation of the Agency is unusual in that besides the normal system of Salnte States in political relations with the Resident and non-salnte States in political relations with the Resident and non-salnte States in political relations with the Political Agents of the sub-ordinal space of the Political Agents of the sub-ordinal space of the Civil Stations of Laglor, Wadhwan and Sadne, and groups of innumer better states, known as "Thanas". The latter are under the direct supervision of the Political are under the direct supervision of the Political

Agency.

Agents. These "Thanas" were originally offshoots of larger States, but owing to the system of successive holders dividing their heritage amongst all their heirs, a custom prevalent amongst the Kathis, who give their name to the province, they have become so sub-divided as to render impractical the normal administration to render impractical the normal administration and the exercise of any jurisdictional powers by each individual holder. The Agency has, therefore, assumed their powers and carries out the administration on their behalf.

The history of the British connection with Kathiawar commences with Colonel Walker's settlement of 1807. In 1863 the States were divided into seven classes and although these have since been abolished, the iurisdictions fixed in that year still remain graded.

Formerly the Political Administration of the Western India States was the responsibility of the Government of Bombay. The transfer of States to direct political relations with the Government of India, a change which was advocatd in the Montague-Chelmsford Report on Constitutional Reforms, was not carried out until 1924. The first stage in the process was the creation of a new Agency in direct relation with the Govern-ment of India, known as the Western India States Agency. This Agency comprised the whole of the area containing the old Kathiawar, Cutch and Palanpur Agencies.

The other States in the Bombay Presidency, which for the time being remained in political relations with the Government of Bombay, were transferred to the control of the Government of India with effect from the 1st April 1933. This transfer necessitated the regrouping, not only of the remaining Bombay States, but also of some of the States of the Western and States Agency. The States of Danta and Palanpur were included in the Rajputana Agency; the former having being part of the old Mahi Kantha Agency and the latter part of the Western India States Agency. The States and estates of the Mahi Kantha and Banas Kantha Agencies were united in the present Sabar Kantha Agency, the third subordinate Agency of the Western India States Agency.

The headquarters of the Western India States Agency are situated at Rajkot, which has been the seat of the Representative of the Government for over 100 years, in the Rajkot Civil Station which was first leased from the Rajkot State in 1863. The personnel of the Headquarters is as follows:

Resident for the States of Western India: The Hon'ble Mr. E. C. Gibson, C.I.E., I.P.S.

India: E. Weston, I.C.S. Secretary to the Hon'ble the Resident : Major

C. W. L. Harvey O.B.E., M.C. The Salute States in this Agency are 17 in number, namely :-

1. Cutch State, 2. Idar State, 3. Junagadh

1. Outen State, 2. Harr State, 5. Jumpann State, 4. Nawangar State, 6. Bhavrangar State, 6. Porbander State, 7. Dhrangadhra State, 8. Radhanpur State, 9. Movi State, 10. Gondal State, 11. Juftabad State, 12. Wakaner State, 13. Palitana State, 14. Dhrol State, 15. Limbdi State, 16. Rajkot State, and 17. Wadhwan State.

The subordinate agencies are three in number. namely :-

Western Kathiawar Agency. Rastern Kathiawar Agency, and Sabar Kantha Agency.

Western Kathiawar Agency.—The Western Kathiawar Agency, with Headquarters at Raikot Civil Station, was constituted by the amalgamation in 1923 of two (Sorath and Halar) out of the four Prants or Districts into which the province of Kathiawar was formerly divided. The combined district which was at first named "The Western Kathiawar States" was given its present designation in 1927.

The Agency contains 44 non-salute jurisdictional States and Talukas and four Thana circles Among Jurisdictional States in direct political relations with the Political Agent, the following are prominent:--

Jetpur, Jasdan, Manayadar, Thana-Devli Vadia, Jirpur, Malia, Kotda-Sangani, Virpur. Bilkha and Khirasra.

Political Agent: W. le B. Egerton, Esq., I.c.s. Eastern Kathiawar Agency.—The Eastern Kathiawar Agency, with Headquarters at Wadhwan Civil Station, was constituted in 1923 by combining the two Prants of Jhalawad and Gohelwad. The combined District was first styled "The Eastern Kathiawar States" and was given it present designation in 1927. The administration and constitution are similar to those prevailing in the Western Kathiawar

The Agency contains 15 non-salute jurisdictional States and Talukas and 7 Thana Circles Among jurisdictional States in direct political

relations with the Political Agent, Eastern Kathiawar Agency, the following are promi-Lakhtar, Savla, Chuda, Vala, Lathi, Muli

Bajana, and Patdi.

Political Agent: Major H. M. Poulton.

Sabar Kantha Agency.—The Sabar Kantha Agency, with Headquarters at Sadra Civil Station, was constituted by the amalgamation of the Mahi Kantha and Banas Kantha Agencies. Previous to 1933 the administration of these two agencies was on the usual lines with a Political Agent in charge of each, while after that date the organisation was assimilated to that of the other two agencies,

The Agency contains 46 jurisdictional non-Judicial Commissioner in the States of Western | salute States and eight Thana Circles.

Among Chiefs in direct relations with the Political Agent, the States of Malpur, Mansa and Mohanpur in the Sadra Division and those of Tharad and Wao in the Banas Division are prominent.

Political Agent: Major D. R. Smith.

Bhavnagar.—This State lies at the head and west side of the Gulf of Cumbay. The Gohel Rajputs, to which tribe the Ruler of Bhavnagar belongs, are said to have settled in the country about the year 1260, under Sajakji from whose three sons—Ranoji, Sarangji and Shahii—are

descended respectively the rulers of Bhavmagar, Lathi and Fulltana. An intimate connection was formed between the Bombay Government and Bhavmagar in the eighteenth century when the ruler of that State took pains to other states and beautiful the states of the states o

The chief products of the State are grain, cotton, sugar-cane and salt. The chief manufactures are oil, copper and brass vessels and chief. The Bhavmagar State Railway is 307 miles lo length. The capital of the State is the town and port of Bhavmagar, which has a good and safe harbour for shipping and carried markets and harbours of export for cotton in Kathlawar. Bhavmagar supports 270 State Lancers and 250 State Infantry.

Population (in 1931) was 500,274 of whom 86 per cent, were Hindus and 8 per cent. Mahomedans. The average income for the last five years was Rs. 1,47,76,273, exclusive of Railway income, and the average expenditure Rs. 1,56,96,200.

Dhrangadhra State is a State of the First Class in Kathhwar with a population of nearly Class in Kathhwar with a population of nearly state of the Charles of the Runn of Cutch. The ruler of Dhrangadhra is the Runn of Cutch. The ruler of Dhrangadhra is the Runn of Cutch. The Rapput Gain is of the Charles of the Matevanus. This Rapput Gain is of the Matevanus. Dhrangadhra State owns the Railway from Wadhwan Junction to Halvad, a distance of 40 miles, which is worked by the B. B. & C. I. Railway. An extension of this line to Mailyas a under contemplation. A railway skiling has been laid from Dhrangadhra to Kuda—a distance of 11 miles—to facilitate the sait traffic.

Gondal State.—The Ruling Prince of Gondal is a Rajiput of the Jadeja stock with the title of H. H. Maharaja Thakore Saheb, the prent Ruler being H. H. Shir Bhagwat Sinhij, G.O.S.I., G.C.I.S. The early founder of the State Kumbbolj, Ind a modest estate of 20 villages, Kumbbolj, Ind a modest estate of 20 villages, of the House, widened the territories to almost their present limits by conquest; but it was left to the present ruler to develop the second of the state of the second of the state of the second of the seco

water supply and electricity to the towns of Gondal, Dhoraji and Upleta. The capital is Gondal, a fortified town on the line between Raikot and Jetuisar.

Junagadh State .- A first class State under the Western India States Agency and lies in the South-Western portion of the Kathlawar Pen-insula between 24°-44' and 21°-53' North latitude : 70° and 72° East longitude with the Halar division of the province as its northern boundary and Golilwad Prant to its east. It is bounded on the south and west by the Arabian Sea. The State is divided into 12 Mahals. It has 16 ports of which the principal are Veraval, Mangrol, and Nawabandar. The principalrivers in the State are the Bhadar, Uben, Ozat, Hiran, Saraswati, Machandri, Singaoda, Meghal, Vrajmi, Raval and Sabli. The principal town of Junagadh, which is one of the most picturesque towns in India, is situated on the slope of the Girnar and the Datar Hills, while in antiquity and his-torical interest it yields to none. The Upperkote or old citadel contains interesting Buddhist caves and the whole of the ditch and neighbourhood is honey-combed with caves of their remains. There are a number of fine modern buildings in the town. The famous Asoka in-scription of the Buddhist time carved out on a big bolster of black granite stone is housed at the foot of the Girnar Hill, which is sacred to the Jains, the Shivaites, the Vaishnavites and other Hindus. To the south-east of the Girnar Hill lies the extensive forest of the Gir comprising 494 square miles, 823 acres and 10 gunthas. It supplies ber and other natural products to the residents of the State and the neighbouring districts and is unique as the sole stronghold of the Indian lion. The area of the State is 3,337 square miles and the average revenue amounts to about Rs. 1,00,00,000. The total population about Rs. 1,00,00,000. The total population according to the census of 1931 is 545,152. Until 1472 when it was conquered by Sultan Mahomed Begra of Ahmedabad Junagadh was a Rajput State ruled by Chiefs of the Chuda Sama tribe. During the reign of the Emperor Akbar it became a de-pendency of Delhi under the immediate authopendency of Deni under the Humediage among-rity of the Moghal Viceroy of Gajrart. About 1735 when the representative of the Moghals had lost his authority in Gujarat, Sherkhan Babl, the ancestor of the present Babl Ruler. habi, the ancestor of the present Babi Rdier, expelled the Moghal Governor, and established his own rule. The ruler of Junggadh first entered into engagements with the British Government in 1807. The principal articles of production in the State are cotton, bajri, juwar, sesamum, wheat, rice, sugar-cane, cereals, grass, timber, stone, castor-seed, fish, country tobacco, groundnuts, cocoanuts, bamboos, etc., while grommonus, cocomus, pannous, etc., while those of manufacture are give, nolasses, sugar-candy, copper, and brassware, dyed cloth, gold and silver embroidery, pottery, hardware, leather, bamboo furniture, otc. The State pays a tribute of Rs. 28.394 annually to the Paramount Power and Peshkashi of Rs. 37,210 to His Highness the Gaekwar; on the other hand, the State of Junagadh receives a tribute styled Zortalbi amounting to Rs. 92,421 from not less than 134 States and Talukas, a relic of the days of Mahomedan supremacy. The State maintains State forces consisting of Lancers and the

Mahabat Khanji Infantry, the sanctioned strength of the former being 173 and of the latter 219 inclusive of Bag-pipe Band,

The present Nawab is Captain His Highness Sig-Mahabak Khan III, 60.15, K.G.S., who is the ninth in succession and seventh in descent from His Highness Bahadurkhani I, the founder of the Babi-Family of Junagadh in 1735 A.D. His Highness the Nawab Saheb was born on 2nd August 1900 and succeeded to the gadi in 1911.

Ruler:—Captain His Highness Sir Mahabat Khanji Rasulkhanji, G.C.I.E., K.C.S.I.

Heir-Apparent—Shahzada Maho med Dilawarkhanji, 2nd Shahzada Mahomed Himatkhanji.

President of the Council.—J. Monteath, Esq., C.I.E., I.C.S. (Retd.)

Nawanagar State, on the southern shore of the Gulf of Cutch, has an area of 3.791 square miles. The Maharaja of Navanagar is a Jadeja Rejout by caste, and belongs to the same family as the Rao of Cutch. The Jadeias originally entered Kathiawar from Cutch, and disposessed the ancient family of Jethwas then established at Ghumii. The town of Jamnagar was founded in 1540. The present Jam Saheb is Licut,-Colonel His Highness Maharaja Jam Shri Digvijayasinhji Saheb, K.C.S.I., who succeeded in April 1933. The principal products are grain, cotton and oil-seeds, shipped from the ports of the State. A small pearl fishery lies off the coast. The State pays a tribute of Rs. 1,20,093 per annum jointly to the British Government the Gaekwar of Baroda and Zortalbi to the Nawab of Junagadh. The State maintains two squadrons The State maintains two squarrons of Nawanagar State Lancers and 1½ company, of the State Infantry. The capital is Jamnagar, a flourishing place, nearly 4 miles in circuit, situated 5 miles east of the port of Bedi. a modern port affording all facilities. The State owns a Railway which traverses through its entire territory and is part of the Railway system connecting the Peninsula with the mainland. Population 4,09,192. Revenue

Population 4,09,192. Revenue nearly Rs. 94 lakhs.

Dewan:—Khan Bahadur Merwanji Pestonji, B.A., Li.B.

Revenue Secretary—Gokulbhai B. Desai, Bar-at-Law.

Military Secretary and Home Member-Lt.-Col. R. K. Himmatsinhii.

Cutch.—The State is bounded on the north and north-west by Sind, on the east by the Palanpur Agency, on the south by the Penhania of Rathlawar and the Gulf of Cutch and the south-west by the Indian Ocean. Its area, exclusive of the great sait marsh called the Rann of Circh, is 8,249 square miles. The Rann of Circh, is 8,249 square miles. The Rann of Circh, is 8,249 square miles. The Ranno His Illighness Maha Rao Bri Khongari is a state of the Ranno His Illighness Maha Rao Bri Khongari is a state of the Ranno His Illighness Maha Rao Bri Khongari is solitated position, the special characteristic of its people, their pseular dialect, and their stong feeling of personal Jovaty to their

ruler, the peninsula of Cutch has more of the elements of a distinct nationality than any other of the dependencies of Bombay. The earliest historic notices of the State occur in the Greek writers. Its modern history dates from its conquest by the Snid tribe of Samma Rajputs in the fourteenth century. The section of the Sammas forming the raling family in Cutch were known as the Jadejas or 'children of Jada'. The British made a treaty with the State in 1815. There is a fair proportion of good arable soil in Cutch. and wheat, barley and cotton are cultivated. Both iron and coal are found but are not worked. Cutch is noted for its beautiful embroidery and silverwork and its manufactures of silk and cotton are of some importance. Trade is chiefly carried by sea. The ruling chief is the supreme authority. A few of the Bhayats are invested with jurisdictional powers in varying degrees in their own estates and over their own ryots. A notable fact in connection with the administration of the Cutch State is the number and position of the Bhayat. These are Rajput nobles forming the brotherwood of the Maha Rao. They were granted a share in the territories of the ruling chief as provision for their maintenance and are bound to furnish troops on emergency. The number of these chiefs is 137, emergency. The number of these times is 101, and the total number of the Jadeja tribe in Cutch is about 16,000. The British military force having been withdrawn from Bhuj, the State now pays Rs. 82,257 annually as an Anjar equivalent to the British Government. The military force consists of about 1,000 in addition to which, there are some irregular infantry, and the Bhayats could furnish on requisition a mixed force of four thousand.

Porbandar.—The Porbandar State on the Western Coast of the province of Kathiawar comprises an area of 642½ square miles and has a population of 115,741 souls and has a population of 115,741 souls and has a population of 115,741 souls are supplied to the State is Porbander, a fourthing port having trade connections with Java, Burnia, Persian Gulf, Africa and the important ing port having trade connections with Java, Burnia, Persian Gulf, Africa and the important Continental Ports. The State has its own Radiway. The subordinate Feudatory Jagirdars are divided into three classes. The Jagirdars comprised in the class of Bhayats are cadets of the Ruling House to whom grants have been made in maintenance or as a Jiwarak. Those known as Sardar Pattawats are descendants of the military leaders who accompanied Anand Singhji and Rai Singhji, the founder of the present Marwar dynasty when they took possession of the State in the first quarter of the eighteenth century and to whom grants of land were made by Maharaja Shiv Singhji in 1741 A.D. on condition of military service. In the case of the Bhoomias are included all subordinate Feudatories who were in possession of their Pattas prior to the advent of the present Marwar dynasty. The pattas they hold were acquired by their ancestors by grant from the former Rec Rulers of the State. The Maharaja receives Rs. 52,427 annually on account of Rhichidi and other Raj Haks from his subordinate Sardars the tributary talukas of the Mahi Kantha Agency and others and pays Rs. 30,340 as Ghasdana to Gaekwar of Baroda through the British Government.

Vijaynagar.—The State has an area of 135 square miles with a population of 3,491 and an annual revenue of about its. 93,859. The Ruler is Rathod Rajput. His ancestors were the Rulers of Idar but on being driven from that place established their rule in Polo. The present Ruler is Ros Shrl Hammirsinhji

Hindusinhji. He was born on 3rd January 1904 and succeeded to the gudi in 1016. The Ruler has no salute but on account of the historic importance of the family he enjoyed rank above the Ruler of the salute State of Danta in the old Mahi Kantha Agency.

BARODA RESIDENCY AND GUJARAT STATES AGENCY.

Rewa Kantha Agency.—Including the Surgana State and the Dangs.

This Agency is a subordinate Political Agency of the Gujarat States Agency. It is comprised of all the non-salute States and Estates of the Old Rewa Kantha Agency, the State of Surgana, previously in the Nasik Agency, and the pottry states known as the Dangs, previously in the Surat Agency.

Rewa Kantha means the district or province situated on the banks of the river Rowa or Narmada or Narbada. This river is held in high veneration among the Hindus especially in the Bombay Presidency.

All the States comprised in the Province of Rewa Kantha are not on the banks of Narbada, for some of the Northern States, i.e., Radanas and the States in Pandu Mewas are on the banks of the Mahi river. In fact the Rewa Kantha Agency comprises territories watered both by the Rewa and Mahi Rivers.

The population consists of the following main classes: Hindus, Jains, Musalmans, Animistic Bhils, Dhankas, Kolis and Naikdas.

Surgana.—Is situated on the borders of the Nasik District, The Dangs consist of a tract of country between the Sahyadris and the Surat District which is parcelled out among 14 petty Chiefs. Of these 13 are Bhils and 1 a Kokani.

The headquarters of the Agency, which is statuted at the Baroda Residency in view of the fact that the Secretary to the Resident at Baroda and the Gujerat States is also ex-officio Political Agent of this Agency, consist of r

EASTERN STATES AGENCY.

the Province of Bihar and Orissa, and 14 Central Provinces States. Subsequently on December plains of t ist, 1936, the two Bengal States of CoochBehar and Sylhet. Tripura were transferred to the Agency. and there are now three Political Agencies under the Resident for the Eastern States at Calcutta,

(1) The Orissa States Agency with its head-quarters at Sambalpur and with which the following States are in Political relations :-

Athgarh, Athmallik, Bamra, Baramba, Baudh, Bonal. Daspalla, Dhenkanal, Gangpur, Hindol, Keonhar, Khandpara, Kharsawan, Narsingh-put, Mayagarh, Migiri, Pal-Lahara, Rairakhol, Ranpur, Seraikela, Sonepur, Talcher and Tigiria.

Bastar, Changbhakar, Chhuikhadan, Jashpur Kalahandi, Kanker, Kawardha, Khairagarh, Korea, Nandgaon, Pataa, Raigarh, Sakti, Saran-garh, Surguja and Udaipur.

(3) The Bengal States Agency with its headquarters at Calcutta and with which the following States are in Political relations :-

Cooch Behar, Mayurbhanj and Tripura,

Of all these States the Rulers of six enjoy the distinction of salute, viz., Cooch Behar and Tripura of 13 guns, and Mayurbhanj, Patna, Kalahandi and Sonepur of 9 guns.

The total area is 65,230 square miles and the total population 80,82,052. income 2,10,46,000. These States pay a t These States pay a tribute amounting to Rs. 4,03,250.

Cooch Behar.—This State is situated in North Bengal, bounded by the Districts of in Notes beingar, bounded by the Districts of 1,31s square miles and a population of 590,886, the revenue being Rs. 26,98,000. The town of Cooch Behar is connected by the The town of Cooch Behar is connected by the Cooch Behar State Railway with the Bastern Robert State Railway with the Bastern Robert State Railway with the Bastern Robert State Railway Robert State Railway Robert State Robert State Railway Robert State Robert State Robert Robert State Robert Robe Ruler. raja Jagaddipendra Narayan Bhup Bahadur who was born on the 15th December 1915, and succeeded his father Maharaja Jitendra Narayan

and the diverse forms of a the carties of a the consect and the consect a styled the may make a control of the man course and art critics of acknowledged authority. During the Moghul period, Mayurbhanj was recognised by the Emperors as an autonomous principality, and in the days of Mahratia supremacy in Orissa, the Rulers of Mayurbhanj were often at war with the Mahrathas who attempted to levy a precarious tribute by force of arms. In 1761, the East India Company took possession of Midnapore and almost immediately afterwards the Ruler of Mayurbhani opened friendly negotiations with the British authorities. During half a century preceding the British conquest of Orissa, the British authorities maintained their friendship with Mayurbhanj and a treaty was concluded between the East India Company and Mayurbhani State in 1829.

> Keonihar is an off-shoot of Mavurbhani being held by a junior branch of the Ruling family which separated from the parent State.

Kharsawan and Seraikela,—The Rulers of these States belong to the family of the Raja these States belong to the minity of the Maja of Poralat whose States were confiscated by the British Government. These States first came under the notice of the British in 1793, when in consequence of disturbances on the frontier of the old Jungle Mahals the Thakur of Kharsawan and the Kunwar of Seraikela were compelled to enter into certain agreements relating to the treatment of fugitive rebels. The Chiefs were bound, when called upon, to render service to the British Government, but not required to pay tribute. The Bengal Nagpur Railway runs through a part of the State.

on the 20th December 1922.

Tigner,—This Sates like to the east of Tigner,—This Sates like to the east of the control of the c

on incessant warfare with their neighbours. (13,002 square miles) it is the twelfth largest In course of time their hill retreats were State in India. The late Chilef of Bastar was a penetrated by Aryan adventurers who Hindu lady. She was the last direct descendant gradually overthrew the tribal Chilefs and on the male line of an ancient family of Lunar established themselves in their place. Tradl. Rajputs. which ruled over Warangal until the tion relates how these daring interiopers, most Mahommedan conquest of the Deccan in the 14th of whom were Rajputs from the north, came to contary A.D. when the brother of the last Raja Puri on a pligimage and remained behind to of Warangal field into Bastar and established found kingdions. It was thus that Jai Singh is a kingdom there. From then till the days of the said to have become ruler of Mayurbhanj over Mahrattas the State was virtually independent. 1.300 years ago, he being succeeded by his cliest its inaccessibility securing it from all but occason, while his second son seized Keonihar. Chiefs of Baudh and Daspalla are said to be descended from the same stock; and a Rajput origin is also claimed by the Rajas of Athmallik. Narsinghour, Pal-Lahara, Talcher and Tigiria, Navagarh, it is alleged, was founded by a Rajput from Rewah, and a scion of the same family was the ancestor of the present house of Khandpara. The ruling family of Ranpur is of Khond origin and furnishes the only known instance in which amid many vicissitudes, the supremacy of the original settlers has remained intact. The States acknowledged the suzerainty of the paramount power and were under an implied obligation to render assistance in resisting invaders; but in other respects neither the ancient kings of Orissa nor their successors, the Moghuls and Mahrattas, ever interfered with their internal administration. All the States have annals of the dynasties that have ruled over them; but the dynasties that have ruled over them; but they are made up for the most part of legend and fiction and long geneological tables of doubtful accuracy, and contain very few features of general interest. The British con-quest of Orissa from the Mahrattas which took place in 1803, was immediately followed by the submission of ten of the tributary States the Chiefs of which were the first to enter into treaty engagements.

Bastar, Changbhakar, Chhuikhadau, Jashpur, Kanker, Kawardha, Khairagarh, Korea, Nandgaon, Raigarh, Sakti, Sarangarh, Surguja, Udaipur.—These States are scattered round Chattisgarh Division in the Central Provinces to the different districts of which the majority of them were formerly attached.

The signal raids of Mahommedan freebooters. Bhonslas of Nagpur imposed a small tribute on Bastar in the 18th century which is now paid to the British Government. Nearly 11,000 square miles are covered by forest of which about 3.000 square miles are reserved and cultivation is sparse. The capital, Jagdalpur, on the Indravati River is 184 miles by motorable road from Rainur in the Central Provinces.

> Surguia.-Until 1905 this was included in the Chota-Nagnur States of Bengal, The early history of Surgaja is obscure, but according to local tradition the present Ruling family is said to be descended from an Arksel Raja of Palaman In 1758 a Mahratta army overran the State and compelled its Chief to acknowledge himself a tributary of the Bhonsla Raja.

Rampur State.—The State of Rampur was founded by Nawab Syed All Mohammad Khan his dominions included a considerable portion of what is now known as Rohilkhand, The founder belonged to the famous Sayed clan of Barcha in the Muzaffarnagar district and was a statesman of remarkable ability. He rendered valuable services to the Moghal Emperor who recognised him as Ruler of Robilkhand and lestowed on him the Mahi Maratib, i.e., the Insignia of the Royal Fish.

Upon his death, his Kingdom underwent many vicissitudes and was considerably reduced in size during the reign of his son Nawab Sayed Faizullah Khan Bahadur. The Province of Rohilkhand had now passed into the hands of India Company, Nawab East Sayed Faizalla Khan Bahadur was very loyal to the British Government to whom he always looked for help during those unsettled days and he gave tangible proof of his loyalty when during the war against France he offered all his cavalry. 2,000 strong, to the British Government in 1778 and received the following message of thankfrom the then Governor-General:-

"That in his own name as well as that of the Board, he returned him the warmest thanks

see company and the English Nation."

The present Ruler, Captain His Highness Another opportunity arose for the ruler of Rampur to evince the steadflest loyely and devotion to the Imperial Cause on the outbreak of the Multipy of 1837. His Highness was born on the Multipy of 1837. His Highness was

are; ment. He saved the lives of many Europeans whom he provided with money and other means of comfort. He established his reputation as a good administrator to such an extent that he was placed in charge of the administration of Moradabad and the other neighbouring districts on behalf of the British Government. signal services were recognised by the British Government by the grant of an Illaga besides other marks of distinction.

During the reign of Nawab Sir Kalb-i-Ali Khan Bahadur who was an Oriental scholar of repute, the Court of Rampur came to be surrounded by Rampur State.—The State of Rampur was artists, poets, and musicians, who were left founded by Nawab Syed All Mohammad Khan without any patronage on the break up of the islandur in the middle of the 18th century and Mohammad Chaplan and Oulh Courts. This Frince collected all those rare and most previous Persian manuscripts and Moghul Miniatures now preserved at the Rampur Oriental Library. Indeed, the years of his rule meant for Rampur the splendour of a rich renaissance. In 1887, Nawab Sir Kalb-i-Ali Khan Bahadur died and was succeeded by his invalid son, Nawab Mushtak Ali Khan Bahadur, who, after a brief reign, passed away in 1889.

> During the reign of His late Highness Nawab Sir Syed Mohammad Hamid Alı Khan Bahadur, Rampur made great strides in trade and commerce and in fact in every walk of life. He maintained the traditions of his House for devotion to the British Crown. The Great War of 1914 found him foremost in offering his per-sonal services and all the resources of the State to the British Government. The 1st Rampur Infantry was sent to East Africa and returned home after nearly four years' service and won favourable remarks from high British officers, He contributed one lakh of rupees towards the cost and upkeep of the hospitalship "Royalty." At the time of the Afghan War of 1919 the I. S. Lancers and the Imperial Service Infantry were sent on garrison duty in British India.

the very start of the Mutiny till peace was re-stablished in the country, he spared neither of the state has been overhauled and reorganised, mean or money in the help of the British Govern-1 A State Council consisting of six members is

Since 1935, His Highness has completely separated his Civil List from the State Budget.

The Rampur Municipality has a representative character, and has a non-official and elected Chairman. Two-thirds of its members are elected and the remainder nominated. Town Areas in two mofussil towns of the State have also been established.

The Legislative Committee consisting of experts who durated enactments for the State has recently been remodelled and a representative element has been introduced into it to afford opportunities to the subjects to ventilate their views and take part in the traming of laws for the State, as well as to discuss and offer their advice on matters in which their opinion may be invited.

The State employees have recently been given the benefit of pension rules and time scale salaries have been fixed for them.

A Development Board has been instituted to encourage and foster the growth of industries and improve agriculture in the State. Two Sugar factories have been established in the State under the management of Messrs. Govan Brothers of Delhi.

His Highness has two sons and four daughters. The eldest son Sahebzada Syed Murtaza Ali Khan Br. is the Heir-Apparent.

The permanent salute of the State is 15 gms and the annual income about 50 lakes of rupers.

Benares.—The kingdom of Benares under the Hight unless existed from time immemorial the Hight unless existed from time immemorial to the highest consideration of the High such that the highest conjugate high such as the hi

made by Safdar Jang and after him by Shujaud-daula of Oudh to destroy the independence of the Raja and the Fort of Ramnagar was built on the ban of the Ganges opposite the Benares City, Raja Balwant Singh died in 1770 and was succeeded by his son Chet Singh. He was expelled by Warren Hastings. Balwant Singh's daughter's son Mahip Narain Singh was placed on the gadi. The latter proved an imbecile and there was maladministration which led to an agreement in 1794 by which the lands, held by the Raja in his own right which was granted to him by the British Government, were separated from the rest of the province. The direct control of the latter was assumed by the Government and an annual income of one lakh of rupees was assured to the Raja while the former constituted the Domains. Within the Domains the Raja had revenue powers similar to those of a Collector in a British district. There was thus constituted ma british desire. There was once constituent what for over a century was known as the Family Domains of the Maharaja of Benares. On the 1st of April, 1911, the major portion of these Domains became a State consisting of the perganas of Bhadohi and Chakia (or Kera Mangraur). The town of Ramnagar and its neighbouring villages were ceded by the British degenormy vinages were cedea by an Ericsa Government to the Maharaja'n 1918 and became part of the State. The Maharaja's powers are those of a Ruling Chief, subject to certain condi-tions, of which the most important are the maintenance of all rights acquired under laws in force prior to the transfer, the reservation to Government of the control of the postal and telegraph systems, of plenary criminal jurisdiction within the State over servants of the British Government and European British subjects, and of a right of control in certain matters connected with Excise.

States Nos. 7, 11, 13, 14, 18, 19 and 21 to 45 were placed in political relations with the Hon'ble the Resident for the Punjab States, on the ist October, 1886. Q Inclusive of two personal. ## Tributaries of Jubbal. † Tributaries of Keonthal. * Tributaries of Bashahr.

Patiala .- This is the largest of the Phulkian States, and the premier State in the Punjab. Its territory is scattered and interspersed with small States and even single villages belonging to other States and British districts. It also comprises a portion of the Simla Hills and territory on the border of Jaipur and Alwar States, Area of 5,932 square miles. Population 16.25.520. Gross income Rs, one crore and forty lakhs. Its history as separate State begins in 1762, Its Ruler, Lieutenant-General His Highness Farzand-i-Khas Daulati-Inglishia Mansur-ul-Zaman Amir-ul-Umra Maharaja Dhirai Raj Rajeshwar, Sri Maharaja-i-Rajgan Sir Bhupindra Singh Mohinder Bahadur, Yadu Vanshavatans Bhatti Kul Bhushan, G.C.S.L., G.C.I.E., G.C.V.O., G.B.E., A.D.C., I.L.D., died in March 1938 and was succeeded by his son, His Highness Maharaja Dhiraj Yadavinder Singh, His Highness the Maharaja Dhiraj enjoys at present personal salute of 19 guns and he and his successors have been exempted from presenting Nazar to the Viceroy in Durbar in perpetuity. The principal crops are grain, barley, wheat, sugar-cane, rapeseed, cotton and tobacco. A great part of the State is irrigated by the Sirhind and Western Junna Canal distributaries. It possesses valuable forests. The State is rich in antiquities, especially at Pinjaur, Sunam, Sirhind, Bhatinda, Narnaul, etc. One hundred and thirty-eight miles of broad-gauge railway line comprising two Sections—from Rajpura to Bhatinda and from Sirhind to Rupar-have been constructed by Railway, the E. I. Railway, the B. B. & C. I. Railway and the J. B. Railway traverse the State. His Highness maintains a contingent of two regiments of Cavalry and four battalions of Infantry—one battery of Horse Artillery.

The State maintains a first grade college which imparts free education to state subjects. Frimary education is also free throughout the State. The Durbar sanctioned a scheme of compulsory education in 1928.

Since the State entered into alliance with the British Government in 1804 and 1809 A.D. is has rendered help to the British Government to all ordical conscious such as the Gurkha War and Irdical conscious such as the Gurkha War of 1837, the Arghan War of 1837, 70, and the of 1837, the Arghan War of 1837, 70, and the Irina and N. W. F. campaign of 1897. On the outbreak of the European War His Islate Highness placed the enthereresources of his State at the disposal of His Majesty the Kingston of the High State at the disposal of His Majesty the Kingston of the War and State at the disposal of His Majesty the Kingston of the War and Saved on various fronts in Egypt, Gallipoli, Mesopotamia and Palestine, whaning numerous served on various fronts in Egypt, Gallipoli, Mesopotamia and Palestine, whaning numerous were related and pulled the construction of the War and in addition to furnishing nearly 28,000 recruits for the British Indian Army and maintaing the State Imperial Service Contingent that the Contingent of the Contingent and in Army and maintain the State Imperial Service Contingent controls of the State Imperial May 18 for the State Imperial Service Contingent Continge

and the Imperial Service Contingent saw active service towards Kohat and Quetta fronts. For his services on the N. W. Frontier His late Highness was mentioned in despatches.

The present ruler has inherited fine qualities of sportmanship and achieved distinction in the field of Cricket.

Bahawalpur.—Bounded on the North-East by the District of Ferozepur; on the East and South by the Rajnutana States of Bikaner and Jaisalmere; on the South-West by Sind, on the North-West by the Indus and Sutlej rivers, Area, 15,000 square miles,

This State is about 300 miles in length and about 50 miles wide, is divided length wise into three great strips. Of these, the first is a part of the Great Indian Desert; the central track which is as barren as uplands of the Western Punjah; has bowever been partly rendered cappulate in the source of the partly rendered capturated (and the strip of the s

The ruling family is descended from the Abbasside Khalifas of Baghdad. The tribe originally came from Sind, and assumed independence during the dismemberment of the Durani Empire in the Treaty of Lahore in 1809. Ranjit Singh was confined to the right bank of the Suttej.

The first treat; with Rehavalpur was negotianted in 1833, the year after the treaty with Intilliciants of the 1842 to the 1842

The chief crops are wheat, rice and millet. The Lahore-Karachi branch of the North Western State Railway passes through the State. The State supports an Imperial Service combined infantry, in addition to other troops. The capital is Bahawalpur, a walled town built

Income from all sources over 90 lakhs. Languages spoken Multani or Western Punjabi (Jatki), and Marwari.

Resident for the Punjab States: The Hon. Lt.-Col. H. Wilberforce-Bell, C.I.E., R.C.I.E., C.B.E., I.C.S.

Khairpur.—The state of Khairpur lies in Upper Sind between 26°-10" and 27°-46" North Latitude and 68°-20" and 70°-14" Fast Longitude. It is bounded on the East by Jodhpur and Jessalmere territories and on the North, West and South by British Districts of Sind. The climate is similar to the rest of Sind. The The climate is similar to the rest of Sind. The maximum temperature in summer is 117° in the shade and the minimum in winter 30° The nearest hill station is Quetta, 5,500 feet above sea level. Rainfall is scarce, the last 12 years' average being 4°-0°. The area of the State is about 6,050 square miles. The population of the State according to the census of 1931 is 2.27,183 souls. The majority of them are cultivators. Others are engaged in trade, State services and labour. By religion they are mainly Suni Muslims, but the Ruler and his family and some others are Shias. Hindus form the minority community. The State's revenue from all sources calculated on the average of the past five years amounts to Rs. 21.99 lakhs, The relations of the State with the British Government are those of subordinate alriance. state pays no tribute either to the British Government or to any other State. The language of the State is Sindhi. Urdu and English are also spoken. The chief product of the State is grain, which is cultivated on irrigation canals taking off from the Indus river at tion cannis taking on front the indus fiver at the Lloyd Barrage and to a small extent on wells. Cotton, oil-seeds, ghee, hides, tobacco, Fuller's earth ("met"), carbonate of Soda ("Kharo chaniho"), and wool are also produced. The manufactures comprise cotton, silken and woollen fabrics, lacquer work, carpets and pottery.

The Rulers are Muslim Talpur Balochs and belong to the Shia seet. Previous to the accession of this family on the fall of the Kalhora dynasty of Sind in 1783, the history Kalhora dynasty of Sind in 1783, the history Sind. In that year Mir Fatchall Khan Talpur, consider the Khairpur Branch of the Talpur Gousled the Khairpur Branch of the Talpur Counsel the Khairpur Branch of the Talpur Khairpur State was recognized by the British Government. The Ruler's a first-class prince and is entitled to a permanent salute of 15 guns outside and 17 gams raised to the State limits.

Present Mir: His Highness Mir Faiz Mahomed Khan Talpur of Khairpur State. Born on 4th January 1913. Ascended the Gadi on 30th April 1936.

Resident for Punjab States: Lt.-Col. Sir H. Wilberforce-Bell, C.I.E.

Minister: S. Ijaz Ali, Esquire, M.B.E., Khan Bahadur,

Jind.—Jind is one of the three Phulkian States (the other two being Patiala and Nabba). Its area is 1,268 square miles, with a population of 324,676 souls and an income of 26 lakhs.

The history of Jind as a separate State dates from 1763, when Raja Gajpat Sineth, the maternal grandfather of Maharaja Kanjik Sineth, and greatgrandfather of Maharaja Kanjik Sineth, and greatgrandfather of Maharaja Kanjik Sineth, and greatgrandfather of Maharaja Kanjik Sineth, who greatly assisted Lord Lake in 1805. His grandson Raja Sangat Sineth was succeeded by the nearest male collateral Itaja Sarup Singh in 1837. In the crisis of 1857 Itaja Sarup Singh in 1837. In the crisis of 1857 Itaja Sarup Singh in 1837. In the crisis of 1857 Itaja Sarup Singh in 1837. In the crisis of 1857 Itaja Sarup Singh in 1837. In the crisis of 1857 Itaja Sarup Singh in 1837. In the crisis of 1857 Itaja Sarup Singh in 1837. In the crisis of 1857 Itaja Sarup Singh in 1837. In the Crisis Maharaja Kaghbir Singh, who gave help to the British Government on the occasion of Kuka outtheak (1872) and on the occasion of Kuka outtheak (1872) and succeeded in 1837, and invested with full powers in 1889. The State rendered exemplary services in the Great European War. It supplied \$4,073 men to the Indian Army and of its Imperial Service Inatury. The total contribution amounted to nearly 35 lakks, in

His Highness enjoys a salute of 15 guns. The capital is Sangrur, which is connected by a State Railway with the North-Western Railway The principal executive Officer of the State is called Chief Minister.

Ruler.—Colonel His Highness Farzand-i-Dilband Rasikh-ul-Itikad, Daulat-i-Inglishia Raja-i-Rajgan Maharaja Sir Ranbir Singh Bajendra Bahadur, G.O.S.I., G.O.I.F., etc.

Nabha — Nabha which became a sonariae State in 1763 is one of the 3 Piniltian States — Nabha, Patiala and Jind—and though second in point of population and revenue of the 3 sixter States, it claims seniority being descended from the eldest branch. It consists of two reasons are not seniority being descended in the seniority being descended in the control of the seniority seathered among the other Punjab States and Districts, forms the City of Nabha and the Nizamate of Pinil and Amiloi, the second portion forms the of the Punjab on the border of Rajputana. It is seniority and the seniority of the Rulers of the Punjab on the border of Rajputana. It is subject to the second of the Punjab on the border of Rajputana this Nizama of Pawal was subsequently added to its territory as a reward from the British of overnment for the loyalty of the Rulers of overnment for the loyalty of the Rulers of the Pinilan Covernment of th

The State is traversed by the main and 8 branch lines of the N. W. Railway and the B. B. & C. I. crosses the Nizamat of Bawal.

A portion of the State is irrigated by the Sirhind Canal. The crops of the State are irrigated by (gram, pulses, bajra, sugarcane, cotton, wheat and barley; to facilitate trade the Durbar has opened grain markets and Banks near the principal railway stations within the State territory. The chief industries of the State consist of the manufacture of silver and gold ornaments, brass utensils, and cotton, carnets. lace and gota, etc. There are some ginning factories and 5 cotton Steam Presses in the State which are working successfully. In 1923 an inquiry was held into certain matters in dispute between the Patiala and the Nabha Durbars which showed that the Nabha Police had fabricated cases against persons connected with the Patiala State with the object of injuring them through the Patiata Durbar. As a result, the Maharaja Ripudaman Singh, who was born in 1883 and succeeded his father in 1911, entered into an agreement with the Government of India whereby he voluntarily separated himself from the administration and the control of the State was accordingly assumed by the Government of India, In consequence of repeated breaches of the agreement by the Maharaja, he was in February 1928 deprived of the title of Maharaja, His Highmess and of all rights and privileges pertaining to the Ruler of the State, privinges pertaining to the Ruise of the State, and his eldest son, Partap Singh, was recognized as Maharaja In his stead. His Highness Maharaja Pratap Singh is a minor and during his minority the State is being administered by a Council of Regency consisting of a President and three Members. His Highness is at present receiving his education in Badingham College, Leatherhead.

Kapurthala .- This State consists of three detached pieces of territory in the great plain of the Jullundur Doab. The ancestors of the ruler of Kapurthala at one time held possessions both in the Cis and Trans-Sutlej and also in the Bari Doab. In the latter lies the village of Ahlu whence the family springs, and from which it takes the name of Ahluwalia. When the Jul-lundur Doab came under the dominion of the British Government in 1846, the estates north of the Sutlej were maintained in the independent possession of the Kapurthala Ruler, conditional on his paying a commutation in cash for military service engagements by which he had previously been bound to Maharaja Ranjit Singh, of Lahore. This annual tribute of Rs. 1,31,000 a year was remitted by the Government of India in perpetuity in (1924) in recognition of the splendid war record and uniformly efficient administration of the State. The Bari Doab estates are held by the head of the House as a jaghir in perpetuity, the civil and police jurisdiction remaining in the hands of the British authorities. For good services during the Mutiny, the present Maharaja's grandfather was rewarded with a grant of other estates in Oudh, which yield a large annual income equal to those of Kapurthala State. The present Ruler's titles are Col. H. H. Farzand-I-Dilband Rasikhul-Itikad Daulat-I-Inglishia Raja-I-Rajagan Maharaja Jagatjit Singh Bahadur Maharaja of Kapurthala, G.C.S.I. (1911), G.C.I.E. (1918), G.B.E. (1927) who was born on 24th November 1872 and succeeded his father His Highness the late Raja-i-Rajgan Kharak Singh of Kapurthala in 1877. He was

granted the title of Maharaja as an hereditary distinction in 1911. His salute was raised to 15 guns and he was made Honorary Colonel of the 45th Rattrays Sikhs. The Maharaja Changara and the state of the 15th Rattrays Risks. The Maharaja Changara and Langara and Langara

The rulers of Kapurthala are Rajput Sikh, and claim descent from Rana Kapur, a distinand dails descent from Ania Kashui, a disa-quished member of the Ralput House of Jaisalmer. Only a small proportion of the operation however are Sikha, the majority being Mahomedans. The chief crops are when gram, make, ootton and sustareane. The town of Sulkanpur in this State is famous for hand-princed oleths. Phagwara is another important printed clouds. Fingware is account imposed town in the State and is very prosperous on account of its grain markets and factories for manufacture of agricultural implements, and metallic utensils of household use. The situation of this town on the main railway line and the consequent facilities of export and import make its importance still greater and this is the chief commercial town in the State. The main line of the North-Western Railway passes through part of the State and the Grand Trunk Road runs parallel to it. A branch railway from Juliundur City to Ferozepur passes through the capital. The Imperial Service and local troops of the State have been re-organized and are now designated as Kapurthala State Forces. The State Troops, the strength of Forces, The State Troops, the strength of which was raised during the Great War, to nearly 2,000, served the Empire in that crisis in East Africa, Mesopotamia and on the Afghan Frontier. Primary education is free Afghan Frontier. Primary education is free throughout the State, and it spends a large proportion of its revenues on its Education Department. The State also possesses a Legislative Assembly which was created by the present Maharaja on the occasion of the Silver Jubilce of his reign in 1916. The capital is Kapurthala which has been embellished by the present Maharaja with a Palace of remarkable beauty and grandeur and with various build-ings of public utility. The town boasts modern amenities such as electric light, water-works,

Political Officer: The Hon'ble Agent to the Governor-General, Punjab States, Lahore.

Tehri State (or Tehri-Gariwal).—This State lies entirely in the Hunianyas and contains a tangled series of ridges and spurs and and the state of the series of the series on the and the Jumna are in it. The early listory to the State is that of Gariwal District, the two trarts lawing formerly been ruled by the same dynasty since 688 A.D. Pradyumna

Shah, the last Raja of the whole territory, was gram, rice, malze and other crops. The State killed in battle fighting against the Gurkhas; forests are valuable and there is an incompany but at the close of the Nepalese War in 1815, his son received from the British the present State of Tehri. During the Mutiny the latter rendered valuableassistance to Government. He died in 1859. The present Maharaja is Lieut.-Gol. H.H. Sir Narendra Shah Bahadur, K.C.S.I., who is 59th direct male lineal descendant from the original founder of the dynasty, Raja Kanak The principal products are rice and Dol . wheat grown on terraces on the hill sides. The State forests are very valuable and there is considerable export of timber. The Maharaja has full powers within the State. The strength of the powers within the State. The strength of the State forces is 330. Tehri is the capital but His Highness and the Secretarial Office are at Narchdranagar for the greater part of the year, the summer capital being Prataphagar, 8,000 feet above the sea-level.

The State is politically transferred to the Residency of the Punjab State.

Mandi is an Indian State in the Puniah Political Agency, lying in the upper reaches of Blas river, which drains nearly all its area. Its area is 1,200 square miles and it lies between 31°-23' North Lat., and 76°-22' East Long., and is bounded on the east by Kulu: on the south by Suket and on the north and west by Kangra. It has an interesting history of considerable length which finally resulted in its entering into a treaty with the British in 1846.

The present Ruler, Captain His Highness Raia The present a Mer, Capani his Highness kapes Sir Jogindar Sen Bahadur, K.O.S.I., assumed full powers in February, 1925. His Highness married for the first time the only daughter of His Highness the Maharaja of Kapurthala. His Highness married again in 1930 the younger daughter of K. Prithiraj Singh of Rajpipla. A son and heir was born on 7th December 1923

The Mandi Hydro-Electric Scheme was The Manual Hydro-Lacture Scheme was formally opened by His Excellency the Viceroy in March, 1982. The principal crops are rice, maize, wheat and millet. About three-fifths of the State is occupied by forests and grazing lands. It is rich in minerals. The capital is Mandi, founded in 1527, which contains several temples and places of interest and is one of the chief marts for commerce with Ladhakh and Varkand.

Sirmur (Nahan) .- This is a hilly State in the Himalayas under the Political control of the Political Agent, Punjab Hill States, Simla. Its history is said to date from the 11th century the eighteenth century the State was able to repulse the Gurkha invasion, but the Gurkhas were invited to aid in the suppression of an internal revolt in the State and they in turn had to be evicted by the British. In 1857 the Raja rendered valuable services to the British, and during the second Afghan War he sent a contingent to the North-West Frontier. The present Prince is H. H. Maharaja Rajendra Prakash who was born in 1913 and succeeded in 1933. The main agricultural feature of the State is the recent development of the Kiarda Dun, a fertile level plain which produces wheat,

at Nahan which was started in 1867 but, being unable to compete with the imported iron, is now used for the manufacture of sugarcane crushing mills. The State supports a Corps of Sappers and Miners which served in the Great War. It was captured with General Townshend's force at Kut-al-Amara but the Corps was reconstituted and sent to service.

Malerkotla.-This State consists of a level sandy plain unbroken by a hill or stream, bounded by the district of Ludhiana on the north, by Patlala territory on the east and south and by the Ludhiana District, Patiala and Nabha territories on the west. The Rulers (Nawabs) of Malerkotla are of "Kurd", descent who came originally from the Province of "Sherwan" and settled in the town of "Sherwan" north of Persia, and after settling for a time in Afghanistan near Ghazni came to India and settled at Maler, the old capital of the State in 1442. Originally they held positions of trust under the Lodhi and Moghal Emperors. As the Moghal Empire began to sink into decay they gradually became independent. They were in constant feuds with the newly created adjacent Sikh States. After the victory of Laswarl, gained by the British over Sindhia in 1803 and the subjugation and flight of Holkar in 1805, when the Nawab of Malerkotla joined the British Army, the British Government succeeded to the power of the Mahrattas in the districts between the Sutlej and the Jumna, The State entered into political relations with the British Government in 1809. The present Ruler is Lt.-Col. His Highness Nawab Sir Ahmad Ali Khan, Bahadur, K.O.S.I., K.C.I.E., who was born in 1881 and succeeded in 1908. He was created Hony. Major in the Indian Army in June 1916 and promoted to the rank of Lt.-Col. in December 1919.

The chief products are cotton, sugar, poppy, aniseed, mustard, ajwan, methi, garlie, onions and all sorts of grains.

The State maintains Sappers, Infantry, avalry and Artillery. The capital is Maler-Cavalry and Artillery. kotla. The population of the town is 30,000. Annual revenue of the State is about 16 lakhs.

Faridkot.-The Faridkot Rajas are sprung from the same stock as the Phulkian Chiefs having a common ancestor in Brar more remote by twelve generations than the celebrated Phul, The Faridkot House was founded in the middle of the seventeenth Century. The present Ruler Farzand-l-Saadat-Nishan Hazraat-i-K a i s a r-i-Hind. Lt. His Highness Raja Harindar Singh Brarbans Bahadur was born on the 29th January 1915, succeeded to the Gadi in 1918, and was invested with full Ruling Powers in October 1934. His Highness was blessed with an Heir-Apparent on October 22, 1987. His personally Highness administers the State assisted by his younger brother Kanwar Manjit-indar Singh Bahadur, Military Secretary, and an efficient Cabinet of three other Secretaries headed by Sardar Bahadur Sardar Indar Singh, B.A., Chief Secretary. The State comprises an area of 643 square miles with a population of 1,69,364 souls and has a gross annual income of over 19½ lakhs. The Ruler is entitled to a salute of 11 guns and a visit to and return visit from the Viceroy. The State Forces consist of the State Sappers and Household Troops (Cavalry and Infantry). Faridkot, the Capital town, elles on the main Delhi-Bhatinda Lahore Section of the North Western Railway.

Chamba.—This State is enclosed on the theorem of the Tarbailli, on the east and well and the British districts of Kangra and Gundaspur, and it is shut in on almost every side by lofty hill ranges. The whole country is mountainnes and is a great problem of the sportsum. It produces a programment of the sportsum of the produce of the property of the law of the produce of the produce of the proton of the produce of the produce of the proton of the produce of the produce of the proton of the produce of the produce of the proton of the produce of the produce of the proton of the produce of the produce of the proton of the produce of the produce of the proton of the produce of the proton of the produce of the produce of the proton of th

Founded probably in the sixth century by Maruta, Surajiansi Rajjunt, who built Brahmapura, the modern Barmaur, Chamba was extended by Meru Varma (680) and the town-Ghamba built by Sahli Varma about 220. The State maintained its independence, until the Moghal conquest of India.

Under the Moghals it became tributary to the empire, but its internal administration was not interfered with, and it escaped almost un-

scathed from Sikh aggression. The State first came under British influence in 1846. part, west of the Ravi, was at first handed over to Kashmir, but subsequently the boundaries of the State were fixed as they now stand, and it was declared independent of Kashmir, The present Chief is H. H. Raja Lakshman Singh who was born in 1924 and succeeded in 1935. As he is a minor the Administration of the State is being conducted by a Council, consisting of a President (Colonel H. S. Strong, c.i.e.), Vice-President and Chief Secretary (Diwan Bahadur L. Madho Ram), and a Judicial Member (Lala Hargobind), The principal crops are rice, maize and millets. There are some valuable forests which were partly leased to Government in 1864 for a term of 99 years, but the management of them has now been retroceded to the Chamba Durbar. The mountain ranges are rich in minerals which are little worked. The principal road to Chamba town is from Pathankot, the terminus of the Amritsar Pathankot branch of the North Western Railway. Chamba town, on the right bank of the Ravi, contains a number of interesting temples, of which that of Lakshui Narayan, dating possibly from the tenth century, is the most famous.

UNDER THE GOVERNMENT OF BURMA.

The States under this Government comprise the Shan States which are included in British Burna though by do not form part of Burna from how the state of Burna though the state of Burna the state of the Province and the Karenni States which are not part of Philish Burna and are not subject to any of the laws in force in the Shan States or other parts of Parma.

Hsawnghsup with an area of 529 square miles and a population of 7,239 lies between the 24th and 25th parallels of latitude and on the 96th parallel of longitude between the Chindwin river and the State of Manipur.

Singkaling Hkamti has an area of 983 square miles and a population of 2,157 and lies on the with and 90th parallels of latitude and longitude respectively.

The Hkamti Long States have an area of 200 square miles with a population of 5,340 and die between the 27th and 28th parallels of latitude on the Upper Waters of the N'Mai branch of the Irrawaddy.

The Northern Shan States (area 20,156 square miles and population 636,107) and the Southern Shan States (area 36,157 square miles and population 870,280), form with the unadmini-

stered Wa States (area about 2,000 square miles) and the Karenni States, a luge triangle lying roughly between the 19th and 24th parallels of latitude and the 96th and 102nd parallels of longitude with its base on the plains of Burma and its apex on the Mehkong river.

The population consists chiefly of Shaus who belong to the Shan group of the Tai Chinese family; the remainder belong chiefly to the Wa-palaung and Mon Khmer groups of races of the Austro-Asiatic brand of the Theoto Burman unanity. The Shanst hemselves shade off imperentially into a markedly Chinese race on the frontier. Buddhism and Animism are the principal religious.

The elimate over so large an area varies greatly. In the narrow longing valleys the heat in summer is excessive. Elsewhere the summer shade temperature is usually 80 to 95° Fahr. In winter frost is severe on the paddy plain like in the equality. The results in the example of the property of the proper

The agricultural products of the States are rice, pulses, maize, buckwheat, cotton, sessamum, groundnuts, oranges and pineapples.

Land is held chiefly on communat tenure but uncerpied and is easily obtainable on less from the Chiefs in accordance with special rules for non-natives of the States. Great spaces of the States are suitable for entitle, pony and mule breeding and in the Northern State Chieses settlers appear to have found the latter a very paying proposition.

The numeral resources of the States are still unexplored. Whe Burna Corporation have a measurement for silver, copper, lead and zinc in a Northern States which they claim to be the richest in the world. The Mawson area in the Southern States is also rich in lead. Lignite and iron ore of a low grade are found in many places.

Lashio, the headquarters of the Northern Shan States, is the terminus of the Myohaung-Lashio Branch of the Burnn Railways (178 miles) and is also connected with Mandalay by a motor road.

The Burma Corporation's narrow-gauge private railway track 44, 49 miles long connects their Bawdwin mine with the Burma Railways system at Namyao.

The Southern Shan States are served by the Burma Railways branch line Thazi to Heho (87 miles) which has been extended to Shwenyaung, 98 miles from Thazi.

Taunggyi, the headquarters of the Southern Shan States, is connected with Thazi by a wellgraded motor road. The States vary much in size and importance. The largest State is Kengtung with an area of 12,400 square miles and population 225,804.

Hsipaw with an area of 4,400 square miles and population 148,731 is the richest State with a gross revenue of Rs. 10,62,418.

The Sawbwas of Kengtung, Hsipaw, Yawngbwe and Mongnai have salutes of nine guns.

Administration.

Under the Burma Laws Act, 1898, Civil, Criminal and Revenue administration of every Shan State is vested in the Chief of the State subject to the restrictions specified in the sanad of appointment granted to him and under the same Act the law to be administered in each State is the customary law of the State so far as it is in accordance with justice, equity and good conscience and not opposed to the law in force in the rest of British Burms. The law in force in the rest of British Burney. The customary law may be modified by the Governor who has also power to appoint officers to take part in the administration of any State and to regulate the powers and proceedings of such officers. The chiefs are bound by their sanads to follow the advice of the Superintendents appointed but subject to certain modifications which have been made in the customary law relating to criminal and civil justice have more or less maintained the semi-independent status which was found existing at the annexation of Upper Burma.

In 1920, Sir Reginald Craddock, Lieutenantfovernor of Burma, proposed a scheme for the sanction of the Secretary of State under which the Chiefe of the Northern and Southorn Shan the Chiefe of the Northern and Southorn Shan ments of Government in which they had been previously largely dependent on contributions from the Provincial Funds. Under this scheme no interference is contemplated in the internal management of the States and the Chiefe state of the Chiefe of the States and the Chiefe state of the Chiefe of the States and the Chiefe state of the Chiefe of the States and the Chiefe state of the Chiefe of disposal of criminal and civil cases, appoint their own officials and control their own subjects under the advice of the Superintendents. But the Federation is responsible for the centralised Departments of Public Works, Medical, Forests, Education, Agriculture and to a small extent Police. In place of the individual tribute formerly paid by them the Chiefs contribute to the Federation a proportion of their revenue which amounts roughly to the expenditure hitherto incurred by them on the heads of administration now centralised while the Burma Government surrenders to the Federation all revenue previously derived from the States to enable it to maintain its services at the same degree of efficiency formerly enjoyed. The Federation on the other hand makes a payment of a fixed proportion of its revenue to the Burma Treasury in place of the individual contributions of the Chiefs. Under this scheme the Federation is a sub-entity of the Burma Government, is selfcontained and responsible for its own progress. The Chiefs express their views on Federal and general matters through a Council of Chiefs consisting of all Chiefs of the rank of Sawbwa and four elected representatives of the lesser Chiefs. The Superintendents, Northern Shan States and the Commissioner of the Federated Shan States to whom the supervision of the Federation has been entrusted are ex-officio members of the Council. The scheme was sanctioned and brought into force with effect from October 1922. The first meeting of the Council of Chiefs was formally opened by His Excellency the Governor Sir Spencer Harcourt Butler, G.C.I.E., K.C.S.I., I.C.S., in March 1923.

Karenni.

This district which formerly consisted of five States now consists of three as two have been amalgamated with others. It has a total area of 3,015 square miles and a population of 58,761. It lies on the south of the Southern Shan States between Slam and the British district of States between Slam and the British district of Toungoo. The larguest State is Kantanwadi Toungoo. The larguest State is Kantanwadi Toungoo. The larguest State is Kantanwadi Larguest exercised in the Shan States though nominally they are more independent than their Shan neighbours. Mineral and forest rights however in Karenni belong to the Chiefs and not to the Government. In the past substantial contributions from Provincial revenues have been made to the Karenni Chiefs for education and medical service. The Chiefs are at present unwilling to surrender their special rights and join the Shan States Federation though very considerable advantages might accrue from their doing so.

The principal wealth of the country used to be in its teak timber and a large allen population was at one time supported by the timber trade. This has largely declined in the last few years and unless the Chiefs are prepared to deny themselves and close their forests they will soon disappear.

JAMMU AND KASHMIR STATE.

The territory known generally as the Janumu and Kashnir State, lies between 52° and 37° N, and 73° and 80° E. It is an almost enthely mountainous region with a strip of level land along the Pumphs bourgies of the Pumphs have been as the property of the product of the product

Briefly described, the State comprises the valleys of the three great rivers of Northern India, viz. the upper reaches of the Chenab and the Jhelum, and the middle reaches of the Indus. The total population is 36,45,000 souls.

History .- Various historians and poets have left more or less trustworthy records of the history of the valley of Kashmir and the adjacent regions. In 1586 it was annexed to the Moghul Empire by Akbar, Srinagar, the capital, originally known as Pravarapura, had by then been long established, though many of the fine buildings said to have been creeted by early Hindu rulers had been destroyed in the fourteenth century. In the reign of Sikandar, who was a contemporary of Tamerlane, a large number of Hindus was converted to Islam. Jahangir did much to beautify the Valley, but after Aurangzeb there was a period of disorder and decay and by the middle of the eighteenth century the Suba or Governor of Kashmir had become practically independent of Delhi. Thereafter the country experienced the oppression of Afghan rule until it was rescued in 1819 by an army sent by Maharaja Ranjit Singh. The Sikh rule was not more beneficial to the people than that of the Afghans. The early history of the State as at present constituted is that of Maharaja Shri Gulab Singhji, a scion of the old Ruling Family of Jammu, who rose to eminence in the service of Maharaja Ranjit Singh of Lahore and was, in recognition of his distinguished services, made Raja of Jammu in 1820. He held aloof from the war between the British and the Sikhs, only appearing as mediator after the battle of Sobraon (1846), when the British made over to him the valley of Kashmir and certain other area in return for his services in re-establishing peace. His son, His Highness Maharaja Ranbir Singhij, a model Hindu and one of the staunchest allies of the British Government, ruled from 1857 to 1885. He did much to consolidate his possessions and evolve order in the frontler districts. He was succeeded by his eldest son, His Highness Maharaja Sir Pratap Singhji, who died on 23rd December 1925, and was succeeded by His Highness the present Shri Maharaja Hari Singhii Bahadur.

The most notable reform effected in the State during the reign of the late Maharaja was the Land Revenue Settlemen originally carried out under Sir Walter Lawrence and revised from time to time.

Administration—For some years after the accession to the gail of the late Maharria, the administration of the State was conducted by a Council over which the Maharria presided, In 1905 this Council was abolished and the administration of the State was thenectorwand carried on by His Hishness the Maharria with the help of a Chief Minister and a number of the help of a Chief Minister and a number of which we have been continued until the 24th January 1922, when an Executive Council was inaugurated, Very recently certain modifications have been introduced in the constitution.

The British Resident has his headquarters at Standard and Standard and there is also a Political Agent at Giligit. A British Officer is stationed at Leh to assist in the supervision of the Central Asian Trade with India, which passes through Kashmir.

In the Dogras (Hindus and Muslims) the State has splendid material for the Army which consists of 8,600 troops. Besides this, thousands of Dogras serve in the Indian Army.

Finance.—The financial position of the State is strong. The total revenue including Jagirs, is about 2,70,00,000; the chief sources being land, forests, customs and excise and sericulture. There is a reserve and no debt,

Production and Industry.—The population is pre-eminently agricultural and pastoral. The principal food crops are rice, maize and wheat, Oilseed is also an important crop. Barley, cotton, saffron tobacco, beans, walnuts, altmonts and hops are also grown. Pears and apples, the principal fruits of the Valley are exported in large quantities. The State forests are extensive large quantities. The State forests are extensive and valuable. The principal species of timber trees are deodar, blue pine and fir. The most valuable forests occur in Kishtwar, Karnah and Kamraj Illagas. A survey of the mineral resources of the State is being conducted. The most noteworthy of the minerals expected to be found in the State are bauxite, coal, Fuller's earth, kaoline, slate, zinc, copper and falc. Gold is found in Baltistan and Gilgit, sapphires in Paddar, aquamarines in Skardu and lead in Uri. The silk filature in Srinagar is the largest of its kind in the world, Manufacture of silk is a very ancient industry in Kashmir. Zain-ul-Abidin who ruled from 1421 to 1472 is said to have imported silk weavers from Khurasan to have imported sink waters from Addrass, and settled them here. Woollen cloth, shawls, carpets, papier mache and wool cavring of the State are world famous. The State participated in the British Empire Exhibition of 1024. The Kashmir Court was styled "The Gem of The Smaller Courts" and attracted many visitors, An Industrial and Agricultural. visitors. An Industrial and Agricultural Exhibition is held in the State annually, where the products of indigenous arts and craftsmanship for which Kashmir is famous are displayed. His Highness' Government are maintaining a

Visitors' Bureau at Srinagar for the convenience of visitors, who are attracted by the scenery and charm of the beauty-spots of Kashmir.

Communications.—Great efforts have been made an robeing made towards the improvement of the property of the pr

The Banihal Cart Road, 205 miles long, joins Kashmir with the North Western Railway system at Jamuu-Tawai and is also a fine motorable road.

Roads for pack animals lead from Srinagar, the summer capital of Kashuir, to the frontier districts of Gligit and Ladakh. Internal village communications have also been much improved.

The Jammu-Suchetgarh Rallway, a section of the Waxirabad-Stalkot branch line of the North Western Rallway system, is the only Rallway in the State. The mountainous nature of the country has so far prevented the extension of the line into the heart of the State.

Public Works.—In 1994 a flood spill channel above Schnagar was constructed to inthinise the constant danger of floods in the River Dielium. A number of canals have been constructed at considerable expense both in Janumu and Kashnir. The State has been recently connected with the telephone system of British India. An accordance has been constructed han rain service between Lahoro and Delhi and Kashnir will be established soon, Good

progress has been made with irrigation, but the most important scheme of recent years has been the installation of a large Electric Power Station on the Jihelium River and Mahora which was completed in 1907. The bridge over the Chenab at Akuru which was completed in 1935 at a cost of Rs. 4 lakhs, has the longest unsupported span in India.

Education.—According to the last census of the State, there were 1,23,600 persons ablo females. In other words, four per can, of the control of the control

Reforms.—One of the important reforms connected with the present financia's reign has been the establishment of an imbegendent High Control Judicature noticiled on British High Courts. Important legislative measures passed by His Highness' Government in recent years include the raising of the see of marriago to 14 for girls and 18 for boys, and the Agriculturists' Lielief Regulation meant to cope with the problem of rural indebtodness.

As sign of constitutional progress of the State may be mentioned the freedom granted to the press, and the introduction of the State Assembly, Over 30 newspapers are in existence in the State, and the Arsembly which has a nonofficial majority has already held seven sessions during three years and a half of its existence.

THE CHAMBER OF PRINCES.

The Narudra Mandal or Chamber of Princes came into oxistence, with the sarnost co-operation of a number of leading Princes themselves as one of the results of the Report on Indian constitutional reform presented to Parliament by Mr. Montague, Secretary of State for Indian on the Princes of State for Indian and H. E. Lord Chelmisfort, Vicercy and Governation of the Chamber of the

The Chamber was formally inaugurated by H.R. H. the Duke of Connaught on 8th February 1921. It meets regularly once a year and the agenda of subjects for discussion is framed

and proposed by the Chancellor of the Chamber who at present is His Highness the Maharaja of Patiala. The Chamber selects by vote its own officers, who are the Chancellor, a pro-Chancellor to act for him in his absence out of indianand-shanding Committee of the Chamber. This Committee considers before the annual them.

Until 1929, the proceedings of the Chamber was on admittance of the general public to its most not provided in the process of the process of

The most important question which the Chamber has over discussed is Federation. This subject came before it on various occasions after the Princes' representatives at the first Round Table Conference, in connection with the attest Constitutional Reforms scheme, made a pronouncement in favour of Federation which led to the incorporation in the new Reforms

Legislation of provisions for its establishment. regisation of provisions for its establishment. The consideration of this great issue, though sometimes taking place in open debate, has for the most part been conducted at meetings of the Standing Committee of the Chamber, which always meets in private, at informal meetings of the Princes with or without their Ministers and in an important Committee of Ministers. This latter body has been representative of all the States, including those whose Rulers have never exercised the privilege of sitting in the Chamber.

Federation caused sharp divisions of opinion among the Princes. Meanwhile, as the constitution of the Chamber provided for each State-Member exercising one vote on any question coming before the Chamber, power in the Cham-ber gradually fell into the hands of a majority representing the smaller States, because these epresenting the smaller States, because these States were naturally the readlest to exercise their membership privileges. This develop-ment caused serious disatisfaction among the Greater States and out of that sprang a movement for the re-organization of the Chamber.

The differences between the Greater States and the Lesser States were much sharpened by the different viewpoints which they occupied in regard to Federation. His Highness of Patiala carly in 1936 resigned the Chancellorship on this account. Thereafter His Highness of Bikaner resigned from one Standing Committee of the Chamber. Only one Raling Prince with a salute as big as 17 guns was then left an active participant in the Chamber's affairs. His Highness of Patiala was succeeded in the Chancellorship by His Highness of Dhelpur, who automatically proceeded to the appointment from that of pro-Chancellor. There was no meeting of the Chamber in 1936. His Excellency the Viceroy, in consultation with the Princes, convened a meeting commencing on 22nd February, 1937.

This meeting was preceded by intensive deliberations in the Informal Conferences of Princes. Their Highnesses at discussions which they held in Bombay in October 1936 appointed a Constitutional Committee, under the Chairman-ship of His Highness the Maharaja of Patiala sully of control in the state of the state o

week of February, 1937, and in the course of it said that upon careful consideration of the Act they had "come to the conclusion that the safeguards have been substantially met" and that certain further recommendations now newly that certain autener recommendations now newly made by themselves would, it adopted, completely fulfil them. These recommendations, the Committee said, had been drafted in consideration of the fact that the Act had already been passed. They comprised, therefore, four proposed changes in the States' Draft Instrument of Accession.

This report was taken into consideration by the general body of Princes in their Informal Conference. At the same time as His Highness the Chancellor brought it before that body, he also laid before it an Opinion upon the same subject by Counsel whom the Standing Com-mittee of the Chamber had recently engaged from London. This Opinion was a lengthy document and in effect amounted to a warning to the Princes against the risks in which entry into Federation would involve them, Its receipt led to its urgent examination by other expert advisers to the general body of Princes. Their criticisms of it were destructive. A further Opinion in favour of Federation was at the same time independently given to the Princes, at the request of His Highness of Patiala, by the Right Hon'ble Sir Tej Bahadur

The upshot of all this was that under the leadership of the Maharaja of Patiala the Informal Conference adopted the report of the Constitutional Committee in favour of the entry into Federation on the basis of the Government of India Act 1935 and subject to the satisfactory conclusion of negotiations with the Crown on the subject of the Constitutional Committee's newly made recommendations. This decision was endorsed in a formal meeting of the Chamber of Princes on 24th February by the re-election of His Highness of Patiala to the Chancellorship by an overwhelming majority, and by the election of a pro-Chancellor and Standing Committee in sympathy with the same decision.

This brought the Princes of the Chamber into line with the recommendations already made by the Committee States Ministers and

Payments from Indian States.

Many of the States make payments, varying in amount according to the chromatances of each case, to His Majesty. These payments are frequently due to exchange of territory or settlement of claims between the Governments, but are chiefly in lieu of former obligations to supply or maintain troops. The annual receipts on account of these payments from Indian States are summarised in the following table. The relations of the States to one another in respect of tributes are complicated, and it would serve no useful purpose to enter upon the question. It may, however, be mentioned that a large number of the States in the Western India and Gujarat States Agencies pay tribute of some kind to Baroda, and that Gwallor claims tribute from some of the smaller States of Central India States making payments directly to His Majesty.

Foreign Possessions in India.

Presidency, consist of the Province of Goa on the Arabian Sea Coast : the territory of Daman with the small territory called Pragana-Nagar-

Portugal and France both hold small terri- | Avely on the Gujarat Coast, at the entrance torial possessions in the Indian Peninsula.

The Portuguere possessions in India, all of which are situated within the limits of Bombay on the southern extremity of the Kathionan. Peninsula. All these three territories constitute what is called the State of India.

GOA.

Goa forms a compact block of territory surrounded by British districts. Savantwadi State lies to the north of it, the Arabian Sea on the west and North Kanara on the south, and the eastern boundary is the range of the Western Ghats, which separates it from the British districts of Belgaum and North Kanara, The extreme length from north to south is 62 miles and the greatest breadth from east to west 40 miles. The territory has a total area of 1,301 square miles and consists of the Velhas Conquistas, or Old Conquests, comprising the Island of Goa, acquired by the Portuguese in 1510, and the neighbouring municipalities of Salsette, Bardez, and Mormugao acquired in 1543; and of the Novis Conquistas, or New Conquests, comprising the municipalities of Pernem, Sanquelim, Ponda, Quepum, Canacona, Satari and Sanguem acquired in the latter half of the 18th century. The small island of Angediva situated opposite the port of Karwar, in the British district of North Kanara, forms administratively a portion of the Canacona municipality. This was acquired in 1505. The whole country is hilly, especially the eastern portion, the predominating physical feature being the Western Ghats, which besides bounding the country along the north-east and south-east, just off westward and spread across the country in a succession of sours and ridges. There are several conspicuous isolated peaks, of which the highest, Sonsagar, is 3,827 feet high.

The country is intersected by numerous rivers running westward from the Ghats, and the principal eight, which are all navigable, are in size of some importance. Goa possesses a fine har-bour, formed by the promontories of Bardez and Salsette. Half-way between these extremities lies the cabo, or cape, which forms the extremity of the island of Goa. This divides the whole bay into two anchorages, known as Aguada and Mormugao. Both are capable of accommodating the largest shipping from September to May, but Aguada is virtually closed during the south-west monsoon, owing to the high winds and sea and to the formation of sand bars across the estuary of the Mandovi river. which opens into Aguada. Mormugae is accessible at all times and is therefore the harbour of commercial importance. It is the terminus of the railway running to the coast from the inland British system of lines. A breakwater and port have been built there and the trade is considerable being chiefly transit trade from British territory.

The People.

The total population of Goa was 531,952 at

tion showed an increase of 9 per cent. since the census ten years previously. In the Velhas Conquistas the majority of the population is Christian. In the Novas Conquistas Hindus are more numerous than Christians. The Moslems in the territory are numbered in a few thousands. The Christians still very largely adhere to caste distinctions, claiming to be Brahmans, Chardos and low castes, which do not intermarry. The Hindus who form about one-half of the total population are largely Maratha and do not differ from those of the adjacent Konkan districts of Bombay. All classes of the people, with the exception of Europeans, use the Konkani dialect of Marathi with some admixture of Portuguese words. The official language is Portuguese, which is commonly spoken in the capital and the principal towns as well as by all educated people. Nearly all the Christians profess the Roman Catholic religion and are spiritually subject to an archbishop who has the titles of Primate of the East and Patriarch of the East Indies and exercises ecclesiastical jurisdiction also over a portion of British India, and the provinces of Macau (China) and Timor (Oceania), with missions in fore gn countries and Mocambique (Portu-guese East Africa). The Christians of Daman and Diu are subject under a new Treaty signed and Dill are subject under a new treasy signed in 1928 between Portugal and the Holy See to the Archbishop of Goa. There are numerous churches in Goa, mostly built by the Jesuits and Franciscans prior to the extinction of the religious orders in Portuguese territory. The churches are in charge of secular priests. Hindus and Mahomedans now enjoy perfect freedom in religious matters and have their own places of worship. In the early days of Portuguese rule the worship of Hindu gods in public and the observance of Hindu usages were strictly forbidden and rigorously suppressed.

The Country.

A little over one-third of the entire territory of Goa is stated to be under cultivation. The fertility of the soil varies considerably according to quality, situation and water-supply. The Velhas Conquistas are as a rule better and more intensively cultivated than the Novas Conquistas. In both these divisions a holding of fifteen or sixteen acres would be considered a good sized farm but the majority of holdings are of much smaller extent varying from half an acre to five or six acres. The staple produce of the country is rice, of which there are two good harvests, but the quantity produced is barely sufficient to meet the needs of the population for two-thirds of the year. Next to rice, the culture of cocoanut palms is deemed most important, the census of 1921. This gives a density of from the variety of uses to which the products 408 persons to the square mile and the popula- are applied. Hilly places and

soils are set apart for the cultivation of cereals and several kinds of fruits and vegetables are cultivated to an important extent. The condition of the agricultural classes in the Velhas Conquistas has improved during recent years owing to the general rise in the prices of all classes of agricultural produce and partly to the current of emigration to British territory. There is a great shortage of agricultural labour in the Velhas Conquistas. In the summer months bands of artisans and field labourers from the adjoining British territory make their way into Bardez where the demand for labour is always keen. Stately forests are found in the Novas Conquistas. They cover an area of 116 square miles and are under conservation and yield some profit to the administration. Iron is found in parts of the territory; but has not been seriously worked. Mangauese also exists and some mines are being worked at present, the ore being exported to the Continent.

Commerce.

In the days of its glory, Goa was the chief entrepot of commerce between East and West and was specially famous for its trade in horses with the Persian Gulf. It lost its commercial importance with the downfall of the Portuguese Empire and its trade is now insignificant.

The present trade of Goa is not very large. Its imports amount to about Rs. 160 lakins and exports to about Rs. 40 lakins. The discrepancy is met from the money sent to Goa by the many emigrants who are to be found all over the world. Few manufacturing industries of any moment exist and most manufactured articles in use are imported. Exports chiefly consist of cocoanuts, betel nuts, mangoes and other fruits and raw produce.

A line of railway connects Mormugao with the Madras and Southern Mahratta Railway, Its length from Mormugao to Castle Rock above the Ghats where it joins the British system is 51 miles, of which 49 are in Portuguese territory, The railway is under the management of the Madras and Southern Mahratta Railway administration, and the bulk of the trade of Mormugao port is what it brings down from and takes to the interior. The telegraphs in Portuguese territories are worked as a separate system from the British. The latter, however, had an office at Nova-Goa maintained jointly by the two Governments but since 1925 the Nova-Goa office has been handed over to the Portuguese Government which now maintains and works all the telegraphs in its territories.

Taxes and Tariffs.

The country was in a state of chronic financial equilibrium for nearly sixty years with occasional exceptions. The last war enhanced the deficits to alarming proportions and these were met by fresh taxes and new loans. Most of the new taxes were the result of the initiative of the taxes were the result of the initiative of the Governor-General Jaime de Morais, who is pepularly known as the "Georemot of Taxes," Only in 1927 the country experience the joys of a balanced budget and the public servants whose salaries had always remained in arrears action being paid regularly. There is an extraction of the control o has been ear-marked for promoting the indus-

trial progress of the country. If municipal and national taxes be added together, the country presents a very high incidence of taxation, even higher than that of British India, the average coming to about Rs. 8-8 per capita. There is no income-tax, except for government servants, but there is a special ten per cent tax on all incomes derived in the shape of interest on loans. This tax is a powerful contributory cause to the flight of capital from Portuguese India. The chief sources of revenue are the land tax, Excise and the customs. There is a special tax on emigrants which yields to the State about Rs. 60,000 The country being economically backward, the taxes give very little indication of its productive capacity or of its annual wealth. The national wealth is a matter of pure conjecture for lack of statistics.

The tariff schedule is based on the three-fold principle, fiscal, protective and preferential.

There is a limited free list on which books and paper figure prominently. The fiscal tariff ranges from 10 to 30 per cent. according to the nature of the commodities, but the duties in nature of the commodutes, but the quies in several cases are specific, not ad veloren. This causes considerable hardship to trade, and specially to the poorer classes of consumers. The preferential tariff applies to goods coming from Lisbon and the Portaguese Colonies. Very recently the principle of protection has been extended to the export of canned fruits which are entitled to a bounty of 10 per cent, on their basic price.

The Capital.

Nova-Goa, the present capital of Portuguese India, comprehends Panjim and Ribandar, Old Goa is some six miles distant from the new city. Panjim occupies a narrow strip of land leading up to the Cabo, the cape dividing the Aguada bay from that of Mornugao, and mainly slopes down to the edge of the Aguada. It was selected as the residence of the Portuguese Vicercy in 1759, and in 1843. it was raised to its present rank as the capital of Portuguese India. The appearance of the city, with its row of public buildings and elegant private residences, as seen from the water is very picturesque and this impression is not belied by a closer inspection of its neat and spacious roads, bordered by decent, tidy houses. The most imposing public structures are the barracks, an immense quadrangular building the eastern wing of which accommodates the Primary School, the Public Library and the Go-vernment Press. Other noticeable buildings are the Cathedral and various churches, the vice-regal palace and the High Court. The square in the lower part of the town is adorned with a life-sized statue of Albuquerque standing under a canopy.

History.

Goa was captured for the Portuguese by Alfonso de Albuquerque in 1510. Albuquer-Alfonso de Albüquerque in 1910. Albüquerque promptiy fortified the place and established Portuguese rule on a firm basis. From this time Goa rapidly rose in importance and became the metropolis of Portuguese power in the East. There was constant fighting with the armies of the Bilapur kingdom, but the Portuguese held their own and gained the surrounding territory now known as the Velhas Conquistas.

Who subsequent history of the town is one of estimation and decay. Goe reached its summit of prosperty at the end of travellers show that the Goa of those days presented a scene of military, ecclesiastical and commerin the British capitals of India. Portugal. however, with its three millions of population, was too small to defend itself against Snain and maintain at the same time its immence Empire in the four Continents. Albuqueraue tried to consclidate Portuguese rule in India by his policy of attracting the conquered Indians and granting them civil and religious liberties. His contemporaries, however, could not understand his far-seeing statesmanship and after his death they undid all his work basing their dominion on conquest by the sword and military force tising organisation which throws all the missionary efforts of every other European power in Iudia into the shade. Old Goa, as the ruins of the old capital are called to-day, had a hundred churches, many of them of magnificent proportions, and the Inquisition which was a power in the land. The sixty years' subjection to Spain in the 17th century completed the ruin of the Marquis of Pombal in the 18th century tried to stave off its decadence, his subordinates in far-off India either could not understand or would not carry out his orders and even his strong hand was unable to stop the decline. It was in the 19th century that the colonials began to enjoy full Portuguese citizenship and sent their representatives to the Parliament in Lisbon.

Modern Times

There was frequently recurring fighting and in 1741 the Marathas invaded the neighbourhood of Goa and threatened the city itself. An army of 12,000 men arrived from Portugal at the critical moment. The invaders were beaten off, and the Novas Conquistas were added to the Portuguese possessions. In 1844 the shelter given by Goa to fugitives from justice in British territory threatened to bring about a rupture with the British Government at Bombay, In 1852 the Ranes of Satari, in the Novas Conquistas, revolted. In 1871 the native army in Goa mutinied and the King's own brother came from Lisbon to deal with the brother cand having done so dislanded the native army, which has never been reconsti-tuted. But another outbreak among the troops took place in 1895 and the Ranes joining them the trouble was again not quieted until the arrival of another special expedition from Lisbon. The Ranes again broke out in 1901 and again in 1912, troops being again imported to deal with the last outbreak, which was only reported concluded in the summer of 1913. There has been no outbreak after that data

The people on the whole appear to be quite satisfied with the Portuguese connection, is no aglitation for further reforms as in British India and not a sign of disaffection against Portuguese rule. This is chiefly due to the fact that under the present regime the natives of Goa tugal many of the sons of Goa occupying high owners and Farmers of the District; and one

and responsible positions in Portugal. Thus Elvino de Britto who was Minister of Public Works towards the end of the last century was a native of Goa as was the father of Dr. Bettencourt Rodrigues, Minister for Foreign Affairs in General Carmonas dictatorial Government Natives of Goa are also Dr. Almeida Arez, the President of the Supreme Court in Lisbon, Dr Custona Gansalves, Judge of the same Court and Mr. Alberto Xavier, Secretary, General of the Ministry of Finance.

Administration

The Lishon Government by Decree No. sacc dated 27th July 1917, enacted new rules re-garding the administration of Portuguese India under an Organic Charter (Carta Organica) in force since 1st July 1919. This Charter, regarding civil and financial administration of the colony, was modified by rules Nos. 1005 and 1022, dated 7th and 20th August 1920 and decrees Nos. 7008 and 7030. dated 9th and 16th October. A new Organic Charter and 16th October. A new Organic Charter modifying in certain parts the earlier one was granted by Decree No. 12499 of 4th October 1926 and is now in force.

The territory of Portuguese India is ruled by one Governor-General, residing in the Capital of the State, at Panjim alias Nova-Goa. and is divided into three districts: Goa. Daman and Din. The last two are each under a Lieutenant-Governor. The district of Goa is under the direct superintendency of the Governor-General

Subordinate to the Governor-General the Subordinate to the Governor-General the following Sceretariats are working: Home and Political, Finance, Customs, Education, Military, Naval, Agriculture, Health and Public Works. There are also three special and autono Works. There are also three special and autonomus Departments, which do not constitute exclusive Secretariats, one of them being the Department of Posts and Telegraphs, the second that of Survey and the third that of the Fiscal of the W. I. P. Rallway.

As the principal organ of administration next to the Governor-General and in collaboration with him works a Governor's Council (Conselho Governo) with Legislative and advisory nowers. The Council is constituted, in addition to the Governor-General, ex-officio President, of four officials (Attorney-General, the Director of Finances, the Director of Civil Administration and the Director of Public Works), five elected members (three representing Velhas Conquistas, one the Novas Conquistas and one the Districts of Daman and Diu) and five members nominated by the Governor-General to represent the minorities, agricultural, commercial and other interests and the press.

In each province of Goa, Daman and Din there is a District Council to supervise the Municipalities and other local institutions. The District Council of Goals composed of the Director of Civil Administration, President, the Government Prosecutor of the Nova-Goa Civil Court; the Deputy Chief Health Officer; the Engineer next to the Director of Public Works: the Deputy Director of Finances; the Chairman of the Municipal Corporation of the Islands; one member elected by the Commercial and Industrial Associations of the district; one member elected by the 60 highest tax payers of Goa; one enjoy complete equality with the natives of Por- member elected by the Associations of Land

imiliar advocates elected by the Legislative Courts of Justice at Paulin Margao, Mapuro, Bouncil among he legally qualified.
There is one High Court in the State of India Courts of Justice at Mormuga (Yasco da Gama), with third Judges and one Attorney-General; and Ponda, Jul and Nagara-Ayen.

PORT OF MORMUGAO.

Mormugao is situated towards the south of | anormaga is suatated towards sale south of Agnada far, on the left bar, on the left bar, on the left bar, of Zuary River in Lat. 15° 25'N, and Long. 73° 47' E., about 225 miles south of Bombay and 6½ miles south of Panjim, the Capital of Portuguese India. The Port of Mormugao is the natural outlet to the sea for the whole area served by the M. & S. M. Ry. (metre-gauge), and offers the shortest route both passenger and goods traffic. The distance from Aden to Mormigao is about the same as from Aden to Bombay. The Port is provided with lightto Bombay. The Port is provided with ingui-houses, buoys and all necessary marks and it is easily accessible all the year round and at any hour of the day or night even without the assistance of a Pilot. Pilotage is not compul-sory, but when usual pilot flag is hoisted, a qualified officer will board the vessel and render

such assistance.

Mormugao Harbour is the terminal station of the West of India Portuguese Railway which controlled by the Madras and Southern Maharatta Railway Company, with headquarters at Madras.

With a view to promoting the economical, commercial and industrial development of Mormugao, a special Department under the designation of the "Mormugao Improvement Trust" with its head office at Vasco da Gama, 2 miles from Mormugão Harbour, has been created and the Local Government have introduced various regulations granting every facility to those intending to raise buildings for residential and industrial purposes in the whole area, comprising about 300 acres, near the Harbour.

DAMAN.

The settlement of Daman lies at the en-|territory is under tillage, The settlement of Daman lies at the en-territory is under tilinge. The principal crops trane to the Guil of cambay, about 100 miles are rice, wheat, the inferior cereals of Guiarat north of Bombay. It is composed of two portant observables, and the datached pargana of Nagar Aveit, Aveit, and about two-thirds of them consists of separated from it by a narrow strip of Britishi teak, but the forcests are not conserved and the territory and bisected by the B. B. & C. I. Rail-cetent of land covered by each kind of way. Daman proper collegates are after a 22 timber has not been determined, Before the lation (1921) of 17,569 of whom 1,489 are Christorical contributions of the contribution of the contribu sans, The humbler of notices is according to the with the cast coast of Africa. The territory forms for administrative purposes a single district and has a Municipal Chamber and Corporation. It is ruled by a Governor invested with both civil and military functions, subordinate to the Governor-General of Goa. The judicial department is adminispermanent descours into a church and have tered by a judge, with in establishment con-sisten bullst eight other places of worship. The posed of a delegate of the Attorney-General antive Christians adopt the European cos- and two clerks. In Nagar Aveil the greater tume, some of the women dressing themselves part of the soll is the property of the Governtunes, some or the years having dressing and other parts of the season's are produced, as the following the old style of petitoons and mantle following the old style of petitoons and mantle to the produced in Spain and Portugal.

The sol of the setchement is moist and fersility, specially in Nagara Avall, but despite the are handless. The chief sources of revenue are handless, forests, excise and customs ease of cultivation only one-twentieth part of the duties.

Din is an island lying off the southern extremity of the Kathiawar Peninsula, from which it is separated by a narrow channel through a considerable swamp. It is composed of three portions, namely, Din proper (Island), the village of Gogin, on the Peninsula, separated by the channel, and the fortress of Simbor, about 5 miles west of the island. It has a small but excellent harbour, where vessels can safely ride at anchor in two fathoms of water and owing to the great advantages which its posi-tion offers for trade with Arabia and the Persian Gulf, the Portuguese were fired at an

early period with a desire to obtain possession

of it. This they gained, first by treaty with the Sultan of Gujarat and then by force of arms. Diu became opulent and famous for its commerce. It has now dwindled into insignificance. The extreme length of the island is about seven miles and its breadth from north to south, two miles. The area is 20 square miles. The population of the town of Diu, from which the island takes its name. Is said to have been 50,000 in the days of its commercial prosperity. The total population of the island, according to the consus of 1921, is 13,844, of whom 228 were Christians.

FRENCH POSSESSIONS.

The French possessions in India comprise five . Settlements, with certain dependent lodges, or plots. They aggregate 203 square miles, and had a total population on the 26th Feb. 1931 of 286,410. The first French expedition into Indian waters, with a view to open up commercial relations, was attempted in 1603. It was undertaken by private merchants at Rouen, but it failed, as also did several similar attempts which followed. In 1642 Cardinal Richelieu founded the first Campagnie d'Orient, but its efforts met with no success. Colbert reconstituted the Company on a larger basis in 1664, granting exemption from taxes and a monopoly of the Indian trade for fifty years. After having twice attempted, without success, to establish itself in Madagascar, Colbert's Company again took up the idea of direct trade with India and its President, Caron, founded in 1668 the Comptoir, or agency, at Surat. But on find-ing that city unsuited for a head establishment he seized the harbour of Trincomalee in Ceylon from the Dutch. The Dutch, however, speedily retook Trincomalee; and Caron, passing over to the Coromandel coast, in 1672, seized St. Thome, a Portuguese town adjoining Madras, which had for twelve years been in the possession of Holland. He was, however, compelled to restore it to the Dutch in 1674.

The ruin of the Company seemed impending when one of its agents, the celebrated Francois Martin, suddenly restored it. Rallying under him a handful of sixty Frenchmen, saved out of the wreck of the settlements at Trincomales and St. Thome, he took up his abode at Pondicherry, then a small village, which he purchased in 1683 from the Raja of Gingee. He built fortifications, and a trade began to spring up; but he was anable to hold the town against the Dutch, who wrested it from him in 1693, and held it until it was restored to the French by the Peace of Ryswick, in 1697. Pondicherry became in this year and has ever since remained, the most important of the French Settlements in India. Its foundation was contemporaneous with that of Calcutta. Like Calcutta, its site was pur-chased by a European Company from a native prince, and what Job Charnock was to Calcutta Francois Martin proved to Pondicherry. On its restitution to the French by the Peace of Ryswick in 1697, Martin was appointed Governor, and under his able management Pondicherry became an entrepot of trade.

Chandernagore, in Lower Bengal, had been acquired by the French Company in 1688, by grant from the Delhi Emperor; Mahé, on the Malabar Coast, was obtained in 1725-6, under the government of M. Lenoir; Karlkal, on the Coromandel Coast, under that of M. Dumas, in 1739. Yanaon, on the coast of the Northern Circars, was taken possession of in 1750, and formally ceded to the French two years later.

Administration.

The military command and administration-inchief of the French possessions in India are vested in a Governor, whose residence is at Pondi-cherry. The office is of present held by

Monsieur Solomiae (Léoz). He is assisted by a Chief Justice and by several "Chefs do Service" in the different administrative departments. In 1879 local councils and a council-general were established, the members being chosen by a sort of universal suffrage within the French territories. Seventeen Municipalities or Communal Boards, were erected in 1907, namely. Pondicherry, Arlancoupam, Modeliarpeth, Oulgaret, Villenour, Tiroubouvane, Bahour and Nettapacam, for the establishment of Pondicherry; Karikal, Neravy, Nedouncadou, Tiru-nalar, Grande Aldée, Cotchery, for the establishment of Karikal, and also Chandernagore, Mahe and Yanaon. On municipal boards natives are entitled to a proportion of the seats. Civil and criminal courts, courts of first instance and a court of appeal compose the indicate and a court of appeal compose the judicial machinery. The army and establishments connected with the Governor and his staff at Pondicherry, and those of administrators at Chandernagore, Yanaon, Mahe and Karikal. together with other headquarters charges necessarily engross a large proportion of the revenue. All the state and dignity of an independent Government, with four denendent ones, have to be maintained. This is effected by rigid economy, and the prestige of the French Government is worthilly maintained in the East. Pondicherry is also the scene of considerable r ligious pomp and an amissionary activity. It forms the seat of an Archbishop, with a body of priests for all French India; and of the Missions Etrangeres, the successors of the Mission du Carnatic foundel by the Jesuits in 1776. But the chief field of this mission lies outside the French Settlements, a large proportion of its Christians are British subjects and many of the churches are in British territory. The British rupee is the ordinary tender within French territories. A line of rail-way running via Villenour, from Pondicherry to Villupuram on the South Indian Railway, maintains communication with Madras and the rest of British India, and Karika is linked to the same railway by the branch from Peralam. A Chamber of Commerce consisting of fifteen members, nine of them Europeans or persons of European descent, was reorganised by a decree of 7th March, 1914. The capital, Pondicherry, is a very handsome town, and presents, especiall from the sea a striking appearance of French civilisation.

People and Trade.

The Settlements are represented in Parliament at Paris by one senator and one deputy. The Senator is Mons. Lemoignic. The Deputy is Mons. Pierre Dupuy. There were in 1932 59 primary schools and 3 colleges all maintained by the Government, with 308 teachers and 9,263 pupils, Local revenue and expenditure (Budget of 1934) Rs. 3,284.873. The principal crops are paddy, groundrut, and ragi There are at Pondicherry 3 cotton mills and at Chandernagore 1 jute mill. The cotton mills have, in all 1,091 located the cotton mills have the cot and 71,744 spindles, employing 7,450 persons. There are also at work one oil factory and a few oil presses for groundnuts, and one ice factory The chief exports from Pondicherry are oil seem

At the ports of Pondicherry and Karikal, visited by French steamers, salling monthly In 1934 the imports amounted to fire 1.04,282,000 between Colombo and Calcutta in connection and the exports to Irs. 119,331,000. At these with the Messageries Maritimes. The figures two ports in 1934. 12,290 vessels entered and coltained in this paragraph are the latest availedated; toonage 144,1307. Pondicherry is jable and are corrected up to December 1934.

PONDICHERRY.

Pondicherry is the chief of the French Settlements in India and its capital is the head-quarters of their Governor. It is situated on the Coromandel Coast, 105 miles from Madras by road and 122 by the Villupuram-Pondi-cherry branch of the South Indian Railway. The area of the Settlement is 115 square miles and its population in the 26th Feb. 1931 was 183,555. It consists of the eight communes of Pondicherry. The Settlement was founded in 1674 under Francois Martin. In 160e Francois Martin. In it was captured by the Dutch but was restored in 1699. It was besieged four times by the English. The first siege under Admiral Boscawen in 1748 was unsuccessful. The second, under Eyre Coote in 1761, resulted in the capture of the place, which was restored in 1765. It was again besieged and captured in 1778 by Sir Hector Munro, and the fortifications were demolished in 1779. The place was again restored in 1785 under the Treaty of Versailles of 1783. It was captured a fourth time by Colonel Braithwaite in 1793, and finally restored in 1816.

The Settlement comprises a number of isolated pieces of territory which are cut off from the main part and surrounded by the British District of South Arcot, except where they border on the sea. The Collector of

South Arcot is empowered to deal with ordinary correspondence with the French authorities on these and kindred matters, and in this capacity is styled the Special Agent.
At Pondicherry itself is a British Consular
Agent accredited to the French Government, who is usually an officer of the Indian Army. The town is compact, neat and clean, and is divided by a canal into two parts, the Ville blanche and the Ville noire. The Ville blanche has a European appearance, the streets being laid at right angles to one another with trees along their margins reminding the visitor of continental boulevards, and the houses being constructed with courtyards and embel-lished with green venetians. All the cross streets lead down to the shore, where a wide promenade facing the sea is again different from anything of its kind in British India. In the middle is a screw-pile pier, which serves, when ships touch at the port, when serves, when ships touch at the port, as a point for the landing of cargo, and on holidays as a general promenade for the population. There is no real harbour at Pondleherry; ships lie at a distance of about a mile from the shore, and communication with them is conducted by the usual masula boats of this coast. Facing the shore end of the pier is a statue of the great Dupleix, to whom the place and the French name owed so much.

CHANDERNAGORE.

Hooghly, a short distance below Chinsura. Population (in the 26th Feb. 1931) 27,262. The town was permanently occupied by the French in 1688, though previously it had been temporarily occupied by them at a date given as 1672 or 1876. It did not however, rise to any importance till the time of Dupleix. It changed hands between British and Fronch various times during the Napoleonic wars and was finally restored to the French in 1816.

The former grandeur of Chandernagore has Government.

Chandernagore is situated on the bank of the | disappeared, and at present it is little more than a quiet suburban town with little external trade. The railway station on the East Indian Rallway is just outside French territory 22 miles from Calcutta (Howrah). The chief administrative officer is the Administrator who is subordinate to the Governor of the French Possessions. The chief public insti-tution is the College Dupleix, formerly called St. Mary's institution, founded in 1882 and under the direct control of the French

KARIKAL.

Karikai lies on the Coromandel Coast between the Tanjore District of Madras and the Bay of Bengal. The settlement is divided into six communes, containing 110 villages in all, and covering an area of 53 square miles. It is governed by an Administrator subordinate 16 is governed by an Administrator subordinate to the Governor at Pondicherry. The population has in recent years rapidly decreased. In 1883 it was 93,055; in 1891, 75,262; in 1901, 54,003; in 1923, 57,023 in 1924, 66,922; and in 1921, 57,914; but the density 54,003; in theo, and in 1681, 57,914; but the general is still very high, being 1,063 persons her square mile, Kumbakoman is the only per square mile, Kumbakonam is the only taluk in Tanjore District which has a higher density. Each of the six communes—namely, Karikal, La Grande Aldee, Nedungadu, Oot-Key, Noravy and Tiruoular—possesses a mayor-and council. The members are all elected by

universal suffrage but in the municipality Karikal half the number of seats are reserved for Europeans or their descendants. The country is very fertile, being irrigated by seven branches of the Cauvery, besides many smaller channels.

The capital of the settlement is situated on

the north bank of the river Arasalar, about 1½ miles from its mouth. It has a brisk trade in rice with Ceylon, and to a less extent with the Straits Settlements. It has no commerce with France, and very little with other French colonies. The port is merely an open road-stead, provided with a light-house 142 feet high, the light in which has a range of from 8 to 10 miles. In 1899 Karikal was connected with Peralem on the Tanjore District Board Rallway. Karikal finally came into French possession on the settlement after 1815.

The Frontiers.

By these who take a long view of polities in the wide seas of the term, it will be seen that the Indian Frontier problem, which has loomed so large in the discussion of Indian questions, has always borne a two fold character—the local issue and the International issue was the greater as century the International issue was the greater as the Indian Government, both directly and as the executors of British Imperial policy, had to face. But the tendency of later times was for the International aspect to recede and for the local aspect to grow in Importance, until tadjit he said, with use much truth as characteristic and the said, with use much truth as characteristic and the said, which as much truth as characteristic and the said with t

The Local Problem. The local problem, in its broadest outlines, may be briefly indicated before proceeding to discuss it in detail. From the Arabian Sea on the West to the confines of Nepal is a wild and troublous sea of some of the highest mountains in the world. The thin valleys in these immense ranges are poorly populated by hardy, brave, militant mountaineers, rendered the flereer and the more difficult by professing the martial Moslem faith, accentuated by the most bitter fanaticism. But sparse as the population is, it is in excess of the supporting power of the country. Like mountaineers in all parts of the world, these brave and fearless men have sought to eke out their exiguous agriculture by raiding the rich plains of Hindustan. We may find a fairly close parallel to the situation in the position of the Highlands of Scotland until after the rebellion of 1745 the English Government of the day sought a permanent remedy by opening for the warlike Highlanders a military career in the famous Highland regiments, and in rendering military operations easier by the construction of Wade's road. The Highland problem has disappeared so long from English politics that its pregnant lessons are little realised, but if the curious student will read again that brilliant novel by Neil Munro, "The New Road," he will appreciate what Wade's work meant for the Highlands of Scotland, and what lessons it teaches those who are called upon to face, in its local aspect, the Indian frontier problem. So far as the area with which we are dealing was concerned, two policies were tried. In Baluchistan, the genius of Sir Robert Sandeman devised the method of entering into military occupation of the principal points, and thence controlling the country. At the same time close engagements were entered into with the principal chiefs, through whom the tribesmen were kept in order. That policy was so successful that whilst the administration was expensive the Baluchistan frontier did not seriously embarrass the Government of India from the time when Sandeman set his mark on the land. Not that the country was entirely peaceful. Occasional tribal raids or risings necessitated occasional military operations. and the Gomal Pass was involved in the general tribal disturbances which followed the wanton declaration of war by Afghanistan

By those who take a long view of politics in evide sense of the term, it will be seen that e radian Frontier problem, which has bounded large in the discussion of landin questions, there is no the large in the discussion of landin questions, the contract of the frontier is the sense of the large frontier are a this section of the frontier is the many the problem of the frontier is greatly the international issue was the granter of the contractive policy.

Towards Afghanistan.-Far otherwise has it until lately been with the section of the frontier which stretches from Baluchistan to the confines of Kashmir. That was, for three quarters of a century, the scene of almost ceaseless operations, which constituted a devastating drain on the Indian exchequer. For years one sought for a definite policy guiding the actions of the Government of India. One explanation of their inconsistencies was found in the existence of two schools of thought. Once the frontier with Afghanistan had been delimited, the soldiers naturally pressed for the armed occupation of the whole country right up to the confines of Afghanistan, or at any rate, for military posts, linked with good communications, which would dominate the country. But those who looked at policy not only from the military standpoint, were fearful of two considerations. They felt that occupation up to the Afghan fromtier would only shift the frontier problem farther north. Instead of the differing tribes, we should, they argued, have to meet the Afghan on our border line. If Afghanistan were a strong, homogeneous State, that would be a matter of little account. But even under the iron rule of Abdurrahaman Khan, the Amir's writ ran but lightly in the southern confines of his kingdom. Under his successor, Habibullah Khan, whose policy was generally wise and successful, it ran still less firmly. The Amir was unable to control the organisation of the tribal gatherings which involved us in the Zakka Khel and Mohmand expeditions during the Indian secretaryship of that arch pacifist, Lord Morley. Nor did it enable Habibullah to deal effectively with a rising against his own Governor in Khost. The Afghan forces melted away under transport difficulties when they were moved against the rebellious Khostwalis, and the Amir had to make peace with his troublous vassals. Therefore, it was said, occupation up to what is called the Durand Line because it is the line demarcated by the Frontier Commission in which Sir Mortimer Durand was the British Plenipotentiary, would simply mean that in time of trouble we should have to deal with Afghanistan instead of a tribe or two, and with the irreconcilable tribesmen along our difficult line of communications. The Kabul Government now have greater control over their tribes near the frontier than formerly but the old argument still applies. was the further consideration that financiers were of the fixed belief that even if the Forward Policy was wise from the military standpoint, it would involve charges over an indefinite period greater than the Indian finances would bear. Moreover on this section of the Frontier, the position was complicated by the

expansion of Russia in Central Asia. The easiest passes, and the passes down which for centuries from the time of Alexander the Great Invaders have swept from Zenika and Gentral Asia to region. Therefore it was deemed essential to control, if not to occupy them, in the interest of the Impedial situation. In this zone therefore on the passes of the Impedial situation. In this zone therefore the passes of the Impedial situation. In this zone therefore down the work of the Impedial situation. In this zone therefore the passes of the Impedial situation. In this zone therefore the passes of the Impedial situation. In this zone therefore the passes of the Impedial situation. In this zone therefore the passes of the Impedial situation and the passes of the Impedial situation and the Impedial situation of the Impedial si

The Two Policies .- The result of this conflict of opinion was a series of wavering compromises, which like all compromises was profoundly un-satisfactory. We pushed forward posts here and there, which irritated the Tribesmen, and made them fearful of their prized independence. These advanced without controlling them. These advanced posts were in many cases inadequately held and posts were in many cases inacequately held and rarely were they linked with their supporting posts by adequate means of communication. We preserved between our administrative frontier and the Durand Line which demarcated our frontier with Afghanistan an irregular belt of land called The Independent Territory, in which neither we nor the Afghan Government exercised notine we nor the Anguan Covenine accessed jurisdiction. This was left entirely under the control of the tribes who peopled it. Now it was often asked why we did not follow the precedent of Baluchistan and "Sandemanise" the Independent Territory. That was one of the perennial topics of Frontier discussions. But stress was laid upon the essential differences between this zone and Baluchistan. Sir Robert Sandeman found a strong tribal system existing in Baluchistan, and he was able to enter into direct engagements with the tribal Chiefs. There is no such tribal organisation in the Independent Territory. The tribal Chiefs, or Maliks, exercise a very precarious authority, and the instrument for the collective expression of the tribal will is not the chief, but the jirgah, or tribal council, of the most democratic character, where the voice of the young men of the tribe often has the same influence, in time of excitement perhaps more influence, as the voice of the wiser greybeard. The bitter fruit of this policy of compromise was reaped in 1897, when following a minor outbreak in the Tochi Valley the general uncasiness flamed into a rising which involved the whole of the North-West Frontier, from the Gomal to the borders of Nepal. A force over thirty thousand strong had to be mobilised to deal with it. Even this large force, owing to the immense difficulties of transportation, was unable effectively to deal with the situation. though peace was made. The emergency thus created synchronised with the advent of Lord Curzon as Viceroy. He dealt with it in master-ful fashion. In the first place, he separated the frontier zone from the Government of the Punjab, which had hitherto been responsible for its administration, and had organised for the purpose a special force of Frontier soldiers, known as the Punjab Irregular Frontier Force. This was the revival of a scheme as old as the Viceroyalty of Lord Lytton, though no other

Viceroy had been able to carry it through in the face of the strong opposition of successive Puniab Governments. The area so separated was constituted into a separate administrative zone under the direct authority of the Government of India, exercised through a Chief Commisced military posts and concentrated the Regular troops in bases better linked with the main military centres of India by roads and railways. The advanced posts, and especially important Passes like the Tochi, the Kurram and the Passes like the Tochi, the Kurram and the Khyber, were entrusted to the defence of local militia, recruited from the tribesmen them-selves, and officered by British officers drawn from the ranks of the Indian Army. Later it was supplemented by a fine development policy. The construction of the Upper Swat Canal, afterwards developed into the Swat Canal (q.v. Irrigation) led to such an increase in cultivation that the tribesmen were given a means of livelihood and were invested with the magic charm of valuable property. The irrigated part of the Frontier has since been one of the most peaceful in the whole horder line.

Lord Curzon's Success .- Judged by every reasonable standard the Curzon policy was successful. It did not give us complete peace.
There were occasional punitive expeditions
demanded, such as for instance the Zakka Khol and Mohmand expeditions, and the Waziris, and in particular the truculent Mahsud Waziris, never ceased raiding. But in comparison with what had gone before, it gave relative peace. It endured throughout the Great War, though the Waziris built up a heavy bill of offences, which awaited settlement when Government were free from the immense preoccupations of the war. It broke down under the strain of the wanton invasion of India by the Afghans in the hot weather of 1919. On February 20th the Amir Habibullah Khan was assassinated in his sleep near Jelalahad. Although he does not figure so prominently in frontier history as his iron father Abdurrahaman Khan, he nevertheless has high claims on the favourable verdict of history. None anticipated that any successor to Abdulrahaman Khan could hold in the least of a single State the fractious, fanatical tribes who make up the population of the Afghan kingdom. this Habibullah did. On occasions his attitude seemed to be equivocal, as when armed gather-ings of the tribes called lashkars were permitted to assemble in Afghan territory and to invade the Independent Territory, causing the Zakka Khel and Mohmand expeditions. But we must not judge a State like Afghanistan by European standards; the Amir had often to bow before the fanatical elements amongst his own people until they had burnt their fingers by contact with the British troops. At the outset of the Great War he warned the Government that he might often have to do things which seemed unfriendly, but they must trust him. In truth, the position of the Amir when Turkey entered on the war, and called Moslems everywhere to arms on the side of Germany was extraordinarily difficult he received Turkish, German and Austrian missions in Kabul, from which British representatives were still excluded. But he kept Afghanistan out of the war, and with the complete defeat of the Central Powers and their satellites, his policy was justified up to the hilt. Indeed

The irreconcilable elements in the Kingdom saw that the day of reckoning had come and strove to avert the settlement of their account by the murder. When he was done to dearn, mas brother, Nasrullah Khan, was proclaimed Amir by the assassins. But the conscience of Afghanistan revolted against the idea of Nasrullah, the archfanatic of the ruling House of Kabul, ascending the throne over the blood-stained corpse of his brother. A military movement in Kabul itself brushed him aside and installed the son of Habibullah, Amanullah Khan, on the throne. But Amanullah Khan soon found it was a thorny bed on which he lay, and encouraged by the disorders in India which followed the passing of stringent measures to deal with anarchical crime, set his troops in motion on April 25, 1919, and preaching a jehad promised his soldiery the traditional loot of Hindustan. The Indian Army was at once set in motion, and as has always been the case the regular Afghan Army was easily beaten. Dacca was seized, Jelalabad and Kabul were frequently bombed from the air, and there was nothing to prevent our occupation of Kabul, save the knowledge gleaned from the bitter heritage of the wars of 1838 and 1878, that it is one thing to overset a government in Afghanistan, but it is quite another to set up a stable government in its stead. The Government of India wisely held their hand, and the Afghans having sued for peace, a treaty was signed on the 8th August 1919.

But an untoward effect of this wanton war was to set the Frontier from the Gomal to the Khyber ablaze. With one or two exceptions, the Pribal Militia, left without the support of the regular troops, who in the emergency ought to have been hastened to their succour, could not stand the strain of an appeal from their fellow tribesmen, and either melted away or joined the rising. This has often been described as the fallure of the Curzon policy, which was based on the tribal militia. But there is another aspect to this question. The Militia numbered only some 3,000 men. They were distributed in a number of isolated and semi-isolated posts. There was no possi-bility of their withstanding the onslaught of an Afghan invading force. They were not intended for such a purpose. If they had, when the invasion began, been supported by regular troops their loyably might have remained sound. But other counsels prevailed. It was at the outset decided in high military quarters that in the face of the Afghan invasion it was inadvisable to send regular troops to support the Waziristan militia posts as it was concluded that the Mahsud and Wazir tribes of Waziristan would join the enemy. Orders were therefore issued that the posts should be abandoned, the British officers in them withdrawing with such men as remained loyal. The officer commanding the Bannu brigade immediately despatched a movable column for the succour and reassurance of the militia garrisons in his area but superior orders followed directing the return of the column forthwith. The militia were thereupon ordered to withdraw and their commence-

his success was the cause of his assassination. | convoys and to loot the abandoned posts. To expect the militia to remain firm in retreat in such circumstances was to refuse reasonable consideration of the facts of the situation.

Russia and the Frontier.—The Curzon policy was up to this inevitable collapse greatly assisted by extraneous events. The greatest external force in moulding Indian frontier policy was the long struggle with Russia. For nearly was the long setups or the traction was the construction of a century a veiled warfare for predominance in Asia was waged between Great Britain and Rassia. There are few pages in British foreign policy less attractive to the student of Imperial affairs. Russia was confronted in Central Asia with precisely the same conditions as those which faced England in India when the course of events converted the old East India Company from a trading corporation into a governing body. The decaying khanates of Central Asia were impossible neighbours. Confronted with an inferior civilisation. and with neighbours who would not let her alone, Russia had to advance. True, the advan-turous spirits in her armies and some of the great administrators in the Tsarist capital were not adverse to paying off on the Indian Borderland the score against Great Britian for the Crimean War and for what the Russians thought was depriving them of the fruits of their costly victory over Turkey in 1877-78. The result was a long and unsatisfactory guerrilla enterprise between the hardlest spirits on both sides, accompanied by periodic panies in the British Press each time the Russians moved forward, which induced the coining, after the Russian occupation of Merv, of the generic term "Mervousness." This external force involved the Government of India in the humiliations of the Afghan War of 1838, with the tragic destruction of the retiring Indian force between Kabul and Jelalabad, slightly relieved by the heroic defence of Jelalabad and the draw the punitive army until he had set his mark on Kabul by the razing of the famous Bala Hissar fortress. It involved us in the second Afghan War of 1878, which left the baffing problem of no stable government in Afghanistan. There was a gleam of light when Abdurrahaman Khan, whom we set up at Kabul to relieve us of our perplexities, proved himself a strong and capable ruler, if one ruthless in his methods. But in the early eighties the two States were on the verge of war over a squabble for the possession of Penjdeh, and then men began to think a little more clearly. There began a series of boundary delimitations and agreements which clarified the situation, without however finally settling it. The old controversy broke out in another form when intrigues with a Buriat monk, Dorjieff, during Lord Curzon's viceroyalty, gave rise to the grave suspicion that the scene had only shifted to Tibet. expedition to Lhasa rent the veil which had so long concealed the mysterious city and dispersed the miasma of this intrigue. But it was not until the conclusion of the Angle-Russian agreement of 1907 that the two countries arrived at a stage long sought by those who looked upon ordered to windraw and their commence- at a stage rong sought by those was 1000 age to most to do so, accompanied by the burning of beyond their noses. The actual authors of the uch stores as they could not carry, quite matin- Agreement were Lord Grey, the Foreign Screally produced the instant uprising of the tribes- tary, and Lord Hardinge, formerly British man, who began to attack and loot the retiring 'Ambassador in Petrograd, but it had been desir-

ed by their predecessors, whose efforts were rendered nugatory by the intransigent attitude of the dominant forces in Petrograd. It was not until Russia was chastened on the battlefields of Manchuria by Japan, and disappeared as a see power in the decisive battle of Tsushima, an atmosphere was created favourable that to the conclusion of an Agreement. This embraced the whole frontier zone. There were many unsatisfactory features in the Agreement. especially in regard to Persia, for which we had to pay a considerable price in the attitude of Persians in the War. But again taking long yiews, the Agreement fully justified itself in a broad definition of the interest of the two countries, which put an end to the period of excursions and alarms up to the outbreak of the War. Russia then ceased to be a material factor in the Indian Frontier Problem. With the establishment of the Soviet Oligarchy in Moscow uneasiness returned, for the geographical and allied circumstances which influenced the policy of the Tsarist regime exert precisely the same pressure upon its successor, and the Soviet have a troublesome motive which the Tsars had not: their aim to produce world revolution is avowed and Britain and the Constitutionalism for which she stands were for long admittedly the greatest obstacles in their path and despite the recent effects of Totalitarianism this is still fundamentally the case.

German Influence.--As nature abhors a vacuum, so in the case of States bordered by a vacuum, so in the case of Season Soutcast of higher civilisations, no sooner does one strong influence recede than some other takes its place. Long before the signing of the Anglo-lussian Agreement the shadow of the German menace had begun to appear on the horizon. Imitative, not creative, in this, as in most other activities, the Germans adapted their methods from the penetration by railway which was so marked a feature of Russian expansion in Manmarked a leasure of musical expansion in accidenta, brought to an end by the disastrous issue of the war with Japan. The seeds of the German effort were sown when the Kaiser, extending the hand of Christian fellowship to the Sultan of Turkey, Abdul-Hamed, at a time when that sovereign was ostracised by Europe when that sovereign was estracised by Europe for his direct complicity in the massacre of Armenians, or rather one of the massacres of Armenians, made German influence supreme at Constantinople. His theatrical tour through Palestine, which was generally treated in Europe as an exhibition of opera bouffe, soon bore fruit in the acquisition by German interests of the principal railways in Anatolia. Later it fructi-fied more effectively in the Baghdad Railway concession, under which German interests secured roncesson, more when certain inecess seems the right of extending the Anatolian lines from the port of Haidar Pasha, opposite Constantinople, to a port in the Persian Gulf. Now successive British Statesmen of both parties had declared that the acquisition of a territorial foothold in the Persian Gulf by any power— Russia and the port of Bunder Abbas being then in view-would be regarded as an unfriendly act. There followed a replica of the period of alarms and excursions which had disfigured our relations with Russia. Undaunted, even when their endeavour to secure British co-operation in the enterprise falled, and when the Revolution in Turkey which set the Committee

temporary interruption of their influence at Constantinople, the Germans pressed forward with their enterprise. They pushed the Anatolian railways as far east as Bourgulu, and constructed a line northwards from Baghdad to Samara. They sent a mission to explore the potentialities of the port of Koweit in the Persian Gulf, and set the Turks in motion to subodrinate the Sheikh of Koweit to direct Turkish sovereignty, with a nominal view to extending the Baghdad railway from Basra to Koweit, or the vicinity of Koweit at the deep water inlet behind Bubian Island. They commenced the most difficult part of the work in plercing the Amanus and Taurus ranges by a series of tunnels, and laid the rails on the other side of the mountains across the Euphrates to Ras-al-Ain. Behind this rail-way activity stood a grandiose policy, which is indicated in what became known in Germany as "B.B.B."—Berlin, Byzantium, Baghdad. Throughout the progress of these schemes, which did not stop short of Baghdad, but were directed the second directed through a port in the Persian Gulf, at India, the Germans were anxious to secure the co-operation of Great Britain, if they could do so on their own terms, that is to say without affecting the enterprise as a dominant German adventure. Shortly before the commencement of the war the protracted negotiations with London which had this end in view ended in a definite agreement between the two Powers. Under this agreement the Gulf section of the line was to have been British, and the other portion German, But this agreement which had not been signed became waste paper with the outbreak of the war, and the German plans vanished in thin air with the complete defeat of Turkey and Germany. Nevertheless the railway did not stand still during the war. Germany made immense efforts to complete the difficult tunnel sections and the work was substantially finished when the Armistice was signed.

The Significance of the Baghdad Railway -The real significance of the Baghdad Railway was little appreciated in Great Britain. It was constantly pictured as a great trunk line, which would short-circuit the traditional British dominance by sea, and absorb the passenger and goods traffic from the East. This idea could only be nourished by those completely ignorant of the conditions of the Indian passenger service and the essentials of a competitive route for the carriage of merchandise. The rush of passenger traffic from India is from April to June, in order to escape the hot weather in India and the return traffic is spread over the period of from October to January. From April to June the heat in Mesopotamia is appalling. To Imagine that the passenger traffic from India would turn from the easy and comfortable, as well as fairly expeditious sea route from Bombay to Marseilles and thence by the easiest railway travelling outside the British Isles to Calais and London, for such a land route was an amazing chimera. The Baghdad route would have involved a sea voyage from Bombay or Karachi to Koweit or Basra, then a journey across the burning plains of Mesopotamia and Asia Minor to Haidar Pasha, then across the Straits to Constantinople, and finally right across Europe to a North Sea port. This would in any circumstances have been a costly freak journey in of Union and Progress in power entailed a comparison with the sea route. Then as for to Baghdad. To imagine again that merchandise would desert this route for a land and sea route, which would have involved a double break of bulk at Constantinople and Haidar Pasha, was again a chimera.

As a through route the primary purpose of the Baghdad Railway was strategic. It was designed to make the Power seated at Constantinonie-and that Power the Teutons were resolved should be Germany-complete master of Asia Minor and The Middle East, and the route-selected, often criticised, was the best for the rapid movement of troops to the strategic centres. As a commercial line, the Railway, if completed, would have served three zones. The western would have served three zones. The area of Turkey in Asia at Haidar Pasha. The rich lands of Anatolia at Alexandretta. eastern zone at Basra. The Germans, it is understood, attached immense importance to the subsequent engagements with Turkey which placed them in maritime command at Alexandretta. They began to inaugurate a commercial position in the Persian Gulf through the establishment of a subsidized line of steamers run by the great Hamburg-America corporation. They strove to obtain an actual footing in the Gulf through the German house of Wonkhaus. The Germans were probably never serious in their alleged designs on Koweit, which could never have borne a more definite relation to the commerce of the Gulf than Flushing to Antwerp or Cuxhaven to Hamburg; that was one of the red herrings they drew across their trail to divert attention from their real objective, Basra, which is destined by virtue of an unchallengeable geographical and natural position to be the great port of The Middle East. These considerations have no more than an academic value now. Germany was defeated. The Turks, when they emerged from an isolated military despotism based on Angora, were confronted with the immense problem of re-building their bankrupt State, deprived of the most intelligent section of the old population-the Greeks and the Armenians, by massacre and expulsion—were a very different factor. The completion of the through line was indefinitely postponed. But as the advantages of the route, for the purposes we have indicated, are many and great, the ultimate construction of the through line was only a matter of time, so one has placed these authoritative characteristics on record for the guidance of opinion at a later stage. The through railway con-nected is due to be made complete by the summer of 1938.

Turkey and the Frontier.—The position of Turkey on the Indian frontier was never of any considerable importance in itself, and never assumed any significance, save as the avant courier of Germany, when she passed under the tutelage of that Power, and for a limited period during the war. Although so long established during the war. Although so long established in Mesopotamia, Turkey was not very firmly seated in that country, the Arabs tolerated rather than accepted Turkish rule so long as they were substantially left alone, and the at the end of the year, with Irak in occupation administration, it is understood, never paid of the disputed up to the temporary frontier, its way. For a brief period Mülant Pasha which was known as The Brussels Line. Aftern

the commercial aspect of the line, the matural raised the status of Meoputantia, and after the port of the Middle East is Basen. The seal Revolution that fine soldier Nation Back freight from Encland or Germany to Basta became a power in the land. But speaking was often less than half the freight from Basta breadly Turkey remained in Mesonotamin broadly Turkey remained in Mesopotamia because it was no-one's interest, even that of Germany developed her "B.B.B." policy, Turkey was used as a stalking horse. She moved a small force to the Peninsula of Al-Katr in order to frighten the Sheikh of Bahrein, and tried to convert the nominal suzerainty exercised, or rather claimed, over the Sheikh of Koweit into a de facto suzerainty, exercised by military force. These efforts faded before the vigorous action of the British Government which concluded a binding arrangement with the Sheikh of Koweit, and the position of the Turks at Al-Kate was always very precarlous. On the outbreak of the war however the situation profoundly changed. When the sound and carefully executed expedition to Basra and its strategic hinterland was developed into the insane enterprise to capture Baghdad by coup de main, with very inadequate forces, and still more inadequate transport, we found ourselves involved in military operations of the most extensive and unprofitable character. These were completely successful with General Maude's occupation of Baghdad. After the Russian debucle we found ourselves involved in a new front, which stretched from the Euphrates to the wildest part of Central Asia, producing military exploits of an almost Asia, producing initiary exprois of an amoust epic character, but exercising little influence on the war. They were brought to an end by pressure not on extensive wings, but at the heart of Turkish Power in Palestine, where Lord Allenby scattered the Turks like chaif. But the aftermath of the war left us in an indefinite position in Mesopotamia, with indefinite fronso disposed, to be troublesome through guerrilla warfare in the Mosul Zone, and by stirring up the Kurds, who are the Ishmaelites of Asia Minor. The conclusion of the Treaty of Lausanne in 1923 brought temporary relief, but it did not settle the main issue, the frontier between Turkey and Irak. Under the Treaty it was provided that if the two parties could not agree to a boundary line delimitation should be left to The League of Nations. Negotiations were promptly opened at Constantinople, but it was immediately found that there could be no mutual agreement; the Turks demanded the whole of the Mosul vilayet, and the British delegates declared that Mosul and its hinterland were necessary to the existence of Irak. The issue therefore went to the League of Nations. That body despatched a neutral commission to study the position on the spot; this commission reported that the best settlement would be for the Mosul vilayet to be incorporated in Irak, if the British Government were prepared to prolong its mandate over that State for a period of twenty-five years. When the report of this commission came before the League in 1925 Britain gave the necessary guarantee, and the Council of The League unanimously allotted the Mosul vilayat to Irak. The Turkish delegates, who at first recognised the decisive authority of the League, then declared that they would not be bound by its decisions. So the matter rested

at first breathing nothing but armed resistance | the events leading to the Afghan War of 1838to acceptance of the award, the Turks afterward assumed a more conciliatory note, and alarmed, it may be, by the threat of Italian aggression, accepted the frontier line demarcated by the League.

France and the Frontier.-If we touch for a few sentences on the position of France on the frontiers of India, it is not because they have any present day significance, but in order to complete this brief survey of the waxing and waning of external influences on Indian frontier policy. It is difficult to find any sound policy behind the efforts of France to obtain a coaling station at Maskat in the Persian Gulf, and her long opposition to the steps necessary to extir-pate the slave trade, and hold in check the immense traffic in arms which was equipping all the tribesmen on our North-West Frontier with rifles of precision and a large supply of ammunition. We can find no more definite ammunition. We can find no more definite purpose in it than a general pin-pricking policy, a desire to play the part of Russia, and perhaps a source of annoyance to Great Britain, which would form a useful lever for the exaction of considerable cessions in West Africa, particularly in the neighbourhood of Gambia, as the price of abstention. These embarrassments were slowly removed one by one after the conclusion of the Anglo-French Entente, Far otherwise was it in the East. The consolidation of French authority in French Indo-China was the prelude to designs for the expansion of this authority at the expense of Siam and to find compensation there for the veiled British protectorate of Egypt. There had earlier been mutterings in Burma. We were established in Lower Burma in the thirties and in the eighties the foolish and tyrannical King Theebaw, in Upper Burma, became an impossible neighbour, and ambitious Frenchmen were not averse to fanning his opposition to the British. However, if any hopes were entertained of extending the Asiatic possessions of France in this direction, they were dissipated by the Second Burmese War and the firm establishment of British rule. Far otherwise was it on the confines of Siam. It was the fixed purpose of British policy to preserve Siam as a buffer state between Burma, then a regular Province of the Indian Empire, and French Indo-China. This policy was definitely challenged by French encroachments on Siam. Matters approached a crisis in 1894, and we were within measurable distance of a situation which might have ended in open war between which might have entered in open was besween the two States. But as in the case of Penjdeh, and later when Major Marchand marched across Africa to Fashoda, the imminence of hostilities made statesmen on both sides ask themselves what they might be going to fight about. They found there was nothing essential and an agreement was negotiated between the and an agreement was negociated between ac-two Powers, which secured the independence and integrity of Siam. That agreement has been consolidated by wise and progressive rule in Siam tiself, under its own independent sovereign, who is imbued with a strong friendship for Great Britain, whilst at the same time maintaining good relations with French neighbours.

The New Frontier Problem.—The whole purpose of this brief sketch has been to show

the Indian frontier problem has never been a local problem. It has been dominated by external influences—in the main the long struggle between Great Britain and Russia, for a brief period the German ambition to build up a dominant position in the East through the revival of the land route, and to a much lesser extent by the ambitions of France and Turkey. circumstances affecting the Frontier from centres beyond it have greatly changed. Old dangers have disappeared. Recent events in China and the development of aggressive air power have during the past year given the Indian North-Eastern frontier a vital aspect which it has never before borne. And, generally, conditions have become more like normal to critical land frontiers any where in the world in this present time of swift communications, aerial operations and easy propaganda. Consequently, a great deal of new attention is necessarily being directed to local aspects of the general problem. The tribesman on the Indian north-west borderland was always an opponent to be respected. Brave, hardy, fanatical, he has always been a first-class fighting man. Knowing every inch of the inhospitable country to which punitive operations must of necessity take place he has hung on our rearguards and given them an infinite of trouble. Even when armed with a jezail and when every cartridge had to be husbanded with jealous care, the tribesman was a respectable antagouist. Now these tribesmen are everywhere armed with magazine riles, either imported through the Persian Gulf when gunruning was a thriving occupation, stolen from British magazines, or secured from Russian and Afghan sources. They have an abundant Aighan sources. They have an abundant supply of ammunition. Considerable numbers of the fighting men have been trained in the ranks of the Indian Army, either as Regulars in the Pathan regiments, or else in the tribal militias. We found this to our cost in the events following the Afghan War of 1919. The tribesmen who rose at the call of the ilhad. especially in Waziristan, were of great account. They gave our troops the hardest fighting they have ever had on the Frontier; their marksmen-ship and fire discipline were described by experienced soldiers as admirable. The tribal militia for all practical purposes disappeared. What was to take its place?

Immediately following the Afghan War, the frontier positions were garrisoned by regular troops, but this was only a temporary measure. It may be said that the crux of the situation was in Waziristan. This sector of the Frontier has always been the most difficult of the whole. heaving of the intractable character of the people, and of their inveterate raiding activities. Besides, possessing a bolt hole into Afghanistan they had in the past evaded effective punishment. In view of the complete disappearance of the external menace, and the consequent lapsing of any necessity to preserve open lines of communication which would enable us to go to the support of Afghanistan, now formally recognised in the Treaty of 1921 as a completely independent State, there were many who urged the desirability that for three generations-most assuredly since of complete withdrawal, even to the line of the

Indus. This extreme school gained little Wana has been re-occupied, partly in response and Peshawar on the other is fully consolidaand no good case could be made out for withdrawing from it. On the other hand, there was a strong case made out for leaving February, 1933, control over tribal territory the tribesmen severely atone from the Gomal was pushed forward beyond Razmak towards to the Kurram, and dealing with them if they the Arghan Border because of a rebellion on the emerged from their fastnesses. The military emerged from their masticesses. The initiatry Argana side and of the neut of seaso-the Aling standpoint was that the Waziristan tribles are of Kabul by preventing experiencians by bodies of intractable; that it was unfair to impose on Wazir into His Anglesty's disturbed territory, troops the frequent necessity of punitive The work of control and of civilization rapidly operations in most ardinous conditions; and progressed in the whole territory. Of this that the only solution of the question was the particulars are given on 25 and following pages, that the only solution of the question was the occupation of dominant points in Waziristan, as far north as Ladha, and linking these posts dis for roads in their country of Tirah. with our military bases, and particularly with the termini of the Indian frontier railways, by good motor roads.

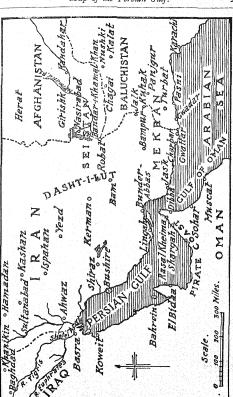

This controversy lasted long. It resulted in a typically British compromise which specially arose from the changed conditions in which we found ourselves in 1922, when our troops were in occupation of Waziristan as a result of the operations forced upon us for the suppression of the tribal outbreak which the Afghans concerns when he was been mittened out, as strict up in support of their invasion of indicates the strict up in support of their invasion of indicates the support of their invasion of indicates the support of the term, but the limit of the North was supported by the distribution of the support of the term, but the limit of the North was supported by the support of consolidations there are far the support of the term, but the limit of the North was supported by the support of the s sion of the tribal outbreak which the Afghans

support. Our position in Quetta on the one side to a pressing invitation from the Wana Wazirs because they wanted to share the benefits which they saw British occupation to be bringing to their cousins northward of them, Afghan side and of the need to assist the King One of its recent fruits was a request by the Afriginning with construction was made, but dissensions within the tribe in regard to it caused the work to be suspended. The desirability of better controlling the Afridis was demonstrated in 1930 when, incited by Congress party agents from India, the young Afridis invaded the Peshawar Plain and the need for the adoption of a more active policy in Waziristan was shown by a rising of the Tori Khel Wazirs in 1936-37, a trouble which has not yet been flattened out.
A serious military campaign in Waziristan in

I.—THE PERSIAN GULF.

From what has gone before it will be seen | policy, but for a quarter of a century the Gulf largely disappeared. No part of the frontier is more powerfully influenced by this consideration than the Persian Gulf. Our first appearance in the Gulf was in connection with the long struggle for supremacy with the Portuguese, the French and the Dutch, who had established trading stations there. With the capture and destruction of the great entrepot which the Portuguese had established at Ormuz, the supersession of the land by the sea route, and the appearance of anarchy in the interior the importance of the Gulf declined. The Indian Government remained there primarily to preserve the peace. This work is quietly and efficiently performed. Piracy was stamped out, the Trucial Chiefs, who occupy the Pirate Coast, were gradually brought into close relations with the Government, the vessels of the Royal Navy kept watch and ward, and our consuls possession of only the tiny station of Bassidu. to consolidate her interests, or to stake out a

that the keynote of this discussion of Indian was involved in European affairs. France frontier policy is that the external menace has sought to acquire a coaling station at Jissa near Maskat, and obstructed the efforts of the British Government to stamp out the slave trade and to check the immense traffic in arms which was equipping the tribes on our land frontier with weapons of precision and quantities of ammunition. All causes of difference were gradually removed by agreements following the Anglo-French Entente. Russia sent one of her finest cruisers to "show the flag" in the Gulf, and established consular posts where there were no interests of preserve. She was credited with the intention of occupying a warm water port, and in particular with casting covetous eyes on the most dreadful spot in the Gulf, Bunder Abhas, This menace declined after the signing of the Anglo-Russian Agreement and disappeared with the collapse of Bussian power following the Revolution. Then Turkey, cithes acting for herself, or as the avant courier regulated the external affairs of the Arth rules; of Germanty, under white domination has also not he Arab coast. In return for these services passed, negan to stir. She threatened the Great Britain chinuch no schish advantages, Shefki of Eabrein by the armed occupation. The waters of the Gulf were kept free to the joi of the pointmain of Al-Eaket, and moved troops navigation of the ships of all nations, and to enforce her suzerainty over Kowelt, the though Great Britain could have made any best port in the Persian Gulf and a possible territorial acquisitions she pleased she retained terminus of the Baghdad Railway. Further Left to herself Great Britain desired no other claim, Germany sent the heavily-subsidized

ships of the Hamburg-America line to the Gulf, | Gulf, to Bahrein, on the Western, Arabian, where they comported themselves as the instruments of Imperial policy rather than as remove causes of friction. inoffensive merchantmen. She also strove, through the agency of the firm of Wonkhaus, to acquire a territorial footing on the island of Shargah. These events stirred the British Government to an unusual activity in the waters of the Gulf.

Counter Measures.

The first effective steps to counter these influences were taken during the vigorous Viceroyalty of Lord Curzon, who visited the Gulf during his early travels and incorporated a masterly survey of its features in his monumen-tal work on Persia. He appointed the ablest men he could find to the head of affairs, established several new consulates, and was instrumental in improving the sea communications with the Gulf ports. The British Government also took alarm. They were fortified in their stand against foreign intrigue by the opinion of a writer of unchallenged authority. The American Naval writer, the late Admiral Mahan, placed on record his view that "Concession in the Persian Gulf, whether by formal arrange-ment (with other Powers) or by neglect of the local commercial interests which now underlie local commercial interests which now interire political and military control, will imperil Great Britain's naval position in the Farther East, her political position in India, her com-mercial interests in both, and the Imperial the between herself and Australasia." The Imperial standpoint, endorsed by both Parties in the State, was set out by Lord Lansdowne in words of great import—"We (i.e., His Majesty's Government) should regard the establishment of a naval base or of a fortifled port in the Persian Gulf by any other Power as a very grave menace to British interests, which we should certainly resist with all the means at our disposal." negative measures following these declarations were followed by a constructive policy when the oil fields in the Bakhtiari country, with a great refinery, were developed by the Anglo-Persian Oil Company, in which the British Government has a large financial stake. But with the disappearance of these external forces on Gulf policy, as set out in the introduction to this section, the politics of the Persian Gulf receded In importance, until they are now. more than they were before these external influences developed, a local question, mainly a question of policy. They are therefore set out more briefly and those who desire a complete narrative are referred to the Indian Year Book for 1923, pp. 178-183. An interesting new feature in 1931 was the decision of the Persian Government to instal a Navy of their own in the Gulf. The fleet consisting of two sloops and four launches, all suitably armed, was built in Italy and duly arrived at its destination in 1932. It is at the outset officered by Italians. The immediate reason for the new fleet is that an increase in the Persian Customs tariff for revenue purposes led to extensive snuggling. The fleet is required to check it. The British Govarnment in 1935 announced their decision to transfer their principal naval station in the Persian Gulf from Henjam, on Kishm Island, off the of Bahrein. Of this group of islands only flose. Persian shore at the entrance of the Gulf, of Bahrein and Maharak are of any site, which they held on lease from the Persian their importance is out of all proportion to purposes led to extensive smuggling. The fleet

This move is calculated to coast of the Gulf.

Maskat.

Maskat, which is reached in about forty-eight hours from Karachi, is outside the Persian Gulf proper. It lies three hundred miles south of Cape Musandim, which is the real entrance to the Gulf, but its natural strength and his-torical prestige combine to make it insepar-able from the politics of the Gulf, with which it has always been intimately associated,

Formerly Maskat was part of a domain which embraced Zanzibar, and the Islands of Kishm and Larak, with Bunder Abbas on the Persian shore. Zanzibar was separated from it by agreement, and the Persians succeeded in establishing their authority over the possessions

on the eastern shore.

The relations between Britain and Maskat have been intimate for a century and more. It was under British auspices that the separa-tion between Zanzibar and Maskat was effected. the Sheikh accepted a British subsidy in return for the suppression of the slave trade and in 1892 scaled his dependence upon us by and in 1892 seated ins dependence upon us by concluding a treaty pledging himself not to cede any part of his territory without our consent. The Sheikh paid a State visit to New Delhi late in 1937 and thereafter to London, whither he journeyed via the Far East and America.

The Pirate Coast.

Turning Cape Musandim and entering the Gulf Proper, we pass the Pirate Coast, controlled by the six Trucial Chiefs. The ill-name of this territory has now ceased to have any meaning, but in the early days it had a very real relation to the actual conditions. The pirates were the to attack on occasion, and not always without success, the Company's ships of war. Large expeditions were fitted out to break their power, with such success that since 1820 no considerable punitive measures have been necessary. The Trucial Chiefs are bound to Great Britain by a series of engagements, beginning with 1806 and ending with the perpetual treaty of 1853 by which they bound themselves to avoid all which they bound themselves to avoid all possibilities at ea, and the subsequent treaty of 1675 by which they undercook to prohibit of the Trucial Childs are controlled by the British Resident at Bushire, who visits the British Resident at Bushire, who visits the British Resident at Bushire, who visits the Controlled Childs are controlled by the British Resident at Bushire, who visits the Controlled Child Child

trade, but the exactions of the Begian Crove tons officials in the employ of Persia drove this traffic from Lingah to Debai. The Trucial Chiefs are—Debai, Abu Thabee, Shargah, Ajman, Um-al-Gawain and Ras-el-Kheyma.

their extent. This is the great centre of the dulf pearl fishery, which, in a good year, may be worth half a million pounds sterling. The anchorage is wretched, and at certain states of the tide ships have to lie four miles from the shore, which is not even approachable by boats, and passengers, mails and cargo have to be landed on the donkeys for which Bahrein is famous. But this notwithstanding the trade of the port is valued at over a million and a quarter sterling, and the customs revenue, which amounts to some eighty thousand pounds makes the Sheikh the richest ruler in the Gulf.

In the neighbourhood of Bahrein is the vast burying ground which has hitherto baffled archeologists. The generally accepted theory is that it is a relic of the Phœnicians, who are known to have traded in these waters.

The British Government as was mentioned earlier in this review announced in 1935 that they proposed transferring the principal British Naval station in the Gulf from Henjam, on the Persian side of the water, to Bahrein. The same place has since been utilised for the provision of a large aerodrome for the service of the British Imperial air line between London and Australia, which is thus enabled to take a route down the Western side of the Persian Gulf and thus avoid difficulties in Persia.

Koweit.

In the north-west corner of the Gulf lies the of Koweit lies solely in the fact that it is a possible Gulf terminus of the Railway. This is no new discovery, for when the Euphrates Valley Railway was under discussion, General Chesney selected it under the alternative name of the Grane-so called from the resemblance of the formation of the Bay to a pair of horns—as the sea terminus of the line, Nowhere else would Koweit be called a good or a promising port. The Bay is 20 miles deep and 5 miles broad, but so shallow that heavy expense would have to be incurred to render it suitable for modern ocean-going steamers. It is sheltered from all but the westerly winds, and the clean thriving town is peopled by some 20,000 inhabitants, chiefly dependent on the sea, for the mariners of Koweit are noted for their boldness and hardihood.

Muhammerah.

On the opposite side of the entrance to the Shatt-el-Arab lie the territories of Shelkh Khazzal of Muhammerah. The town; favourhazzai of anomaniariati and a saly situated near the mouth of the karun River, has grown in importance since the opening of the Karun River route to trade through the enterprise of Messrs. Lynch Brothers. This route provides the shortest pas-sage to Ispahan and the central tableland, and aiready competes with the older route by way of Bushire and Shiraz. This importance has grown since the Anglo-Persian Oil Company— now called the Anglo-Iran Oil Company established refineries at Muhammerah for the oil which they win in the rich fields which they

Rasra.

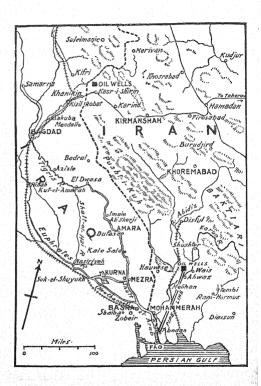

In a sense Basra and Turkish Arabistan can hardly be said to come within the scope of the hardly be said to come within the scope of the condiers of India, yet they are so Indisolubly associated with the politics of the full that associated with the politics of the full that Basta is the Dresent sea terminus of the Basta is the Basta is the Basta is the Basta is the Basta of the date groves on elthur side of the Shattel-Arab is indescribable, there is a considerable entrepot traffic, whilst Basra is the port of entry for Baghdad and for the trade with Persla; which follows the caravan route via Kermanshah and Hamadan.

The political destinies of Basra are at present wrapped up with the destinies of the new Arab State which was set up in Mesopotamia under King Feisal and is now under the sovereignty of his son. When the war was over we found ourselves committed to was over we tound only instruct communes, undefined and burdensome responsi-bilities in that land. The sound concepts which dictated the original expedition were dislocated in the foolish advance to Baghdad; then the great military enterprises necessitated by the fall of Kut-al-Amara carried our frontier north to Mosul and the mountains of Kurdistan, east to the Persian boundary, and west to the confines port which has made more stir than any place of Trans-Jordania. Amongst ardent Imperial-of similar size in the world. The importance lists, there was undoubtedly the hope that this immense area would be in one way or another an integral part of the British Empire. The cold fit followed when the cost was measured, and the Arabs rose in a revolt which showed that any such domination could only be maintained by force of arms and that the cost would be prodi-gious. In these circumstances King Feisal was imported from the Hedjaz and installed on the throne under the aegis of Great Britain. Still we were committed to the support of the new kingdom, and that most dangerous condition area-magnon, and that most unagerous conditions area-magnonsibility without any real power unless King Felsal was to be a mere pupped, immense expenditure and indefinite initiary commitments. In these circumstances there was an insistent demand for withdrawal from the land. British policy moved slowly towards that end, but a definite step was taken in 1923. The Secretary of State for the Colonies announced this policy in a statement which is reproduced textually, for the purpose of reference. Addressing the House of Lords on May 3rd he

> Your Lordships will remember that the Cabinet have been discussing this matter for some time and decisions have now been taken. some time and decisions have now been taken. Sir Percy Cox has accordingly been authorised by His Majesty's Government to make an announcement at Baghdad, the terms of which I propose to read out to Your Lordships. This announcement was drawn up in consultation with King Felsal and his Government, and has their cordial assent. It is being published at Baghdad to-day.

The announcement is as follows:-

"It will be remembered that in the autumn have tapped near Ahwaz. Its importance will be still further accentuated, by the opening of isst year, after a lengthy exchange of views, the rallway to Khorremabad by way of Diztui it was decided between the Governments of

His Britannic Majesty and His Majesty King Firsial that a Treaty of Alliance should be entered into between His Britannic Majesty and His Majesty the King of Iraq. This Treaty, which was signed on the 10th October, 1923, called to periodical revision at the desire of either party) provided for the establishment in Iraq, enjoying a certain measure of advice and assistance from Great Britain of the mature tizelf and of subsidiary Agreements which were to be made thereunder.

"Since then the Iraq Government has made great strides along the path of independence, and stable existence and has been able successfully to assume administrative responsibility and both parties being equally anxious that Majesty's Government in respect of Iraq should be terminated as soon as possible, it is considered that the period of the Treaty in its present form can conveniently be shortened. In order to obviate the inconvenience of introducing amendments into the body of a Treaty already meessary modifications by means of a protocol which, like the Treaty itself, will be subject to ratification by the Constituent assembly.

"Accordingly a protocol has now been signed by the parties in the following terms:—

It is understood between the High Contracting Parties that, notwithstanding the provisions of Article 18, the present Treaty is all terminate upon Iraq becoming member of the League years from the ratification of peace with Turkey, Nothing in this protocol shall prevent a fresh agreement from being concluded with a view to regulate the subsequent relations between for that object shall be entered into between them before the expiration of the above period."

It will be noticed that under this protocol the Treaty in its present form was to terminate on the entry of Iraq into the League of Nations or in four years, whichever might be earlier.

The position of Iraq as regards the League was that when the Treaty was ratified His Britannic Majesty was bound under Article 6 to use his good offices to secure the admission of Iraq to membership of the League of Nations would be in a position to take this step on the fulfilment of the two following essential conditions, namely, the delimitation of the frontiers of Iraq and the establishment of a stable government in accordance with the Organic Law.

The Council of the League of Nations in Spanary, 1982, adopted the report of the Iraq Commission recommending the termination of the mandate subject to the admission of Iraq to membership of the League and Iraq entering into a number of undertakings, with regard to treatment of minorities and the admissionation and the same of the contract of the same of the same

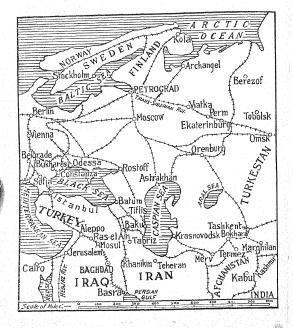

Under the Treaty of Lausanne between Turkey and the Powers, which was signed in 1923, it was agreed that the frontier between 1923, it was agreed that the frontier between 1924, it was agreed that the frontier between 1924, the process of the question was opened before the Council of the League of the Lausanne, and contains the process of the proces

Here the matter remained until the autumn of 1925. In order to secure the material for a decision the League of Nations despatched a neutral commission to Mosul to investigate the situation. This commission produced a long and involved report, but one which led by devious paths to a common sense recommendation. It was that the first essential in the Mosul vilayet is stable government. The desires of the people were for incorporation in the State of Iraq. If therefore the British in the state of Iraq, it interests will among the Government was willing to extend its mandate over Iraq for a further period of twenty-five years—a guarantee of stable government—then Mosul should be incorporated in Iraq; if Britain was not willing, then Mosul should return to Turkey. When the matter came before the Council of the League Great Britain gave the necessary guarantee. The Turks thereupon challenged the whole competence of the Council to give an award under the terms of the Treaty of Lausanne. The issue was remit-ted to the Court of International Justice at The Hague which decided in favour of the competence of the Council. About this time there was published the report of a distin-guished Esthonian General, General Laindoner, who had been despatched by the League to investigate allegations of brutality by the Turks in deporting Christians from their own zone, and this report was of the most damning character. Great Britain having given the character, treat Britain having given the necessary assurance, that she was prepared to extend her mandate over Iraq for a further twenty-five years, thereupon the Council of the League allocated the whole of the area in dispute, right up to the temporary frontler-commonly called The Brussels Line-to Iraq. The Turks refused to accept the award and withdrew from Geneva threatening force. Later, wiser counsels prevailed and in 1926 Turkey accepted a frontier substantially as drawn by the League,

A New Treaty.—A new Treaty regulating the relation of Iraq with Great Britain, the Mandatory Power, was negotiated in 1927, and signed towards the end of the year.

The Treaty declares that there shall be peace and friendship between His Britannic Majesty and His Majesty the King of Iraq. It states that "Provided the present rate of progress in Iraq is maintained and all goes well in the

Railway Position in the Middle East.

rate agreements superseding those of March 25, 1924, shall regulate the financial and military relations.

The King of Iraq undertook to secure the execution of all international obligations which His Britannic Majesty had undertaken to see carried out in respect of Iraq. He also undertook not to modify the existing provisions of Iraq's organic law so as adversely to affect the rights and interests of foreigners, and to constitute any difference in the rights before the law among Iraquis on the grounds of differences of race, religion, or language.

There was provision for full consultation between the high contracting parties in all matters of foreign policy which may affect their common interests. The King of Iraq undertook so soon as local conditions permit to accede to all general international agreements already existing, or which might be concluded thereafter. with the approval of the League of Nations, in respect of the slave trade, the traffic in drugs, arms and munitions, the traffic in women and children, transit navigation, aviation, and communications, and also to execute the provisions of the Covenant of the League of Nations, the Treaty of Lausanne, the Anglo-French Boundary Convention, and the San Remo Oil Agreement in so far as they apply to Iraq.

There was provision against discrimination in matters concerning taxation, commerce, or navigation against nationals or companies of any State which is a member of the League of Nations, or of any State to which the King of Iraq had agreed by Treaty that the same rights should be ensured as if it were a member of the

Any difference that might arise between the high contracting parties was to be referred to the Permanent Court of International Justice provided for by Article Fourteen of the Cove-nant of the League. The Treaty was made subjected to revision with the object of making all the modifications required by the circumstances when Iraq entered the League of Nations.

It is important to remember that there is a considerable difference between the vilayet considerable unterence between the ring of Basra and the other portions of the Iraq State. Basra has for long been in the closest commercial contact with India, and is in many

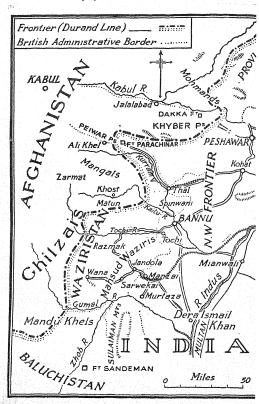

interval, His Britannic Majesty will support the British Government. If we are correct in the andidature of Iraq for admission to the League supposition that Basra is destined to be the of Nations in 1932." It stipulated that separate great port of the Middle Bast, then its future under an Arab State, with no experience of administration in such conditions, is one of the greatest interest, which can hardly be regarded as settled by the policy underlying the declaration which is set out above.

The Persian Shore.

The Persian shore presents fewer points of permanent interest. The importance of Bu-shire is administrative rather than commercial. It is the headquarters of Persian authority, the as is the headquarters of revision authority, the residence of the British Resident, and the centre of many foreign consuls. It is also the main entrepot for the trade of Shiraz, and competes for that of Ispahan. But the anchorage is wretched and dangerous, the road to Shiraz passes over the notorious ketals, which preduce the idea of rail connection, and if ever a railway to the central tableland is opened, the commer-cial value of Bushire will dwindle to insignificance. Further south ites Lingah, reputed neance. Further south has langan, reputed to be the prettiest port on the Persian coast, but its trade is being diverted to Debai on the Pirate Coast. In the narrow channel which forms the entrance to the Gulf from the Arabica Carlo Brades before bian Sea is Bunder Abbas. Here we are at the key of the Guit. Bunder Abbas is of some importance as the outlet for the trade of Kerman and Yezd. It is of still more importance as a possible naval base. To the west of the town, between the Island of Kishm and the mainland, lie the Clarence Straits which parrow until they are less than three miles in width, and yet con-tain abundance of water. Here, according to sound naval opinion, there is the possibility of creating a naval base which would command the Gulf. The great obstacle is the climate, which is sunt. The great obstacle is the climate, which is one of the worst in the world. On the opposite shore, under the shadow of Cape Musandim, lies another sheltered deep-water anchorage, Elphinstone's Inlet, where the climate con-ditions are equally vile. But between these ditions are equally vile. But between these two points there is the possibility of controlling the Guif just as Gibraltar controls the Mediterranean. For many years Bunder Abbas loomed large in public discussions as the possible warm water port for which Russia was seeking. There was established in British Naval station at Henjam, a small island close to Kism, where the station was constructed under agreement with the Persian authorities. Its evacuation by Great Britain in favour of respects a commercial apparage of Bombay. Bahrein was decided upon by the British its people have not much in common with Government in 1935. On the Mckran coast, those of the North. They took no part in the there is the cable station of Jask, and the possible BIOSE Of The NUCLL. Alway SOUR IN DAYS IN MANY ARAD ITSING WHICH PROPERTY ARAD ITSING WHIch followed the war, and they port of Chambot. An interesting development, ask nothing better than to remain in close in the Gulf within the past decade was the touch with India and through India with the institution of a Persian Navy.

II.-SEISTAN.

The concentration of public attention on the sea at Gwattur. It marches on its eastern Persian Gulf was allowed to obscure the frontier border with Afghanistan and with Baluchistan; Persian Guil was allowed to obscure the frontier border with Afghanistan and with Baluchistan, importance of Seistan. Yet it was for many it commands the valley of the Helmand, and year a serious preoccupation with the Govern—with it the road from Herat to Kandahar, and ment of India. Seistan lies midway north and lies immense resources as a whest-producing south between the point where the frontiers region have been only partly developed under of Russia, Persia and Afghanistan meet at Persian mixerile. It offers to an aggressive Zuilikar and that where the frontiers of Persia rival, an admirable strategic base for future and of our Indian Empire meet on the open military operation; it is also middray athwart

the track of the shortest line which could be ! built to connect the Trans-Caspian Railway with the Indian Ocean, and if and when the line from Askabad to Meshed were built, the temptation to extend it through Seistan would be strong. Whilst the gaze of the British was concentrated on the North-West Frontier, and to possible lines of advance through Kandahar to possible lines of accession of the control of th tion was directed to a more leisurely movement through Seistan, if the day came when she moved her armies against India.

Whether with this purpose or not, Russian intrigue was particularly active in Seistan lo the early years of the century. Having Russia fled Khorassan, her agents moved into Selstan and through the agency of the Belgian Customs 'scientific missions" and an irriofficials. tating plague cordon, sought to establish in-fuence, and to stifle the British trade which was gradually being built up by way of Nushki. These efforts died down before the presence special reference to the distribution the waters of the Helmand. They finally scenring British-Indian assistance in that ceased with the conclusion of the Anglo-Russian enterprise. Only informal conversations on ance of Seistan has waned.

The natural conditions which give to Seistan this strategic importance persist. For a time, British influence increased in substance through the Seistan trade route. The distance from Quetta to the Seistan border at Killa Robat is 465 miles, most of it dead level, and it was provided with fortified posts, dak bungalows, wells, and all facilities for caravan traffic. The railway was pushed out from Spezand, on the called Zahidan) 54 miles on the Persian side of the Indo-Persian Frontier, during the war as a military measure, but the traffic after the re-establishment of peace supported only two trains a week. There then arose trouble owing to Persian insistence on the collection of Customs duties on rations taken across their frontier for the railway staff. This led to the stoppage of train running on the Persian side of the Frontier. Negotiations for years dragged on to bring about a reasonable settlement in regard to the situation. The Persian Foreign Minister, Mons. B. Kazemi, paid a visit to New Delhi in of the McMahon mission, which, in pursuance of Treaty rights, was demarcating the boun Persia by the Baluchistan route. He was dary between Persia and Afghanistan, with linerested, as his Government's representative, of in the development of railways in Seistan and in ceased with the conclusion of the Anglo-Russian enterprise. Only informal conversations on Agreement. Since then the international import- the subject took place. No constructive result has become apparent.

III .- IRAN.

From causes which only need to be very briefly set out, the Iran question as affecting Indian frontier policy has receded until it is of no account. Reference is made in the introduction to this section to the fact that the conclusion of the Anglo-Russian Agreement left us a bitter legacy in Persia. That Agreement divided Iran into two zones of influence, and the Iranians bitterly resented this apparent division of their kingdom between the two Powers, though no such end was in view. German agents, working cleverly on this feeling, established an influence which was not suspected, and when the war broke out they were able to raise the tribes in opposition to Great Britain, in the South, and after the fall of Kut-al-Amara when a Turkish Division penetrated Western Iran, they exercised a strong influence in Teheran. With the defeat of Turkey and the Central Powers this influence disappeared, but at that time there was no authority in Iran besides that of the British Government, which had strong forces in the North-West and controlled the southern provinces through a force organised under British officers and called The South Persian Rifles. It was one of the first tasks of the British Government to regularise this position, and for this purpose an agreement was reached with the then Persian Government, the main features of which were :--

To respect Persian integrity;

To supply experts for Persian administration:

To supply officers and equipment for a order:

To provide a loan for these purposes;

To co-operate with the Persian Government in railway construction and other forms of transport.

Both Governments agreed to the appointment of a joint committee to examine and revise the Customs tariff.

The second agreement defined the terms and conditions on which the loan was to be made to Persia. The loan was for £2,000,000 at 7 per cent. redeemable in 20 years. It was secured on the revenues and Customs' receipts assigned for the repayment of the 1911 loan and should these be insufficient the Persian Government was to make good the necessary sums from other sources.

The Present Position .- We have given the main points in the Anglo-Iran agreebecause few documents have been isunderstood. Those who desire to study ment. more misunderstood. it in greater detail will find it set out in the Indian Year Book for 1921, page 138 et seq. It has been explained that most Iranians construed it into a guarantee of protection against all extenal enemies. When the British troops in the north-west retired before the Bolshaviks the Iranians had no use for the Agreement and it soon became a dead instrument. It was finally rejected and the advisers who were to have assisted Persia under it withdrew.

A remark frequently heard amongst soldiers and politicians in India after the War was that Great Britain must take an active hand in Iran supply officers and equipment for a because she could not be a passive witness to Persian force for the maintenance of chaos in that country. The view always taken in the Indian Year Book was that the internal

affairs of Iran were her own concern; if she preferred chaos to order that was her own lookout, but left alone she would hammer out some form of Government. That position has been justified. The Sirdar Sipah, or commander-in-chief, a rough but energetic soldier, gradually took charge of Iranian affairs and established a thinly-veiled military dictatorship which made the Government feared and respected throughout the country for the first time since the assas-sination of Shah Nasr-ed-din. A body of capable Americans under Dr. Millspaugh restored order to the chaotic finances. These two forces operating in unison gave Iran the best government she had known for a generation. the Sirdar Sipah chafed under the irregularities the Smar Sipan engage under the frequential of his position, with a Shah spending his time in Europe and wasting the resources of the country. He moved to have his position regularised by he deposition of the absentee Shah and his own ascent of the throne. At first, he was defeated by the opposition of the Mullahs, but in 1925 prevailed, and the Shah was formally deposed and the Sirdar Sipah chosen monarch in his place under the title of Reza Shah Pahlavi. The change was made without disturbance, and Iran entered on a period of peace and consolidation which thous between the British and I has removed it from the disturbing forces in ments for an agreement covering all the post-war world. Since then considerable points of difficulty between them.

progress has been made with the reform of the administration, and many projects are afoot for the improvement of communications. which is the greatest need of the land, such as an air service to Teheran and rallway construc-The least reassuring episode was departure of the American financial the mission, which had done admirable work in the restoration of the finances. When their contract expired Dr. Millspaugh and his colleagues were offered a renewal of it on terms which gues were onered a renewal of the one terms which they did not regard as satisfactory, especially in regard to the powers they were to exercise. They therefore withdrew from the country, and have been replaced by other foreign advisers. The general situation was gravely disturbed in 1932 by the sudden termination by the Iran Government of the Anglo-Iran Oil Co.'s concession, a matter affecting one of the biggest industrial undertakings in the world and millions sterling of capital. The intervention of the British Government led to the reference of the trouble to the League of Nations and this paved the way for negotiations between the Company and the Iran Government. While these were being settled some progress was also made with general negotiations between the British and Iran Governments for an agreement covering all outstanding

IV.—THE PRESENT FRONTIER PROBLEM.

There yet remains a small part of British over have utilised from time immemorial, the India where the King's writ does not run raiding of the weathier and more peaceful Under what is called the Durand Agreement with population of the Plains. The internal peace the Amir of Aghanistan, the boundary between enforced among them by British control has Indian and Afghanistan influence was settled, in late years led to an increase in their numbers and it was delimited in 1903 except for a small and this has aggravated their economic problem. section which was delimited after the Afghan War in 1919. But the Government of India have never occupied up to the border. Between have never occupied an order to botter. Sowers the administered territory and the Durand line there lies a belt of territory of varying width extending from the Gomal Pass in the south, to Koshmir in the north; this is generically known as the Tribal Territory. Its future is the keynote of the interminable discussions. of frontier policy for nearly half a century.

This is a country of deep valleys and secluded glens, which nature has fenced in with almost glens, which flature has renceu in with amnose; benind note the pointer my the menace or an inaccessible mountains. It is peopled with Russian hivesion, and that coloured our from wild tribes of mysterious orizon, in whom the polley until the Anglo-Russian Agreement. Frontier Policy.

The policy of the Government of India to-ward the Independent Territory has ebbed and flowed in a remarkable degree. It has fluctuated between the Forward School, which would occupy the frontier up to the confines of Afghanistan, and the school of Masterly Inactivity, which would leave the tribesmenentirely to their own resources, punishing them only when they raided British territory. Behind both the policies lay the menace of peditions, each one of which left behind a legacy of distrust, and which brought no per-manent improvement in its train. The fruit comparatively recently—
military measures which were taken to meet the whole positive the compelled a consideration of the whole positive to the positive compelled a consideration of the new polley. military measures which were taken to meet and other meter is time the command the good state of india, which prescribed for lation. effect to this policy. The main foundations failed to give timely support to the advanced of his action were to exercise over the tribes of the action, were so exercise over she tribes the political influence requisite to secure our imperial interests, to pay them subsidies for the performance of specific duties, but to re-spect their tribal independence and leave them, as far as possible, free to govern themselves according to their own traditions and to follow their own inherited habits of life without let or bindrance.

New Province.

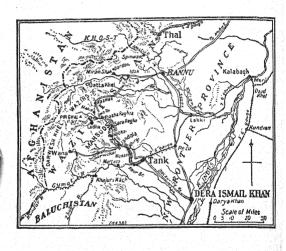

As a first step Lord Curzon took the control of the tribes under supervision of the Government of India. Up to this point they had been in charge of the Government of the Punjab, a province whose head is busied with many other concerns. Lord Curzon created in 1901 the North-West Frontier Province, and placed it in charge of a Chief Commissioner, with an intimate of a ciner commissioner, with an intimate troutier experience, directly subordinate to the Government of India. This was a revival of a scheme prepared by Lord Lytton in 1877, and often considered afterwards, but which and often considered alterwards, but which ad slipped for lack of driving power. Next, Lord Curzon withdrew the regular troops of ar as possible from the advanced posts, and placed these fortalices in charge of tribal levies, officered by a handful of British officers. most successful of these was the Khyber Rifles. which steadfastly kept the peace of that historic Pass until 1919. At the same time the regular troops were cantoned in places whence they could quickly move to any danger point, and these bases were connected with the Indian railway system. In pursuance of this policy railway system. In pursuance of this policy frontier railways were run out to Dargai, and a narrow-gauge line, since converted to the broad-gauge, was constructed from Kushai-garh to Kohat, at the entrance of the Kohat Pass, and to Thai in the midst of the Kurram Valley. These railways were completed means the stitling power of the regular lorses was greatly inoreased. Nor was the molicy of economic development nestered. forces was greatly independent neglected. The railways gave a powerful stimulus to trade and the Lower Swat Canal converted fractious tribesnen into successful agriculturists. This policy of economic development is re-ceiving a great development through the com-pletion of the Upper Swat Canal (q. v. Irrigation). Now it is completed there are other works awaiting attention. For many years this policy was completely justified by results.

A New Policy.

It saved us from serious complications for nearly twenty years, although the position could never be said to be entirely satisfactory, particularly in Waziristan, peopled by the most reckless raiders on the whole border-line, with a bolt hole into Afghanistan border-ine, with a bott note into Afghanistan when pressed from the British side. It endured through the Great War and did not break down until the Amir of Afghanistan sought refuge from his internal troubles in a jehad against India. In this insane enterprise the Afghans placed less reliance in their regular troops which have never offered more than a contemptible resistance to the British forces than in the armed tribesmen. In this they were

militia posts, some of these posts were ordered to withdraw, the Militia collapsed and the most serious fighting was with the tribesmen. The Southern Waziristan Militia inevitably broke and there was serious trouble throughout the Zhob district. The Afridis, our most serious enemies in 1897, and the most powerful of the tribes on the North-West Frontier, remained fairly quiet throughout the actual hostilities with Afghanistan, but later it was necessary to take measures against a leading malcontent and destroy his fort The Mahsuds and the Waziris at Chora. broke into open hostilities. Their country lies within the belt bounded by the Durand Line and the Afghan frontier on the west, and by the districts of Bannu and Dera Ismail Khan on the east. Amongst them the Afghan emissaries were particularly active and as they could put in the field some 30,000 warriors, 75 per cent. armed with modern weapons of precision they constituted formidable adversaries. They refused to make even when the Afghans caved in. They rejected our terms and active measures were taken against them. The fighting was the most severe in the history of the Frontier. The Mahsuds fought with great tenacity. Their shooting was amazingly good; their tactics were admirable, for amongst their ranks were many men trained either in the Militis or in the Indian Army; and more than once they came within measurable distance of considerable success. They were assisted by the fact that the best trained troops in the Indian Army were still overseas and younger soldiers were opposed to them. But their very tenacity and bravery were their own undoing: their losses were the heaviest in the long history of the Borderland and when the Mahsuds made their complete submission in September 1921 they were more severely chastened than at any time during their career.

A New Chapter.—As the result of the Afghan War of 1919, Indian frontier policy was again thrown into the melting pot. There was much vague discussion of the position in the course of the months which followed the Afghan War and the troubles in Waziristan which succeeded it, but this discussion did not really come to a head until February-March 1922. The Budget then presented to the country revealed a serious financial position. It showed that despite serious increases in taxation, the country had suffered a series of deficits, which had been financed out of borrowings. Further heavy taxation was proposed in this Budget, but even then the equilibrium which Budget, but even then the equilibrium which the financial authorities regarded as of para-mount importance was not attained. When the accounts were examined, it was seen that the heaviest charges on the exchaquer were those under Military Expenses, and that there was an indefinitely large, and seemingly unend-ing expenditure on Waziristan. This forced the Military, and allied with it the Frontier, expenditure to the front. In actual prac-tice the discussion was really focussed on Waziristan. In essentials it was the aged controversy-shall we deal with this part of the Frontier on what is known as the Sandeman than in the armed tribesmen. In this they were system, namely, by occupying commanding justified, for the Indian Military authorities posts within the country itself, dominating the

WAZIRISTAN.

tribesmen but interfering little in their own Waziri militia either mutinied, as at Wana, or affairs; or shall we revert to what was known deserted. The pillar of the Curzon system fell. as the close border system, as modified by Lord Curzon, of withdrawing our regular troops to strategic positions outside the tribal area. leaving the tribesmen, organised into militia, to keep the passes open, and punishing the tribes-men by expeditions when their raiding propensties become unbearable.

The Curzon Policy .- The Curzon policy. adopted in 1899, to clear up the aftermath or the serious and unsatisfactory Frontier rising in 1897, was a compromise between the "occupation" and the "close border" policies. It was hased on the withdrawal of the regular troons so far as possible to cantonments in rear whilst the frontier posts, such as those in the Tochi at Wana and in the Khyber and Kurram were held by militia, recruited from amongst the tribesmen themselves. The cantonments for regular troops were linked so far as possible with the Indian railway system, so as to permit of rapid reinforcement. But it must be remembered that like all Frontier students, Lord Curzon did not regard this as the final policy. He wrote in the Memorandum formulating his ideas: "It is of course inevitable that in the passage of time the whole Waziri country up to the Durand line will come more and more under our control. No policy in the world can resist or greatly retard that consummation. My desire is to bring it about by gradual degrees and is so pring it about by grantial degrees and above all without the constant aid and presence of British troops." The Curzon policy, though it was not pursued with the steadfastness he would have followed if he had remained in control, gave us moderate-or rather it should be said bearable—frontier conditions until the Afghan War. It then broke down, because the tribal militia, on which it was based, could the trical militia, on which it was based, could not, when left without the support of regular troops in the day of need, withstand the wave of fanaticism and other conditions set up by the Afghan invasion of 1919. The Khyber militia faded away; the recruited, officered by British officers.

The Policy.-The policy first adumbrated to meet these changed conditions was outlined by Lord Chelmsford, the then Viceroy, in a speech which he addressed to the Indian Legislature. He said it had been decided to retain commanding posts in Waziristan; to open up the country by roads; to extend the main Indian railway system from its then ter-minus, Jamrud, through the Khyber to the frontier of Afghanistan and to take over the duties of the Militia by regular troops. That immediate policy was soon modified so far as the policing of these frontier lines by regular troops was concerned. Such duties are immensely unpopular in the regular army, which is not organised and equipped for work of this character. Irregulars have always existed on the frontier, and as they had disappeared with the Militia, it was necessary to recreate them. The new form of irregular was what have been called Khassadars and Scouts. The Khassadar is an irregular in the extreme. He has no British officers and no uniform, except a distinguishing kind of pagri. In contradistinction to the old Militia, he finds his own rifle. As one informed observer remarked, the beauty of the system is that so long as the Khassadars under their own headmen, secure the immunity of the caravans and perform their other police duties, they draw their pay and no questions are asked. If they desert in the day of trouble, they lose their pay but the Government loses no rifles, nor does it risk mutiny or the loss of British and Indian officers. But the application British and monan omeers. But the apparamon of this polley produced an acute controversy. It was one thing to say that commanding posts in Waziristan should be retained; it was another to decide what these posts should be. We must therefore consider the special problem of Waziristan. tan. The Scouts are a mobile, irregular force not territorially mounted,

V .- WAZIRISTAN.

We can now approach the real frontier ques- | Wana and Ladha some 15 and 20 miles respecttion of the day, the future of Waziristan.

Geographically Waziristan is a rough paral-Geographically Wazirisian is a rough paral-lelogram averaging 60 miles from East to West and 180 from North to South. The western half consists of the Suleiman Range gradually rising up to the ridge from five to ten thousand feet high, which forms the water-shed between the Indus and the Helmund Rivers and corresponds with the Durand Line separating India from Afghanistan. This is the western boundary. from Afghanistan. This is the western boundary. On the east is the Indus. North is the water-shed of the Kurram River running East and West about 30 miles north of Bannu separating West about 50 miles flower of Banda separating Waziristan from the Kohat District. South is a zigzag political boundary from the Durand Line running between Wana and Fort Sande-man in Baluchistan with a turn southwards

ively from the Durand Line, in the centre of the grazing district, the latter within five miles of important villages of Kaniguram and Makin,

The submontane tracts from the hills to the Indus vary from the highly cultivated and irrigated land round Bannu to the sand desert in the Marwat above Pezu,

Where irrigation or river water is obtainable cultivation is attempted under conditions which can hardly be encouraging. Other tracts like that between Pezu and Tank, usually pastoral, can only hope for an occasional crop after a lucky rainfall.

Inhabitants.-The inhabitants, unable to support existence on their meagre soil, make up the margin by armed robbery of to the Indus.

The western half is a rugged and inhospitable the control of the c

Their villages are separate though lotted about | nnetr vanages are separate anough notice anouth more or less indiscriminately, and in extraoring is the exception—in fact all traditionally are in open strife, a circumstance which, until some bright political comet like the Afghan War of 1919 joined them together, as materially aided our dealings with them.

Unlike other parts of India, however, these wild people acknowledge little allegiance to maliks or headmen. No one except perhaps the Mulla Powindah till his death in 1913 could speak of any portion of them as his following.

Policy.-The policy of the British was at first one of non-interference with the tribes. Even now only part of the country is administered. now only part of the country is administered.
Gradually it was found that more and more supervision became necessary to control raiding and this was attempted by expeditions to portions of the country with Regulars, followed by building posts and brick towers to be held by Militia. These posts were at first placed at the points where raiders usually debouched. The Political Officers, at first supported by Regulars, built up from 1904 onwards a force of some 3,000 Militia with British Officers at their disposal, who were backed up by the garrisons at Bannu and Dera Ismail Khan. In addition certain allowances were made to the tribes for good behaviour, prevention of raids and surrender of offenders when required; also for tribal escorts as necessary. Gradually, as occasion required, posts were occupied.
Wana was occupied in 1895 at the request of
the Wana Wazirs. Similarly the Tochi in
1896. In the comprehensive expedition of 1895-96 when this policy was put into effect, the British arms were shown in every remote valley in the vain hope of taming the Mahsuds. It was hoped the various posts would prove a pacifying influence and a rallying ground for Government supporters. From 1904 to 1919 they were held by Militia. Roads and communications were improved and tribal allowances augmented by sales of produce to the troops on a liberal scale.

A Compromise.—A full statement of the policy finally adopted by Government in view of the situation left upon their hands after the Mahsud rebellion was made by the Foreign Secretary, Sir (then Mr.) Denys Bray, in the course of a Budget discussion in the Legislative Assembly on 5th March 1923. He outlined neither a Forward policy nor a Close Border policy. Both these terms had, in fact, ceased to be appropriate. Circumstances had so changed that neither the one plan nor the other remained within the bounds of reasonable argument.

The Foreign Socretary explained that the Ingredients of the Frontier problem at the present day are essentially three, namely, the Frontier districts, the neighbouring friendly product Territory, this last being the belt of unsettled mountain country which lies between the borders of British Inula and India Vic. unsettled mountain country which lies between the borders of British India and India. He proceeded speedally to show that this belt is, in the main, until the Tori Khei rebellion of the boundary pillars that include Wadristan it is boundary pillars that sinclude Wadristan in India. We are apt to call Wadristan the speed of our British districts that these

tribes are trans-frontier tribes. From the point of view of India, from the international point of view that is, they are cis-frontier tribesmen of India. tribes are India's scourge, they are also India's responsibility—and India's alone. That to an international fact that we must never forget."

Sir Denys next referred to the triumph of the Sandeman policy in Baluchistan. He pointed out that some people long ago believed wastristan. "But what was a practical proposition 20 or 30 years ago is not necessarily so now. The sak is induletly more difficult indulety better armed; their arms having increased at least tenfold during the last 20 years." Dealing with the Close Border prescription he showed that if one erected a Chinese Sir Denvs next referred to the triumph of wall of barbed-wire fence along the plain some distance below the hills, "all the time the problem in front of us would be going from bad to worse, with the inevitable increase of arms in the trans-border and with that inevitable increase in the economic stringency in this mountainous tract, which would make the tribesmen more and more desperate, more and more thrown back on barbarism....A rigid Close
Border policy is really a policy of negation,
and nothing more.....We might gain for our districts a momentary respite from raids but we would be leaving behind a legacy of infinitely worse trouble for their descendants."

The settled policy of Government in Waziris. tan, Sir Denys showed, was the control of that country through a road system, of which about 140 miles would lie in Waziristan itself and one hundred miles along the border of Derajat, and the maintenance of some 4.600 Khassadars and of some 5,000 irregulars, while at Razmak, 7,000 feet high and overlooking northern Waziristan, there would be an advanced base occupied by a strong garrison of regular troops. Razmak he showed to be further from the Durand Line than the old-established posts in the Tochi. In the geographical sense, posts in the Todin. In the geographical sense, therefore, the policy was, in one signal respect, a backward policy. None the less, it was a forward policy in a very real sense, for it was orward policy in a very real sense, for it was a policy of constructive progress and was a big step forward on the long and laborious road towards the pacification, through civilization, of the most backward and inaccessible, and therefore the most truculent and aggressive tribes on the border. "Come what may, civilization must be made to penetrate these inaccessible mountains or we must admit that there is no solution to the Waziristan problem, and we must fold our hands while it grows inevitably worse."

The policy thus initiated proceeded with results according to the highest reason-able expectations and exceeding the most sanguine hopes of most people concerned in its formulation.

faded away, and the people showed an understanding of the rule of law, and, under the control exercised, a readiness to conform to it. In various small but significant ways, methods of civilization caught the imagination of the people and won their approval. Thus, the safety of the roads was encouraged, and became that is no shooting up or other pursuit of that is no shooting up or other pursuit of personal or tribal feud is permitted upon them. This permits villagers to proceed to and from the plains towns in safety. Under the influence of their women, the tribesmen applied that the ban against shooting upon the highway would be extended to a the editor time miles on either side of the plain to the control of the c for after times on eather sace of the figures; Tentative efforts to introduce primary edu cation proved possible and achieved as much pacess as could be expected. The hospitals and dispensaries maintained for irregular troops, called Scotts, employed about the country, attend to the wants of the tribespeople who come to them. So much has this arrangement been appreciated that the Mahauds formally applied for the establish-ment of a hospital of their own. With grim humour, they offered to provide such an insti-tution with the necessary surgical instruments, saying that they had saved this from the time when the British formerly left the country. In other words, they offered what they had captured or looted during the 1919 emeute.

A remarkable illustration of the acceptance by the people of the new conditions was provided some few years ago by the Wana Wazirs when they partitioned the Political Authorities for the occupation of south Wazirstan corres-ponding with that already established in northern Wazirstan northern Waziristan. A motor road had already been run out from Jhandola through Chagmalai and the Shahur Tangi to Sarwekai. Chagmalai and the Shahur Tangi to Sarwekai, A brigade of troops, hitherto stationed at Manzai, whereabouts the Tak-i-Zam, after flowing down its deep valley from northern Waziristan, debouches on to the Derajat, was accordingly ordered up to Wana in the autumn of 1929. It proceeded throughout the journey thither without opposition and was warmly welcomed by the tribes people at Wana, where it established itself in a favourably sited camp not far from the fort which was the earlier centre of British occupation. There it remains.

The reoccupation of Wana and the circum-The reoccupation of Wana and the circumstances in which it took place flustrate that a policy are the results of the policy and the policy are the completion. It lives and always waits upon some new action to give it further expression. In this respect the new policy, though it has only demonstrably been applied in Wazhista, must be regarded as that which governs that make the progretical state which governs the progretical state of the progretical st the actions of the authorities in regard, at least to the whole Frontier region lying between Baluchistan and the Khyber Pass, except, possibly, the Kurram Valley.

and small bodies of troops at every opportunity, drearms if their neighbours also gave up theirs faded away, and the people showed an or were deprived of them. A road has been or were deprived of them. A road has been built commencing Fort Sandeman via Gulkach, on the Gomal river, with Tanai, on the Sar-wekai-Wana road. A motor road has also been constructed from Razmak through Kaniguram, in the heart of the Mahsud country, to Wana. It was completed in 1933 and the only disputes safety of the romes was encouraged, and decame 12 was completed in 1933 and the only disputes buttessed by a considerable development connected with its construction arose from the of motor-bus traffic. The roads, as the king's irrivaly of the tribesmen whose willages lie along thelmay, are officially held to be sacrosanct, the route and who sometimes fought one another to secure road-making contracts.

> A startling new development upon the North West Frontier during 1930 was the spread thereto of agitation carried on by the Indian National Congress in the interior of India in pursuit of its efforts to bring political pressure to bear upon the Government of India, and above them, His Majesty's Government. The Congress at its annual session at Lahore in the week following Christmas, 1929, adopted an one week following Christians, 1929, adopted a programme aiming at the separation of India from the British Empire and at the promotion of revolution in India to secure this end. In particular, it avowedly set out "to make Government impossible." Revolutionary agitation, and especially a campaign to promote disobedience of the civil law in order to bring the administration to a stand-still, commenced all over India immediately after the Congress meetings. The settled districts of the N.W. F. P. were the scene of this, in common with the rest of the land. The agitation was there carried on by Congress agents organised in what are known as Khilafat Committees. For their purpose they made special use of misrepresentations of the Sarda Act, recently passed by the Indian Legislature by the official and Hindu votes against the opposition of the Muslim non-official members. This measure makes illegal and provides penalties for the marriage of boys and girls below stated mini-mum ages. The age at which marriage may take place is also in general terms laid down for Mohammedans by their religious law. Hence, the Muslims in British India, while acknowledging that the Sarda Act would not in practice affect them, because its provisions in no way over-rule their religious law, nevertheless saw in the measure an act affecting the domain of their religious law, and passed spite of their dissent, in a Legislature in which Muslims are, by themselves, a hopeless minority. They regarded its enactment as a grave illustration of their fears that under any scheme of democratic self-government in India, Muslim interests would not be safe against disregard by the Hindu majority.

Outbreak at Peshawar in 1930,— This Muslim apprehension, after the passing of the Act, strongly influenced the attitude of the community towards all questions of political reform, and the lever which mis-representation of the Act provided for stirring up anti-Government agitation in the almost wholly and fanatical Muslim province in the north can easily be understood. Grossly untrue propaganda was carried on; it was, for instance, alleged that under the Act all girls must be The area cultivated by the villagers of Wana medically examined before marriage. An plain doubled by the end of 1981 and the people elaboration of this untruth was that the declared their readiness to surrender their Government were recruiting a large body of

Hindu inspectors to make the examinations. And the agitation was deliberately pushed outwards from the settled districts of the N. W. F. P. into the tribal areas. Waziristan was amongst the first of them to be inundated with the propaganda. This was in March-April 1929. The poison spread outwards from Peshawar into Tirah about the same time. The agitation was sedulously carried on in the district northward of Peshawar city and from thence was pushed into Mohmand country. The first point of violent combustion was Peshawar city, where the mob murderously broke out on 23rd April 1930. Within a short time, Afridi bands descended the ravines and nullahs from Tirah to join in the fray. The Molimands became greatly excited and sent down bands to sit near the border and watch for an opportunity to join in. The Upper Tochi Wazirs simultaneously took to arms and shortly afterwards the Mahsud Wazirs, about Ladha, did the same. At this stage, the development of the Air arm in India proved of incalculable value. Aero-planes patrolled the whole country and were frequently employed by the political authorities to take preventive and punitive action by bombing. The road system, meanwhile, enabled troops to be moved at will to positions of advantage for dealing with whatever serious tribal aggression appeared likely.

In the result, the Mohmands, after being bombed several times, found discretion the better part of valour and made no descent in the better part of valour and made no descent in the part of valour and made no descent and land action were both times driven back to their hills with no achievement to report. The their hills with no achievement to report. The descend by the Ublan Pass upon Kohat and their western clans attacked a post in the Upper Kurram and endeavoured to attack Parachinar, talepied by the machinations of Conference of the Conference of Afghan tribesmen across the border into the fray. Combined at and ground action crushed these efforts. The Tocha proceeding the Conference of the Conference

All outbreaks of revolt were suppressed in the same manner and the establishment of new fortified posts on the Peshawar plain, immediately opposite the main valleys leading out of the property of the proper

It will be seen that the events of the summer of 1930 put the policy to a severe test, and that its successful operation in the emergency

was specially assisted by the Royal Air Force. The resultant position appears, then, to be that the control of the tribes, where the policy of the control of the tribes, where the policy of the control of the tribes, where the policy and in the establishment of suitable particus, is effective, that the political and military fround organization with which the policy is supported brings about the introduction and that the rapidity and success with which the Royal Air Force can operate over the hills, thends to dimnlish the amount of ground force control of the Airliks upon the plant and certain to their homes without great loss, despite all that the Royal Air Force and large bodies of troops could do, include the tapacity bodies of troops could do, include the tapacity and tribes, and must remain there so long as the policy is not extended over their highlands.

Mohmand Outbreak Disturbances in the Mohmand country during the summer of 1933 both illustrated the operation of the modern Frontier policy and the need to keep it alive policy if it is to be of any use at all. The Mohmands may for the purposes of present description be divided into two categories namely, the Upper Mohmands, who live in the highlands of the Mohmand country, and the Lower Mohmands, whose country stretches from the lower altitudes of the same hills down to the Peshawar Plain. Through the country of the Upper Mohmands passes the Durand line but the Afghan Government have never agreed to its delimitation in part of this region and consequently its place has long been taken over a considerable portion of the length of the Frontier by what is described as the Presumptive Frontier. The exact position of this latter has never been settled between the two governments and it is consequently sometimes difficult to say whether people from particular villages belong to one side or to the other of it.

In 1922, during the revolutionary Red Shirt campaign, in connection with the Indian National Congress, in the Peshawar Plain, the Upper Mohmands deeided to join in the disturbances and ratis in the administered territory. Lower Mohmands are described as the Assured Tribes. The meaning of the description is that the British Indian authorities assure them protection against the attacks of the Upper Mohmands and they, on the other hand, are Mohmands and they, or the other hand, are represented by the control of the Upper Mohmands in 1938, when spring and early summer once more facilitated their methods of campaigning commenced retributory raties upon the Lalindan when spring and early summer once more facilitated their methods of campaigning commenced retributory raties upon the Lalindan commenced retributory raties upon the Lalindan appealed to the political authorities for help and that help they were obliged to give.

About the same time as this trouble was germinating, there appeared in Bajanr, a country immediately to the north of that in which the versts just described developed, a Pretender to the Aghan throne. He was accompanied by two companions and started a campaign in Bajaur for a revolution or such other trouble as might be possible in Afghanistan, This.

compelled the British Indian authorities to take measures in fulfilment of their obligations of good neighbourliness to Afghanistan.

Road construction from the Peshwar-Shab-kadr road northwards through Ghalanai into the Halimzai country and towards the passes which lead from that country into the upper extremities of the Bajaur Valley was undertaken and two brigades of troops, with other details. were sent forward up it to assist in dealing with the Upper Mohmands. At the same time, aeroplanes bombarded the village of Kotkai in Upper Bajaur, which had given shelter to the Pretender, further aerial demonstrations were made and the Bajauris were given an ultimatum demanding the surrender of the Pretender by a given date.

The Upper Mohmands continuing aggressive and the Bajauris obdurate, there was good prospect of a campaign over the same country as that covered by the campaign of 1807. It seemed likely that the Ghalanai Road would be continued into the upper extremity of Bajaur and that another road for troops would also have to be constructed up the Bajaur valley tiself so that by the meeting of the two roads in Upper Bajaur, there would become established a circular road through this part of the tribal territory, resembling that running through North Waziristan.

In the end, the Upper Mohmands, partly doubtless because of punishment which they received in certain encounters with our troops and partly probably because of influence brought to bear upon them from Kabul, retired to their hills and after negotiations entered into bonds to keep the peace; and the Bajauris, while maintaining on grounds of tribal custom their refusal to surrender the Pretender, nevertheless remain to Surremer the Freehard, nevertheless expelled that person from their territory, probably into Afghanistan. Here, then, the trouble ceased. The nett result of it was the construction of the road through Ghalanal and the rapid development of bus services and other activities of civilization which speedily took place along it.

The Upper Mohmands made another descent in the summer of 1935. The Lower Mohmands quarrelled among themselves over the distribution of road maintenance contracts and the upper Mohmands decided to fish in the troubled waters. Successful military operations ended in where success in initially operations ended in the Upper Mohmands sueing for peace—and in the Ghalanai road being carried forward over the Nahakil Pass and down beyond it on to the Main which extends to the natural road junction where the Upper Bajaur Valley meets the Upper Mohmand country.

Tori Khel Rebellion.—The Wazirs and Mahsuds in 1930 showed signs of rebelling against Government in parallel with the Afridis. Congress party agents endeavoured to persuade them to do so. They were at the outset firmly dealt with and peace was thus assured almost without its having been broken. All went peacefully until the autumn of 1936 and then trouble was produced in North Waziristan by the faqir of Ipi, a man who was formerly in subordinate Government service in the Settled Districts and afterwards settled at the place from which he took his best known name, A Muslim lad was accused in 1936 of kidnapping a Hindu girl of Bannu. Apparently, she eloped with him. She was restored to her parents by order of the Civil Court, on the ground that she was a minor. There was a good deal of communal excitement about the matter and the fagir started an agitation about it in the Tribal country, alleging that the return of the girl to her Hindu parents was an interference with Islam. There was also, in 1936, a dispute between Muslims and Sikhs in Lahore over the possession of an old building said to have been a mosque. This was settled in the Lahore High Court in favour of the Sikhs and the Punjab Muslims accepted the decision. The tagir of Ipi lumped together the Bannu Girl Case and the Lahore (Shahidganj) Mosque Case and upon them raised among the Waziristan Tribes the slogan, "Islam in Danger." His demand for a holy war was only taken up by a sub-section of the Tori Khel section of the Wazirs of Northern Waziristan. Their elders begged Government to order a flag march of troops through their country so as to increase the credit of the loyalist element. This Government did. The troops were heavily fired upon and had to fight their way out. Efforts to round off the matter before it developed into a major affair failed and there followed a war in which the Tori Khel were the only tribal section avowedly at war with Government but all the other tribesmen of the country were hardly more than nominally friendly, some joined in gangs fighting the authorities and others connived at such acts. Not until the fall of winter towards the end of 1937 were the Tori Khel and the bands of irreconcilables under during leaders whom the faqir inspired by his agitation, beaten by extensive military operations into asking for peace. The fagir has not been car and continues a troublesome influence. been caught summer campaign in 1937 involved the employ-ment of 50,000 troops. Before they were withdrawn in the following winter 106 miles of new roads opening up some of the hitherto inaccessible country in and about the upper reaches of the Shaktu river were made,

VI.-AFGHANISTAN.

The relations of Afghanistan with the Indian | War of 1838 was fought—the most melancholy Empire were for long dominated by one main con- episode in Indian frontier history. It was be-Empire were for long dominated by one main con-jephode in Indian frontier history. If was be-sidenation—the relation of Afghanistan to a Kra-cause a Russian envoy was received at Kabiul sian invasion of India. All other considerations while the British representative may be all the relation of the re we should be in a position to move large forces early and largely succeeded. The second aim up, if necessary, to support the Afghans in may now also be said to have been attained. resisting aggression.

Gates to India.

knowledge of the trans-frontier geography of India brought home to her administrators the conviction that there were only two main gates to India—through Afghanistan, the historic route to India, along which successive invasions have poured, and by way of Seistan. It was the property of t It was the purpose of British policy to close them, and of Russia to endeavour to keep them at any rate half open. To this end, having pushed her trans-Persian railway to Samarkand, Russia thrust a military line from Merv to the Kushklinsky Post, where railway material collected for its immediate prolongation Herat. Later, she connected the trans-erian railway with the tran-Caucasian to Herat. to Herat. Later, she connected the trans-Siberian railway with the tran-Caucasian system, by the Orenburg-Tashkent line, thus bringing Central Asia into direct touch with lar European magazines. No has Great Britam been created a Queeta military station useded with one of the control of the used of the control of the control of the lines out by the Bolan Pass and through the Caucar Bitt lines which climbury system by Chapper Rift, lines which rank amongst the most picturesque and daring in the world. From Quetta the line has been carried by the Khojak tunnel through the Khwaja Amran Range, until it leads out to the Afghan Border at New Chaman, where it opens on the route to Kandahar. The material is stocked at New Chaman which would enable the line to be carried to Kandahar in sixty days. In view of the same menace the whole of Baluchistan has been brought under British control. Quetta is now one of the great strategical positions of the world, and nothing has been left undone which modern military science can achieve to add to its natural strength. In the opinion of many military authorities it firmly closes the western gate to India, either by way of Kandahar, or by the direct route through Scistan.

Further east, the Indian railway system was carried to Jamrud and by the autumn of 1925 up the Khyber Pass to Landi Kotal and down the other side of the Pass to Landi Khana, class military road sometimes double, sometimes truble, also threads the Pass to our advanced post at Landi Kotal; and then descends until it meets the Afghan frontier at Landi Khana. Later, a commence-ment was made with the Lol Shilman Rail-way, which starting from Peshawar was dethis line was suddenly stopped and is now thrust in the air. In this wise the two Powers prepared for the great conflict which was to be fought on the Kandahar-Ghazni-Kabul line.

Relations with India.

When the late Abdurrahaman was invited to ascend the throne, as the only means of escape from the tangle of 1879, none realised his great qualities. Previously the Amir of Afghanistan had been the chief of a confederacy of clans. Abdurrahaman made himself master in his own kingdom. By means into which it is not well closely to enter; he beat down opposition until none dared lift a hand against him. Aided by a British sub-sidy of twelve lakhs of rupees a year, increased to eighteen by the Durand Agreement of 1893, and subsequently to over 20 lakhs, he estabstrong standing army and set lished a up arsenals under foreign supervision to furnish it with arms and ammunition. Step by step his position was regularised. The Anglo-Russian Boundary Commission,—which nearly precipitated war over the Penjdeh episode in 1885,—determined the northern boundaries, The Pamirs Agreement delimited the borders amid those snowy heights. The Durand Agreement settled the border on the British side, except for a small section to the west of the Khyber, which remained a fruitful source of trouble between Afghanistan and ourselves until 1919, when the Afghan claims and action upon the undemarcated section led to war, npon the uncomarcated section and the frontier determined shortly after the conclusion of peace with Afghanistan. Finally the McMahon award closed the old feud with Persia over the distribution of the waters Helmand in Seistan. the It. estimated by competent authorities about the time of Abdurrahaman's death, Afghanistan was in a position to place in the field, in the event of war, one hundred thousand well-armed regular and irregular troops, to-gether with two hundred thousand tribal levies, and to leave fifty thousand regulars and irregulars and a hundred thousand levies to maintain order in Kabul and the provinces, But if Afghanistan were made strong, it was not made friendly. Abdurrahaman Khan distrusted British policy up to the day of his death. All that can be said is that he dis-trusted it less than he distrusted Russia, and if the occasion had arisen for him to make a choice, he would have opposed a Russian advance with all the force at his disposal. He closed his country absolutely against all foreigners, except those who were necessary for the supervision of his arsenals and factories. He refused to accept a British Resident, on the ground that he could not protect him, and British affairs Were entrusted to an Indian signed to penetrate the Mulicori country and agent, who was ha a most equivocal position, provide an alternative advance to the Khyler At the same time he repeatedly pressed for the for the movement of British troops for the light to pass by the Government of India and delence of Kabull. For unexplained reasons, to establish his own representative at the Court agent, who was in a most equivocal position. of St. James.

Afghanistan and the War .- These relations were markedly improved during the reign of His Majesty the Amir Habibullah Khan. It used to be one of the trite sayings of the Frontier that the system which Abdurrah-Between the advanced posts on either side iman Khan had built up would perish with him, stands the Kingdom of Afghanistan. The end for none was capable of maintaining it. Habbe of British policy has been to make it strong ullah Khan more than maintained it. He and friendly. In the first particular it has visited India soon after his accession and ac-

quired a vivid knowledge of the power and place. Afghan agents in India, of whom the resources of the Empire. He strengthened most prominent was Ghuam Hyder Khan, and consolidated his authority in Afghanistan the Afghan postmaster at Peshawar, Moodel warned the Government of India that he might be forced into many equivocal acts, but that they must trust him; certainly his reception of Turkish, Austrian and German "missions" at Kabul, at a time when British representatives were severely excluded, was open to grave misconstruction. But a fuller knowledge induced the belief that the Amir was in a position of no little difficulty. He had to compromise with the fanntical and anti-British elements amongst his own people, inflamed by the Turkish oreaching of a jehad, or holy Islamic war. But he committed no act of hostility; as soon as it was safe to do so he turned the members of these missions out of the kingdom. At of these missions out of the kingdom. At the end of the war his policy was completely justified; he had kept Aighanistan out of the war, he had adhered to the winning side; his authority in the kingdom and in Central Asia was at its zenith.

Murder of the Amir.—It is believed that it he had lived Habibullah Khan would have used this authority for a progressive policy in Afghanistan, by opening up communications and extending his engagements with India. He was courted by the representatives of Persia and the Central Asian States as the possible rallying contre of a Central Asian Islamic confederation. At this moment he was assassinated on the 20th February 1919. The circumstances surrounding his murder have never been stances surrounding his muruer have never been fully explained; but there is strong ground for the belief that it was promoted by the reactionaries who had harassed him all his reign. These realised that with his vindication by the war their time of reckoning had come; they anticipated it by suborning one of his they anticipated it by suborning one of insides to murder him in his sleep. His brother, Nasrullah Khan, the nominee of the fanatical element, was proclaimed Amir at Jelalabad in his stead, but public opinion in Afrikanistan revolted at the idea of the brother seizing power over the corpse of the murdered man. His sons, Hayat and Amanullah, were not disposed to waive their heritage. Amanullah was at Kabul, controlling the treasury and the arsenal and supported by the Army. Naszullah found it impossible to make head against him and withdrew. The new Amir, Amanuliah, at once communicated his accession to the Government of India and proclaimed his desire to adhere to the traditional policy of friendship. But his difficulties at once commenced; he had to deal with the war party in Afghanistan; he was confronted with the dissatisfaction arising from

and emissilitated his authority in Afghanistan title Afghan postunaiter as results war, mounts itself. At the outset of the war he made a Afghanistan with exaggerated accounts of declaration of his complete neutrality. It is the Indian unrest. The result of all this was to believed—a considerable resticence is preserved convince the Amir that the real solution of ourse our relations with Afghanistan—that he his difficulties was to units all the distributions of the contract elements in a war with India. On the 25th April his troops were set in motion and simultaneously a stream of anti-British propaganda commenced to flow from Kabul and open intrigue was started with the Frontier tribes. on whom the Afghans placed their chief rellance.

Speedy Defeat .- The war caught the Army in India in the throes of demobilisation and with a large proportion of the seasoned troops on service abroad. Nevertheless the regular Afghan Army was rapidly dealt with. Strong British forces moved up the Khyber and seized Dacca. Jelalabad was repeatedly bombed from the air and also Kabul. Nothing but a shortage of mechanical transport prevented the British forces from seizing Jelalaprevented the Drissn forces from seizing centa-bad. In ten days the Afghans were severely defeated. On the 14th May they asked for an Armistice. With the usual Afghan spirit of haggling, they tried to water down the conditions of the armistice, but as they were met with an uncompromising emphasis of the situation they despatched representatives to a conference at Rawalpindi on the 26th July. On the 8th August a Treaty of Peace was signed which is set out in the Indian Year Book, 1923, pp. 196-197

Post-War Relations .- It will be seen that under this Treaty the way was paved for a fresh engagement six months afterwards. During the hot weather of 1920 there were prolonged discussions at Mussoorie between Afghan Representatives and British officials under Sir Henry Dobhs. These were private, but it is believed that a complete agreement was reached. Certainly after an interchange of Notes which revealed no major point of difference it was agreed that a British Mission should proceed to Kabul to arrange a definite treaty of peace. This Mission crossed the Border in January 1921 and entered Kabul where a peace treaty was signed.

The main points of the Treaty are set out in the Indian Year Book, 1923, pp. 197, 198-199.

Afghanistan after the War.—Since the War the relations between Afghanistan and Great Britain have been good and improving, there were paintle elsodes in 1923 when a mur-der gang from the tribal territory in the British side of the Frontier committed raids in British India, murdering English people and kidnapping English women and then took refuge with the war party in Afghanistan; he was confronted with the disassification arising from the manner in which the murderers of Habibuliah nable one dealt with; the fanatical element is an indicate the war was exaperated by the imprisonment of Nasrullah; and the Army was so inconsed that it had not be removed from Kabul and given occupation of the control of the c administration and education. The direct result extension of the Orenberg-Tashkent railway to was a formidable rebellion of Mangals and Termes. That line has been constructed by Zadrans in the Southern Provinces, and serious the Boisheviks. The Afghans have had their reverses to the regular troops sent against the rebels. At one time the position was serious, but the rebels were not sufficiently united to develop their successes, and with the aid of peroplanes and other assistance afforded by the Government of India the insurrection was Whilst this assistance was appreclated, broken. the whole business gave a scrious set-back to the reforms initiated by His Majesty; he had to withdraw almost the whole of his adminis-trative code and to revert to the Mahomedan Law which was previously in force.

Bolshevik Penetration.-Taking a long view, a much more serious development of the view, a much more serious development of the policies of Afghanistan, at the period to which the foregoing notes apply was the penetration of the Bolsheviks. These astute propagandists have converted the former Trans-Caspian States of Tsarist Russia into Soviet Republics, where the rule of the Bolsheviks is nuch more drastic and disruptive than was that of what was called the despotism of the Romanoffs. The object of this policy is gradually to sweep into the Soviet system the outlying provinces of Persia, of China and of Afghanistan. In or rersia, or canna and si Aignanistan, In Persia this policy was folled by the vigeur of the Sipar Salah, Reza Khan, since declared Shah. In Chinese Turkestan it is pursued with qualified success. In Aighanistan it also made certain progress. The first step of the Bolshevika was to extend the Soviet Republics of Tajikistan, Uzbekia and Turkmanistan so as to absorb all Northern Afghanistan. This was later, apparently, abandoned for the moment for a more gentle penetration. Large subsidies, mostly delivered in kind, were given to Telegraph lines were erected Afghanistan. all over the country; roads were constructed, large quantities of arms and ammunition were supplied, whilst an air force with Russian pilots and mechanics was created and was largely developed. In return the Bolsheviks received important trading facilities. The whole purpose of this policy was ultimately to make it possible to attack Great Britain in India through an absorbed Afghanistan.

It is very doubtful if the Amir and his advisers were deceived by these practices, and whether they did not pursue the simple plan of taking all they could get without the slightest inter-tion of handing themselves over to the Bolsheviks. But it is easier to let the Bolshevik in than to get him out ; friends of the Afghans were asking themselves whether the Amir was not nourishing vipers in his bosom. Towards the end of 1925 and in the early part of 1926 there was a rude awakening. The Northern Frontier of the country has always been unsettled because of the shifting courses of the Oxus. In December Bolshevik forces captured with violence the Afghan post of Darkabad, killing one soldier. These events aroused great indignation at Kabul and were denounced by the Amir coram publico. There is no little evidence to show that though the form of government has changed in Russia the aims of Russian policy are the same. It used to be said that the test of Russian good faith under the Anglo-Russian Agreement would be the attitude of Petrograd towards the States. The representatives of Afghanistan are

eves opened.

Russo-Afghan Treaty.—Outwardly the relations between the two States are friendly. In December 1926 the Afghan papers published the text of a new treaty concluded with Soviet Russia, which was signed on August 31st, but it provided that it should in no way interfere with the secret treaty signed in Moscow on February 28th, 1921. The principal clauses of this treaty, as disclosed in the Afghan papers. are as follows :--

Clause 1 .- In the event of war or hostile action between one of the contracting parties and a third power or powers, the other contracting party will observe neutrality in respect of the first contracting party.

Clause 2 .- Both the contracting parties agree to abstain from mutual aggression, the one against the other. Within their own dominions also they will do nothing which may cause political or military harm to the other party. The contracting parties particularly agree not to make alliances or political and military agreements with any one or more other powers against each other. Each will also abstain from joining any boycott or financial or economic blockade organized against the other party. Besides this in case the attitude of a third power or powers is hostile towards or a third power or powers is mosaic towards one of the contracting parties, the other contracting party will not help such hostile policy, and, further, will prohibit the execution of such policy and hostile actions and measures within its dominions.

Clause 3 .- The high contracting parties acknowledge one another's Government as rightful and independent. They agree to abstain from all sorts of armed or unarmed interference in one another's internal affairs. They will decidedly neither join nor help any one or more other powers which interfere in or against one of the contracting Government. None of the contracting parties will permit in its dominions the formation or existence of societies and the activities of individuals whose object is to gather armed force with a view to injuring the other's independence, or otherwise such activities will be checked. Similarly, neither of the con-tracting parties will allow armed forces, arms, ammunition, or other war material, meant to be used against the other contracting party to pass through its dominions,

Clause 6 .- This treaty will take effect from the date of its ratification, which should take place within three months of its signature, it will be valid for three years. After this period it will remain in force for another year provided neither of the parties has given notice six months before the date of its expiry that it would cease after that time.

On March 23rd there was also signed in Berlin a treaty between Germany and Afghanistan which amounted to no more than the establishment of diplomatic relations.

A British Minister is established in Kabul as well as the representatives of other European established in India and in London, and at some of the European capitals. The various subsidiary agreements under the Treaty have been carried into effect.

The King's Tour.—In the closing months of 1927 His Majesty King Amanula, accompanied by the Queen and a staff of dificials, commenced a long four to India and Europe. It is understood that the staff of the staff o

Reforming Zeal.—King Amanulla returned to his realm as full of reforming zeal. He was much impressed by the political and social institutions of the western lands he visited, and institutions of the western lands he visited, and institutions of the western lands he visited, and which Mustapha Kemal Pash had driven Turkey along the path of "reform," or perhaps it would be more correct to say westernisation. In this he was encouraged by the Queen, who was the western of the perhaps it would be more correct to say westernisation, the same of the perhaps it would be more correct to say westernisation, and the westernisation was part of the perhaps the westernisation which was the same than the perhaps which was a support of the perhaps which was a prescribed; in September Government officials were considerable of the perhaps which was prescribed; in September Government officials were considerable or peaced by the perhaps which was prescribed; in September Government officials were considerable or peaced by the perhaps which was prescribed; in September Government officials were considerable or peaced by the peaced by the

With every appreciation of the spirit and direction of these changes, friends of His Majesty advised the King to moderate the pace. They reminded him that is 1924 far less drastic changes had brought serious trouble in their changes had brought serious trouble in the distance of th

A change of Kings.—Events moved rapidly in 1929. A notorious north Afghan budmash, Bacha-I-Saqqoo, raised the standard of revolt and inflicted severe losses on the Afghan Regular troops, discontended as they were by arrears of pay. Day by day the Afghan represent-

atives in various parts of the world issued messages asserting that the rebels had been destroyed, and a rapid series of pronouncements declared the withdrawal of all the reforms and the establishment of a Council of Provincial Representatives. Communications with the outer world were broken. King Amanulia and his family fled from Kabul to Kandahar, and then from Kandahar via Quetta to Bombay where they took ship to Europe. King Amanula on his arrival at Rome entered into possession of the Afghan Legation, where he remained, Bacha-l-Saqqao declared himself King of Afghanistan, and for a few months held his position in Kabul. Without money, administrative experience or a disciplined following, his throne was a thorny one and he Was harassed by constant attacks. The Royal Air Force in India meanwhile went to the rescue of the British Nationals beleaguered in and around Kabul and in a series of brilliant flights evacuated all without the slightest hitch. The most formidable of the new king's adversaries were led by General Nadir Khan, a scion of the old ruling house, with a wide knowledge of the world. Heavy fighting took place. Fortunes varied. Nadir Khan aimost gave up his chances as finally lost. But a hand of Wazirs from the British side of the border was in the british sale of and bottom attracted by prospects of loot, joined Nadir and finally seized Kabul in his name and interest. Nadir Khan thus became victor and shortly afterwards, at the wish of the Afghans, shortly afterwards, at the wish of the Arganas, Beacha-Saqqoo was executed with other robets, and when the year closed Naddir of the Kingdom. He despatched members of his family to the principal Afghan Legations in Europe. A Shinwari Islang near the exit from the Kinytor Pass took place in February 1850, and was repressed with unexpected success and vigour. There followed a serious rebellion Bacha-i-Saqqao's Kohidaman, country. th Administration paterns-t-Salqao's country.
This also was promptly quelled. And thereafter
Nadir Shah rulled without challenge. He
devoted himself to the reorganisation of his
Army. England was strictly neutral during
the successive stages of the zorolution,
but promised support to Agianistan to hale
performed in the promised support to Agianistan to hale
performed its and this morphies was full lied by the restored it and this promise was fulfilled by the provision of an interest free loan of £200,000 to King Nadir and by the supply of rifles and ammunition to him. He gave evidence of his friendliness towards Britain and India. He Irlendiness towards Britain and India. He op-o-perated effectively to prevent tribes on his open and the property of the property of the Britain side against the downment of India in Extra the property of the Congress agitation in the summer of 1930. The trade routes were re-opened and the new King again took up Amanullah's manule of reform but in a states manifice manner which carried the Mullas-manifice manner which carried the Mullasalong with him.

Murder of Nadir Shah.—This ordered march of progress was tradically interrupted by the murder of His Majesty Nadir Shah on the atternoon of 8 November 1983. His Majesty was attending one management of the Nadia of Nadia of the Nadia of the

in revenge for the execution of a prominent Afghan who had been caught deeply involved in treasonable activities after he had been mercifully treated for earlier behaviour of the same kind. The assassin's father was stated to have been this man's servant. The murder was not followed by general or widespread disorder. The members of Nadir Shah's family and his prominent officers of State stood loyally by his heir, his son, Muhammed Zahir. The latter was duly placed on his father's throne and his accession was in due course acknowledged and confirmed throughout the kingdom in the traditional manner. The new king started his C.S.I., C.I.E.

reign with a high reputation for courage and steadiness. He early issued assurances to his people that he would continue the policy of his father in affairs of State. No untoward events have occurred in the years that have since past and during them the new young King has by his sagacity and good government gradually strengthened his position on the throne and by the development of communications and trade done much to encourage the establishment of settled conditions among his people.

British Representative-Lt.-Col. Fraser Tytler.

VII .- TIBET.

Recent British policy in Tibet is really another with the Tax of Russla. His emissary was a phase in the long-drawn-out duel between Great Siberian Dorlieff, who had established a restrain and Russla in Central Asia. The markable assendancy in the counsels of the earliest efforts to establish communication Dalai Lama. After a few years' residence at with that country were not, of course, inspired Lhasa Dorjieff went to Russia on a confidential with that country were not, of course, inspired by this apprehension. When in 1774 Warren Hastings despatched Bogle on a mission to the trasht-name of Shifatss—the spittinal equal sion of which the head was officially described in our superior of the Dalal Jame of Lobss—in Russia as "the senior Tsanite Exhemble his desire was to establish facilities for trade, attached to the Dalal Jame of Lobss—in October 1900, to open up flendly relations with a Power mission arrived at Odessa in October 1900, which was giving us trouble on the frontier, and was received in audience by the Tsar at and gradually to paye the way to a good un- Livadia. Dorjieff returned to Lhasa to report and gradually to pave the way to a good un-derstanding between the two countries. After Warren Hastings' departure from India the subject slept, and the last Englishman to visit Lhasa, until the Younghusband Expedition of 1904, was the unofficial Manning. In 1885, under the inspiration of Colman Macaulay, of the Bengal Civil Service, a further attempt was made to get into touch with the Tibetans, DIE IN WAS abandoned in deference to the opposition of the Chinese, whose suzeralnty over which virtually placed Tibet under the protection of the Chinese, whose suzeralnty over which virtually placed Tibet under the protection of the Chinese, whose suzeralnty over which virtually placed Tibet under the protection of the Chinese whose suzeralnty over which contact of Russia. This rumour was afternated the war with Japan, British statement wards officially contradicted by the Diesert of the Chinese was afternated to the contradicted with the Chinese was a contradicted by the Diesert of the Chinese was a contradicted by the Diesert of the Chinese was a contradicted by the Diesert of the Chinese was a contradicted by the Diesert of the Chinese was a contradicted by the Diesert of the Chinese was a contradicted by the Diesert of the Chinese was a contradicted by the Chinese was a c were inclined to pay excessive deference. But the position on the Tibetan frontier continued to be most unsatisfactory. The were aggressive and obstructive, and with a view to putting an end to an intolerable situaview to putting an end to an intolerable situa- of India, treating the 166a of Chinese suga-tion, a Convention was negociated between rathry over Tubet as a constitutional fiction, Great Britain and China in 1806. This and proposed in 1905, to despatch a mission, with it admitted a British protectorate over Stkitin, standing questions with the Tibetan autho-and paved the way for arrangements for the titles on the spot. To this the Home Govern-conduct of trade across the Sikkim-Tibet most could not assent, but agreed, in conjunc-troutiers. These supplementary arrangements iton with the Chinese Government, to a joint provided for the opening of a trade mart at meeting at Khamba Jong, on the Tibetan side Yatung, on the Tibetan side of the frontier, of the frontier. Sir Francis Youngrashend to which British asplicet should have the eight was the British representative, but after months of free access, and where there should be no restrictions on trade. The agreement proved useless in practice, because the Tibetane re-tused to recognise it, and despite their establish-ed suzerainty, the Chinese Government were unable to secure respect for it.

Russian Intervention.

The markable ascendancy in the counsels of the mission in 1899. At the end of 1900 he re-turned to Russia at the head of a Tibetan mission of which the head was officially described in Russia as "the senior Tsanite Khomba attached to the Dalai Lama of Tibet." This progress, and in 1901 was at St. Petersburg with a Thota mission, where as bearers of an autograph letter from the Dalai Lama they were received by the Tsar at Peterhoff. They were escorted home through Central Asia by a Russian force to which several Intelligence
Officers were attached. At the time it was
cumoured that Dorjieff had, on behalf of the

The Expedition of 1904. In view of these conditions the Government

of India, treating the idea of Chinese suzewas one Dillish representative, but after months of delay it was ascertained that the Thetans had no intention of committing themselves. It was therefore agreed that the mission, with a strong escort, should move to Gyantse. On the way the Thetans developed marked hostility, and there was fighting at Tuna, and several sharp encounters in and around Gyantse. It was therefore decided that the mission should Russian Intervention.

This was the position when in 1509 Lord Links, and on August 87d, 1904. Curson, Vicercy of Londs, when in 1509 Lord Links was reached. There Sir Francis Young-tion direct took with the becam authorities, the Tibetans agreed to respect the Chinese Three letters which he addressed to the Jaile Convention of 1890; to open trade martia Lama were returned unopend, as time at dyantes, Garcia and Yatung; to pay an when the Dalal Lama was an direct intercourse indemnity of 250,000 (security-free lakits of

year. In a separate instrument the Tibetans agreed that the British Trade Agent at Gyantse should have the right to proceed to Lhasa to discuss commercial questions, if necessary.

Home Government intervenes.

For reasons which were not apparent at the time, but which have since been made clearer, the Home Government were unable to accept the full terms of this agreement. The indem-nity was reduced from seventy-five lakhs of rupees to twenty-five lakhs, to be paid off in three years, and the occupation of the Chumbi Valley was reduced to that period. The right to despatch the British Trade Agent to Lhasa to despaten the British Trade Agent to Jhasa was withdrawn. Two years later (June 1906) a Convention was concluded between Great Initial and China regulating the position in Tibet. Under this Convention Great British agreed neither to annex Tibetan territory, nor to interfere in the internal administration of Thet. China undertook not to permit any other foreign State to interfere with the territory or internal administration of Tibet. Great Britain was empowered to lay down telegraph lines to connect the trade stations with India, and it was provided that the provisions of the and it was provided that the provisions of the Convention of 1890, and the Trade Regulations of 1893, remained in force. The Chinese Government paid the indemnity in three years and the Chumbi Vailey was evacuated. The analy direct result of the Mission was the opening of the three trade marts and the establishment was the control of ment of a British Trade Agent at Gyantse.

Chinese Action.

The sequel to the Anglo-Russian Agreement was dramatic, although it ought not to have been unexpected. On the approach of the Younghusband Mission the Dalai Lama fied to Urga, the sacred city of the Buddhists in Mongolia He left the internal government of Mongolia He left the internal government of libet in contusion, and one of Sir Francis Younghusband's great difficulties was to find fluctan officials who would undertake the rapposability of signing the Treaty. Now the uncerainty of China over Thet had been explicitly restiment. It was assorted that should be found to the control of tions of Tibet. In the past this suzerainty, having been a "constitutional action," it was inevitable that China should take steps to see

supress); the British to remain in occupation of the Dalai Lama and of the Chinese Govern-of the Chumbi Valley until this indemnity ment had little in common. The Dalai Lama was paid off at the rate of a lakh of ruppers a expected to resume the temporal and substrain expected to resume the temporal and spiritual despotism which he had exercised prior to The Chinese intended to deprive him 1904. of all temporal power and preserve him as a spiritual pope. The Tibetans had already of all temporar power and preserve mm as a spiritual pope. The Tibetans had already been exacperated by the pressure of the Chinese soldiery. The report that a strong Chinese force was moving on Linsa so alarmed the Dalal Lama that he fied from Linsas, and by the irony of fate sought a retuge in India. He was chased to the frontier by Chinese troops, and took up his abode in Darjeeling, whilst Chinese troops overran Tibet.

Later Stages.

The British Government, acting on the representations of the Government o India, made strong protests to China against this action. They pointed out that Great Britain, while disclaiming any desire to interfere with the internal administration of Tibet, could not be indifferent to disturbances in the peace of a oce interests to disturbances in the peace of a country which was a neighbour, en intimate terms with other neighbouring States on our frontier, especially with Nepal, and pressed that an effective Tibetan Government be maintained. The attitude of the Chinese Government was that no more troops had been sent to Thee than were necessary for the preservation of order, that China had no intention of con-verting Thee into a province, but that being responsible for the good conduct of Thee, she must be in a position to see that her wishes were respected by the Thetans. Finally, the Chinese remarked that the Dalust Lams was such an Impossible person that they had been matter might have rested, but for the revolu-tion of the theory of the control of the con-matter might have rested, but for the revolu-tion in China. That revolution broke out in Seachieux and one of the first victims was ment was that no more troops had been sent to Szechuen, and one of the first victims was Chao Erh-feng. Cut off from all support from China, surrounded by a hostile and infurlated populace, the Chinese troops in Tibet were in a hopeless case; they surrendered, and sought escape not through China, but through sought escape not through thina, but through India, by way of Darjeeling and Calcutta. The Dalai Lama returned to Lhasa, and in 1913. in the House of Lords on July 28, Lord Morley stated the policy of the British Government in relation to these changes. He said the declaration of the President of the Chinese declaration of the President of the Chinese Republic saying that Tible came within the sphere of Chinese internal administration; and that Tible was to be regarded as on an equal footing with other provinces of China, was met by a very vigorous protest from the British Government. The Chinese Govern-ment subsequently accepted the principle that China is to have no right of active intervention in the internal administration of Tibles, and inevitable that China should take steps to see inta stee had the power to make her well residual for the steps to see inta stee had the power to make her well residual footing with other provinces of China, power of the steps proper, with the right of China to maintain a | Lhasa and India was established. The Chinese Resident at Linesa with a suitable guard. A semi-autonomous zone was to be constituted in Eastern Tibet, in which the Chinese position was to be relatively much stronger. But this Convention, it is understood, has not been ratified by the Chinese Government, owing to the difficulty of defining Outer and Inner Tibet, and in 1918 Tibet took the offensive and threw off the last vestiges of Chinese suzerainty. When the Chinese province of Szechuan went over to the South, the Central Government at Pekin was unable to finance the frontier forces or to withstand the Tibetan advance, which was directed from Lhasa and appeared to be ably managed. After the Tibetan army had occupied some towns on the confines of the Szechuan marshes, hostilities were suspended and an armistice was concluded.

From what has gone before, it will be seen that the importance which formerly attached to the political condition of Tibet was much less a local than an external question, and was in-fluenced by our relations with Russia and China rather than with our relations with Tibet. Russia having relapsed into a state of considerable confusion, and China having relapsed into a state of absolute confusion, these external forces temporarily at any rate disappeared, and Tibet no longer loomed on the Indian political horizon. The vell was drawn afresh over Lhasa, and affairs in that country pursued an isolated course, with this considerable difference. The Dalai Lama was now on terms of the greatest cordiality with the Government of India. In 1920 he requested that a British officer should be sent to discuss with him the position in Central Asia brought about by the Revolution in Russia and the collapse of Government in China, and Mr. Bell, C.M.G., I.C.S., Political Officer in Sikkim, was deputed for this purpose. In 1922 telephonic communication

have lately tried to increase their hold on Tibet but without persuading the Tibetans to accept closer association.

There followed in 1936 the death of the Dalai Lanta and the Tibetans have ever since been trying to discover the babe in whose body, they believe, his reincarnation must simultaneously have occurred. They have so far not succeeded.

Meanwhile, the Tashi Lama, who occupies
the spiritual chiefship in Tibet as the Dalai Lama does the chiciship in temporal affairs. went to live in China, having left Tibet during the lifetime of the late Dalai Lama, as a the lifetime of the late Dalai Lama, as a result, it is said, of disagreement with him. After prolonged negotiations, he set out to return to Lhasa in 1937. It was announced through Chinese avenues of communication that through his instrumentality the new Dalai Lama had been discovered in the extreme north of Tibet. But the Tashi Lama died while in the midst of his journey in the Chino-Tibetan borderland. Nothing has yet Chino-Tibetan boracriand. Nothing mas yet been heard of his successor nor any more about the New Dalai Lama. To all outward appearances events proceed from day to day in Tibet as before. A British Goodwill Mission visited Tibet in the winter of 1936-37, spent several months in Lhasa and there established or renewed highly friendly relationships with the chief Tibetan Government officials and the Tibetan people. The Mission was led by Mr. B. J. Gould, I.C.S., of the Political Department, who has many personal friends among the leading men of Tibet, and one of his colleagues was left behind in Lhasa where he still remains to maintain the liaison between Lhasa and the headquarters of the Government of India.

Political Officer in Sikkim: Mr. B. G. Gould.

VIII.—THE NORTH-EASTERN FRONTIER.

been considered as if the British line were contiguous with that of Tibet. This is not so. The real frontier States are Kashmir, Nepal, Sikkim, Bhutan and Burma. From Chitral to Gilgit now the northernmost posts of the Indian Government, to Assam, with the exception of the small wedge between Kashmir and Nepal, where the British district of Rumson is thrust right up to the confines of Tibet, for a distance of nearly fifteen hundred miles there is a narrow of nearly inseen numbers mines there is a harrow strip of native territory between British India and the true frontier. The first of these fron-tier States is Kashmir. The characteristics of this State are considered under Indian States (q.v.); it is almost the only important Native State in India with frontier responsibilities, and it worthly discharges them through the agency of its efficient Indian State troops—four of its efficient Indian State troops—four regiments of infantry and two Mountain Bat-teries, composed mainly of the Rajput Dogras, who make excellent fighting material. One indemned disturbance, and has been raised to a cit-the most important trade routes with fibth strong bulwar for India. Nepal is the recruit-passes through Kashmir—that through Ladak. Ing ground for the Gurkha Infantry, who lare we come to the long narrow strip of Nepal form went a sphendid part of the sighting the properties of the sphending of the sphending part of the sighting with the British Government, it is for all are the smaller States of Bhutan and passitish impress independent, and the British Sikkim, whose rules: are Mongolian by ex-

The position on the northern frontier has resident at Khatmandu exercises no influence on the internal administration. The governing machine in Nepal is also peculiar. The Maharaj Dhiraj, who comes from the Sesodia Rajput clan. the bluest blood in India, takes no part in the administration. All power vests in the Prime Minister, who occupies a place equivalent to that of the Mayors of the Palace, or the Shoguns of Japan. The present Prime Minister, Sir Chandra Shamsher, has visited England, and has given conspicuous evidence of his attachment to the British Government. Nepal is the main Indian outpost against Tibet or against Chinese aggression through Tibet. The irition between the Chinese and the Nepalese used to be frequent, and in the eighteenth century the Chinese marched an army to the confines of Khatmandu-one of the most remarkable military achievements in the history of Asia. Under the firm rule of the present Prime Minister Nepal has been largely free from of India in 1910 strengthened their relations labsence of a defined boundary makes the with Blutan by lacreasing their subsidy from maintenance of the peace difficult. A Delimitative business of the peace difficult. A Delimitative business of the peace difficult in Delimitations and the stating a guarantee that Blutan would be Commission, consisting of British and Chinese guided by them in its foreign relations. Afterwards China was officially notified that Great to spend the winter settling the line between British could protect the cripits and interests the two countries. The Neutral President Covernment a British railway expert was Coloned Estimatished Swiss engineer officer, covernment a British railway expert was Coloned Statish and the Covernment of th best means of improving communications with India. As the result of his report the Nepalese india. As the result of in report the Repairse Government have decided to construct a light rallway from Bhichhakhori to Raxaul. Great success has attended the orders passed by the Nepalese Government abolishing slavery.

Assam and Burma.

We then come to the Assam border tribesthe Daflas, the Miris, the Abors and the Mish mis. Excepting the Abors none of these tribes has recently given serious trouble. The murder of Mr. Williamson and Dr. Gregorson by the Minyong Abors in 1911 made necessary an expedition to the Dihang valley of the Abor country on the N. E. frontier. A force of 2,500 and about 400 military police was employed from October 1911 to April 1912 in subduing the tribe. After two or three small actions the murderers were countries. Close contact with these forest-clad and leech-infested hills has not encouraged any desire to establish more intimate relations with them. The area occupied by the Nagasares runs northwards from Manipur. The Nagasares. a Tibeto-Burman people, devoted to the prac-tice of head hunting, which is still vigorous-ly prosecuted by the independent tribes. The ly prosecuted by the independent trues. The Chin Hills is a tract of mountainous country to the south of Manipur. The corner of India from the Assum boundary to the northern boundary of the Shan States is for the most part included in the Mytkyma and Ehmmo districted of Burnary of the China States is for the most part included in the Mytkyma and Ehmmo districted of Burnary of the China States and the China States are considered in the China States of the China S direct administrative control is at present

traction and Buddhists by religion. In view of with a view to the frontier between Burma and Chinese aggressions in Tibet, the Government the Chinese province of Yunnan, where the of India In 1910 strengthened their relations absence of a defined boundary makes the unable to complete its work before the end of the current dry season and the Chairman therefore decided that it should disperse and reassemble in November, 1936, to complete its task.

> On re-assembling, according to this plan, the Commission spent several more months completing its inquiries and eventually, in the Spring of 1937, presented a unanimous report. This document, definitely laid down upon the map the frontier line between Burma and Yunnan as preseribed by the latest Anglo-Chinese agreement on the subject. It therefore provided both Governments with exact data for the pursuit of negotiations concerning frontier questions still unsettled between the military.

There is a considerable trade with China through Bhamo. On the Eastern frontier of Burma are delivered up. The cost of the expedition was the Shan States, with an area of fifty thousand Rs. 21,60,000. At the same time friendly square miles and a population of 1,300,000. missions were sent to the Mishmi and Miri These States are still administered by the square miles and a population of 1,300,000. These States are still administered by the Sawbwas or hereditary chiefs, subject to the guidance of Superintendents and Assistant Superintendents. The Northern Shan Rail-way to Lashio, opened in 1903, was meant to be a stage in the construction of a direct railway link with China, but this idea has been put aside, for it is seen that there can never be a trade which would justify the heavy expenditure. The Southern Shan States are being developed by railway connection. The five Karenni States lie on the frontier south of the Shan States. South of Karenni the frontier runs between Siam and the Tenasserim Division of Burna. The relations between the Indian Government and the progressive kingdom of Siam are excellent. A notable humanitarian development of recent years is the success of the direct administrative control is at present Siam are excellent. A notable humanitarian exercised. It is peopled by the Shans and the development of recent years is the success of the exercise of the state of the s

NEPAL.

Nepal is a narrow tract of country extending for about 520 miles along the southern slope of the central axis of the Himalayas. It has an area of about 56,000 square miles, with a population of about 5530.000. chiefly Hindus. The lation of about 5,580,000, chiefly Hindus. greater part of the country is mountainous, the lower slopes being cultivated. Above these is a rugged broken wall of rock leading up to the chain of snow-clad peaks which culminate in Mount Everest (29,002 feet) and others of slightly less altitude. The country before the Gurkha occupation was split up into several small kingdoms under Newar kings-The Gurkhas under Prithvi Narayan Shah overran and conquered the different kingdoms of Patan, Kathmandu, and Bhatgaon, and other places during the latter half of the 18th century and since then have been rulers of the whole of Nepal. In 1846 the head of the Rana family Maharaja Jung Bahadur Rana obtained from the sovereign the perpetual right to the office of Prime Minister of Nepal, and the right is still enjoyed by the descendants of the Rana family. In 1850 Jung Bahadur paid a visit to England and was thus the first Hindu Chief to leave India and to become acquainted with the power and resources of the British nation. The relations of Nepal with the Government of India are regulated by the treaty of 1816 and subsequent agreements by which a re-presentative of the British Government is received at Kathmandu. By virtue of the same Treaty either Government maintained representative at the Court of the other and her treaty relations with Tibet allow her to keep a Resident at Lhasa of her own. Her relation with China is of a friendly nature. Ever since the conclusion of the treaty of 1816 the friendly relations with the British Government have steadily been maintained. During the rule of the late Prime Minister it has been at its height as is evidenced by the valuable friendly help in men and money which has been given and which was appreciatively mentioned in both the Houses of Parliament and by Mr. Asquith in his Guildhall speech in 1915. The message from His Majesty the King-Emperor to the Nepalese Prime Minister sent on the termination of hostilities and published at the time as also Viceroy's valedictory address to the Nepalese contingent on the eve of their return home after having laudably fulfilled their mission in India advanting sattassy tunned their instead in India soloquentity and gratefully acknowledged the valuable help rendered by Nepal during the four and a half years of war. In recognition of this help Nepal receives an unconditional annual present of rupees ten lakhs from the British Government to be paid in perpetuity. To further strengthen and cement the bonds of friendship that have subsisted so long between the two countries, a new Treaty of friendship was concluded between the Government of Nepal and Great Britain on the 21st December

From the foregoing account of the history of line as a preliminary to link up the Western and Nepal it will be seen that the Government of hill district in course of time. The remotest of the country has generally been in the hands of the Minister of the day. Since the time of Jung the valley by fair motorable roads and the main the Minister of the day. Since the time of Jung the valley by fair motorable roads and the main

The small hilly independent Kingdom of upal is a narrow track of country extending rabout 520 miles along the southern slope the central axis of the Himalayas. It has an early of the contral axis of the Himalayas. It has an early of the contral axis of the Himalayas. It has an early of the contral axis of the Himalayas. It has an early of the contral axis of the Himalayas. The centre part of the country is mountainous, the war slopes being cultivated. Shere Jung Bahadur Rana after only a short tenure of office his next brother Ojaswi Rajanya Projjwala Nepal Tara, Ati Pravala Gorkha Dakshina Bahu Prithuladheesha His Highness Maharaja Joodha Shum Shere Jung Bahadur Rana, G.C.L.H., G.C.L., G.C.S.M.L., G.C.I.E., G.K.R.K., Yitang Paoting Shun Chiang Lin Chuan Shang Chiang, Honorary Lieutenant-General, British Army, Honorary Colonel of all the Gorkha Rifle Regiments, Indian Army, Prime-Minister and Supreme Commander-in Chief, Nepal, succeeded to the premiership on 1st September 1932. The rich experience he had earned in highly responsible offices as he rose step by step coupled with the broader outlook of affairs gained from the visit to England with his brother the late Maharaja Chandra Shum Shere enabled the present Maharaja fully to grasp the significance of the social, economic and political problems that held and still hold the world in their grip since the great war. A deep thinker, a close observer and a man with independent views he had after much and careful deliberation matured his plans and with the courage of his conviction set himself to the carrying out of his programme. A Nepalese Legation was established in London as much to bring still closer the more than century old friendship with the British Government as also to fully implement the traditional treaty rights. The first Envoy Extraordinary and Minister Plenipotentiary Extraordinary and Minister Plenipotentiary (Commanding General Bahadur Shum Shere Jung Bahadur Rana) left Nepal as the head of a Mission carrying the Insignia of the newly inaugurated Royal Order of "The Ojaswi Rajanya" for H.M. The King-Emperor. With grim deterfor H.M. The King-Emperor. mination the present Maharaja fought the ravages of the Great Earthquake—an unwelcome and undreamt of calamity at the very threshold of his regime-and has evolved a better and more beautiful Katmandu within a period not hoped for even by the most sanguine of the people. The political reorganisation in the country which had to be carried through to stabilise the existing Government gave ample indication of his clear foresight. The Eastern Terai district headquarters in the Kingdom extending to some 300 miles are now in telephonic connection with the capital on the most modern line as a preliminary to link up the Western and hill districts in course of time. The remotest suburbs can now be reached from the towns in

thoroughfare has been and is being dally im-of H.M. the King-Emperor. Thus the present proved. An up-to-date Firebrigade fulfilling an regime though still young, has been fruitful urgent and long felt want, a new and larger elec-tric installation giving further impetus to home industries, the first industrial exhibition of local industries, the first industrial exhibition of focul manufacture and craft all proclaim his many sided activities. The postal union connection with the Government of India now offers a much needed facility to inter-correspondence to the control of the control of the correspondence between the Nepalese at home or abroad in India. With the permanancy in the tenure of army service and inauguration of a Savings Fund for the benefit of the units, the modernisation of Arsenal equipment and arrangement for manufacture of up-to-date propellants the Military side of the country has been brought more in line with present day requirements. first Bank in Nepal and the first Jute Mill in the Terai have already come during this short regime and are functioning to-day. Sugar, Cotton, wool and other industrial ventures on a moderate scale are in active discussion. A second railway in the country which will shortly be working will link up Jayanagar on the B.N.W.

indeed and in many ways promises to become the turning point in the history of the country.

Rice, wheat and maize form the chief crops in the low-lands and in some parts of the hills too. Mineral wealth is supposed to exist but has not as yet been either prospected or developed. Communication in the hills is necessarily primitive owing to the difficult nature of the country but improvements are in evidence and progressive. Since 1920 the vehicular traffic from Amlekhganj to Bhimphedi, the base of a steep ridge in the main route to the capital of the country from British India-goes over a good and permanent well maintained road linking up with the ropeway of 18 miles which was opened in 1927 and a motor trolley service which was installed in 1934 joins up the Ropeway terminus with the Customs House for transport of goods traffic. The telephone from Katmandu to Birganj, shortly to be extended to Raxaul, he working will link up Jayanagar on the B.N.W. now forms part of the 300 miles main line extend-Rallway with Janakpur the capital of Rajarshi ing from Katmandu to Birathnager and Jhapa, fairway who damaged on copies or supported by the Color Kanadi and to distabilize the color of t Sherred Worson, Shum Sheer Jung Bahadur with seems of Buddha's ite has been dimetised Lana, the Maharaja's nepher and son, for Hall, in it by the remains on insertibed pillurar, The King George VI who also represented the British Envoy Extraordinary and Minister independent Kinglom of Nepal in the Coronation Phenipotentary—Lieut-Col. F.M. Balley, CJ.E.

The prospect of linking Europe and Asia by of Mosul. It has for some time been open as a railway running eastwards through Asia Minor has fascinated men's minds for generations. The plans suggested have, owing to the British connection with India, always lain in the direction of lines approaching India.

More than 50 years ago a Select Committee
of the House of Commons sat for two years to consider the question of a Euphrates Valley railway. The Shah of Persia applied to the railway. The Shah of Persia applied to the British Foreign Office for the investment of British capital in Persian railway construction many years before the end of the nineteenth century. A proposal was put forward in 1895 for a line of 1,000 miles from Cairo and Port Said to Kowelt, at the head of the Persian Gulf. While these projects were in the air, German enterprise stepped in and made a small beginning by constructing the Anatolian rallway system. Its lines start from Scutari, on the southern shore of the Bosphorus, opposite Constantinople, and serve the extreme western end of Asia Minor. And upon this foundation was based the Turkish concession to Germans to build the Baghdad Railway.

Meanwhile, Russia was pushing her railway from various directions into the Central Asian territory running along the northern frontiers of Persia and Afghanistan to the borders of Chinese Turkestan. The construction of a Trans-Persian railway, connecting India, across with the Russian lines between Black Sea and the Caspian Sea came to the forefront after the conclusion of the historic Anglo-Russian agreement regarding Persia.

The Germans pushed forward their Baghdad railway project with a calculating shrewdness railway project with a calculating strewlines arising from their estimate of the value it would possess in their grand aim to overthrow the British Empire. The outbreak of the great war and the success of the Germans in inveigling Turkey into it saw the final stages or the construction of the railway pressed forward with passionate energy. Thus, before the overthrow of the Turks and Germans in Asia Minor and of the Germans in France the railway was completed and in use from Scutari railway was completed and in use from Soutari across Anatolia, over the Taurus Mountains to Aleppo and thence eastward across the Euphraces to a point between Nisibin and Mosul. The Germans had also by that time constructed a line to Baghded at the eastern end of the route, northwards from Baghdad to a point a considerable distance beyond Samara.

The war compelled the British to undertake considerable railway development northward from Basra, the port at the mouth of the Shat-el-Arab, the broad stream in which the Tigris and Euphrates, after their junction, flow into the head of the Persian Gulf. The system

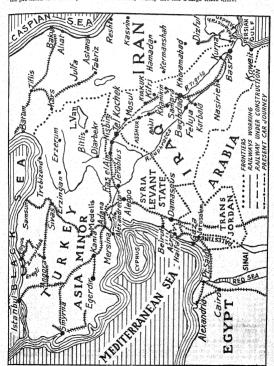

far as Kirkuk, 200 miles northward of Baghdad and 112 miles southward of Mosul. Similarly, the Taurus railway has long been open east-ward of Aleppo as far as Tel Kochek, on the Syrian frontier, a few hours' road motor run north-west from Mosul, Through passenger services between Iraq and Istanbul are run, a road motor service linking the railway termini at Kirkuk and Tel Kochek. The gap in the railway is being filled. Through trains are expected to be running by the autumn of 1938. A line also runs westward from Baghdad to Feluja, on the Euphrates.

The Trans-Persian line to join the Russian Caucasian system and the Indian railways first assumed proportions of practical import-ance in the winter of 1911. Both the Russian and the Indian railway systems were by then well developed up to the points likely to be the termini of a Trans-Persian line. The Russian system reached Julfa, on the Russo-Persian frontier in the Caucasus. During the war this line was carried thence southward into the region east and south-east of Lake Urumia. The Indian rail-way system, on the borderland of India and Persia, was similarly much extended and improved during the war. A new agreement which was negotiated between England and Persia specially provided for British assistance in the development of Persian natural resources and particularly for the extension and improvement of Persian roads suitable for motor traffic, but the agreement came to naught.

The Foreign Minister of Persia, or Iran as it is now called, visited New Delhi in November, 1935, for informal discussions with the Government of India with a view to enlisting British help in the development of rail communications in Eastern Persia. The development thus envisaged was of a new Persian railway system linked with the British line running from Quetta, through Nushki, towards the Baluchistan-Seistan frontier. The Quetta-Nushki line was Seistan frontier. The Quetta-Nushki line was extended across the Seistan border into Persia during the Great War. Its terminus was then at Duzdap (or Zahidan), in Persia. It has long ceased to be used further towards Persia than Nokkundi, in Baluchistan. The informal dis-cussions did not crystallize into an agreement or formal undertaking on either side,

There remains the possibility of linking the Russian and Indian railway system by way of Afghanistan. The suggestion has often been made in recent years that the Russian line from Mery to Herat, on the northern frontier of Afghanistan, should be linked to the Indian line which proceeds from Quetta to the Afghan border on Chaman. What the present Afghan Government think about the matter was not shown up to the time this article was written, but the Into the sead of the Pennau 1917. The system ment Muns about the moves was not some consists of a subtree gauge in from Busars et up to the time this action was written, but the wards to Baghdad, the line passing a consil Indian North-West Frontier does not suggest dearble distance westward to Kut1-Amar, the early removal of the strategic difficulties. The of historic fanne. From Baghdad the line completion of a broad-gauge line stending the runs estream alphoratmackly to the foot of the lindian railway system through the Khyber Pass pass through which the Persian road crosses to Landi Khann, at its western extremity, opens the frontier of that country. A line branches a prospect of further possible rail connections off in the neighbourhood of Kitri in the direction with Afghanistan.

Britain's special interests in regard to at the opening of the Karun Valley, where the Innian communications have hithered pri-Karun River runs into the Shat-el-Arab, just marily been associated with lines running inland from the Persian Gulf, to supersect the old mule routes. Special importance has for many years been attached to the provision of a rulway from Mchammerate case, and the provision of a rulway from Mchammerate, Valley and has a large tract there.

The great sepoy army of india originated in the small establishments of guards, known as peons, enrolled for the protection of the facto-ries of the East India Company; but sepoys were first enlisted and disciplined by the French, who appeared in India in 1665. Before this detachments of soldiers were sent from England to Bombay, and as early as 1665 the first for-tified position was occupied by the East India Company at Armagon, near Masulinatam. company at Armagon, near Masulipatam. Madras was acquired in 1640, but in 1654 the garrison of Fort St. George consisted of only ten men. In 1661 Bombay was occupied by 400 soldiers, and in 1668 the number was only 285 of whom 93 were English and the rest French, Portuguese and Indians.

After the declaration of war with France in 1744 the forces were considerably increased, but this did not prevent the French capturing Madras in 1746. Following the French example, the English raised considerable sepoy forces and largely increased the military establish-ments. In 1748 Major Stringer Lawrence landed at Fort St. David to command the forces of the Company. The English foothold in India was then precarious and the French under attacks Dupleix were contemplating fresh It became necessary for the English Company to form a larger military establishment. The new commandant at once set about the organisation and discipline of his small force, and the garrison was given a company formation. This was the beginning of the regular Indian Army of which Lawrence subsequently became Commander-in-Chief. In Madras the European mander in-unier. In madras the European companies were developed into the Madras Fusiliers; similar companies in Bengal and Bombay became the 1st Bengal and 1st Bompointag became and its bengat and its boilt bay Fusiliers. The native infantry were simi-larly organised by Lawrence and Clive. By degrees Royal Regiments were sent to India, the first being the 39th Foot, which arrived in

Struggle with the French.-From this time for a century or more the army in India was engaged in constant war. After a prolonged war with the French, whom Dupleix had by 1750 raised to the position of the leading power in India, the efforts of Stringer Lawrence, Clive, and Eyre Coote completed the downfall of their rivals, and the power of England was established by the battle of Plassey in Bengal; and at Wandewash in Southern India, where the French were finally defeated in 1761. A number of independent States, owning nominal allegiance to the Emperor at Delhi, had risen on the decline of the Mughal Empire, some ruled by Mahratta Princes and others by Musalman adventurers such as Hyder Ali of Mysore, A prolonged struggle ensued with the latter and his son and successor Tipu Sultan, which ended only with the defeat and death of Tipu and the capture of Seringapatam in 1799.

Reorganisation of 1796.—In 1796 the Indian armies, which had been organised on the Presidency system, were reorganised. The European troops were 13,000 strong and

The great sepoy army of India originated in | the Indians numbered some 67,000, the infantry being generally formed into 75 regiments of two battalions each. In Bengal, regiments were formed by linking existing battalions of ten companies each with large establishments of English officers. The Madras and Bombay armies were at the same time reorganised on similar lines, and cavalry and artiflery comnanies were raised.

In 1798, the Marquis Wellesley arrived as Governor-General, firmly imbued with the necessity of destroying the last vestiges of French say or uescroying the last vesuses of French influence. In pursuance of this policy he reduced Mysore, where Tipu was intriguing with the French, and then turned his attention to the Mainatta States, in which Sindhia had established power over the Mughal Emperor at Delhi by means of a large regular army offi-cered by Europeans under the French adventucerea or surropeans unner the French adventile rer Perron. In campaigns against Sindhia in Hindustan by a British Army under General Lake, and in the Decean against that prince and the Raja of Berar by an army under General Wellesley, afterwards Duke of Wellington, the power of these Chiefs was broken in the battles of Laswari and Assaye. French influence was finally destroyed, and the Mughal Em-peror was released from the domination of the Mahrattas. Subsequently Holkar also reduced, and British power established on a firm footing.

Mutiny at Vellore.—The Indian Army had been from time to time subject to incidents of mutiny which were the precursors of the great cataclysm of 1857. The most serious of these outbreaks occurred at the fort of Vellore in 1806 when the native troops suddenly broke out and killed the majority of the European officers and soldiers quartered in the fort, while the striped flag of the Sultan of Mysore, whose sons were confined there, was raised upon the ramparts. The mutiny was suppressed by Colonel Gillespie, who galloped over from Arcot at the head of the 19th Light Dragoons, blew in the gate of the fort, and destroyed the muti-neers. This retribution put a stop to any further outbreaks in the army.

Overseas Expeditions.—Several Important overseas expeditions were undertaken in the early part of the nineteenth century, Bourbon was taken from the French : Ceylon and the Spice Islands were wrested from the Dutch, and Java was conquered in 1811 by a force largely composed of Bengal troops which had volunteered for this service.

In 1814, the Nepal War took place in which the brave Gillespie, who had distinguished himself in Java, was killed when leading the assault on the fort of Kalunga. The Gurkhas were overcome in this war after offering a stout resistance.

In 1817, hostilities again broke out with the Mahrattas, who rose against the British during the progress of operations against the Pindaris Practically the whole army took the field and all India was turned into a vast camp. The

Mahratta Chiefs of Poona, Nagpur, and Indore rose in succession, and were beater, respectively, as it Kirkee, Sibabild, and Mehidpur. This was the keep and the succession of the succession of the consideration of the succession of the succession of the the Punjah, to which our frontier now extended, our army came into touch with the great military community of the Sikhs.

In 1824 the armies were reorganised, the double-battalion regiments being separate and the battalions numbered seconding to the dates and the battalions numbered seconding to the dates are to the second to the se

The Indian Mutiny.—On the eve of the mutiny in 1857 there were in the Bengal Army 21,000 British and 137,000 Indian troops; in the Madnas Army 2,000 British and 49,000 Indian troops; and in Bombay 9,000 British and 49,000 Indian troops. The proportion and 45,000 Indian troops. The proportion and 45,000 Indian troops; and the supportion of the mutiny were many and various. Among these were the annexation policy of Lord Dalhousie, especially that of Oudh from which the greater part of the Bengal Army was drawn; interference with the Bengal Army was drawn; interference with the Simonacce; and lack of power on the part of commanding officers either to punish or reward. The final spart which first the revolt was the

introduction of a new cartridge. The multeds of those dary were supplied with a curting in which the powder was enclosed in a paper cover, which had to be bitten off to expose the powder to ignition. In 1857 a new cartridge was introduced with paper of a glazed texture which it was currently reported was greased with the fat of swine and oxen, and therefore undean alike for Minhammadans and Hindux, which was not without foundation of the servey skilled a glatators exploited this grievance, which was not without foundation, and added reports that flour was mixed with hone-dust and sugar refined with the blood of oxen.

Disaffection culminated in mutiny at Benhampur and in an outbreak at Burnetspore where sepoy Mangas Pande attacked a Burnetson officer. The next most serious manifestation was the refusal of men of the Srd Bengal Cavairy at Meernt to take the obnoxious cartridge. These men were tried and sentenced to long terms of imprisonment, their fetters being riverterns of imprisonment, their fetters and burned the houses of the Europeans and murdered many. The troops then went of to Delhi. Unfortunately there was in Meerut no senior officer capable of dealing with the situation. The European troops in the place control of the cont

The Europeans who did the Delhi was been a support of the motion of the motion of the motion of the Delhi Emperor was proclaimed suprement in India. The capital constituted a nucleus to which the troops who mutinied in many places flowled to the standard of the Mughai, but the best of the standard of the Mughai, but the support of the standard of the Mughai, but the standard of the Mughai, but the support of the standard of the Mughai, but the support of the standard of the Mughai, but the support of the support

Minor Campaigns.—During the period until 1879, when the second Afghan War began, there were many minor campaigns including, the China War of 1880, the Ambeyla Campaign, and the Abyssinian War. Then followed the Afghan War in which the leading finure was Lord Roberts. There were expeditions to Regard and Online and the State of This Campaign of 1897. There were also the prolonged operations which led up to or ensited upon departments which led up to or ensited upon Africa, and the expeditions to Links. But until 1914, since the Afghan War, the army of male, except that portion of the British gardings represent the survey of the process of the survey of

Reorganisation after the Mutiny.—In 1877 the East India Company ceased to exist and their army was taken over by the Crown. At this time the army was organized into three armies, viz: Bengal, Bombay and Madras, the total strength being 65,000 British and 140,000 Indian troops.

Several minor re-organizations took place during the following years, such as the linking of three Regiments together and the raising of class Regiments and Companies. In 1895 the next large reorganization took place. This was the abolition of the three Armies and the following the results of the results of the commonitaries were formed, ref: Punjob, Bengal, Madrias and Bombay.

Lord Kitchener's Scheme.—This system lasted until 1904 when under Lord Kitchener's re-organization the Madras Command was abolished and the Army divided into three Commands—the Northern, Eastern and Western, corresponding to the Punjab, Bombay and

Bengal Commands.

In 1907, Lord Kitchener considered that consequent on the delogation of administrative powers to Divisional Commanders, retention of Commands led to the command set of the commands led to delay in the despatch of business. The Command system was therefore abolished and India was divided into two Armies—the Northern and Southern—each near the command inspection and training of the troops, but was given no administrative responsibilities.

Early in the War both Army Commanders took the field and were not replaced until 1916 and 1917, when both had practically the same interest of the processors. It was not to the processor of the

The commands were increased to four in 1920, each under a General Officer Commanding-in-Chief.

Present System of Administration.

The essential features of the Army, as constructed on its present basis, will be found in "The Army in India and its Evolution," a publication issued in 1024 with the authority of the Government of India.

The Secretary of State, as one of His Majesty's ministers, has a special responsibility and authority in regard to the Defence administration in India.

The Secretary of State's principal adviser on Indian military affairs is the Secretary in the Military Department of the India Office. The post is filled by a scalor officer of the Indian Army with recent Indian experience.

The Milliary Scorciary is assisted by one since grade said follow, solected from the Indian Army. In order that he may keep in touch with the current Indian affars, the Milliary Scorciary is expected to visit India during the tenure of his office. In addition, by a practice thereing the solection of the process of the p

The superintendence, direction and control of the civil and military government of India are vested in the Governor-General in Conned, who is required to ray due obedience to all such who is required to ray due obedience to all such in respect of Defence administration the same authority and functions as they exercise in the same authority and functions as they exercise in the first phase of the representative institutions on formed upon India by the Montaguient Conference of the Indian Legislature of the Conference of the Indian Legislature.

Commander-in-Chief.-The authority in the chain of administrative arrangements is His Excellency the Commander-in-Chief. who by custom is also the Defence Member of the Viceroy's Executive Council. The appointment is held by His Excellency General Sir Robert A. Cassels, G.C.B., C.S.I., D.S.O., Indian Army, who succeeded Field-Marshal Sir Philip Chetwode. He is also a member of the Council of State. All the work connected with the administration of Defence, the formulation and execution of the Defence policy of the Government of India. the responsibility for maintaining every branch of the Army, combatant and non-combatant, in a state of efficiency, and the supreme direction of any military operations based upon India are centred in one authority,—the Commander-in-Chief and Defence Member. In addition, he administers the Royal Indian Navy and the Royal Air Force in India. The Commander-in-Chief is assisted in the executive side of his administration by 4 Principal Staff Officers, viz., the Chief of the General Staff, the Adjutant-General, the Quartermaster-General and the Master-General of Ordnance.

The Defence Department.—The Department is administered by a Secretary who, like other Secretaries in the civil departments, is a Secretary to the Government of India as a whole, possessing the constitutional right of access to the Viceroy, he is also for the purposes of Subsection 4, Section 20, 20 and the purpose of Subsection 4, Section 20, and the secretary to the Government of India in the Military Department. He also exercises the Government of India in the Military Department, He also exercises the General Convention Act, 1911, so far as that Act applies to India under the Order in Council No. 15th of 1016, He is assisted by a Deputy Of Military Lands and Candonments, Decorpt of Military Lands and Candonments, Decorpt Secretary (Revision) and two Assistant Secretaries.

The Defence Department deals with all army services proper, and also the administration

of the Royal Indian Navy and the Royal ing the orders of the Government of India are concerned. It deals also with all questions connected with the administration of Ecclesias-tical Affairs. The Defence Department Secretarist has no direct relations with commanders of troops or the staffs of formations subordinate to Army Headquarters : it has continuous and intimate relations with Army Headquarters in all administration matters and is responsible for the administration of Cantonments, the estates of deceased officers and the compilation of the Indian Army List. The Army administration is represented in the Legislature by the Defence Member in the Council of State, and by the Defence Secretary in the Legislative Assembly.

The Military Council—Is composed of the Commander-in-Chief as President, and the following members, namely: The Chief of following members, namely: The Chief of the General Staff, as Vice-President, the Adjutant-General, the Quartermaster-General, the Master-General of Ordnance, the Air Officer Commanding Royal Air Force, the Secretary to the Government of India in the Defence Department Government of India in the Dotenice Department and the Financial Adviser, Military Finance, representing the Finance Department of the Government of India. An Under-Secretary in Defence Department, acts as its Secretary. It is Government of India. An Onder-Secretary in Defence Department, acts as its Secretary. It is mainly an advisory body, constituted for the surpose of assisting the Commander-in-Chief in the performance of his administrative duties. It has no collective responsibility. It meets when convened by the Commander-in-Chief for the consideration of cases of sufficient importance and difficulty to require examination in conference. The heads of the minor independent branches of Army Headquarters and the directors of technical services attend when required.

Military Territorial Areas.

Indian Territory is divided in four commands each under a General Officer Commanding-in-Chief and the Independent District of Burma omer and commander. The details of the organisation are given in the table on the next page and it will be seen that Commands comprise 12 districts: 4 Independent Commands Comprise 12 districts: 4 interpendent Brigade Areas and 30 Brigades and Brigade Areas. The Northern Command, with its headquarters at Murree, coincides roughly with the Funjab and North-West Frontier Province; the Southern Command, with headquarters at Poona, coincides roughly with the Bombay and Madras Presidencies and part of the Central and Madray resources and pare of the Central Provinces and Rajputana; the Eastern Command, with headquarters at Naini Tal, coincides roughly with the Bengal Presidency, the United Provinces, Bihar, Orissa and Assam; the Western Command, whose headquarters are at Karachi, covers Sind and Baluchistan.

The General Officer Commanding-in-Chief of each command is responsible for the command administration, training and general efficiency of the troops stationed within his area, and also for all internal security arrangements.

The distribution of the troops allotted to the commands and districts has been determined

constituted as it is in peace. With this end in view, the Army in India is now regarded as comprising three categories of troops:

(1) Covering Troops.

(2) The Field Army, (3) Internal Security Troops.

The role of the Covering Force is to deal with minor frontier outbreaks and, in the event of major operations, to form a screen behind which mobilisation can proceed undisturbed. The force consists of approximately 12 infantrybrigades with a due proportion of other arms.

The Field Army consists of 4 Divisions and 4 Cavalry Brigades. The Field Army is India's striking force in a major war.

Army Headquarters.

The organization of the Army Headquarters with the Commander-in-Chief as the head, is founded upon four Principal Staff Officers charged with the administration of --

(a) The General Staff Branch: (b) The Adjutant-General's Branch;

The Quartermaster-General's Branch : The Master-General of Ordnance Branch.

General Staff Branch.

C. G. S .- Lieut .- General Sir Ivo L. B. Vesev. K.C.B., K.B.E., C.M.G., D.S.O., Brit. Ser. D. C. G. S .- Maj .- Genl. C. J. E. Auchinleck. C.B., C.S.I., D.S.O., O.B.E., I.A.

berly, K.C.I.E., C.B., D.S.O. D. O. M. G .- Mai .- Genl. H. F. Salt, C.B., C.M.G., D.S.O., Brit. Ser.

D. S.&T.-Maj.-Genl. C. E. Edward-Collins, C.B. C.I.E., T.A.

This Branch is concerned with the specification, provision, inspection, management and issue of supplies i.e., foodstuffs, forage, fuel, etc., and is responsible for the following Services:—Transportation. Movements, Quartana Transport, Military Farms, Remounts, Veterinary, Garrison and Regimental Institutes. Also for the purchase of grains and of minor supplies not provided in bulk by the authority responsible for production and provision.

Master General of the Ordnance Branch. M. G. O .- Lt. Genl. C. C. Armitage, C.B., C.M.G., D.S.O., Brit. Ser.

D. M. G. O .- Maj-Genl. R. K. Hezlet, C.B., G.B.E., D.S.O., Brit. Ser.

This Branch controls the ordnance and clothing factories and is concerned with the provision, inspection, maintenance and issue of equipment and ordnance stores, clothing, and necessaries and conducts all matter relating to contracts in respect o food-stuffs, &c., and supply in bulk of general stores and materials. The Master-General is slso responsible for the design, inspection, and supply of guns, carriages, tanks, small arms, machine guns, ammunition, chemical warfare appliances, etc. He also deals with questions regarding patents, royalties and inventions.

There are other branches of Army Headquarters administered by officers who are not classified as Principal Staff Officers, but are not directly subordinate to any of the four Principal Staff Officers.

These are:

 MILITARY SECRETARY'S BRANCH.
 Mily. Secy.—Maj.-Genl. N. C. Bannatyne, O.B., C.I.E., I.A.

The Military Secretary deals with the appointment, promotion and retirement of officers ment, promotion and rearestent of differs holding the King's Commission, of officers of the Indian Land Forces, the selection of officers for staff appointments, and the appointment of officers to the Army in India Reserve of Officers. He is also the Secretary of the Selection Board.

(2) ENGINEER-IN-CHIEF'S BRANCH. E.-in-C.-Maj.-Genl. H. S. Gaskell, C.B.,

p.s.o., Brit. Ser.
The Engineer-in-Chief is the head of the Corps of Royal Engineers in India. He is responsible for Engineer operations and Engineer Services during war and peace, the preparedness for war of the Engineering services. The supply of Engineer stores during war and peace. The construction and maintenance of all military works and the constructional efficiency, accuracy and economy of all projects and designs.

In addition to the above, the Army Headquarters staff includes certain technical advisers, oiz., the Major-General, Cavalry, the Major-General, Royal Artillery, and the Adviser and

Secretary, Board of Examiners.

The duties of the Inspector of the Army Educational Corps, India and the Inspector of Physical Training are carried out by the Commandants of Army School of Education, India Belgaum and Army School of Physical Train. ing, Ambala, respectively,

Regular British Forces in India

The British cavalry and British infantry units of the army in India are units of the British service. No individual British service unit is located permanently in India. Units of the British Army are detailed for a tour of foreign service, of which the major part is as a rule spent in India. In the case of British infantry battalions the system is that one battalion of a regiment is normally on home service while the other is overseas. In the case of British cavalry the same arrangement cannot be applied. as one unit only comprises the regiment.

In Great Britain, in In Great Britain, in peace-time, units are maintained at an establishment smaller than that required for war. In India, the peace establishments exceed the war establishments in view of the fact that reserves of British personnel do not exist, and reinforcements must be obtained from Great Britain.

British Cavalry.—There are 5 British cavalry regiments in India. The establishment of a British cavalry regiment is 27 officers and 567 other ranks.

British Infantry .- The present number of British infantry battalions in India is 43, each with an establishment of 28 officers and 865 other ranks

In 1921, an important change was made in the composition of a British infantry battalion in India by the inclusion of a proportion of Indian combatant ranks. Battalions had always maintained a quota of Indian followers, but un to 1921 the combatant personnel was entirely British. In 1921, on the abolition of the Machine Gun Corps, eight machine guns were included in the equipment of a British infantry battalion. This number was increased to twelve in 1927. In 1929, a change of organisation was introduced, and the battalion now comprises:— Headquarters Wing-1 Support Company and 3 Rifle Companies. Each Rifle Company has 4 Lewis guns. The Support Company is organised into:—Headquarters and 3 Platons (all on pack) each of 2 Sections of 2 Vickers guns each. The peace establishment of Indian combatant personnel is fixed at one Indian officer and 42 Indian other ranks. The Support Company platoon, as it is called, is transferred en bloc to another British battalion when the battalion to which it was originally attached proceeds on relief out of India.

Royal Artillery.—Indians are employed as drivers and artificers in the Royal Horse Artillery and in field and medium batteries, as drivers, gunners and artificers in mountain batteries, and as gunners in heavy batteries.

The neace organisation of the artillery at the present day is as follows:

Royal Horse Artillery,-Comprises four independent batteries. Each battery is armed with six 18-pounder guns.

Field (Higher and Lower Establishment) Brigades. Four brigades on the higher establishment. each consisting of headquarters and four batte-Four brigades on the lower establishment, each consisting of headquarters and four batteries. A brigade on the higher establishment consists A brigade on the higher seach and 2 batteries and economy of all projects and designs submitof six 4.5" Howitzers each. A brigade on the of SIX 4.5 HOWITZETS CACH. A DIRECTO ON the four 18 prs. each and 2 batteries of four 4.5, Howitzers each.

Field (Mechanized) Brigades .- Two mechanised brigades each consisting of two batteries armed with four 18-pounder guns, and two hatteries armed with four 4.5" howitzers.

Indian Mountain Brigades.—Six brigades, each consisting of headquarters, one British light and three Indian mountain batteries, one unbrigaded mountain battery also one mountain Artillery Section for Chitral and one Survey Section. All batteries are armed with four 3.7" howitzers. The armaments of the Frontier posts at Fort Milward, Fort Salop, Fort Jhansi, Wana Mir Ali, Wana Thal, Chaman, Hindubagh, Landi Kotal; Shagai: Chakdara and Fort Sande-man are also manned by personnel of Indian Mountain Brigades, R.A.

Medium Brigades .- There are two such brigades. Three batteries in each brigade, two of which are armed with six 6" and one battery with four 60-pounder guns.

Heavy Brigade, -One battery at Bombay and Jemadar Quartermaster. one at Karachi.

Anti-Aircraft—Headquarters One battery, located at Bombay. The battery is armed with eight 3 inch, 20 cwt. guns.

Indian Regiment of Artillery.—The first unit of this new corps has been raised as a field artillery brigade and is designated "A" Field Brigade, Indian Artillery. The establish-ment of this brigade consists of brigade head-

medium and anti-air craft batteries and another centre at Ambala for Indian ranks of training of Indian personnel. A training battery to recruit and train Indian ranks for the Indian Artillery has been formed from 1st April 1936 by expanding the Royal Artillery Training Centre at Muttra. There is also a R. A. Boys Depot at Bangalore.

Engineer Services.

The Engineer-in-Chief.—The head of the Corps of Royal Engineers in India is directly responsible to His Excellency the Commander-in-Chief. The Engineer-in-Chief is not a Staff Officer, but the technical adviser of the Commander-in-Chief on all military engineering matters and is responsible for:

- (1) Engineer operations and engineer services during war and peace.
- (2) The preparedness for war of the engineering services.

(3) The supply of engineer stores during war and peace.

- (4) The execution and maintenance of all military works.
- (5) The constructional efficiency, accuracy ted by him.
- The Organisation.-The Engineer organisation of the Army consists of two main branches, the Sappers and Miners and the Military Engineer Services.
- The composition of the Corps of Sappers and Miners is as follows:

Queen Victoria's Own Madras Sappers and Miners, with headquarters at Bangalore. King George's Own Bengal Sappers and Miners, with headquarters at Roorkee, Royal Bombay Sappers and Miners, with headquarters at Kirkee.

The personnel of the Corps consists of Royal Engineer officers, Indian Army Officers from the late Pioneer Corps, Indian officers holding the Viceroy's commission, a certain number of British warrant and non-commissioned officers, Indian non-commissioned officers and Indian other ranks. Each Corps is commanded by a Lieut.-Colonel, who is assisted by a Superintendent of Instruction, an Officer-in-Charge, Workshops, an Adjutant, three Quartermasters, three Subadar-Majors, a Jemadar Adjutant and a

Field Troops are mounted units, trained to accompany cavalry, and are equipped to carry out hasty bridging, demolition and watersupply work. Field Companies are trained to accompany work. Field Companies are trained to accompanies infantry. Divisional Headquarters' Companies are small units containing highly qualified "tradesmen" and are trained to carry out technical work in connection with field workshops. Field Brigade, Indian Artillery. The establishing ment of this brigade consists of brigade head parters, 2 batteries each of 18-per, guns and batteries each four 4.5 howfusers.

Artillery Training Centres.—One contre at Mutta, for Indian ranks of R. H. A. and of lead ment of the Engineers, e.g., heavy bridging dwarfs, to find an ranks of R. H. A. and of the mental installation.

Military Engineer Services contro Light, Mountain and Heavy Artillery. These all military works in India, except in the centres were created for the recruitment and case of a few small outlying military training of Indian personnel. A training istations, which are in charge of Public Works stations, which are in charge of Public Works Department. They control all works for the Royal Air Force and all such works as are entrusted to them in respect of the Royal Indian Navy; and they are charged with all civil works in the North-West Frontier Province and Baluchistan under the orders, in each of these two areas, of the Governor and Agent to the Governor-General, respectively. They also control civil works in Bangalore, under the Mysore Government.

> The Engineer-in-Chief is assisted by a Deputy Engineer-in-Chief (Works) and a Deputy Engineer-in-Chief (Electrical and Mechanical). In each Command there is a Chief Engineer, in each command there is a Unit ingineer, while in the Northern Command a Deputy Chief Engineer administers Milisary and Civil works in the N. W. F. P. and is Secretary, P. W. D., to the Govt. of N. W. F. Province. The Chief Engineer, Western Command, is the

Secretary, P. W. D., to the Agent to the establishment of the Group consists of 7 officers Governor-General in Baluchistan. Both at and 21 airmen.

Army Headquarters and in Commands there are Staff Officers, R. E., and Technical Officers, the headquarters of each district there is a Com-mander, Royal Engineers, assisted in certain districts by A.Cs. R. E. Officers of the Barrack Department are also employed as District Stores Officers. Garrison Engineers are in charge of charges being divided into sub-divisions under Sub-divisional Officers. The sub-divisions are Buildings and Roads, Electrical and Mechaniof Furniture and Stores are assisted by store- a Lieutenant-Colonel in the Army. keeners.

Royal Air Force in India.

The Royal Air Force in India is controlled by the Commander-in-Chief in India as part of the defence services of the Indian Empire. The air Force budget is incorporated in Defence Services Estimates. The Commander of the Air Force, the Air Officer Commanding in India is an Air Marshal whose rank corresponds i.e., Station Headquarters under the command to that of a Lieut.-General in the Army. The appointment is now held by Air Marshal P. B. Joubert de la Forté, c.B., C.M.G., D.S.O.

The headquarters of the Air Force is closely associated with Army Headquarters and is located with the latter at the sent of the Government of India. The Air Officer Commanding has a headquarters staff constituted in six branches, namely, air staff, personnel, technical, stores, medical and chief engineer. The system of staff organisation is similar to the staff system obtaining in the Army. Broadly speaking, the duties assigned to the divisions mentioned are those which are performed by the General Staff Branch, the Adjutant-General's and Military Secretary's branches, the Quartermaster-General's Branch, the Medical Directorate and the Engineer in Chief's branch respectively, of Army Headquarters.

Subordinate formations,-The formations subordinate to the Royal Air Force Headquarters

- GROUP COMMAND, comprising 2 Wing Stations of two squadrons each, on a station basis.
- Command comprising squadrons not on a station basis, bombing squadrons. (iii) Station Commands.
- (iv) The Aircraft Depot.
- The Aircraft Park including a bomb-
- er transport flight.
- (vi) Two flights of Indian Air Force. (vii) R.A. F. Hill Depot, Lower Topa.
- Group Command .- The Group Command is known as No. 1 (Indian) Group Headquarters, and is located at Peshawar. The Group

Commander is a Group Captain, corresponding in rank to a Colonel in the Army. His staff is organised on the same system as that of the Readquarters of the R.A.F. in India, The

The subordinate units to No. 1 (Indian) Groun Headquarters are as follows :-

No. 1 Wing Station, R.A.F., Kohat. No. 2 Wing Station, R.A.F., Risalpur.

Army Co-operation Squadron at Peshawar.

Wine Command.-There one Buildings and from the action of the command only namely 3 (Indian) Wing, R.A.F.; overseers for Buildings and Roads and the located at Clakhala. The Wing Commander is Barrack Department subordinates in charge lan officer with Air Force rank corresponding to

> He is equipped with a staff organised on anproximately the same system as the Headquar-ters of a Group. The Wing Establishment consists of 4 officers and 13 airmen.

> Wing Station Commands,-There are 2 Wing station commands in India, one located at Kohat and the other at Risalpur. Each station consists of two squadrons on a reduced squadron basis with one administrative head. of a Wing Commander. The strength of the Station Headquarters is 37 officers and 220 airmen, while that of the two squadrons totals 26 officers and 127 airmer. The wing Station at Risalnur also administers the Parachute Section.

The Squadrons.—Of the 8 squadrons 7 are extended along the North West Frontier from Quetta to Risalpur, and one is stationed at Ambala

The squadron is the primary air force unit, and Inte squadron is the primary air force unit, and it consists, normally, of a Headquarters and three flights of aeroplanes. A flight can be detached temporarily but not permanently from its squadron as repair facilities, workshops and stores cannot economically be organised on anything less than a squadron basis. The squadrons headquarters comprises the of officers and other ranks required for the command and administration of the squadron as a whole; it includes the workshops and renair units, the armouries and equipment stores of the squadrons.

The number of aeroplanes in a squadron varies with the type of aeroplane with which the squadron is equipped; but speaking generally squadrons on a peace basis have twelve aero-planes t.s., four in each of three flights. This does not however apply to the twin engined

Of the 8 squadrons 4 are equipped with Bristol Fighters and four with Wapitis and they are allotted for distant reconnaissance and bombing duties, of the other four, which are allotted for Army Co-operation duties, two squadrons are equipped with Bristol Fighters and two with Wapitis aircraft.

Squadron Establishment,-The establishment of officers in a squadron consists of seven officers in the Headquarters, and fifteen officers allotted to flying duties, This allows a reserve of one officer for each of the operative flights.

The establishment of other ranks is 127 airmen.

The Aircraft Depot.—The Aircraft Depot may be conveniently described as the wholesale store and provision department of the store and provision departments of the Royal Air Force. Technical stores are received from the United Kingdom, and in the first instance, held by this unit. It is the main workshop and repair shop of the Force, where all engine repairs, and aircraft repairs of any magnitude are carried out. New aeroplanes received from the United Kingdom are also erected here. The Depot is located at Drigh Road, Karachi,

The Aircraft Park.—Relatively to the Aircraft Depot, the Aircraft Park may be described as a central retail establishment, intermediate between the squadrons and the Aircraft Depot. It receives stores from the depot and distributes them to the squadron. The and distances agent to the squatron. The Stocks held in the Park are, however, usually limited to items necessary at short notice for operations, and the quantities held are kept as low as distance from the depot and local con-ditions will admit. In war, an Aircraft Park is intended to be a mobile formation, though the aircraft Park in India cannot be made mobile under ordinary conditions. In peace, the Air-erstr Park is located at Lahore. In addition to the above functions, practically the whole of the motor transport bodies required for B. A. F. vehicles and all other mechanical transport vehicles in the command are built or repaired at Aircraft Park. The Transport fight is administered by this unit.

Composition of Establishments.—The personnel of the Royal Air Force in India consists of officers, warrant officers, non-commissioned officers and men in the ranks of the R. A. F. of the United Kingdom, and Indian artificers, Mechanical Transport drivers and followers of the Indian Technical and Followers Corps, R. A. F. in India. The officers are employed on administration, flying and technical duties but all with the exception of officers of the store and medical branches are required to be capable of flying an aeroplane. A proportion of airmen are also trained and employed as pilots for a period of five years, after which period, they revert to their technical trades. Apart from these airmen all warrant officers, non-commissioned officers and aircraftsmen are employed solely on technical duties. The only other flying personnel who are not officers or airmen pilots are air gunners and a certain percentage of wireless operators.

The warrant officers, non-commissioned officers and aircraftsmen are employed at all units. The personnel of the Indian Technical and Followers Corps are employed as follows :-

- . . Aircraft Depot. (a) Technical Section Aircraft Park. (artificers)
- (t) M. T. Drivers Section . All Units. . . All Units.
- (c) Followers Section

total establishment of the Royal Air Force in India is as follows :-.. 1,896 Airmen Indian Officers, other ranks .. 1,065 and followers .. 514 Civilians

The Medical Royal Air Force the Services .- In India. United as in Kingdom, the Air Force has a medical service of its own. Flying is carried out under conditions which differ widely from those on the ground. With the growth of aeronauties therefore, it was found necessary to create a separate department of medical science whose functions, broadly stated are to study the effect of flying upon the human constitution both mental and physical, to study also the effects of different forms of illness and physical disability upon flying efficiency and to apply in practical form the results ascertained. The essentical form the results ascertained. tial object in view is to save life by ensuring, so far as possible that those who fly are physically and psychologically fit to do so. The present establishment of the Royal Air Force Medical Service in India consists of 10 officers and 12 airmen. The Medical Administration is controlled by the Principal Medical Officer of the rank of Group Captain, on the staff of the Air Officer Commanding the R. A. F. in India.

Indian Air Force -This force came into existence on 8th October 1932, the date on which the first batch of six Indian cadets, after receiving training at Cranwell, obtained com-mission as Pilot Officers. These officers will form the first unit of the Indian Air Force. The training of cadets for the Indian Air Force cannot at present be undertaken in India, and arrangements have been made to continue their training at Cranwell.

Regular Indian Forces.

Indian Cavalry .- The present number of Indian cavalry regiments is 21,

The peace establishment of an Indian cavalry regiment comprises:

- 14 British officers.
- 19 Indian officers.
- 492 Indian non-commissioned officers and
 - 192 Followers.

31

- Indian Infantry .- The establishment of the Indian Infantry is constituted as follows: Battalions
- 18 Infantry Regiments consisting of .. 93 3 Regiments of Sappers and Miners .. 10 Gurkha regiments consisting of .. 20

120

The normal strength of an active battalion

	British Officers.	Indian Officers.	Indian other rank
Infantry	12	20	703
Gurkhas	13	22	898

The strength of an infantry training battallon signals, and is also responsible for the techthe regiment. The average is as follows :-

British Officers 10. Indian Officers 15, and Indian other ranks 780.

In 1932 it was decided that the Pioneer organization was no longer absolutely necessary as the duties on which Pioneers were employed e.g., road-making, etc., were now generally performed by labour. The whole organization that the opportunity has been taken to make a much medic addition to the various Engineer units the various types of the various ty (Sappers and Miners).

Reserves for the various units of the Indian Army have to be sufficient to provide for an actual shortage on mobilisation as well as for the maintenance of the mobilised unit at full strength for the first 8 months after mobilisation.

Reserve.-The conditions of the reserve are as follows :-

The Indian Army Reserve consists of private soldiers or their equivalent. It is comprised of class 'C' reservists for Indian Cavalry Artillery, Sappers and Miners, Signals and Infantry and class 1 for Gurkha Rifles. The new class 'C' reserve was introduced for Indian Cavalry, Artillery, Sappers and Miners and Signals with effect from 1st October 1932 and for Indian Infantry with effect from 1st May 1932. There still remain a number of classes 'A' and 'B' reservists which count against the authorised establishment of the reserve but these are gradually wasting

Training for Indian Cavalry, Infantry and Gurkha Rifles reservists is carried out biennially.

Reserve pay at certain specified rates is admissible from the date of transfer to, or enrolment, in the reserve. When called up for service or training, reservists receive pay and allowances, in lieu of reserve pay, at regular rates according to their arm of the service.

The establishment of reservists is fixed at present as follows :-

	255
	650
	2,000
٠.,	21,560
٠.,	625
٠	2,350
	2,731

The Indian Signal Corps.—The Corps is organised on the same lines as a Sapper and Miner Corps, with a headquarters for recruiting and training personnel, and detached field formations. units for the various army formations. 5 Armoured Car Companies. Each company The head of the corps is the Signal consists of Headquarters and 3 Sections and is Officer-in-Chief in the General Staff Branch armed with 16 armoured cars; 1 for Company

nical inspection of all signal units. A chief signal officer with similar functions is attached to the headquarters of each Army Command.
The British portion of the Corps has now been amalgamated with the Royal Corps of Signals,

The Signal Training Centre, India, is located at Jubbulpore, and is commanded by a Lieut.-Colonel, assisted by a staff, British and Indian, organised on very much the same lines as the headquarters of a Corps

The various types of field units and the number maintained are :-

Corps Signals Headquarters including Line and Wireless Company Cavalry Brigade Signal Troops Divisional Signals ... District Signals 3 Experimental Wireless Section ...

In addition, there is an Army Signal School which carries out the training of regimental signalling instructors.

Zhob Signal Section.

The formation of the District signals units was effected in 1926 with the transfer of Communications on the North-West Frontier to the Posts and Telegraphs Department. This transfer of communications also made feasible the raising of the 'A' and 'C' troops of Cavalry Brigade Signals to include a Wireless Section each the formation of two Corps Signal Headquarters. The District Signals are located at Peshawar, Waziristan and Kohat.

Royal Tank Corps.—Six armoured car companies arrived in India in 1921. Two more companies arrived in 1925. Two Group Headquarters were sanctioned in 1925. They were located as follows:-the Northern Group at Rawalpindi, this Group Headquarters com-manded companies in the Northern and Eastern Commands. The Southern Group at Poona. This Group Headquarters commanded companies in the Southern and Western Commands,

These have been abolished and their duties are carried out by the Commander, R. Tank Corps, Northern Command, so far as that command is concerned and by the Commandant, R. T. C. School, Ahmednagar, in respect of the other three commands. There is a school at Ahmednagar for the training of R. T personnel and the conduct of experiments. the training of R. T. C.

Organisations .- 3 Light Tank Companies. Each company consists of Headquarters and 3 Sections and is armed with 25 Carden Lloyd Light Tanks : 4 for Company Headquarters and 7 per section.

at Army Headquarters. He acts as a tech-Headquarters and 5 per section. The armoured nical adviser on questions connected with cars at present in India are of various types. The armoured

entegories of personnel and subordinate organisations:-

- (a) Officers and other ranks of the Royal Army Medical Corps serving in India;
- (b) Officers of the Indian Medical Service in military employment.
- (c) The Indian Medical Department, consisting of two branches, viz., (i) assistant surgeons and (ii) sub-assistant surgeons.
- (d) Queen Alexandra's Imperial Military Nursing Service.
- (e) The Queen Alexandra's Military Nursing Service for India.
- (f) The Army Dental Corps.
- (a) The Indian Military Nursing Service.
- (h) The Indian Hospital Corps.

Of these categories, the officers and men of the Royal Army Medical Corps and the Army Dental Corps, the assistant surgeons of the Indian Medical Department and the Queen Alexandra's Imperial Military Nursing Service and the Queen Alexandra for India a Nursing Service Military for primarily concerned with the medical care of British troops; while the officers of the Indian Medical Service, the sub-assistant sur-geons of the Indian Medical Department and the Indian Military Nursing Service are concerned, primarily, with the medical care of Indian troops. The Indian Hospital Corps serves both organisations.

Civilians of miscellaneous classes employed by the Army in Waziristan are given medical treatment in military hospitals, and arrange-ments have been made with the Headquarters of the Indian Red Cross Society for the medical treatment and care of cases amongst Indian soldiers and followers of the Indian Army for chronic diseases, such as tuberculosis, leprosy and diabetes.

Royal Indian Army Service Corps.—The Royal Indian Army Service Corps is the counterpart of the Royal Army Service Corps of the British Army. It has developed from the Commissariat Department of an earlier period, and its immediate predecessor was the Supply and Transport Corps, by which name the service was known up to 1923. The Royal Indian Army known up to 1923. The Royal Indian Army Service Corps which is under the control of the Quartermaster-General, is constituted in three main branches, namely : (a) Supply, (b) Animal transport, and (c) Mechanical Transport. The

eonsists of the following:-

(a) Field units-

a at T Companies consisting offs headquarters and 91 sections

Motor ambulance units 16 Independent Sections. Headquarters, Chaklala

Maintenance units-Headquarters, Maintenance Group

> Workshop Companies. Motor Transport Convoy (M. R. U.)

Heavy Repair shops. Central M. T. Stores Denot. Vehicle Reserve Denot. Experimental Section

Apart from units and vehicles employed in the conveyance of military stores, the mechanical transport service also provides motor ambulance convoys for hospitals and field medical units, and vehicles for other miscellaneous purposes. The total establishment now consists of 2 068 vehicles with 100 motor eveles.

The mechanical transport was taken over by the Indian Army Service Corps in 1927. At present the officers of the service are mainly drawn from the Royal Army Service Corps training officers in every branch of mechanical transport duties. The establishment of officers includes, however, a certain number of King's commissioned officers belonging to the Indian Army. The British subordinates of the ser-Service Corns.

The Ordnance Services which are under the M.G.O. may be broadly described as the agency whose duty it is to supply the army with munitions of war, such as small arms, guns, ammunition and other equipment of a technical military character, and also, under an arrangement introduced in recent years, with elothing and general stores other than engi-neering stores. A central disposal organisation is in operation under the control of the Master General of Ordnance to dispose of the Surplus Stores and waste materials of the various services of the Army and the Royal Air Force in India to the best advantage of the State.

Army Remount Department.-The following are among the most important duties for the remount service:—The provision of animais for the Army in India, The enumeration throughout India of all animals available for transport in war. The animal mobilization of all units, services and departments of the country zacion of all lines, services and depart-ments of the army. A general responsi-bility for the efficiency of all the animals of the army both in peace and war. The ad-ministration of the remount squadron formed in 1922 as a nucleus for expansion into three squadrons on mobilization. Breeding operations of a direct character.

The department is organised on lines corresponding to the remount service in the United | Indian combatant | Kingdom. Its composition is as follows: try 6 years in army.

mechanical transport establishment (The Remount Directorate at Army Head-The Remount Directorate at Army Head-quarters consisting of one Director and an Assistant Director. 4 Remount officers, one attached to each Command Headquarters, 6 Superintendents of Remount Depots, 5 District Remount officers of horse-breeding areas and the Ahmednagar Stud. 10 Assistant Remount officers and S Veterinary officers.

> Veterinary Services in India. - The Veterinary services are responsible for the vetering care, in peace and war, of animals of British troops, Indian cavalry and artillery, I. A. S. C. units, the remount department (excluding horsebreeding operations), etc. The vetermary services include: The establishment of Royal Army Veterinary Corps officers, serving on a tour of duty in India and those of the continuous service cadre. The establishment of warrant and non-commissioned officers, India Unattached List, and veterinary assistant surgeons of the Indian Army Veterinary Corns.

> The organisation consists of 20 veterinary hospitals, Class I, 24 veterinary hospitals, Class II, 25 branch veterinary hospitals, 9 Sick lines and 12 Indian Army Veterinary Corps Sections of personnel posted to veterinary hospitals during peace and forming a cadre for expansion on mobilisation to provide technical personnel for all veterinary units.

> Farms Department .- This department, which is under the control of the Quartermaster-General consists of two branches: i) The military grass farms.

provide fodder for the army.

(ii) The military dairy farms, for the provision of dairy produce for hospitals, troops

and families. Educational Services.—The education of the army is under the control of the Army Educational Corps and of Indian officers borne supernumerary to the establishment of units of the Indian Army. The establishment is as

follows including training schools :-

British	Indian	В. О.	1. 0.	Civilians.
officers.	officers.	174	89	500

Terms of service in the Indian army are as follows :-

Cavalry, 7 years' service in army and 8 years in the reserve.

Artillery, 7 years' service in army and 8 in the reserve for gunners and drivers (horse) drivers (mechanical transport) 6 years in army and 9 years in the reserve ; and 4 years' service in army for Heavy Artillery personnel, S. & M. Corps. 7 years' service in army and

8 in the reserve

Indian Signal Corps, 7 years' service in army and 8 in the reserve.

Infantry (except Gurkhas and trans-frontier personnel of the Infantry other than Orakzais); 7 years in army service and 8 years in the reserve. Gurkhas and trans-frontier personnel of

infantry, 4 years' service in army, Indian combatant personnel of British infan-

Animal transport personnel of the Indian Army Service Corps, drivers of mechanical transport and all combatants of the Army Veterinary Corps, 6 years' service in army and o in the reserve.

All combatants in the Works Corps, 2 years' service in army. Bandsmen, musicians, trumpeters, drummers, buglers, fifers and pipers, 10 years' service in

armv. Except in the case of those enrolled in the Works and of those who are non-combatants, all school-masters, clerks, artificers, armourers

engine drivers, farriers, carpenters, tailors and bootmakers, 10 years' service in army. The period laid down for service in the army to the minimum and may be extended. Combatants may be enrolled direct into the Reserve, in which case there is

no minimum period of service, but no one is the reserve for a longer period than is permitted by the regulations in force.

Frontier Militia and Levy Corps.— These forces are "Civil" troops, i.e., they are administered and paid by the Civil authorities and not by the Army. They are, however, officered by Officers of the Regular Indian Army. These forces were raised for duty on the North-West Frontier and at present consist of the following: -- Kurram Militia, Tochi Scouts, South Waziristan Scouts, Chitral Scouts, Scouts, Zhob militia and the Mekran Levy Corps.

The Auxiliary Force.

After the war, the question of universal training for European British subjects came up for consideration, and it was decided that in India, as elsewhere in the Empire, the adopin mans, as ensewhere in the halpire, the moly-tion of compilsory military sorvice would be underirable. It was recognised, however, that India needed some adequate auxiliary force, if only on a voluntary basis, that could be trained to a fairly definite standard of efficiency; and in the result, an Act to constitute an Auxiliary Force for service in India was passed in 1920. Under this Act membership is limited to European British subjects, and the liability of members for training and service is clearly defined. Military training is graduated according to age, the more extended training being carried out by the younger members, the older members being obliged to fire a musketry course only. It was laid down that military service should be purely local. As the form of service that would be most suitable varies largely according to localities, the local military authorities, acting in consultation with the advisory committee of the Auxiliary Force area, were given the power of adjusting the form of training to suit local conditions.

The Auxiliary Force comprises all branches

Indian Military establishments of the Indian | are under the command of the local military Army Ordnance Corps, 4 years' service in the authority, and the latter has the power of calling them out for service locally in a case of emergency. Their role is to assist in home defence. Training is carried on throughout the year. Pay at a fixed rate is given for each day's training and, on completion of the sche-duled period of annual training, every enrolled member of the force is entitled to a certain bonus. Men enrol in the Auxiliary Force for an indefinite period. An enrolled person is entitled to claim his discharge on the completion of four years' service or on attaining the age of 45 years. Till then he can only be discharged on the recommendation of the advisory committee of the area.

> The duties connected with the Defence Light Sections at Calcutta, Bombay and Karachi are performed by the Field Companies R. E. (A. F. I.) at those stations, assisted by Indian ranks of Sapper and Miner Units.

Indian Territorial Force.

The Territorial Force is one of the several allowed to serve in the reserve or in any class of aspects of the Indianisation of the military The force is intended to cater, amongst services. other things, for the military aspirations of those classes of the population to whom mili-tary service has not hitherto been a hereditary profession. It is intended, at the same time, to be a second line to and a source of reinforcement for the regular Indian army. Member-ship of the force for this latter reason carries with it a liability for something more than purely local service or home defence. It may, in certain circumstances, involve service overseas. The force is the direct successor of the Indian section of the Indian Defence Force created during the war. It has been modelled on the old militia in England. The essence of its scheme of organisation consists in training men by means of annual embodiment for a short period in successive years. By this means Indian Territorial Force units can be given sufficient preliminary training in peace to enable them, after a comparatively short period of intensive training, to take their place by the side of regular units in war.

The Indian Territorial Force consists at present of three main categories, provincial battallons, urban units and the university training corps units. The last are recruited from the staff and students of Indian universities. They are trained all the year round by means of weekly drills during terms and a period of 15 days in camp and are equipped with a permanent staff of British instructors. On ceasing to belong to a university, a member of the corps is discharged. In the case of the or the corps is discharged. In the case of the university training corps units there is no liability to perform the liability to render actual military service. Their purpose is mainly educative, to inculcate discipline and form character. But, incidentally, they are expected to be a source of supply of both officers and men for the provincial and urban units.

of the service, cavairy, artillery, engineer, of the members of the provincial battalions, initiatry—in which are included railway pat-accept the full liability for service which has alions,—machine gun companies, a Signal been mentioned. Seven such battalions were Company, and the Medical and Veteri-constituted in the first instance. The number's may Corps. Dults of the Auxiliary Force now eighteen and, though the unit establishment of the control of

ment has not been completely filled in all cases, the movement has alrendy achieved a greater degree of success than might have been anticipated at so early a stage. Although for the present the infantry arm only has been created with the addition of the I.T.F. Medical Branch, the force by law may include every

other army service.

Men enrol in the provincial battallons for a period of six years, the period being reduced to four years in certain cases. On the completion of the first period they can re-enrol period being reduced to four years in certain cases. On the completion of the first year, every man does preliminary training for one calendar month and during every year he receives one month's have our thing of the periodical training. Members of urban units have our thing the second periodical training. Members of urban with the second periodical training to the periodical training to the periodical training to the periodical training. Members and the United Provinces, one of which has since been dishanded; but in 1987, a fifther enrolled for a period of 6 years and train and mevery subsequent year 16 days' periodical training.

The Indian State Forces.

The Indian State Forces, formerly designated "Imperial Service Troops," consist of the military forces raised and maintained by the Rulers of Indian States at their own expense and for Government of India, and the Indian State of Indian State of India, and the Government of India have on many occasions received military assistance of great value from this source. But this rendering of such at its entirely at the Government, on the other hand, provide permanently a staff of British officers, termed 'Military Advisers and Assistant Military Advisers,' to assist and advise the Ending of their States.

After the war had ended, the Indian States, ilite the Government of India, undertook a military reorganisation, which in a number of cases, has already been carried out. The principal feature of the new arrangements, as adopted more or less generally, is that in future the Indian State Forces should be composed of three

rategories of troops, namely:

Class A.—Troops in this class are organised

Cuss A.—Iroops in this class are organised on the present-day Indian Army system and establishments, and, with some exceptions, are armed with the same weapons as corresponding units of the regular Indian Army.

Class B.—These troops consist of units which

Class B.—These troops consists of units which are, in most cases, little inferior in training and discipline to troops of Class A; but they are not organised on present-day Indian Army establishments. They have, as a rule, retained the system of the pre-war formations. Their standard of armament is pitched lower than that of Class A troops.

Class C.—These troops consist in the main of militia formations, which are not permanently embodied. The standard of training, discipline and armament, prescribed for this class, is generally lower than the standard prescribed for Class B troops. The authorized and actual strength of the Indian State Forces on the 1st October 1937, amounted to—

			Authorized strength.	Actual strength;
Artillery			1,355	1,351
Cavalry			9.118	8,375
Infantry			38.112	32,924
Camel Corps			466	456

Sappers			1.014	894
Transport Cor	ps		1,545	1,466
Gr	and tot	al	51.790	45 550

Officers.

There are two main categories of officers in the Indian Army; those holding the King's Commission and those holding the Viceroy's Commission. The latter are all Indians, apart from the Gurkin officers of Gurkin battallons, and have a limited status and power of command, both of withic are regulated by the Indian and have a limited status and power of command, both of withic are regulated by the Indian Army Within recent years several Indians have received King's Commissions, on entry into the Indian Army through the Royal Military College, Sandhurst and the Royal Military Academy, Woolwich.

King's Commissioned officers for the Indian Army are obtained from two main sources : from among the cadets who pass through the Royal Military College, Sandhurst, and by the transfer to the Indian Army of officers belonging to British units. The former is the principal channel of recruitment; the latter being only resorted to when, owing to abnormal wastage or for some other special reason, requirements cannot be completed by means of cadets from Sandhurst. A third source is from among University candidates. When a cadet has qualified at Sandhurst and has received his commission, he becomes, in the first instance, an officer of the Unattached List, and is posted for a period of one year to a British battallon or regiment in India, where he receives a preliminary training in his military duties. At the end of the year, he is posted as a squadron or company officer to a regiment or battalion of the Indian Army, Administrative services and departments of the army draw their officers from combatant units, as it has hitherto been regarded as essential that every officer should, in the first instance, receive a thorough grounding in combatant, duties, and acquire at first hand an intimate knowledge of the requirements of the combatant arms.

The promotion in rank of King's commissionci officers of the Indian Army is regulated by a time-scale up to the rank of Lieutenant-Colonel but is subject also to certain professional examinations and tests being successfully passed. The rank of Lieutenant-Colonel is in normal course attained at 26 years' service; promotion beyond this rank is determined by selection.

Indian Officers.—One of the most momentous decisions of the Great War, so far as the Indian Army is concerned, was that white rendered Indians eligible to hold the King's commission in the army. King's commission are obtainable by Indian gentlemen in three ways: (1) By qualifying as a cadet through the Royal Military College, Sandhurat or the Royal

Military Academy, Woolwich. Examinations | been under consideration. A press note was of suitable candidates for admission. the selection of specially capable and deserving Indian officers or non-commissioned officers of Indian regiments promoted from the ranks or those appointed direct as jemadar. These receive their commissions after training at the Royal Military College or Academy as Cadets and qualifying in the usual way. (3) By the be-stowal of honorary King's commissions on Indian officers who have rendered distinguished service. but whose age and lack of education preclude their being granted the full King's com-mission. The first two avenues of selection mentioned afford full opportunity to the Indian of satisfying a military ambition and of enjoying a military career on terms of absolute equality with the British officer, who, as a general rule, also enters the army by qualifying at Sand-hurst or Woolwich. Until 1931, ten vacancies at Sandhurst and three at Woolwich were reserved annually for Indian cadets.

A further measure adopted by the Government was the establishment of the Prince of Wales' Royal Indian Military College at Dehra Dun, a Government institution for the preliminary education of Indians who desire to qualify for the King's commission in the army through the Royal Military College, Sandhurst or the Royal Military Academy, Woolwich. The arrangements so far made enable a maximum of 70 boys to be in residence at the college at any one time, and the normal course of education is planned to occupy six years. In February 1923, it was decided that eight units of the Indian Army should be completely Indianized. The units selected for Indianization were: 7th Light Cavalry; 16th Light Cavalry; 2nd Bn., Madras Pioneers; 4/19th Hyderabad Regiment;5th Royal Battalion,5th Mahratta Light Infantry; 1/7th Rajput Regiment (Q. V. O. L. I.); 1/14thPunjab Regiment;2/1st Punjab Regiment.

In 1932 a considerable advance in the Indianization of the Army was made by the announcement that it was intended to Indianize a Division of all Arms and a Cavalry Brigade. In order to implement this decision, the following units have been marked for Indianization : and Cavalry, 5/2nd Punjab Regiment, 5/6th Rajnutana Rifles, 5/8th Punjab Regiment, 5/10th Baluch Regiment, 5/11th Sikh Regiment, 4/12th Frontier Force Regiment, and 6th Royal Battalion, 13th Frontier Force Rifles, in addition to units of Indian Artillery, Engineers, etc., together with the usual complement of anciliary services, to make up a complete Division. The Indian Regiment of Artillery has been formed on the 15th January 1935 and the first unit of this new corps has been raised as a field artillery brigade. This brigade is designated "A" Field Brigade, Indian Artillery.

In order to train officers for the Indian Army of the future, the Indian Military Academy at Dehra Dun was opened in October 1932. It will provide officers for all arms cavairy, in-fantry, artillery and signals. The first batch of officers passing out of the Academy received their commissions on the 1st February 1935.

Indian Military Academy.—How to improve the quality of candidates for the Indian Military Academy at Dehra Dun has recently

Military Acquemy, woodward. Administration listing by the Defence Department in October, (2) By 1936, in which the problem was examined in detail. It consisted of a memorandum which had been prepared on the subject by a Committee consisting of members of both Houses of the Central Legislature, and of a careful reply to this memorandum by the Commander-in-Chief, Sir Robert Cassels. The Committee was constituted as a result of a debate which took place in the Council of State, during which the present difficulty in obtaining candidates of the

right type for the Academy had been discussed. The members of the Committee prefaced their memorandum by stating in general terms that they did not agree with the policy being followed with regard to the Indianization of the Army, since they thought that the process could be speeded up. They then made observations and suggestions on various points—as, for example, that the provision under certain conditions for a refund by parents of part of the cost of training young officers was too extensive; that more scholarships should be granted to cadets of the scholarships should be granted to caders of the Academy by Local Governments; that the fees charged by the Academy should be reduced; that passage of the final examination of the Prince of Wales' Royal Indian Military College by students who did not gain admission to the Academy should entitle them to admission to the Universities; that the activities of the the Universities; that he accurates of the University Training Corps should be expanded; that more Indians should be admitted to the Staff College; and that the problems created by the disparities in age between British and Indian officers of similar rank should be favourably dealt with

The Commander-in-Chief, in reply, expressed gratitude to the Committee for their work and for the studied moderation and reasonableness of their recommendations. Some of these recommendations he accepted, and he undertook that others would be fully and sympathetically considered. He asked the Committee not cally considered. The assett the containance and to expect startling results from the acceptance of certain of their recommendations, since the process of expanding the field of choice and improving the quality and quantity of the candidates for cadetships must inevitably be gradual, and depend largely on public opinion.

Training Institutions

The following institutions exist in India for the higher training of military personnel and for the education of instructors for units:-Staff College, Quetta,

Senior Officers' School, Belgaum. School of Artillery, Kakul. Equitation School, Saugor. Small Arms Schools (India), at Pachmarhi

and Ahmednagar. Army School of Physical Training, Ambala Army School of Physical Training, Ambusia Army Signal School, Poona. Royal Tank Corps School, Ahmednagar. Army School of Education, Belgaum. Chemical Warfare School, Belgaum. Army School of Cookery, Poons.

Army Veterinary Schools, Ambala and Poona, Indian Army Service Corps Training Establishment, Rawalpindi. Indian Army Ordnance Corps School of

Instruction, Kirkee.

the units throughout the army a constant supply of officers, warrant officers, non-commissioned officers and men, provided with a thorough up-todate knowledge of various technical subjects. and with the ability to pass on this knowledge.

Following the procedure adopted at Home, the Small Arms and Machine Gun Schools were amalgamated in February 1927. Instruction in the rife, light gun, etc., is carried out at Pachmarhi and in the machine gun at Ahmednagar.

The King George's Royal Indian Military Schools at Jhelum, Jullundur and Ajmere, and the Kitchener College, Nowgong, also exist for the education of the sons of Indian soldiers with a view to their finding a career in the Indian Army. The latter at present assists in the training of Indian N.C.Os. for promotion to Viceroy's Commission. The Prince of Wales's Royal Indian Military College at Dehra Dun exists for the preliminary education of Indians who desire to qualify for the King's Commission in the Army through the Indian Military Academy.

Army in India Reserve of Officers. Previous to the Great War there existed what was called the Indian Army Reserve of Officers, a body of trained officers available to replace a source of the Indian Army. The war proved that for many reasons this reserve did not the North-West Frontier, but the Gardwalls fully meet requirements and in 1922 the Army and Kunaonis are equally good mountaineers. in India Reserve of Officers was constituted.

The revised Regulations for the A. I. R. O. published in 1934 provide that the following gentlemen may be granted commissions in the Reserve:-

(1) Ex-Officers who, having held King's commission in any Branch of His Majesty's British, Indian or Dominion Forces, either naval, military (including the Auxiliary Force (India) and Indian Territorial Force) Marine or Air, have retired therefrom and are no longer liable for service therein, and who are resident in India, Burma or Ceylon.

(2) Civil officials of gazetted status serving under the Government of India or a local Government, whose services can be spared in the event of general mobilization being ordered. (3) Private gentlemen who are resident

in India, Burma or Ceylon.

Ceylon Government officials are not eligible for appointment to the Army in India Reserve of Officers.

Applicants for Category-Medical (includes Dental) must possess a qualification registrable in Great Britain and Ireland under the Medical Acts in force at the time of their appointment.

Dental applicants must possess a qualification registrable in Great Britain and Ireland under the Dentists Acts in force at the time of their appointment.

Applicants for Category-Veterinary must be in possession of the diploma M.R.C.V.S. The strength of the Reserve on the 1st January 1938 was 922.

Indian Army have hitherto been drawn mainly sappers and Miners, and done their duty well from the north of India, but the experiences in every campaign in which they have been of the great war have caused some modifica- engaged.

The object of these Schools is to ensure to all tions in the opinions previously held as to the relative value of these and other fighting men. The numbers of the various castes and tribes enlisted in the Army have since the war un-dergone fluctuations, and it is not possible at present to give exact information as to their proportions. Previous to the war the Sikhs contributed very large numbers both to the cavalry and infantry, and the contribution of the Gurkhas was also large. The Sikhs, who inhabit the Punjab originated in a sect founded near Lahore by a peasant in the early part of the sixteenth century and in the course of a hundred years grew into a formidable militant power. Muhammadans of various races contribute a still larger proportion to both the cavalry and infantry. These are drawn both from the north and the south of India, as well as from beyond the They are all excellent fighting men. Frontier. hardy and warlike, who have furnished soldiers to all the great powers of India for many hundreds of years. As cavalry the Muhammadans are perhaps unequalled by any other race in the East. being good horsemen and expert men-at-arms.

> Next in point of numbers are the Gurkhas of Nepal, of whom there are twenty complete battalions, which during the war were con-siderably increased. As fighters in the hills

> The professional military caste of India from time immemorial has been the Rajput, inhabiting not only Rajputana but the United Provinces and Oudh. Of fine physique and martial bearing, these warriors of Hindustan formed the backbone of the cld Bengal Army, and have sustained the English flag in every campaign in the East. Their high caste and consequent prejudices in no respect interfere with their martial instincts and efficiency in war. They furnish many battalions. The Garhwalis are Hill Rajputs, good and gallant soldiers, who have proved themselves equal to any other troops on the field of battle and have established an imperishable record in the war both in Europe and in the East. The two battalions which risted in 1914 have since peen necreased. The Jats are a fine and warlike race of Hindus found in the Delhi and Rohtak dispeople who held out so bravely at Bharatpurand repelled Lord Lake's army in 1805. They have proved themselves good soldiers on the battlefields of Europe. Dogras are good and steady soldiers found in the hilly districts of the Punjab. They fought well in Flanders and in Mesopctamia.

> Among those who have rendered signal and gallant service in the war are the Mahrattas of the Deccan and the Konkan, who have revived thereputation held by their race in the days of Shivaji, the founder of the Mahratta Empire. It is probable that their proved efficiency in war will lead to their recruitment in larger numbers in future.

In addition to the castes that have been men-The Fighting Races. —The fighting classes tioned, other caste men from the south and other that contribute to the composition of the parts of India have filled the ranks of the

for service in Waziristan.

A large number of Indian Officers and men were also granted Foreign decorations,

Summary of India's Effort in the War .-

During the war the Victoria Cross was figures showing the extent of India's contri-swarded for conspicuous gallantry to 2 Indian button in terms of men. On the outbreak of efficers, 4 non-commissioned officers and 6 war, the combatant strength of the Indian other ranks of the Indian Army. The Military Cross was awarded to 90 Indian officers for distinguished service rendered during the Great War and to 3 Indian Officers of the Stroke of the S Of the number, 352,000 were sent overseas. As regards non-combatants, the pre-war strength was 45,000; an additional 427,000 were enrolled during the war and 391,000 were sent overseas. The total contribution of Indian personnel has thus been 1,457,000, of whom 943,000 Summary of India's Effort in the War—i sound has thus been 1,457,000, of whom 943,000, In a despatch by the Commander-in-Chief has served overseas. Casualties amounted published in July, 1919, the whole operations to 108,504, which include 38,600 deaths from of the Indian Army during the war are review—all causes. The number of animals sent overed. His Excellency gives in it the following seas was 175,000.*

Budget Expenditure on National Defence.

A part of the Defence expenditure on the Indian Budget is incurred in England, the Indian Ranger is incurred in England, the nature of such expenditure being indicated in the detailed Tables of Army, Navy and Mil-lary Engineer Services expenditure. This expenditure is met by transfer of funds from expenditure is met by transfer of funds from India. From the last April, 1920, to the size March, 1927, the accounts were prepared on the basis of the rate of 2.p. per rupe for the conversion of English sterling transaction into rupes. From the last April, 1927, the accounts expenditure for Millitary purposes.

are being prepared at the standard rate of 1s. 6d. per rupee.

As a rule, the receipts collected by the various departments are not set off against expenditure as appropriations in aid, but are

contribution towards the recruiting and training expenses in England of the British troops and airmen who serve for a part of their time in India. The Tribunal has also examined India's counterclaim to a contribution towards the cost of her defence expenditure.

The Tribunal was an advisory body which mot in November with instructions to report to the Prime Minister. The Chairman was to the Prime Minister. The Chairman was Sir Robert Garran, until recently Solicitor-General in the Commonwealth of Australia. Lord Tomlin and Lord Dunedin were nominated by His Majesty's Government, and Sir Shadi Lal, Chief Justice of the Punjab High Court, and Sir Muhammad Sulaiman, the Senior Puisne Judge of the High Court of Allahabad, by the Govern-ment of India.

The matters on which the Tribunal will make recommendations have been subjects of controversy for many years, and, as was recognized in the Report of the Simon Commission, the issue bears upon the great constitutional problem now under consideration. One reason for the connexion is the heavy burden of the cost of defence upon India. Taking the Central and Provincial Governments together, it amounts to 29 per cent. of the total expenditure; and if the Central Government alone is considered it amounts to 54 per cent. These calculations take account of net receipts only from semi-commercial undertakings such as railways, posts, and

Cost of the Army.—A Tribunal was set up a capitation rate of £10 on every British soldier in 1932 to investigate the amount of India's sent to India was fixed. This worked out at an average annual sum of, roughly, £631,000.

In 1870 objections were raised by both sides to the £10 rate, and until 1878 India made payments on account averaging £440,000 per annum. An Act of Parliament confirmed these amounts as full payment, with the effect of writing off outstanding War Office claims. In 1890 the capitation rate was fixed at £7 10s. Meanwhile the British forces in India had been substantially British forces in India had been substantially increased; and the abrect rate represented an increased and the abrect rate represented an interest of the presided over by Lord Justice Romer was appointed in 1907. It held that the capitation charge was justified in principle. In the representation of the principle. In the contract of the principle of the principle. In the principle of the princi the rate was raised to £11 ss., the annual charge on India being thereby increased by about £300,000. During the War India met this llability as part of her normal military expendi-ture, and all extraordinary costs arising from the employment of Forces from India In the various theatres of War were mot by the British Ex-chequer, in accordance with decisions of Parliament.

The great increases in rates of pay and cost of equipment led to the capitation rate being raised in 1920 to £28 10s. Since 1924 India has paid on account each year £1,400,000, compared with War Office claims, backed by elaborate details which amounted in 1926-28 to Capitation payments.—When, after the the provisional payments by about £300,000 Muthy, the troops of the East India Company annually. The Government of India has disputed were amalgamated with those of the Crown the bill.

The Strength of the Army.

BRITISH TROOPS.

The following table gives the average strength of British troops, and the main nots as regards their health for the quinquennial periods 1910-14 and 1915-19 and for the years 1920 to 1929:—

INDIAN SOLDIERS' BOARD.

The Indian Soldiers' Board is probably the most important and valuable non-official institute on an inform footing, with the civil nead of the tion connected with the Indian Army. It was District as President and a serving soldier as constituted on 7, February 1910, in place of the Military Vice-President. The latter was either Central Recruiting Board, the purpose of which a Recruiting Officer or an Indian Army Officer was fulfilled with the end of the War. Its detailed by Army Headquarters—except in the object was at the outset to deal with a number North-West Frontier Province where the of post-war problems—the finding of employment for soldiers released from the colours, the grant or rewards to those who had rendered distin-guished service, the relief of the dependents of those who had lost their lives in the war and of those who were incapacitated for further or those who were meapadated for interests ervice, the education of soldiers' children and the safeguarding of the general interests of soldiers and their dependents, all matters demanding immediate and close attention. As years passed, the Board had gradually to adjust itself to normal peace conditions and it was decided to maintain it permanently for a series of duties which have from time to time expanded and developed.

The Board is composed of three members of H. E. the Viceroy's Executive Council nominated by H. E. the Viceroy, of whom one is President, H. E. the Governor of the Punjab, the Defence H. E. the Governor of the Punjab, the Defence Secretary, the Adjutant-General in India and the Financial Adviser, Military Finance, with the Auditor-General in India, as an additional member. An Under-Secretary in the Defence Department acts as Secretary to the Board, in addition to his other duties. The President and Members of the Board at the beginning of 1938 were as follows :-

PRESIDENT,-The Hon'ble Sir James Grigg. K.C.B., K.C.S.I., Finance Member to the Government of India.

MEMBERS .- H. E. Sir Herbert-William Emerson, G.C.I.E., K.C.S.I., C.B.E., I.C.S., Governor of the Punjab; The Hon'ble Sir Nripendra Nath Sircar, K.C.S.I., Law Member of the Government of India: The Hon'ble Chaudhri Sir Zafrullah Khan, K.C.S.I., Commerce and Labour Member of the Government of India; Lieut-General of the Government of India; Lieur-General SIr Roger Wilson, K.O.S., D.S.O., M.O.; MR. O. Maol, G. Ogilvie, O.D.E., I.O.S., Defence Secretary to the Government of India; Mr. A. Rowlands, M.B.R., Financial Adviser to the Commander-in-Chief; SIr Ernest Burdon, K.O.L.E., O.S.I., I.O.S., Auditor-General.

SECRETARY.-Mr. J. S. H. Shattock, I.C.S., Under-Secretary (Army), Defence Department,

The Board has its seat at New Delhi/Simla and co-ordinates the activities of a large number of kindred organizations in the various areas from which the bulk of the Indian Army is recruited. Under the control of these Provincial Boards there exists throughout the country a network of subordinate organizations, includ-ing District Soldiers' Boards, Tehsil or Taluka Committees and other kindred bodies. There Committees and other kindren codies, incre are Provincial Soldiers' Boards in Bihar, Bombay, Delhi, Kashmir, Mysore, North West Frontier Province, Punjab, Rajputana and the United Provinces.

North-west Frontier Province where the President was a soldier and the Vice-President a civilian. Five years' experience showed the organization to need revision if it was to serve its purpose in the most efficient manner. It was found, for instance, that Boards in areas where recruitment had, temporarily at any rate, stopped began to decline in value through lack of attention and that the Military Vice-Presidents of Boards, mostly drawn from active batta-lions, could not maintain continuity of policy because of their frequent changes of station. because of their inequal changes of Scalent, Reorganization was therefore undertaken in 1936. This was achieved without interference in the internal constitution of the Boards. To preserve continuity and provide constant supervision, it was decided to make Indian Infantry Training Battalions and similar units, which are not liable to changes of station, responsible for providing the Military Vice-Presidents for the District Soldiers' Boards in their neighbourhood. At the same time full advantage was taken of the experience and influence of Recruiting Officers, who were appointed addi-tional Vice-Presidents of District Soldiers' Boards in their Recruiting areas. Funds were Boards in their Recrusing areas. Funds were made available for the allotment of travelling allowances to Military Vice-Presidents of Boards in the Punjab, U. P., Delhi, Bombay and the Central Provinces, to tour their districts or to sanction allowances to members touring on Soldiers' Board business,

The whole organization shortly after its revision improved out of all recognition. The District Soldiers' Boards revived and the greatest importance is attached to an indirect result of this improvement, namely, the increase in the prestige of the ex-soldier among his fellow citizens and its enhancement, a fact particularly gratifying in those areas where recruitment is not now being carried on.

The following are the objects and duties of the District Soldiers' Boards :-

- (a) Constantly to endeavour to promote and maintain a feeling of good-will between the civilian and military classes:
- (b) To give all possible assistance to the President of the Board in his capacity as head of the district in all administrative matters connected with the exsoldier or his family;
- (c) To demonstrate the benefit of and so promote the desire for mutual cooperation between ex-soldiers and civilian officials;

- (d) To represent and explain to the civil authorities all matters of particular moment to ex-soldiers that require the attention of the local administration;
- (e) Generally to watch over the welfare of the ex-soldier and his family, and the interests of serving soldiers absent with their units. As regards item (e), quoted above, the func-

tion of the Board and corresponding organizations cover a wide range and some of their main tasks are enumerated below :---

- (b) To communicate information regarding employment, facilities for training for civilian vocations and concessions open to discharged men, and to maintain registers of ex-soldiers desirous of obtaining employment :
- (c) To ascertain and intimate the whereabouts of an absent soldier to his news of all important matters affecting his family's welfares :
- (d) To procure legal advice in the case of a law suit against an absent soldier where there is no male member of his family capable of protecting his interests:
- (e) To assist an absent soldier's family in the event of disease or famine :
- (f) To assist ex-soldiers and their dependants in securing medals, pensions. arrears of pay, etc. :
- (g) To keep a watch on the adequacy of the number of pension-paying branch post offices, especially in hilly districts, and, if and when there is a need for more such offices, to bring the fact to notice;
- (h) To investigate cases of ex-soldiers invalided out of the Indian Army for chronic diseases such as tuberculosis. leprosy, diabetes, etc., and to report March 1936.

them to the Provincial Branch of the Indian Red Cross Society for medical assistance :

(f) To investigate applications for relief from the various military charitable funds.

Another leading development has been the institution of the "Welfare Scheme," the foundation of which is the network of District Soldiers' Boards, etc., acting under the orders of Provincial Soldiers' Boards, which have been created in all areas from which the Indian Army obtains recruits in any number, for the purpose of ensuring that the home interests of Indian soldiers and their dependents are specially (a) To circulate information regarding the looked after. The Board in 1986 allotted as an educational concessions available for experimental measure Rs. 106 a year for three years for the promotion of schemes of Rural Reconstruction in military villages in the Puniab.

One of the most important functions of the Provincial and District Soldiers' Boards is to find employment for ex-soldiers. The Government of India and Local Governments and Administrations have accepted the principle that preferential treatment should be accorded to ex-soldiers in this respect and as a result employment under Government was found for 76.639 individuals between the years 1922 and dependents and to communicate to him 1936. The Board especially appeals to private employers to assist as far as they can by engaging ex-soldiers. The Recruiting Officers at Delhi, Rawalpindi, Lahore, Jullunder, Lucknow, Ajmer, Poona, Peshawar and Kohat can supply reliable Indian ex-soldiers for most kinds of civil employment, especially guards of all descrip-tions, motor drivers, peons, chaprasis, drill and physical training instructors, rough-riders and polo orderlies. (Personal servants cannot be supplied). Applications should be sent to any of the above officers. Employers should, when applying for labour, furnish particulars as to wages, quarters, etc., and state the length of time the appointment can be held open. The various district soldiers' boards also maintain various district soldiers boards also maintain lists of reliable ex-soldiers desirous of employ-ment in their own districts. In their case applications should be sent to the Secretary of the Board.

> The Board on 31 December 1922 had the residue of the war fund, known as the Imperial Indian War Relief Fund, handed over to it. This formed the nucleus of its finances. The latter have since been husbanded with great success. The face value of the securities consti-tuting the fund amounted on 31 March 1937 to Rs. 17,19,700, bearing an annual interest of Rs. 60,189-8-0, as against Rs. 16,99,700 bearing an annual interest of Rs. 59.489-8-0 on the 31st

THE VICTORIA CROSS.

The announcement, made at the Delhi Durbar on going out to his Adjutant, and offered to in 1911, that in future Indians would be eligible crawl back with him on his back at once, for the Victoria Cross, gave satisfaction which this was not permitted, he stripped off his own was increased during the War and afterwards by the award of that decoration to the following:-

129th Bainchis.—On 31st October 1914, at Hollebeke, Belgium, the British Officer in charge of the detachment having been wounded, and the other gun put out of action by a shell, Sepoy Khudadad, though himself wounded, remained working his gun until all the other five men of the gun detachment had been killed.

Naick Darwan Sing Negi, 1-39th Garhwal Rifles.—For great gallantry on the night of the 23rd-24th November, 1914 near Festubert, France, when the Regiment was engaged in retaking and clearing the enemy out of our trenches, and, although wounded in two places in the head, and also in the arm, being one of the first to push round each successive traverse, in the face of severe fire from bombs and rifles at the closest range,

Subadar (then Jamadar) Mir Dast, 55th Coke's Rifles.—For most conspicuous ovac a nines.—ror most conspicuous bravery and great ability at Ypres on 26th April 1915, when he lod his platoon with great gallantry during the attack, and after-wards collected various parties of the Regi-ment (when no British Officers were left) and kept them under his command until the retirement was ordered. Jamadar Mir Dast subsequently on this day displayed remarkable. When his gun was knocked out by hostile courage in helping to curry eight British and fire he and his two belt-fillers held their Indian Officers into satety, whist exposed to ground, with rifles till ordered to withdraw. very heavy fire.

of the 2nd Leicestershire Regiment behind the first line German trench, and though urged by the British soldier to save himself. he remained ry. For most conspicuous brayery and devotion with him all day and night. In the early morn- to duty in thrice volunteering to carry messages ing of the 26th September, in misty weather, he between the regiment and brigade headbrought him out through the German wire, and, quarters, a distance of 1½ miles over open ground leaving him in a place of comparative safety which was under the observation and heavy lire returned and brought in two wounded Gurklasy of the enemy. He succeeded each time in delione after the other. He then went back in vering his message although on each occasion broad daylight for the British soldier and brought his horse was shot, and he was compelled to him in also, carrying him most of the way [in his horse our property of the way [in his horse of the way [in his her property of the way and being at most points under the enemy's fire.

another regiment lying close to the enemy contempt of danger during an attack. He with both danger limit as the Emphary's shaller a few officiar men succeeded, under intorior dire, the head already bandaged four wounded men. After bandaging his wounds he head cause from the adjutant of his own Regiment who realls from the adjutant of his own Regiment who realls from the adjutant of his own Regiment who realls who had attempted to put it out of soliton enemy were not more than one hundred yards she immediately. Without a mounth's heal-distant, and it seemed certain death to go out it that direction, but Lance-Nsick Laila insisted off the gun, and in spite of bombs thrown at him.

slothing to keep the wounded officer warmer and stayed with him till just before dark when Subadar (then Sepoy) Khudadad Khan, the returned to the shelter. After dark he carried the first wounded officer back to the main trenches, and then, returning with a stretcher carried back his Adjutant. He set a magni-ficent example of courage and devotion to his officers.

> Sepoy Chatta Singh, 9th Bhopal Infantry.-For most conspicuous bravery and devotion to duty in leaving cover to assist his Commanding Officer who was lying wounded and helpless in the open. Sepoy Chatta Singh bound up the officer's wound and then dug cover for him with his entrenching tool, being exposed all the time to very heavy rifle fire. For five hours until nightfall he remained beside the wounded officer shielding him with his own body on the exposed side. He then under cover of darkness, went back for assistance and brought the officer into safety.

Naick Shahamad Khan, 89th Punjabis.-For most conspicuous bravery. He was in charge of a machine-gun section in an exposed position in front of and covering a gap in our new line within 150 yards of the enemy's entrenched posttion. He beat off three counter-attacks, and worked his gun single-handed after all his men, except two belt-fillers, had become casualties. For three hours he held the gap under very heavy fire while it was being made secure. When his gun was knocked out by hostile fire he and his two belt-fillers held their With three men sent to assist him he then brought back his gun, ammunition, and one Rifleman Kulbir Thapa, 23rd Gurkha Rifles.—

It did between the first the factor is a significant of the factor is a significant of the factor is a significant with the fact man to go round each traverse, driving back the enemy until they were eventually forced to surrender. He was killed during this engagement.

on the very top of the hill when capturing one only after he was exhausted through three hours' of the machine guns single-handed, but all the continual effort and by loss of blood.

THE EAST INDIES SQUADRON.

Since 1903 a squadron of the Royal Navy, Gulf. By 1913 the position of the East Indies known as the East Indies Squadrov, has been squadron had considerably improved. maintained in Indian waters. It has natural battleship Swiftsure had taken the place of the ly varied in strength from time to time, second class cruiser which had been a flagshim In 1993 the squadron consisted of one second and another second class cruiser replaced the class and three smaller cruisers and four sloops or gunboats. In 1906, it consisted of two second class and two third class cruisers, and remained at this strength until 1910; when one is as follows:mained at this strencth until 1910: when one is as follows:—
second class cruiser was withdrawn and two "Norfold" (Plag), Cruiser, 9,850 tone;
smaller vessels substituted, and three cruisers "Emerald," Cruiser, 7,550 tone; "Emterprise,"
were lest from the Mediterranean to assist Cruiser, 7,550 tons; Escort Vessels "Shorcham,"
in the suppression of the arms traffic in the "Dideford," "Powey," and "Deptord."

The present composition of the East Indies Squadron (Fourth Cruiser Squadron)

India's Naval Expenditure.

From 1869 onwards India paid a contribution of varying amounts to the Imperial Governmat he consideration of services performed by the Boyal Kavy. Under arrangements which dates from 1990-7 the subsidy no 110,0000 a year was paid towards the uplesc of certain ships of the East India Squadron, which were not to be employed beyond prescribed limits, except with the consent of the Government of India. India's total naval expanditure is under half a million pounds annually. In 1938 India's contribution to the British Government was drop-ped on the understanding that the Royal Indian Navy would maintain six modern Secort vessels and be responsible for India's coast defence. The contribution was added to India's Naval budget.

The question of a new distribution of the burden of the cost of Imperial Naval Defence was discussed at the Imperial Conference in London in October—November 1926. The matter appeared to be one on which the delegates could form no new decision without further consultations in their respective capitals and no resolution was passed.

The Royal Indian Navy consists of a Depot Ship, 4 Escort vessels. 2 Patrol vessels and a Survey yessel.

ROYAL INDIAN NAVY.

The Royal Indian Navy (The Sea Service the plutes which infested the Indian coasts, under the Government of India traces its The first two slips, she Dragon and Roseander origins of a book as 1612 when the East India (or Osiander), were despatched from England Company stationed at Surat found that it was in 1612 under Captain Best, and since those necessary to provide themselves with armed days under slightly varying titles and of various vessels to protect their commerce and settle-strengths the Government in India have always ments from the Dutch or Portuguese and from maintained a sea service.

Bombay Indian Navy Bombay Marine

H. M. Indian Marine .. Royal Indian Marine .. 1892. 1934. Royal Indian Navv ...

India's Naval Force has always been most closely connected with Bombay, and in 1668 when the E. India Co. took over Bombay, Captain Young of the Marine was appointed Deputy Governor. From then until 1877 the Marine was under the Government of Bombay, and although from that date all the Marine Establishments were amalgamated into an Imperial Marine under the Government of India, Commanding.

During the War 1914-1918 Royal Indian Marine Officers were employed on many and various duties, Royal Indian Marine Ships "Dufferin," "Hardinge," "Northerook," "DUFFERIN," "HARDINGE," "NOETHEROOK,"
"LAWRENCE," "DALHOUSIE" and "MINTO" had their guns mounted and served as Auxiliary Cruisers. Officers also served in the Royal Navy in the Grand Fleet, Mediterranean North Sea, North Red Sea and Caspian Sea Fleets.

In addition to transport duties in Indian Ports, Officers were sent to Marseilles, East Africa and Egypt for such duties, and on the entry of Turkey into the War were employed on duties towing and manning River Craft and Barges to and in Mesopotamia, and it was necessary to enlist a number of Temporary

Reorganisation Schemes.—After the War the Government of India asked Admiral of the Fleet, Lord Jellicoe, who was visiting India, to draw up a scheme for the reorganisation of His valuable suggestions were the Service. unfortunately too ambitious for Indian finances and could not be accepted.

Shortly afterwards the Esher Committee arrived in India to report on the Indian Army and although the R.I.M. was not included in their terms of reference, they strongly recom-mended that the R. I. M. should be reorganised as a combatant service. The Government of India in 1920 obtained from the Admiralty the

The R.I.M. then fell upon hard times; money mittee necessitated drastic retrenchments, and duties. A close liaison is maintained between the working of the Montagu-Chelmsford reforms the Royal Indian Navy and the East Indies resulted in the Local Governments having to Squadron.

The periods and titles have been as follows:- | defray the cost of the work of R. I. M. ships 1612—1686 on their various stations, on lighthouse duties, transport work, carrying of officials, etc. The 1686-1830 Local Governments were naturally inclined to think that if they had to pay they would like 1830—1863 to have a say in the management, and that 1863—1877 if the work could be done cheaper locally, they 1803—1877 should arrange to carry out the duties them-1877—1892 sloves. Further, the Incheape Committee recommended that the three large troopships should be scrapped and all trooping carried out under contract, which would have left the Marine with only the Survey Department and the Bombay Dockyard.

A Combatant Service.—Happily for the Service, however, the Government of India in 1925 appointed a Departmental Committee under the Chairmanship of General Lord Rawlinson, in his capacity of Minister of Defence and Member of Council in charge of the Marine Portfolio, to submit a scheme for the reorganisa-Bombay has continued to be the headquarters tion of the Service as a combatant force. This and the official residence of the Flag Officer Committee recommended that the Service should be reorganised as a purely combatant Naval Service with the title of Royal Indian Naval Service with the title of Royal Indian Navy, with a strength in the first instance of a armed sloops, 2 patrol vessels, 4 mine-sween ing trawlers, 2 surveying ships and a depot commanded by a Rear-Admiral on the active list in the Royal Navy. The scheme was accepted by the Indian and Home Governments, and the necessary Act to permit India to maintain a Navy was passed through both Houses of Parliaments.

> To effect this change in the title, it was necessary to draw up a new Indian Naval Discipline Act and this had to be passed through the Assembly and Council of State in India,

necessary to emist a number of a component of Component o sembly with certain minor amendments but in response to a plea for circulation, the Government circulated the Bill,

> In August, the Bill was re-introduced and passed by the Assembly and Council of State. On 2nd October 1934 the Royal Indian Navy was inaugurated, the historic ceremony taking place in Bombay.

> The Royal Indian Marine which had rendered sterling service to India and the Empire in peace and war then ceased to exist.

services of Rear-Admiral Mawpy as Denominal Mawpy as January R.I.M., to draw up a scheme of reorganisation of the late Royal Indian status der was not adopted, and Admiral Mawpy resigned was not adopted, and Admiral Mawpy resigned the Empires, taval Forces and is under the command of a Fig. Officer of the Royal Navy. Its work in addition to training its Navy. The R.I.M. then fell upon hard times; money communications, etc., includes ushery pro-was scarce, the report of the Inchcape Com-tection in the Bay of Bengal and other Naval

In addition to the regular appointments in the ships of the Royal Indian Navy, and in H. M. I. N. Dockyard, the following appointments under the Government of India, Commerce Department, are held by the officers of the Royal Indian Navy:

BOMBAY.

Principal Officer, Mercantile Marine Department, Bombay District; Senior Nautical Surveyor, Junior Nautical Surveyor, Mercantile Engineer and Harbour Master.

Marine Department, Bombay District, Principal Engineer and Ship Surveyor, 2nd, 3rd and 4th Engineer and Ship Surveyors.

CALCUTTA.

Principal Officer, Mercantile Marine Department, Calcutta District; Nautical Surveyor. Mercantile Marine Department, Calcutta District, Principal Engineer and Ship Surveyor, 2nd, 3rd. 4th and 5th Engineers and Ship Surveyors.

MADRAS.

Principal Officer, Mercantile Marine Department, Madras District, and Engineer and Ship Surveyor.

KARACHI. Principal Officer, Mercantile Marine Depart-

ADEN.

ment, Karachi District. Port Officer.

CHITTAGONG.

Nautical Surveyor and Engineer and Shin Surveyor.

Agriculture.

The agriculture of the sub-continent of India with its wide range of physical and climatological conditions. There is scarcely any cultivated and of the temperate, sub-temperate or tropical cases which cannot be grown in some part of this vast country from the warm, humid coast-lands to the perennially temperate altitudes of its mountain ranges. Even in the phase of the cultivation of the cultivation of the district countries of the cultivation of the district countries with the more truly tropical crops are sense in the same areas during summer. Further variations in agricultural practice are to be found in the irrigated and non-irrigated tracts.

The total area of culturable land in India, excluding a forest area of 83 million acres, is about 440 million acres. The total gross cropped area, sown annually, approximates to 200 million acres of this vast area of cultivation, no less than 244 million acres are under cereal and pulse crops of all kinds, which supply tool and fodder for India's human population of 388 million and her animal population of 388 million and her animal population 301 million head of cattle, sheep and goats.

In Indian agriculture, the dominant climatological factor is the monsoon and, in most parts of the country, the total annual rainfall is precipitated between the months of June and October. The winter and early summer months are generally dry and high temperatures prevail in the months of March to June, prior to the break of the monsoon rains. Thus the agricultural season is naturally divided into two main subdivisions, the Kharif season of the monsoon and the Rabi season of the cold weather. Each of these seasons has its own distinctive crops. The greater part of the Indo-Gangetic plain and the northern tracts of the Peniusula are served by the main monsoon which falls between June and October. During these months the average rainfall for the whole of India is about 40 inches, varying from 15 (or less) to 50 inches in the main cultivated tracts. go at means in the cold weather season between December and March is generally not more than 2 to 4 inches. In the south of India, which includes most of the Madras Province and the bulk of the territories of the two large Indian States of Hyderabad and Mysore, the climatic and rainfall conditions are different. The bulk of the rainfall in this area is received from the North-East monsoon and falls during the period October to February. Conditions are more truly tropical, especially on the West coast and the sub-division of the agricultural season into Kharif and Rabi can hardly be said

In South India, rice and millets are the main tool crops. Rice, millets, maize, hot weather pulses and oilseeds are the principal food crops of the monsoon season, in the northern parts of the Peninsula, with cotton, jute and ground-nuts as the main cash crops. Sugarcane is grown as a whole year crop in both North and South India.

Soils.—Four main soil types can be recognised in India, viz., (1) the red soils derived from rocks of the Archæan system which characterise Madras, Mysore and the South-East

of Bombay and extend through the East of Hyderabud and the Central Provinces to Orisas, Chota Nagpur and the South of Bengal. (2) The black cotton or regur soils which over-lie the Deccan trap and cover the greater of the Central Provinces and Hyderabud with extensions into Central India and Bundelshand, The Madras regur soils though east stypical are also important. (3) The great allutions of the Central Provinces and Hyderabud with extensions into Central India and Bundelshand, The Madras regure soils through east stypical are also important. (3) The great allution to the Central India and Bundelshand, The Bundelshand, The the most extensive, mainly the Indo-Gangetic Plain embracing Sind, northern Rapitunan, most of the Punjab, the plains of the United Provinces, most of interties coils which form a belt round the Peninsula and extend through East Bengal into Assam and Burma.

The great alluvial plains are characterised by cases of cultivation and rapid response to irrigation and manuring; broadly speaking there are few soils in the world more suited to intensive agriculture so long as the water supply is assured. The other soils are less trackable assured, and the supplementation of the soil of the s

AGRICULTURAL EQUIPMENT.

Finance.—In India, farming is carried on with the minimum of capital and there is practically no outlay on buildings, fencing and agricultural machinery. The outlivators are for ness is high and rates of interest on leans are ness is high and rates of interest on leans are nearly. During the past twenty years, very much progress has been made by the co-operative credit movement in many Provinces. In recent in has been found accessary to supplement of co-operative credit by the development of non-credit activities, e.g., purchase and sale societies, "better-farming" societies, etc. Such societies have proved of great value to the societies have proved of great value to the for debt redemption, etc., will contribute largely to improvement in the economic condition of the agriculturists.

Livestock.—Practically all cultivation in India is done by bullocks and the efficiency and capacity of these in different districts varies considerably. The best types in common use are capable of handling what would be considered as light single-horse implements in Europe. Bullock power is also used for raising water from wells for the disglement cuber and for treading out the grain in the treshing yard. Although in many districts the bullock cart is rapidly being supplanted by the motorias as the commonst means of human transport, the great bulk of agrinultural produce is still taken to market in bullock care, the former of the property of the

Implements—In general, cultivating implements are few and simple and remarkably well suited for the tillage operations for which they have been evolved. The ploughs are

usually of wood, tipped with an iron or steel The main object of tillage methods for rabi, point, and stir rather than invert the soil. i.e., cold-weather, crops is the conservation point, and stir rather than inverse the some of soil moisture and the preparation of a good Iron ploughs are also extensively used in some or son moisture and one preparation of a account of recent agricultural depression and the consequent decline in the prices of agricultural produce. A heavy wooden beam is commonly roller, clod-crusher and soil-compactor. In the black cotton soil areas, the bakhar, a simple In many Provinces seed drills or seed tubes are in many floringes, seed utilis or seed thes are utilised for drilling the crops in rows to facilitate inter-cultivation. In less advanced tracts, the seed is merely broadcast and ploughed into the soil. There is a great variety of hand implements to be found throughout the country, most of which are simple, cheap and efficient under local conditions. Practically no harvesting machinery is in use, the crops being cut or gathered by hand and threshed—in the case of grain crops—under the feet of bullocks. Cereal crops are winnowed by the agency of the wind although cheap mechanical winnowing the wind atthough enesp meerannea uniforms; clustwators and (9) research work on the improve-ment of indicenous agreement and appears of indicenous agreement in the improve-entity of the property of the property of the property of the property of the entity of improved agreement in implements, it is jof tractor outfits for mechanical cultivation of improved agreement in implements, it is jof tractor outfits for mechanical cultivation calculated that the Agricultural Departments sold 28,655 improved ploughs, 32,385 fodder sold 28,655 improved ploughs, 32,385 fodder in certain tracts, to such specific purposes as cutters. 3.614 from came mills and about 15,000 the gradication of deep-rooted weeds, where the other types of better implements to the cultivators in 1935-36. Work on mechanical cultivation is still largely in an experimental stage though tractor ploughing has proved very effective in the eradication of deep-rooted weeds in the United Provinces, Bombay and certain Indian States. One notable development of recent years in connection with agricultural implements is the large extent to which improved types are now being manufactured and sold by village craftsmen.

Cultivation and Tillage.-The improvement of the ordinary cultivation and tillage methods in common use in India offers by far the widest field for increasing the yields of field crops and, consequently, the profits of the agriculturists. In many parts of India, cultivation is decidedly good but, particularly in the non-irrigated tracts and in areas liable to failure of rainfall, there is much room for improvement. In this connection, the research work on dry-farming methods, which is being conducted in Bombay, Madras and Hyderabad under the auspices of the Imperial Council of Agricultural Research, is of very great import-

Two economic factors which tend to keep down the standard of cultivation in many Provinces of India are the fragmentation and sub-division of holdings, resulting from Indian laws of inheritance, and certain systems of land tenure whereby the cultivator, as a land tenure tenant, has no interest in permanent improvement of his holding. In addition, the agricul-turists rarely live on their lands but congregate in villages for mutual protection. Efforts are now being made in many Provinces to eliminate rise with the melting of the snow in April-May these factors, which contribute to a low standard of cultivation, but progress in this direction must necessarily be slow.

achieve these objects, the land is given repeated schallow ploughings or harrowings, which pro-duce a surface mulch over a moist sub-soil. For tharif, i.e., hot-weather, crops, the preliminary cultivation of the fields is usually much lace cultivation of the fields is usually much less thorough as sowings must commence as soon as the rains break. The practice of drilling the crops in rows is rapidly supplanting the old method of broadcasting in many tracts. The former method permits the intercultivation of the crops by bullock implements and greatly or the crops by bullock implements and greatly reduces the cost of weeding. Harvesting is generally done by hand implements, e.g., the sickle, and very little wastage occurs in the processos. The work of the Agricultural processes. The work of the Agricultural Departments in India in connection with the improvement of cultivation and tillage is largely improvement of cultivation and things is largely concentrated upon (a) the demonstration of better methods on the actual lands of the cultivators and (b) research work on the improve is still largely limited to large estates and work is done on a contract basis by private agencies.

Irrigation .- The concentration of the princinal rainfall in less than a third of the year. which is not the sowing period of the rabi crops, places a very definite limit on the yield which can be obtained from the principal cereal crops. Some other crops, e.g., sugarcane, can hardly be grown indeed without supplementary water-ing. With adequate irrigation the yield from ing. With adequate irrigation the yield from doubled even in areas where the monsoon is generous, whilst in the great canal colonies and in Sind barren desert has become fertile land. The Indian canal system is by far the largest in the world. Of the total cultivated area of 280 million acres, no less than 60 million are annually irrigated from one source or are annually irrigated from one source or another. Of this area, 30 million acres are irrigated from canals, 15 million from wells and 15 million from tanks and other sources, In 1932-33 the total length of the main and branch canals and distributaries amounted to some 75,000 miles area of 33 million acres, irrgating an and the value of crops irrigated from Government works was estimated at about 87 crores. protective effect of the canals in many areas is no less important than the enhanced yield. Protectiveirrigation works have made agriculture stable instead of precarious in many districts. The Indian canals are of two types—perennial and inundation—and the trend of irrigation practice is to replace the latter by the former wherever possible. The great perennial canals in the North of India draw their supply from snow-fed rivers; the inundation canals run only when the rivers

water stored behind great dams thrown across suitable corres and are in consequence issuitable corres and are in consequence issuitable. When the larger snow-fed systems, Wester rates are levied on the area of Irrigade corps matured so that Government bears part of the risk of failure of crops. Different rates are charged for different crops and vary somewhat in different parts of India; rates are also lower when the water has to be lifted than when flow irrigation is given.

The Madras, Bombay and Sind Provinces possess some of the most spectacular irrigation schemes in the world. The Cauvery-Mettur irrigation system inauqurated in 1934 is considered to the control of the

About one quarter of the total irrigation of the country is got from lifting water from wells ranging in depth from a few greatly increased in recent years largely through Government advances for their construction. The recurring cost of this form of irrigation has, however, greatly increased the recent properties of the properties of

All agricultural departments are now giving increased attention to the botter utilisation of underground water supplies, existing wells being improved by boring and tube wells of laxification to the capacity installed and equipped with pumping machinery. Efficient types of water lifts are rapidly replacing the old-fashioned mhôtea.

Tank irrigation is common in Central and Southern India. Large quantities of rain water are stored in lakes (or tanks) and distributed during the drier seasons of the year. Often the indirect effect of the tank in maintaining the sub-soil water level is as important as the direct irrigation.

Manures and Manuring.—The great bulk of Indian soils are deficient in organic matter. In other agricultural countries of the world, this want is usually me by the return of farmyard manure to the land or by the use of farmyard manure to the land or by the use of farmyard manure to the land or by the use of farmyard manure to the land or by the use of farmyard manure to the land or by the use of farmy and the produce of the land or by the use of farmy and the produce of the land of green slowly developed. The cultivation of green in the irrigated tracts, and many Provincial Governments allow concessions to encourage their extension. The use of certain oil-called experiments allow concessions to encourage their extension. The use of certain oil-called covernments allow concessions to encourage specially castor cake, is on the increase and valuable crops such as sugarance can choose. With regard to artificial fertilisers, nitrogenous organic manures, \$\sigma_c\$, amonounum sulphate and

nitrate of soda, are being extended in use through the efforts of departmental and private agencies. The approximate country of the agencies of the approximate country of the agencies of the

Bios.—Bite is the most extensively grown error in India, and on a vocycenge, ecupies about 35%, of the total cultivated area. If preponented the wetter parts of the country, siz, in Bengal, Bilarr and Orissa, Burma and Madras, The area fluctuates slightly around 80 million crop requires for its proper unstarting, a most climate with well assured traintal. The cultivated varieties are rumerous differing greatly in quality and in suitability for various conditions of soil and climate, and the people possess an other own localities. The better qualities are sown in seed beds and transplanted in the monscon. Broadcasted rice is grown generally in low-lying areas and is sown before the monscon the conductive. Deep water free grow quickly and to a great height and are generally able to keep pace with the rise in water level.

For transplanted rice the soil is generally prepared affer the service of the monsoon and is worked into a puddle before the seedlings are recomplanted. The land is half out into amail a worked into a puddle before the seedlings are planted either singly or in small bunches containing from 4 to 6 plants each bunches containing from 4 to 6 plants each of 6 to 12 inches apart. Either by bunding to retain rainfall or by artificial irrigation, the details varying with locality, the rice fields are proposed to the seed of the containing to retain rainfall or by artificial irrigation, the details varying with locality, the rice fields are possible to the seed of the containing the seed of t

India (excluding Burma) consumes more rice than she produces, the balance in the past having been provided almost entirely by Burma, Imports in 1985-36 were approximately 2,10 lakhs of tons, mainly from Slam and French Indo-China.

Wheat.—Wheat is grown widely throughout Northern India as a winter crop, the United Provinces and the Punjab supplying about two-thirds of the total area, and probably three-quarters of the total otturn in India.

This erop occupies, on an average, about 10 per cent, of the total cultivated area in the The majority of the varieties grown belong to the species Triticium vulgare. Indian wheats are generally white, red and amber coloured and are mostly classed as soft from a commercial point of view. As seen in local markets Indian wheats frequently contain appreciable quantities of other grains and even of extraneous matter due to the method of threshing employed. Wheat for export is well-cleaned and there has been great improvement in this res-pect of recent years. Most of the Indian pect of recent years. Most of the Indian wheats are soft weak wheats but there are some well known Maccaroni wheats amongst them. The largest wheat acreage of recent years was that of 1933-34, namely, 36 million acres, but the yield did not come up to the record harvest of 1930 which exceeded 10½ million tons, Recent crops have averaged 95 million tons per annum which is only slightly, if anything, above internal requirements. Exports of wheat amounted to 197,000 tons in 1930-31 after which year, they were nominal for some time but, owing to favourable world parity, and the protection afforded by the import duty on foreign wheats, have recommenced. In 1935-36, 29,000 tons were exported from India. With the development of irrigation from the Lloyd Barrage Canal in Sind and in the newer Puniab Canal Colonies a further increase in wheat production is practically certain and, although the internal consumption of wheat will increase with the growth of population, there is likely to be a greater exportable surplus in the not distant future. The crop is generally grown after a sum-mer fallow and, except in irrigated tracts, depends largely on the conservation of the soil moisture from the previous monsoon. Rains in January and February are generally beneficial but an excess of rainfall in these months usually produces rust with a diminution of the yield. On irrigated land 2 to 4 waterings are generally given. The crop is generally harvested in March and April and the threshing and winnowing go on up till the end of May. The total area under improved varieties of wheat is now 7 million acres. The Imperial Council of Agricultural Research has recently appointed two Standing Committees to advise on problems connected with rice and wheat,

The Millets.-These constitute one of the most important groups of crops in the country. supplying food for the poorer classes and fodder for the cattle. The varieties vary greatly in quality, height and suitability to various climatic and soil conditions. Perhaps the two best known varieties are Jowar (Sorghum vulgare) the great millet, and Bajra the Bulrush millet (Pennisetum typhoideum) which, between them, occupy about 50 million acres annually. Generally speaking the jowars require better land than the bajras and the distribution of the two crops follows the quality of the soil. Neither for jowar nor bajra is manure usually applied though jowar responds hand-somely to high manuring and cultivation is not so thorough as for wheat. The crop is generally sown in the beginning of the monsoon and so it requires to be thoroughly weeded. It is often grown mixed with the summer pulses especially Arhar (Cajanus indicus-pigeon pea) improvements in methods of cultivation,

and other crops, and is commonly rotated with cotton. The subsidiary crops are harvested as they ripen either before the millet is harvested or afterwards. In some provinces rabi juar is also an important crop. The produce is consumed in the country.

Pulses.—Pulses are commonly grown through-out India in great variety and form at once the backbone of the agriculture, since even the present moderate degree of soil fertility could not be maintained without leguminous rotations, and a primary necessity in the food of a vegetarian population. The yields on the whole are fairly good, mixed cropping is com-mon. The principal pulses are Arhar (Cajanus indicus), gram (Cicer arietinum), various species of Phaseolus and Pisum.

Cotton .- Is one of the most important commercial crops in India and, despite the recent sharp fall in quantities and value due to trade depression and other economic causes, it still retains a most prominent position in the list of exports. The average area under cotton in the quinquennium, ending 1929-30 was 26.2 million acres and the average yield, 5.6 million bales. During the five year period ending 1935-36, the average annual acreage has decreased to about 23.7 million acres and the average yield to 4.9 million bales, In 1937-38, the estimated area is approximately 25.3 million acres with a yield of 5.4 million bales. The area under improved varieties of cotion is now estimated to be about 5,047,000 acres The annual consumption of Indian cotton in Indian mills in 1935-36 amounted to 2,677,506 bales. The principal export is of short staple cotton of \(\frac{4}{3} \) staple but there is also in normal years an export of Indian medium &" to 1-1/16" staple cottons such as Punjab/American and staple cottons such as runjab/American and Karungami. There is no Indian cotton belt; Bombay, the Central Provinces, Hyderabad, Baroda, Madras, the Punjab and the United Provinces all have important cotton tracts producing distinct types. Sowing and har-vesting seasons are equally diverse, the former extending from May to December in different extending from any to December in different parts of the country and the latter from October to May and June. Yields vary greatly; in the best irrigated tracts the normal yield is about 200 lbs. of ginned cotton per acre and yields much above these have been recorded, whilst in the poorest unirrigated tracts 60 lbs. per acre is a good crop. Of recent years, as the result of the work of the agricultural departments and the Indian Central Cotton Committee, the quality and yield of the staple cottons has improved and also the yield and cleanliness of the short-staple tracts.

The Cotton Transport Act, the Cotton Gin-ning and Pressing Factories Act, the Bombay Cotton Markets Act, the C. P. Cotton Markets Act and the Madras (commercial crops) Market Act have all been passed at the instance of the Committee and are doing much to check adulteration and promote better marketing, certain provinces legislation has been enacted, or is under consideration, with the aim of preventing the growing of very inferior varieties and of stopping certain malpractices which affect the quality and reputation of Indian cotton, Agricultural departments have continued their campaign of cotton improvement apart from

Japan is the virtue of an agreement between Governments of India and Japan which will have effect up to the 31st March 1940, for a million bales of raw cotton taken by Japan, British India will import 283 million yards of Japanese piecegoods.

Exports.—The exports of raw cotton from has given a stimulus to the production of sugar ludia by sea to foreign countries for the last by modern methods. The production of sugar India by sea to foreign countries for the last by modern methods. In production us sugar fiscal pars (ending March 31st) were as follows direct from cane in India during the season 385-36 totalled 912,100 tons as against 578,115 tons in 1934-35. The average extraction for he whole of India shows a very substantial increase, the figure being 9.29 per cent. for 1935-36 as against 8.66 per cent. for 1934-35. Of the total production of sugar refined from gur in 1935, 35,528 tons were manufactured by factories which are purely refineries while 3,575 tons were made by cane factories equipped with auxiliary refining plant. Imports of sugar of all sorts during 1935-36 was 201,200 tons as compared with 223,000 tons in 1934-35 and 901,200 tons in 1930-31. It is expected hat within a few years India will not only provide her own requirements of sugar but will have a surplus for export,

> The Sugar (Excise Duty) Act of 1934 has imposed an excise duty of 10 as, per cent. on Khandasari and Re. 1-5-0 per cent. on all other sugar except palmyras sugar produced in factories.

> Oilseeds.-The crops classified under the heading are chiefly groundnuts, linseed, sesamum and the cruciferous oilseeds (rape, mustard, etc.). Although oilseeds are subject to great fluctuation in price and the crops themselves are more or less precarious by nature, they cover an immense area.

> Groundnut, though of modern introduction, is already an important crop particularly in Madras, Bombay, Burma and Hyderabad. is aready an important crop particularly in Madras, Bombay, Burma and Hyderabad, The area has not however achieved stability, It rose steadily from 1.5 millon acres in the pre-war period to 8.23 millions in 1933-34. There have been successive drops in the past two years, the acreage for 1936-37 being 5.78 million acres. The yield in 1935-36 was about 2.2 million tons of which 412,000 tons were exported as compared with a pre-war average export of 212,000 tons.

Sugarcane.—India, until recently a large importer of sugar, is one of the most important sugarcane growing countries in the world, and Orissa and the United Provinces, Tibar Che area in 1286-37 is estimated to be 4,141,000 crops is grown for seed and not for fibre and the The area in 1936-37 is estimated to be 4,141,000 crops is grown for seed and not for five and the acres as against a quinquennial average of common varieties are of a much shorter habit 3,440,000 acres for the five year period ending of growth than those of Emrope. The yield 5,440,000 acres for the five year period ending of growth than those of Emrope. The yield the product of to be 3,071,000 acres representing 74 per cent. from the Argentine, has contracted the market on the JULIANUM sures representing (A per cent, iron the Argentine, as contracted the market of the total can are in the country as against for Indian Hissed and with it the area under the property of the p cane in India in 1935-36 (4.01 million acres) successive short harvests in the Argentine, represents only an advance of 34.3 per cent, helped India to regain her pre-war position over the quinquennial average the yield (5.91) in the British market in 1938-34 when Britain million tons expressed as gur) represents an took 174,000 tons out of a total of 379,000 tons increase of 51 per cent. The protection afforded On account of the large Argentine crop in by the Sugar Industry Protection Act of 1932 1934-35, the price of lineed in India remained

Sesamum (Gingelly) is grown mostly in Peninsular India as an autumn or winter erop. In 1935-38, it occupied an area of 5.6 million acres with a yield of 461,000 tons. About 10 per cent. of the production is exported and the rest consumed locally.

Cruciferous Oilseeds The important group of crops in Northern India where they grow freely and attain a fair state The area under rape and of development. mustard, including an estimated figure for the leaf amounted to 051,000 tons in 1935-36 as area grown mixed with other crop is about against 684,000 tons in the previous year. area grown mixed with other crop is about squares 05,000 tons in the previous year, of to 7 million acres annually. Production in The production in India of Iright fluctured 1935-36 was estimated at 945,000 tons of which tobacco suitable for cigarette making has 20,138 tons, were exported as compared with increased considerably, particularly in the 34,000 tons in 1934-35 and 115,000 tons in Guntur District of the Madras Province and 1932-33. Several species are grown and there several thousands of luceuring barns have 1932-33. Several species are grown and there are numerous local varieties, A large portion of the crop is crushed locally for domestic consumption.

Jute.—Two varieties of the plant are cultivated as a crop, Capsularis and Olitorius.
Jute growing is confined almost entirely to Bengal, Assam, Bihar and Orissa. The Bengal, Assam, Bihar and Orissa, crop requires a rich moist soil. Owing to river inundation this part of India receives a considerable alluvial deposit every year and the land is thus able to sustain this exhausting crop without manure. The crop is rather delicate when young, but once estab-Hished requires no attention, and grows to a great height (10 to 11 feet). Before ripening the crop is out and wetted in water. After about three weeks submersion the fibre is removed by washing and beating. The area removed by washing and beating. The area 1986 was estimated to be 2,545,000 acres which showed an increase of 364,700 acres over the previous year; production in 1936-37 was 8,711,000 bales as against 6,400,000 bales in 1935-36. The total weight of raw and manufactured jute exported during 1935-36 amounted to 1,602,275 tons, a distinct recovery over the previous three years. This is a distinct recovery over the exports of the three previous years. Although the present acreage is much less than some years ago a vigorous campaign is in pro-gress to reduce it sill further. A Central Jute Committee has recently been established with headquarters at Calcutta to consider all measures concerning the welfare of the jute growers and

Tobacco is grown here and there all over the country chiefly, however, in Bengal, Bihar, Bombay, Madras and Burma. Of two varie-ties cultivated Nicotiana Tabacum is by far the most common. Maximum crops are obtained on deep and moist alluvium soils and a high standard of cultivation including liberal manuring is necessary. The crop is only suited to small holdings where labour is plentiful as the attention necessary for its proper cultivation is very great. The seed is germinated in seed beds

low till the middle of December when the poor | a few inches high, great care being taken to crop prospects in the Argentine let the shield them from the sun. The crop is very proposed in the control of the control o and is coarse and heavy in flavour. Lighter kinds are also produced for cigar and cigarette manufacture, of recent years there has been important development in the production, in commercial quantities, of better quality cigarette tobacco both in Madras and in Bihar. exports in 1935-36 amounted to about 29 million lbs. of which the United Kingdom alone took more than 11 million lbs. The area in 1935-36 was 1,357,000 acres as compared with 1,410,000 acres in 1934-35 and the total yield of dried leaf amounted to 651,000 tons in 1935-36 as been installed in recent years.

Livestock Census .- The report on the 4th quinquennial Census of Livestock in India, taken in January 1935, shows that there were then in British India, excluding Bengal and Bihar and Orissa, 113 million heads of bovine cattle, made up roughly of about 84 million heads of oxen and 29 million heads of buffaloes, The total figure for this census is over 5 millions (or about 5 per cent.) higher than that recorded at the preceding census in 1930,

Oxen accounted for an increase of 2.7 millions and buffaloes for an increase of 2.5 millions. In the case of oxen, there was an increase of a little over 3 millions in young stock, but bulls and bullocks showed a decrease of about half a million, the reduction occurring mainly in Madras.

Cows recorded a decrease of over a lakh (1,00,000), the decline occurring mainly in the Central Provinces and Berar.

Both male and cow buffaloes increased in number, the former by nearly a quarter of a million and the latter by little over half a million the variations occurring mainly in the United Provinces and the Punjab.

Sheep declined in number by over 11 million to a total of 22 millions, the notable decreases being in Madras, the United Provinces, the Central Provinces, and Berar.

Goats numbered 26 millions, showing an increase of over one million as compared with the previous census-the chief increases being in the United Provinces and the Punjab.

There were no appreciable variations in the total number of horses and ponies, which amounted to nearly 14,000,000, but donkeys increased by about a lakh. Mules numbered 65,000 and camels a little over half a million.

Ploughs and carts gave a return of 17 and 5 millions respectively, showing a slight increase (mainly in the United Provinces) as compared with the previous census figures, meat. The seed is germinated in seed beds purposes cattle are mainly used everywhere and the young plants are transplanted when though male buffaloes are important as

draught animals in the rice tracts and Agricultural Research. dempler are practically never used for is a most useful and comprehensive goldention agricultural purposes. For datary purposes, the and indicates clearly many avonuse whereby hisfalo is important, the milk yield being high improvement can be effected, and the percentage of butter fat considerably It is sufficient here to say that there is a above that in cow's milk. The best known breeds are the Murra buffaloes of the Punjab, the Jafferabadi builaioes of Kakhiawar, and the between crop production and animal industry surf bindialoes of the Bombay Province. The is needed and that the raising of crops for the catife and builaio population in India is abnor-feeding of dairy stock, instead of for sale as mally high amounting to over 60 per cent. of the such, will be of increasing importance, bushed bushed by the surface of the such will be of increasing importance. The surface of the surface o are small, ill-fed and inefficient. Neverthe the best Indian breeds have many merits. the pess indian breeds have many fifties. Of the draught types the best known breeds are the Hissar, Nellore, Amrit Mahal, Gujerat (Kankrej), Kangayam, Kherigarh and Malvi: the Sahiwai (Punjab), Gir (Kathiawar), Scindi and Hansi are amongst the best milking breeds. On the Government cattle-breeding farms pedigree herds are being built up and from these selected bulls are issued, preference being given to special breeding areas, to villages which undertake to exclude 'scrub' bulls and where serious efforts to maintain a good strain of cow are made. Once established such strain of oware made. Once established such breeding areas rapidly produce a supply of superior bulls for general distribution and in this way the valuable bulls from Government herds are used to advantage. The premium herds are used to advantage. The premium bull system is also working well in some tracts. H. E. the Viceroy's "Gitt" Bull Scheme has given very considerable impetus to cattle improvement in all Provinces and States of India and this branch of animal husbandry is now receiving much close attention. Cattle improvement is a slow process at the best and though a start on sound lines has been made in all provinces, continued effort and persistent endeavour are essential. There is no branch of agricultural improvement where the landowners of India could render greater service.

dairying forms a very important indigenous industry throughout India. The annual cash influting distribution distribution and be over-estimated. Apart from liquid milk the best known products are native butter (ghee) and cheese (dahl). During recent years a considerable trade in tinued butter has spring up and there seems to be no reason why an important industry should not be built milk can usually be procured in the villages but in towns dairy products can scarcely be bought unadulterated.

ane overamene or and a maintain an institute of column and the col The Government of India maintain an Institute effected

The report prepared damper parts of the country. Horses and by Dr. Wright on the dairying industry of India

growing recognition of the fact that as India's economic development proceeds a better balance the Jafferabadi buffaloes of Kathlawar, and the between crop production and animal industry

As a result of systematic work, a stage has now been reached at which, given the necessar staff, rinderpest (cattle plague), the most dreaded of cattle diseases, can now be brought under control at a comparatively small cost. Two kinds of vaccines derived from goats are in use for the purpose: the "blood virus" and the "tissue virus." Two important points established as a result of work with these products in the field are (1) that goat virus can be used with safety in the face of actual outbreaks, and (2) that the immunity conferred by this virus extends to as much as 36 months, which is at present the longest time after vaccination at which it has been possible to carry out tests under field conditions. A considerable fall in the incidence of the disease has occurred where goat virus vaccination has been extensively employed. Of a total number of deaths among cattle in 1935-36, i.e., 230,000 or 55 per cent. were due to rinderpest. The percentage of deaths among inoculated cattle, however, was only 0.17. Over 3 million animals were inoculated against rinderpest in 1935-36.

As a result of an intensive study of equine diseases, the Imperial Veterinary Research Institute at Muktesar, in collaboration with the military authorities, has succeeded in isolating Dairying.—Though little noticed hitherto known as "strangles" can now be produced

in susceptible animals.

With regard to surra, a fatal form of the disease

The vaccines issued from Muktesar have been found to be very satisfactory for the control of hemorrhagic septicemia and "black quarter" in cattle.

For the development of dairying it was decided to expand the existing Dairy Institute at up in other dairy products, such as milk-powder. Bangalore and to establish a research station at condensed milk and casein. Pure ghee and Anand. Systematic selective breeding of indigenous dairy breeds was continued at Government farms and considerable improvement in type, conformation and performance was

AGRICULTURAL PROGRESS.

been fully dealt with in the report of the Linlithgow Commission. The Famine Commission as long ago as 1866 made the first proposal for a separate Department of Agriculture but little resulted except the collection of agricul-tural statistics and other data with the object of throwing light on famine problems. The Famine Commission of 1880 by their masterly review of the possibilities of agricultural development revived interest in the matter and their proposal for a new Department for Agriculture and allied subjects in the Government of India and for provincial departments of agriculture bore fruit eventually. Dr. J. A. Voelker, Consulting Chemist to the Royal Agricultural Society, was invited to visit India and his book "Improvement of Indian Agricultural' is still a valuable reference book. In 1892 an agricultural chemist to the Government of India was appointed. Provincial Departments mainly concerned themselves at first with agricultural statistics but experimental farms were opened at Saidapet in 1871, Poona in 1880, Cawupore in 1881 and Nagpur in 1883; there were various sporadic attempts at agricultural improvement but no real beginning was made until technical agricultural officers were appointed. Of these the earliest were Mollison in Bombay Gubsequently Inspector-General of Agriculture).
Barber and Benson in Madras, Hayman in the
United Provinces and Milligan in the Punjab. In 1901, the first Inspector-General of Agriculture was appointed and in the same year an Imperial Mycologist was added followed by an Imperial Entomologist in 1903. The present departments of agriculture, however, owe their existence to the foresight and energy of Lord Curzon whose famous despatch of 1903 marked the commencement of the reorganisation which took place in 1905. That scheme provided for a central research institute at Pusa, completely staffed provincial departments of agriculture with agricultural colleges and provincial research what agricultural coneges and provincial research institutes and an experimental farm in each important agricultural tract. To the establish-ment of the Imperial Agricultural Research Institute at Pusa, Lord Curzon devoted the greater part of a generous donation of £30,000 given by Mr. Henry Phipps of Chicago to be applied to some object of public utility preferably connected with scientific research. The Indian Agricultural Service was constituted in 1906. Since that date progress has been steady and continuous. With the advent of the reforms of 1919, agriculture became a provincial transferred subject but the Government of India retained responsibility for central research institutions and for certain matters connected with the diseases and pests of plants and animals. The addition of the Imperial Institute of Animal Husbandry and Dairying (with a branch farm at Wellington), the Imperial Cattle-breeding Farm at Karnal and the Anand Creamery enabled livestock work to be carried out on a scale not possible at Pusa. The Imperial Sugarcane-breeding station at Colmbatore is yet another

Agricultural Progress.—The historical aspect Institute and Provincial Governments have of agricultural development in India has steadily developed and strengthened their agricultural departments. The Institute was moved to New Delhi and the new buildings erected for the purpose were formally reopened there in September 1936.

Parallel developments took place in the provision made for matters connected with animal health. The now world-famous Imperial Institute of Veterinary Research at Muktesar started in 1893 as a modest hill laboratory for research on rinderpest. It is now a fully equipped which also manufactures research institute protective sera and vaccines of which some a million doses are issued annually. The Civil Veterinary Department was formed in 1891 and until 1912 was under the control of the Inspector General. The departments were completely provincialised in 1919, the Government of India continuing to finance and control the Muktesar Research Institute and its branch station at Izatnagar (Bareilly).

Recent Progress .- As now constituted, the agricultural departments include a complete organisation for bringing the results of the application of science to agriculture into the village. At one end of the scale are the agricultural colleges and research institutes-at the other thousands of village demonstration plots where the effect of improved seed, methods, implements and manures is shown under the cultivators' own conditions. Intermediate links in the chain are the experimental farms, where scientific research is translated into field practice, demonstration and seed farms and seed stores. The ascertained results of the work of the agricultural department are striking enough, The ascertained area under improved varieties of crops in British India in 1935-36 was appro-ximately 21.4 million acres, as compared with 18,6 million acres in 1934-35. In other words, the recorded area under improved crops words, the recorded area under improved crops has increased by 14 per cent. In the twelve months under review. These figures by no means represent the whole extent to which improved strains have replaced old varieties as it is almost impossible to gauge the full extent of the "natural spread" of improved extent of the "natural spread" of improved varieties. Improved methods of cultivation and manuring are steadily spreading, work is in progress on most of the major crops and each year brings new trumphs. The position was authoritatively reviewed by the Royal Commission a Aartendams with the control of the which reported in 1928. Recognising how much has already been done in the 20 years since the agricultural departments were created, the Commission also emphasised the enormous field for future work to which all witnesses had drawn their attention. The agricultural departments having shown that the application of science to Indian agriculture is a practical proposition and further that the individual cultivator can be reached and his methods improved, the problem is now to develop and intensity such work so that a general advance in agricultural practice will result. The recent branch of the Imperial Agricultural Research reports submitted by Sir John Russell and Dr. Institute. The Bihar Earthquake of Wright, who recently renewed the progress of agricultural research work in India, earlied out

of Agricultural Research, contain valuable and important recommendations for breaching the cultivator. These recommendations are being carefully examined by a special Sub-Committee of the Imperial Council of Agricultural Research. At no time has there been a greater need for co-ordinated effort directed towards the solution by low prices for all agricultural commodities staff appointed in the various provinces.

under the auspices of the Imperial Council and the intense competition in world markets arising from production in excess of effective demand.

The Government of India have recently announced their intention to render further assistance to the agriculturists by providing better facilities for credit and for the marketing of agricultural produce. A central marketing section has been established under the Imperial of agricultural problems. Only by increased Council of Agricultural Research. It works efficiency can India meet the situation caused in collaboration with the special marketing

THE IMPERIAL COUNCIL OF AGRICULTURAL RESEARCH.

provincial agricultural departments but also between the provincial departments themselves. After describing the way in which similar difficulties had been overcome in Canada, the United States and Australia and dismissing as inadequate the constitution of crop committees on the model of the Indian Central Cotton Committee or the constitution of a quasi-independent governing body for Pusa on which Imperial Council of Agricultural Research.

Committee and the planting community respectappoint.

In Chapter III of their Report, the Royal tively and five would be nominated by the Commission on Agriculture stated that the Council for the approval of the Government of most important problem with which they had India. The Council would largely work through a been confronted was that of devising some Standing Finance Committee and sub-commethod of intesing a different spirit into the initiess. A provincial committee should be whole organisation of agricultural research stabilished in each major province to work in india and of bringing about the realization dose co-pertiation with it. The advisory duties on the part of research workers in this country of the Agricultural Adviser to the Government that they are working to an end the major of India would be taken every by the Chairman ums very net working to one can where its more or and would be taken over by the Chairman be reached by the common enterprise. They had council, but chairman embers of the Research count or only a lack of sufficiently close touch lover by a whole-time Director of the Pusa between the Pusa, Research Institute, and the Institute.

Constitution of the Council.-In a Resolu-tion issued on May 23rd, 1929, the Government of India stated that whilst they were of opinion that the proposals of the Royal Commission were, on the whole, admirably designed to secure the objects for the attainment of which the establishment of the organisation outlined above was recommended, they considered a Council of thirty-nine members would be too independent governing bouy for Fues on which the provincial agricultural departments and interpretable agricultural departments and large to be really effective and that it was not considered interests would be represented, the desirable that the Logislative Assembly should commission proposed the section of the proposed the section of the constraints o over an activity which affects the staple industry The primary function of the Council would of India. They had discuss as substituted by the to promote, guide and no-ordinate agricult the central preparation for tural, including veterinary, research in India two parts, a Governing Body which would have and to link if with agricultural research in the management of all the affairs and funds of other parts of the British Empire and in foreign the Council subject to the limitation in regard countries. It would make arrangements for to the control of funds which is mentioned the tenining of research workers, would and as a below and an advisory Board the functioned clearing house of information in regard not which would be to examine all proposals in only to research but also to agricultural and connection with the scientific objects of the veterinary matters generally and would take [Council which might be submitted to the only to season the state of the control of the cont The Advisory Board would consist of all the Council on payment of a donation those whose inclusion in the Council was Es. 80,000 ril 20 equal annual installments and recommended by the Royal Commission with been allowed the same representation on the exception of the representatives of the Council as has been granted to the other Legislature and the representatives of the European and Indian commercial communities, who, under the modified scheme, would be members of the Governing Body. In view of their exclusion from the Advisory Board, the university representation would be increased from three to four and the scientific representation by the addition of the Director of the Indian Institute of Science, Bangalore, a representative of the Forest Research Institute, Dehra Dun, and a representative elected by the Indian Research Fund Association. A re-presentative of the Co-operative Movement would also be added. The Principal Administrative Officer to the Council would be ex-officio Chairman of the Advisory Board.

The Government of India further announced that for the lump grant of Rs. 50 lakhs recom-mended by the Royal Commission, they had decided to substitute an initial lump grant of Rs. 25 lakhs, of which Rs. 15 lakhs would be paid in 1829-30, supplemented by a fixed of the portfolio of Agriculture, The Hon. minimum grant annually. The annual grant Kunwar Sir Jagdish Prasad, K.C.S.I., Kt., would be Rs. 725 lakhs, of which Rs. 5 lakhs [c.S.I. c.L.R. C.R.R. would be devoted to the furtherance of the scientific objects of the Council and the remain-ing Rs. 2.25 lakhs to the cost of its staff and secretariat. The Council would have an entirely free hand in regard to the expenditure of the grants made to it for scientific purposes subject to the condition that no liability in respect of such matters as leave or pension contributions after the research for which the grant had been given would be incurred. In regard to the grant to meet the cost of staff, establishment, etc., the Council would be in the same position as a Department of the Government of India Secretariat.

The Council has since been constituted a separate Department of the Government of India for the purpose of administering this grant.

The Government of India also stated their decision that the Council should not be constituted under an Act of the Imperial Legislature as recommended by the Royal Commission but should be registered under the Registration of Societies Act, XXI of 1860. In pursuance of this decision, a meeting of those who would constitute the Society was held at Simla in June, 1929, to consider the terms of a memo-randum of association and the Rules and Regulations. At that meeting, it was announced that His Exalted Highness the Nizam's Government had offered a donation of Rs. 2 lakhs to the funds of the Council. This offer was gratefully accepted and the Revenue Member of the Nizam's Government has been added to the Governing Body, the Directors of Agriculture and of Veterinary Services becoming members of the Advisory Board. Since then donations of one lake each, payable in 20 equal annual instalments, have been made by the Mysore, Baroda, Cochin, Travancore and Kashmir States and each nominates one representative to the Governing Body of the Council and two technical members to the Advisory Board. The Bhopal State has also been admitted as a constituent member of M.Sc.

constituent States.

Personnel.-In addition to the 20 ex-officio members the Governing Body included at the commencement of 1938 the following gentlemen:-

The Hon'ble Mr. Husain Imam, elected by the Council of State; Pt. Sri Krishna Dutta Paliwal, M.L.A. and Mr. Mohamed Azhar Ali, M.L.A., elected by the Legislative Assembly : Mr. R. Scherer and Mr. Chunilal R. Mehta representing the business community, Messrs. Carpenter and Kerr, elected by the

Advisory Board, and Diwan Bahadur Sir T. Vijayaraghavacharya, additional members appointed by the Governor-General in Council. The Chairman of the Council is the Hon'ble Member of the Council of His Excellency the Governor-General for the time being in charge of the portfolio of Agriculture, The Hop C.S.I., C.I.E., C.B.E.

The whole-time officers of the Council are :-The Vice-Chairman-Since the retirement of Diwan Bahadur Sir T. Vijayaraghayacharya on the 25th October 1935, the post has not been permanently filled.

Vice-Chairman and Principal Officiatina Administrative Officer :- Sir Bryce Burt, Kt. C.I.E., M.B.E., I.A.S.

Secretary: -Mr. N. C. Mehta, B.A. (Cantab.). Bar-at-Law, I.C.S.

Animal Husbandry Expert:-Colonel Si-Arthur Olver, C.B., C.M.G., F.R.C.V.S. (on leave). Officiating Agricultural Expert:- Dr. W. Burns, D.Sc. (Edin.), I.A.S.

Under-Secretary :- Mr. S. Dutt, I.c.s. Assistant Agricultural Expert :- Rai Bahadur R. L. Sethi, M.SC., M.R.A.S., I.A.S.

Assistant Animal Husbandry Expert:-Mr. H. B. Shahi, M.Sc., M.R.C.V.S., D.T.V.M. Superintendents: - Khan Sahib Bazlul Karim and Messrs, P. M. Sundaram, B.A.; S. C. Sarkar,

Agricultural Marketing Adviser:-Major A. M. Livingstone, M.C., M.A., B.Sc.

Director, Imperial Institute of Sugar Technology. Cawnpore :- Mr. R. C. Srivastava, O.B.E., B.Sc. Locust Research Entomologist:-Rao Bahadur Y. Ramachandra Rao Garu, M.A., F.E.S.

Statistician :- Rao Bahadur M. Vaidvanathan. M.A., L.T., P.S.S.

Chief Economist :- Mr. Ramji Das Kaput,

IMPROVEMENT OF AGRICULTURAL MARKETING.

economic recovery of the country, the Govern-ment of India decided to give effect to the recommendations made by the Royal Commission on agriculture, and generally endorsed by the Central Banking Enquiry Committee, regarding Central Banking Enquiry Communet, regarding marketing surveys. After consultation with the Provincial Governments it was decided that the first step should be the appointment for a limited period of a highly qualified and experienced Marketing Expert with practical knowledge of agricultural marketing in other countries. This officer and the necessary assistants should be attached to the Imperial Council of Agricultural Research and should undertake the investigation of marketing problems, formulate schemes for improvement make recommendations as regards standard grades for the various commodities and advise local Governments and provincial Departments of Agriculture generally in regard to agricultural marketing.

In accordance with this decision the office of the Agricultural Marketing Adviser to the Government of India, was constituted with effect from the 1st January 1935, at Delhi. With Mr. A. M. Livingstone as the Agricultural Marketing Adviser, the central staff consists of 3 Senior Marketing Officers, 3 Marketing Officers. one Supervisor for Experimental Grading and Packing Stations, and 12 Assistant Marketing Officers. Some 92 full-time Marketing Officers are operating throughout India and Burma, Out of these 32 (Assistant Marketing Officers) have been provided in the provinces out of grants made by the Imperial Council of Agricultural Research. In provinces and States for which no Senior Marketing Officer is shown the Director of Agriculture supervises the work of the Marketing Officers. In addition to the full-time Marketing staffs referred to 226 Officers have been nominated to deal with marketing questions the smaller Indian States and Minor Administrations. The Assistant Marketing Officer (Coffee) appointed by the Coffee Cess Committee is attached to the office of the Agricultural Marketing Adviser,

The investigation work connected with the system of classification. surveys ranges over the whole field of marketing, but special attention is devoted to a study of prices and the quality of the products concerned. In this latter connection a considerable amount of analytical work has been done at various research institutions in the country. Generally speaking, the market investigations have been carried out by means of personal interviews assisted by a standard list of questions in the form of questionnaires and the Marketing officers in the course of their work, a part from visiting the villages and mundls, interview representative members of different groups of persons concerned in the production and distribution of commodities, for example, producers, distributors, wholesalers, manufac-turers, railway agents and so on.

In view of the importance of improved have also to advise and assist the local Marketing agricultural marketing as an aid to the general Staffs in carrying out their work.

Surveys were in the first instance initiated in regard to rice, wheat, linseed, groundmits, tobacco, fruits, milk, eggs, livestock and hides and skins and also in respect of Markets and Fairs and Co-operative Marketing. At a Fairs and Co-operative Marketing. At a conference between the Central Marketing Staff and Senior Marketing Officers in provinces and States held at Delhi in April 1936, it was agreed that as soon as the completion of the enquiries regarding any of the foregoing commodities permitted survey work should be commenced on the following:-

Cereals : barley, gram and maize.

Oilseeds: coconuts, mustardseed rapeseed and toria.

Fruits: mangoes. Vegetables: potatoes.

Special crops: coffee.

Animal Husbundry Products: sheen and goats, wool and hair and ghee and butter.

The first report recently issued by the Agricultural Marketing Adviser gives an exhaustive picture of the marketing of wheat in It contains considerable material which should be of interest to all those connected with should be of interest to all those connected with the wheat trade. Its price has been specially fixed so low as Re. 1-4 a copy so that it may suit all pockets. Copies of the report (Report on the marketing of wheat in India) are available for sale at all Government book-depots and in the office of the Manager, Central Publication Branch, Civil Lines, Delhi. Similar reports on tobacco, eggs, grapes, cattle and linseed are under preparation.

Arrangements were made for the analysis of samples of new commodities at various centres. By courtesy of certain large exporters at Calcutta and Karachi an analysis was made from their books of the quality of exported hides and skins on the basis of trade selections on the Hamburg

Although development work is mainly the concern of provincial staffs certain experimental grading and packing stations were established for hides (at Agra and Delhi) fruits (oranges at Nagpur and grapes at Nasik) eggs (at Pabbi in N.W.F.P. and Kottarakara in Trayancore) and for ata from washed and conditioned wheat ground at Delhi. The system of grades adopted at these experimental stations is based on the commodity analyses, and discussions with representatives of the trade. Soon after this work started, necessity was felt for taking suitable steps to protect these grade designations ersons concerned in the production and sixthuition of commodities, for example station to from boding copied or otherwise, including stations, and marks from boding copied or otherwise, including stations, manufactures, railway agents and so on.

The Central Marketing Staff are responsible and Marketing by the Central Logislastre with the state of the st for survey work in a large number of States Act prescribing grade designation and standards which do not have staff of their own. They of quality for eggs, oranges, grapes, hides and skins and published in the Gazette of India dated 27th February 1937 and 20th March 1937. The General Rules made at the same time empower the Agricultural Marketing Adviser to issue certificate of authorisation to suitable persons desirous of being authorised to grade and mark their produce with the prescribed designation marks.

As a general policy it is hoped that, as far as many of the heavy commodities are concerned grades and standards will be controlled by suitable trade associations like the East India Cotton Association at Bombay. In pursuit of this policy and with a view to encouraging and developing the sense of corporate responsibility for improving marketing methods, the Central Marketing Staffs have held many conferences, both formal and informal, with various trade and manufacturing interests concerned with the marketing of different commodities. In the course of the year Grain Trade Associations and millers co-operated with the Central Marketing Staff in formulating the basis of an all-India standard contract for wheat and linseed. As a result of mutual discussion the Federation of Indian Tanners was established at Cawnpore and the Indian Tobacco Association at Guntur. Part of the object of both these bodies is to cars of the object of both these bodies is to example, the fladars local Alarketing Shaff have maintain grade standards and promote their formed two fruit growers associations; the use in the trade. Discussions were also held United Provinces Shaff have work in with sugar interests with a view to establishing connection with the Lucknow Reshalter. with sugar interests with a view to establishing connection with the Lucknow Exhibition and at an early date a comprehensive association the Fruit Development Board; in Assan the for controlling "futures" trading on the basis [Senior Marketing Officer provided local growth. for controlling "futures" trading of defined standards. It is of consoning invaries trading on the mass of companies and consoning invaries the first state of the consoning invaries and consoning the consoning in a consoning the consoning in the consoning to make so much progress.

A bulletin containing the prices (both 'ready' and 'futures') stocks and movements of wheat, linseed and rice is compiled at the Headquarters from information received from the important markets of Amritsar, Lyallpur, Karachi, Bombay, Calcutta and Hapur. This is passed on to the All-India Radio Delhi Station from where it is broadcasted (both in Urdu and English) every Sunday evening,

The question of cold storage and refrigerated transport, which had been engaging the active consideration of Army authorities, has also been taken up by the Agricultural Marketing Adviser, who is to act as liaison officer and to attend to enquiries from the trade and general public concerning cold storage. At the instance of the Army authorities a company (The Indian Cold Storage Company, Delhi) has been formed for the erection of cold storage depots at several places in Northern India. These depots, when erected, will cater for the requirements of both military and commercial interests.

Apart from the work of the Central Staff all the local Marketing Staffs in provinces and States were, by force of circumstances, driven to take some kind of development work. For of improved marketing.

List of the Central Marketing Officers and the Senior Marketing Officers in Provinces and Indian States :-

A .- Central Marketing Staff.

Apricultural Marketing Adviser to the Government of India,-Major A. McD. Livingstone, M.C., M.A., B.Sc.

Senior Marketing Officers.—C. B. Samuel, M.A., B.Sc. (Hons.); A. M. Thomson; H. C. Javaraya, L.Ag., F.L.S., F.R.H.S.

Marketing Officers.—B. P. Bhargava, B.Sc., A.M. Inst. B.E.; Dr. T. G. Shirname, B.Ag., Ph.D., F.S.S., F.R.Econ.S.; D. N. Khurody, I.D.D. (Hons.).

Supervisor for Experimental Grading and Packing Stations.—P. L. Tandon, B.Sc. (Wales), F.R. Econ. S. (Lond.).

Assistant Marketing Officers.—Tiryugi Prasad.

Patiala .- Harchand Singh, L.Ag. Bhonal .- K. F. Haider.

Cochin .- M. Sankara Menon, B.A., B.Ag.

IMPERIAL INSTITUTE OF SUGAR TECHNOLOGY.

The Indian Sugar Committee of 1920 recom- the industry. It is also responsible for the mended inter alia the establishment of a Central collection, tabulation and analysis of scientific Research Institute as necessary for the proper development of the sugar industry in this country. The necessity for such an institute was greatly emphasised since the date of the Report by the rapid expansion of the industry during the past few years.

The Government of India accepted the recommendation of the Sugar Committee and started with effect from 1st October 1936, for a period of five years the Imperial Institute of Sugar Technology at Cawnpore. It was decided to take over with the concurrence of the Government of the United Provinces the Sugar Section of the Harcourt Butler Technological Institute and develop it into the Imperial Institute of Sugar Technology.

It is decided that the Institute should undertake research on-

- (a) Problems of Sugar Technology in general and those of the sugar factories in India in particular ;
- industry: (a) Detailed testing of new varieties of cane
- under factory conditions : and (d) General problems of sugar engineering

The institute also provides adequate facilities for the training of students in all branches of Sugar Technology and arranges for short refresher courses for men already employed in

and chemistry.

control returns from factories and making the results of detailed study of these returns available to factories in the shape of technical reports. The institute is, in other words, intended to furnish assistance of a scientific and technical nature to all factories which may need it. Besides carrying on research on fundamental problems of sugar chemistry it acts as the medium for harmonising the latest developments in the sugar industry abroad with the conditions prevailing in this country.

The administration of the Institute was vested in the Imperial Council of Agricultural Research Department, Government of India, Mr. R. C. Srivastava, formerly Sugar Tech-nologist to the Imperial Council of Agricultural Research, was appointed the first Director of the Institute. A representative body was constituted to advise from time to time on the problems to be investigated at the Institute and to undertake periodic reviews of its activities.

The first academic session of the I.I.S.T. The utilisation of the by-products of the commenced on the 10th July 1937, and facilities were provided for the training of students in the following courses:-

- Associateship in Sugar Technology.
- 2. Engineering. 3. Fellowship Technology
 - 4. Engineering.
- Sugar Boilers' Certificate Course. Short courses of instruction to be given in the "off season.'

Irrigation.

are its unequal distribution over the country, those of the south-west monsoon, the principal its irregular distribution throughout the sea-non-storage systems are found. sons and its liability to failure or serious deficiency. The normal annual rainfall varies from 460 inches at Cherrapunji in the Assam hills to less than three inches in Upper Sind. The greatest rainfall actually measured at any station in any one year was 905 inches, recorded at Cherrapunji in 1861, while at stations in Upper Sind it has been nil. There are thus portions of the country which suffer as much from excessive rainfall as others do from

is received from October to December, by far the greater portion of the rainfalls during the south-west monsoon, between June and October. During the winter months the rainfall is comparatively small the normal amount varying from half an inch to two inches, while the hot weather, from March to May or June, is prac-tically rainless. Consequently it happens becomes a dreary, sun-burnt waste. The transition from the latter to the former stage often occurs in a few days. From the agricultural point of view the most unsatisfactory feature of the Indian rainfall is it liability to failure or serious deficiency. The average annual rainfall over the whole country is about 45 inches and there is but little variation from this average from year to year, the greatest recorded being only about seven inches. But if separate tracts are considered, extraordinary variations are found. At many stations annual rainfalls of less than half the average are not uncommon, while at some less than a quarter of the normal amount has been recorded in a year of extreme drought.

Scarcity .- Classing a year in which the

irrigation works of India may be divided into two main classes, those provided with artificial Storage, and those dependent throughout the Year on the natural supplies of the rivers from in India from dovernment works is effected year of the material suppose of the rivers mount in India from dovernmens worss in success which they spars their origin. In actual fact, by minor works for which no capital account depends upon to be supposed of one kind or another but, in many control of another or their pass during control or control o dates, this is provided by nature without man's cases, this is provided by nature without man's cases, this is provided by nature without man's the last fifty years, been a steady growth in the Humalayan Tripated by Government tripated to work.

The chief characteristics of the Indian rainfall cold weather rains are even heavier than

The expedient of storing water in the monsoon for utilization during the subsequent dry weather has been practised in India from time immemorial. In their simplest form, such storage works consist of an earthen embankment constructed across a valley or depression, behind which the water collects, and those under Government control range from small tanks irrigating only a few acres each to the huge from excessive rainfall as others do iron forugith.

The second important characteristic of the milital is the unequal distribution throughout escaping over 20,000 through the second important characteristic of the milital is the unequal distribution throughout escaping water from a work of the latter type, the seasons. Except in the south-east of the a supply can be maintained long after the river peninsula, where the heaviest precipitation on which the reservoir is situated would other wise be dry and useless.

The Three Classes.—Previously all irriga-tion works were divided into three classes Productive, Protective and Minor, but during the triennium 1921-24 the method of determining the source from which the funds for the construction of Government works was protically rainless. Consequently it happens consertation or Government works was pro-tablat in one season of the year the greater part vided was changed, and now all works, we-of India is delinged with rain and is the seene ther major or minor, for which capital accounts of the most wonderful and rapid growth of are kept, have been re-classified under two vegetation; in another period the same tract, leads, Productive and Unproductive, with a becomes a dreary, sun-burnt waste. The lithic disas embracing areas irrigated by noncapital works. The main criterion to be satisfled before a work can be classed as productive is that it shall, within ten years of the completion of construction, produce sufficient revenue to cover its working expenses and the interest charges on its capital cost. Most of the largest irrigation systems in India belong to the productive class. The total capital outlay direct and indirect on irrigation and navigation works, including works under construction, amounted at the end of the year 1934-35 to Rs. 150.89 erores.

Unproductive works are constructed primarily with a view to the protection of precarious tracts and to guard against the necessity for periodical expenditure on the relief of the popula-tion in times of famine. They are financed deficiency is 25 per cent. as a dry year and one tion in times of famine. They are financed in which it is 40 per cent. as a year of severe from the current revenues of India, generally in which it is 840 per cease, as a year of severe from the current creatings, believing drought, the examination of past statistics from the annual grant for famine relief and shows that, over the precardors area, one year in the as expected to be a dry year and our purpose, and are not directly remunerative, in the a year of severe drought. It is largely rately justified by a comparison of the value of in five may be expected to us a way in the project of the project in order to tide over a period of severe drought) with the cost of such protection.

From 104 million acres in 1878-79 the 2 28 province. Thus in the Punjah they vary from From 10½ million acres in 1878-79 the sea annually irrigated rose to 19½ million acres at the beginning of the century and to 29.88 million acres in 1934-35.

The main increase has been in the class of productive works, which irrigated 4½ million agree in 1878-79 and rose to 20,756,209 agree in 1996-27. During the year 1934-35 the areas irigated by productive and unproductive works amounted to 21,361,503 acres and irrigated by productive a con 227 acros reconctively

The area irrigated in 1934-35 was largest in the Punjab, in which province 10.48 million acres were irrigated during the year. In addition about 663.391 acres were irrigated from channels which although drawing their supplies from British canals, lie wholly in the Indian States. The Madras Presidency came next with an area of 7 3 million acres, followed by Sind with an eres of 4.06 million acres.

Capital and Revenue.—The total capital invested in the works has risen from Rs. 42.36 lakhs in 1900-01 to Rs. 150.89 crores in 1934-35. The gross revenue for the year was Rs. 1,234 takhs and the working expenses Rs. 492 lakhs. the net return on capital being, therefore, 4.9 per cent. In considering the latter figure, it includes considerable expenditure on two large projects, the Lloyd (Sukkur) project, and the Cauvery Mettur Project. The former project which was opened for irrigation in 1932 did not vield any revenue this year as against Rs. 25 lakhs in the preceding year while the latter project which was completed during the year under review, yielded a net revenue

Charges for Water.—The charges for water are levied in different ways in the various provinces. In some, notably in Sind, the ordinary land revenue assessment includes also the charge for water, 9/10ths of this assessment being regarded as due to the canals. In others, as in parts of Madras and Bombay, different rates of land revenue are assessed according to whether the land is irrigated or not, and the assessment upon irrigated land includes also the charge for water. These methods may however be regarded as exceptional. Over the greater part of India water is paid for sepa-rately, the area actually irrigated is measured, and a rate is charged per acre according to the crop grown. Lower rates are often levied in cases where irrigation is by "lift", that is to that is to say where the land is too high for the water to flow on to it by gravity and consequently the cultivator has to lift it on to his field.

been tried, such as by renting outlets for an annual sum, or by charging according to the volume of the water used, but these have never been successful. The cultivator fully understands the principle of "No crops, no charge" which is now followed as far as possible in canal administration, but has no coalidence in a system under which his liability for water rate is independent of the area and quality of his crop.

Various other methods of assessment have

Rs. 7-8-0 to Rs. 12 per acre for sugarcane, from Rs. 4 to Rs. 7-8-0 per acre for rice, from Rs. 3-4-0 to Rs. 5-4-0 per acre for wheat, from Rs. 3 to Rs. 4-4-0 per acre for cotton and from Hs. 3 to Rs. 4-4-0 per acre for cotton and mounts.

Rs. 2 to Rs. 3-4-0 per acre for millets and pulses.

Charge is made for additional waterings.

Practically speaking, Government guarantees
sufficient water for the crop and gives it as available. If the crop fails to mature, or if its yield is much below normal, either the whole or part of the irrigation assessment is remitted.

A somewhat different system, the long lease system, is in force in parts of Bengal and the Central Provinces, under which the cultivators pay a small rate for a term of years whether they take water or not. In these provinces where the normal rainfall is fairly high, it is always a question whether irrigation will be necessary at all, and if the cultivators have to pay the full rate, they are apt to hold off until water becomes absolutely essential, and the sudden and universal demand then usually exceeds the supply. paying a reduced rate every year for a term of years they become entitled to water when required: consequently there is no temptation to wait till the last possible moment, and the throughout the season.

Taken as a whole, irrigation is offered on extremely easy terms, and the water rates represent only a very small proportion of the extra profit which the cultivator secures owing to the water he receives.

Central Bureau of Irrigation.—An important event of the inclination 1930-33 was the establishment of a Central Bureau of Irrigation as an essential adjunct of the Central Board of Irrigation. This organization satisfies a want long felt by irrigation officers and has great potentialities in connection with the deve-lopment of Indian irrigation. The Bureau came into being in May 1931. Its main objects are to ensure the free exchange of information and experience on irrigation and allied subjects, between the engineer officers of the various provinces ; to co-ordinate research in irrigation matters throughout India and to disseminate the results achieved; to convene at intervals general will be discussed by officers from various provinces: and to establish contact with similar bureaux in other countries with a view to the exchange of publications and information, These objects necessitate among other things the maintenance of a comprehensive library of irriga-tion publications both Indian and foreign, and the expenditure on the establishment and on the library is considerable. The bureau was financed during the year 1931-32 by the Government of India, but local Governments have since consented to contribute towards its support, and it has thus achieved an independent existence under the Central Board of Irrigation, the Government of India contributing in the same manner as provincial Governments.

The rates obarged vary considerably with the Irrigated in British Indis by Government works corp grown, and are different in each province of all classes during the triennium 1930-35 was and often upon the several canals in a single 30-23 million acres:

The results obtained in each province are given in the table below :--

	Provinces.		Average area irrigated in triennium 1927-30.	A verage area irrigated in triennium 1930–33.
Madras			7,277,967	7,484,466
Bombay (Deccan)			406,748	382,729
Sind			3,579,592	3,690,000
Bengal			90,054	63,740
United Provinces			3,639,867	3,805,205
Punjab			11,200,550	10,995,258
Burma			1,994,321	2,076,435
Bihar and Orissa			937,067	886,834
Central Provinces			400,438	405,184
North-West Fronti	er Province		403,064	395,089
Rajputana			31,984	25,098
Baluchistan			22,407	21,430
		Total	29,954,059	30,231,468

Productive Works.—Taking productive works only, a triennial comparison is given in the following table. It will be sen that the average area irrigated by such works during the triennium was approximately two hundred thousand less than in the previous period:—

Provinces.	Average area irrigated in previous triennium 1927-30.	Average area irrigated in triennium 1930-33.
Madras	3,821,815	8,825,277
Bombay-Decean	2,637	6,089
Sind	2,661,519	2,705,647
United Provinces	3,372,506	3,508,892
Punjab	10,775,794	10,314,031
Burma	1,378,393	1,446,121
Central Provinces	21,889	nil
North-West Frontier Province	207,750	203,238
Total	22,242,303	22,009,295

Taking the productive works as a whole construction, which classes at present contribe capital invested in them was, at the end of but of 184-35, its. 1,058 lakhs. The not revenue for moreover only receipts from water rates and a the year was Rs. 713 laking giving a return share of the enhanced land revenue due to the 184 may be received by the received to the 184 may be received to the 184 may b upon several works which have only lately come nto operation and others which were under

Unproductive Works.—Turning now to the unproductive works, the areas irrigated in the various provinces during the triennium were as below:—

	Provinces.			Average area irrigated in previous triennium 1927-30.	Average area irrigated in triennium 1930-33.
Madras				266,849	261,624
Bombay-Deccan				239,278	204,715

. In addition 6.63.391 acres were irrigated on the Indian State channels of the Western Jumna canal, the Sirhind and the Ghaggar canals.

† Excluding 31,498 acres irrigated by the Paharpur canal for which at present no capital and revenue accounts are kept.

New Works.—The major works of excep-tional importance are the Lloyd Barrage and Canals in Sind, the Cauvery (Mettur) project in Madras, and the Sutlej Valley Canals in the Punjab. The Lloyd Barrage, which was opened by His Excellency the Viceroy early in 1932, is the greatest work of its kind in the world, measuring 4.725 feet between the faces of the regulators on either side. The canals construction scheme has

Providing for the irrigation of a total anti-cipated area of approximately 5½ million acres on attainment of full development the main features of the scheme are a Barrage approxi-mately a mile long across the river Indus near Sukkur, three large canals taking off from above the Barrage on the right lank of the River and four-small on the left hank of the Elver with a laws perennial and 5,033,000 acres non-perennial spents the defended regulator for each canal. The irrigation, 1,942,000 acres are in Elicibia herritory, total expenditure (excluding interest charges) 2,885,000 acres in Bahawalpur and 341,000 incurred on the project to the end of March 1935 [acres in Blanar.] amounted to Rs. 20.08 crores. The construction estimate of the project was closed on the 30th September 1933. The year under review was the third year of operation of the Barrage canals and their general working was satisfactory. The

completion by the end of 1932-33 received involved :-

the sanction of the Secretary of State for India in 1921-22. It falls into four natural groups centred on the Ferozepur, Suleimanke, Islam, and Panjnad Headworks. During the triennium ending 1932-33 all the State Canals taking off from the first three headworks, namely the on from the mest enter measurers, manery the Bikaner, Fordwah, Eastern Sadiqia, Bahawapur and Qalmpur Canals were handed over to the States. The remaining two Canals, namely the Abbasia and Panjnad Canals taking off been completed, and the revenue account the Abbasia and Panjand Canais taking off of the scheme was opened with effect from the Panjand Headworks, were also handed the financial year 1932-33. The total expenditure on the Project to the end of 1932-33 amounted to Rs. 21.12 crores end of 1932-33 amounted to 18. z1.12 ctores which include Rs. 11.63 ctores contributed by the States of Bikaner and Bahawalpur—the co-partners in the Project. The total area to be irrigated is 5,108,000 acres, or necessi 8,000 square miles. Of this, 2,075,000 acres

The Cauvery-Mettur Project is the most important project completed during the year under review and its inauguration coremony, was performed on the 21st August 1934. The project was sanctioned in 1925 and its sanctioned important construction work carried out during estimate amounts to Rs. 737 lakhs. It has been the year under review consisted of the excava- iramed with two main objects in view, first, to the state of the s

when required ;

(the Grand Anient canal) taking off on the right bank of the Cauvery; and

(iii) the improvement and extension of the existing Vadavar canal in the Cauvery

Government of India at the time of going to press.]

(i) the construction of a large dam on the irrigation to new areas (271,000 acres on the Cauvery at Mettur, the object of the dam Grand Anieut canal and 30,000 acres on the being to store the flood waters of the river | Vadavar canal) second crop cultivation is expectand to pass them down to the delta as and ed to increase by 175,000 acres. The construction of the dam, in addition to the development (ii) the construction of an irrigation canal of irrigation in the Cauvery delta, enabled the development of electrical power and the Mettur Hydro-Electric scheme is expected to be com-pleted by April 1938. The potentialities of Mettur as an industrial centre are now consiexisting the state of the state Rs. 50 lakhs. Apart from the extension of vicinity of the railway and the river Cauvery. [Editorial Note:-The figures given throughout this article are the latest obtainable from the

WELLS AND TANKS.

So far we have dealt only with the great irrl-gation schemes. They are essentially exotic, have been made, particularly in Madras, to the products of British rule; the real eastern substitute mechanical power, furnished by oil instrument is the well. The most recent figures give thirty per cent. of the irrigated area in India as being under wells. Moreover the well is an extremely efficient instrument of irrigation. When the cultivator has to raise every drop of water which he uses from a varying depth, he is more careful in the use of it; well water exerts at least three times as much duty as canal water. Again, owing to the cost of lifting, it is generally used for high grade crops. It is estimated that well-irrigated lands produce at least one-third more than canal-watered lands. Although the huge areas brought under cultivation by a single canal scheme tend to reduce the disproportion between the two systems, it must he remembered that the spread of canals increases the possibilities of well irrigation by adding, through seepage, to the store of subsoil water and raising the level.

of every description. They may be just holes in the ground, sunk to subsoil level, used for a year or two and then allowed to fall into decay. These are temporary or kacha wells. Or they may be lined with timber, or with brick or stone. They vary from the kacha well costing a few rupees to the masoury well, which will run into thousands, or in the sandy wastes of Bikaner, where the water level is three hundred feet below the surface, to still more. The means of raising the water vary in equal degree. There is the picottah, or weighted lever, raising a is the picotan, or weighted level, making the bucket at the end of a pivoted pole, just as is done on the banks of the Nile. This is rarely used for litts beyond fifteen feet. For greater lifts bullock power is invariably used. This is generally harnessed to the mot, or leather bag, which is passed over a pulley overhanging the well, then raised by bullocks who walk down a ramp of a length approximating to the depth of the well. Sometimes the mot is just a leather bag, more often it is a self-acting arrangement, which discharges the water into a sump auto-matically on reaching the surface. By this

engines, for the bullock. This has been found economical where the water supply is sufficiently large, especially where two or three wells can be linked. Government have systematically encouraged well irrigation by advancing funds for the purpose and exempting well watered land from extra assessment due to improvement. These advances, termed takavi, are freely made to approved applicants, the general rate of interest being 61 per cent. In Madras and Bombay ryots who construct wells, or other works of agricultural improvement, are exempt from enhanced assessment on that account. In other provinces the exemption lasts for specific periods, the term generally being long enough to recoup the owner the capital sunk.

Tanks .- Next to the well, the indigenous instrument of irrigation is the tank. The village or the roadside tank is one of the most conspicu-Varieties of Wells .- Wells in India are ous features in the Indian scene. The Indian ous reacures in the Indian scene. The Indian tank may be any size. It may vary from a great work like Lakes Fife and Whiting in the Bombay Presidency or the Pertyar Lake in Travancee, holding up from four to seven billion cubic feet of water; and spreading their waters through great chains of canal, to the little village tank irrigating ten acres. They start the property of the property of the property of the works in Madeas are of creat size holding from there to feer billion. great size, holding from three to four billion cubic feet, with water spreads of nine miles. The inscriptions of two large tanks in the Chingleput district of Madras, which still irregate from two to four thousand acres are said to be over 1,100 years old. Tank irrigation is practically unknown in the Punjab and in Sind, but it is found in some form or other in all other provinces, including Burma, and finds its highest development in Madras. In the ryotwari tracts of Bombay and Madras all but the smallest tanks are controlled by Government. In the zemindari tracts only the large tanks are State works. According to the latest figures the area irrigated from tanks is about eight materiary on reacong the many cases the supply is raised at a time, and in its simplicity, and the extremely precarious. So far from tanks being a chief they are often quite useless ease with which the apparatus can be construct- a refuge in famine they are often quite useless ed and repaired by village labour, the mof is inasmuch as the rainfall does not suffice to full unsuipassed in efficiency. There is also the them and they remain dry throughout the Persian wheel, an endies othan of earthernware season.

Meteorology.

The meteorology of India like that of other this period of generally settled conditions, is countries is largely a result of its geographical North-west India. This region during January, countries is largely a result of its geographical North-west India. This region during January, position. The great land area of Asia to the February and part of March is traversed by northward and the enormous sea expanse of a succession of shallow storms from the west-the Indian Ocean to the southward are ward. The number and character of these determining factors in settling its grinefpal storms vary very largely from year to year meteorological relatures. When the North- and in some years no storms at all are recorded, ern Hemisphere is turned away from the sum, in normal years, however, in Northern India in the northern which Compared the proposition of the sum of the proposition of the sum of the proposition of the sum of the proposition an area of intense cold. an area of interest control in meteroconductor of the control of t regions, while, when the Northern Hemisphere while the total fall for the four months. June regions, while, when the Northern Hemisphere while the total full for the four months, June is turned towards the sun, Southern skin better to September, is 4 '65 inches, showing that the comes a super-heated region drawing towards rainfall of the winter is, absolutely, greater in this region than that of the summer monwhich it has picked up in the course of its long apparent to the properties of the course of the long and country, and the course of the long and persistent dry weather prevails.

Monsoons,-The all-important fact in the meteorology of India is the alternation of the seasons known as the summer and winter monsoons. During the winter monsoon the winds are of continental origin and hence, dry, fine wea-ther, clear skies, low humidity and little air ther, clear skies, low humidity and little air there occurs a steady transference northward movement are the characteristic features of this of the area of greatest heat. In March the season. The summer rains cease in the pro-vinces of the North-West Frontier Province and the Punjab about the middle of September after which cool westerly and northerly winds set in over that area and the weather becomes fresh and pleasant. These fine weather con-ditions extend slowly eastward and southward so that by the end of October, they embrace all parts of the country except the southern half of the Peninsula, and by the end of the year have extended to the whole of the Indian land and sea area, the rains withdrawing to the Equatorial Belt. Thus the characteristics of the cold weather from October to February over India are :- Westerly winds of the temperate zone over the extreme north of India; to the south of these the north-east winds of the winter monsoon or perhaps more properly the north-east Trades and a gradually extend-ing area of fine weather which, as the season progresses, finally embraces the whole Indian land and sea area. Two exceptions to these fine weather conditions exist during this period, ster, the Madras coast and the north-west strict, the Madras coast and the north-east india. In the former region the north-east in regions. These land and sea winds, as they winds which set in over the Bay of Bengal in regions. These land and sea winds, as they winds which set in over the Bay of Bengal in regions. The meteorological of disturbed weather (occurring during the greatest consequence as on it largely depend the grain and wheat crops of Northern India.

Spring Months.-March to May and part of June form a period of rapid continuous increase of temperature and decrease of barometric pressure throughout India. During this period maximum temperatures, slightly exceeding 100° occur in the Deccan; in April the area of maximum temperature, between 100° and 105°, lies over the south of the Central Pro-165°, lies over the south of the Central Fro-vinces and Gujarat; in May maximum tem-peratures, varying between 105° and 116°, prevail over the greater part of the interior of the country while in June the highest mean of the country while in June the highest mean maximum temperatures, oxeeding, 110-9, occur in the Indus Valley less Jacobabad. Temperatures, oxeeding, 110-9, occur in the Indus Valley less Jacobabad. Temperature, over a wide area including Sind, Raphutan, the West and South Punjab and the west of the United Provinces, but the highest temperature hitherto recorded is 1270 expistered at Jacobabad on June 1221, 1210. During this period of rising temperature and diminishing barometric pressure, great alterations take place in the air movements over India, including the disappearance of the north-east winds of the winter mensoon, and the air circulation over India and its adjacent seas, becomes a local circulation; characterised by strong hot winds down the river valleys of Northern India ramman for me four montast June to exptember, is inter-action between damp sex winds and dup-servatory amounts to 15'46 inches the total rivindial for the three mouths detober to De-rivindial for the three mouths detober to De-icejon in which the weather is uncettled; during known as "Norwesters". In Bengal. By the time the area of greatest heat has over the Indian land it is highly charged with heen established over North-west India, in the James when the May or first of June, India has the come the seat of low barometric pressures at the commencement of June and in the course ratio of the weather changes. During Arabian Sea and Bay of Bengal up to their the hot weather period, discussed above, the extreme northern limits. It advances over winds and weather are mainly determined India from these two seas. The Arabian Sea and Bay of Bengal up to their produces of the second from about Lat. 300-350 south a wind from south-east blows over the surface of the sea no to about the equator. Here the air rises into the upper strata to flow back again at a considerable elevation to the Southern Tropic or beyond. To the north of this circulation, i.e., between the Equator and Lat. 20° to 25° North, there exists a light unsteady circulation the remains of the north-east trades, that is to say about Lat. 20° North there is a northeast wind which blows southward till it reaches the thermal equator where side by side with the south-east Trades mentioned above, the air rises into the upper strata of the atmosphere. Still further to the northward and in the immediate neighbourhood of land there are the circulations due to the land and sea breezes which are attributable to the difference in the heating effect of the sun's rays over land and sea. It is now necessary to trace the changes which occur and lead up to the establishment and with it the area of ascent of the south-east trades circulation. Thus the south-east trade winds cross the equator and advance further and further northward, as the thermal equator and area of ascent follows the sun in its northcooler regions—more especially the sea areas. Thus we have the southern Trades circulation sea circulation extending southward about the beginning of June the light unsteady interfering circulation over the Arabian Sea finally breaks up, the immense circulation of the South-east Trades, with its cool, moisture laden winds rushes forward, becomes on to the local circulation proceeding between the Indian land area and the adjacent seas and India is invaded by oceanic conditions the south-west monsoon proper. This is the most important season of the year as upon it depends the prosperity of at least five-sixths of the people of India.

When this current is fully established a contiauous air movement extends over the Indian Ocean, the Indian seas and the Indian land area from Lat. 30° S. to Lat. 30° N. the southern half being the south-east trades and the northem half the south-west monsoon. The most important fact about it is that it is a continuous horizontal air movement passing over an extensive oceanic area where steady evaporatien is constantly in progress so that where To the south of this easterly wind of the the current enters the Indian seas and flows Bay current and to the north of the westerly

Idla, Rajputana and north Bombay. The Bay of Bengal current blows directly up the Bay. One portion is directed towards Burma, East Bengal and Assam while another portion curves to south at the head of the Bay and over Bengal, and then meeting with the barrier of the Himalayas curves still further and blows as a south-easterly and easterly wind right up the Gangette plain. The south-west mon-soon continues for three and a half to four months, viz., from the beginning of June to the middle or end of September. During its provalence more or less general though far from continuous rain prevails throughout India, the principal features of the rainfall distribution being as follows. The greater portion of the Arabian Sea current, the total volume of which is probably three times as great as that of the Bengal current. blows directly on to the west coast districts. Here it meets an almost continuous hill range, is which could never monoton period. The sun forced into account and given heavy rain alike at this time is progressing slowly northward to the consal districts and to the billy range, towards the northern fropic. Hence the the total averaging about 100 inches most hermal equator is also progressing northward of which falls in four montls. The current after parting with most of its moisture advances across the Peninsula giving occasional uncertain rain to the Deccan and passes out into the Bay where it coalesces with the local current, The northern portion of the current blowing cm progress. At the same time the temperature of the Gujarak Kathiawar and Sind coasts rature over India increases rapidly and bare gives a certain amount of rain to the coast metric pressure diminishes, owing to the air districts and frequent showers to the Aravalli traing and being transferred, to neighbouring Hill range but very little to Western Rajputana, and passing onward gives moderate to heavy rain in the Eastern Punjab, Eastern Rajputan a extending northward and the local land and and the North-west Himalayas. In this region until the current meets and mixes with the monsoon current from the Bay.

> The monsoon current over the southern half of the Bay of Bengal blows from southnail of the bay of Benkin blows from south-west and is thus directed towards the Tenesserim hills and up the valley of the Irrawady to which it gives very heavy rain. That portion of this current which advances sufficiently far northward to blow over Bengal and Assam gives very heavy rain to the low-lying districts of East Bengal and Immediately thereafter coming under the influence of the Assam Hills is forced upwards and gives ex-cessive rain (perhaps the heaviest in the world) to the southern face of these hills. The remaining portion of the Bay current advance from the southward over Bengal, is then directed westward by the barrier of the Himalayas and gives general rain over the Gangetic plain and fairly frequent rain over the lower ranges of the Himalayas from Sikhim to Kashmir.

wind of the Arabian Sea current there crisis a debatable area running roughly from Hissar in the Punjab through Agra, Allahabad and part of Choiat Nagpur to Orisas, where neither neither a contract of the c

The total rainfall of the monsoon period (June to September) is 100 inches over part of the west coast, the amount diminishes castward, is below 20 inches over a large part of the centre and east of the Peninsula and is only 5 inches in South Madras; it is over 100 inches so the Zenasserim and South Burnas Burnas; it is over 100 in the north Assam Valley and diminishes steadily westward and is only 5 inches in the Indus Valley.

The preceding paragraphs give an account of the normal procession of the seasons throughout India during the year, but it must be remembered, that every year produces variations from the normal and that in some years these variations are very large. This is pear titled with the process that it was a superstance of the process of the p

- Delay in the commencement of the rains over a large part of the country, this being most frequent in North Bombay and North-west India.
- (2) A prolonged break in July or August or both.
- (3) Early termination of the rains, which may occur in any part of the country.
- (4) The determination throughout the monsoon period of more rain than usual to one part and less than usual to another vart of the country. Examples of this occur every year.

About the middle of September fine and riceh weather begins to appear in the extreme north-west of India. This area of line weather the area of India. This area of line weather the area of India weather at the same time contracting till by the end of October the rainy area has refereated to Madras and the south of the Peninsula and by the end of December of the Peninsula and by the end of December of the Peninsula and by the end of December of the Peninsula and by the end of December of the Peninsula and by the end of December of the Peninsula and by the end of December of the end of the

(For monsoon of 1937, see page 361).

INDIA METEOROLOGICAL DEPARTMENT.

Functions of the Department—The India Meteorological Department was instituted in 1875 to combine and extend the work of various provincial meteorological services which had sprung up before that date. The various duties stime of the formation were from time it does stime of the formation were from time it does supplemented by new duties. The main existing functions, more or less in the historical order in which they were assumed, may be briefly summarked as follows:—

(a) The issue of warnings to ports and coastal districts of the approach of cyclonic storms.

(b) The issue of storm warnings by wireless to ships in the Indian seas, and the making of arrangements for the collection of meteorological data from ships.

(c) The maintenance of systematic records of meteorological data and the publication of climatological statistics. These were originally undertaken in order to furnish data for the investigation of the relation between weather and disease.

(d) The issue to the public of up-to-date weather reports and of rainfall forecasts. These duties were originally recommended by a Committee of Enquiry into the causes of famine in India.

(e) Meteorological researches of a general character, but particularly regarding tropical storms and the forecasting of monsoon and winter rainfall.

(f) The issue of seasonal rainfall forecasts

(g) The issue of telegraphic warnings of heavy rainfall and frost (cold wave), mainly to Government officials (e.g., canal and railway engineers, collectors, directors of agriculture, etc.), and through the newspapers to the public in general.

(h) Supply of meteorological, astronomical and geophysical information in response to enquiries from officials, commercial firms or private individuals.

 (i) Technical supervision of rainfall registration carried out under the control of provincial Government authorities. ment-carrying balloons and of upper winds by balloons; and regular compilation of statistics of upper air data.

(k) The issue of weather reports and warnings to aircraft, civil and fullitary, the latter being in collaboration with the Royal Air Force.

(I) The training and examination in meteorology of candidates for air pilots' licenses.

(m) Study of meteorology in relation to Agriculture, on which the Royal Commission on Agriculture in India made recommendations. (n) Broadcast of synoptic data for the

benefit of ships in the Arabian Sea and Bay of

In addition to these meteorological duties the India Meteorological Department was from time to time made responsible for or undertook various other important duties, such as-

(a) Determination of time in India and the issue of time-signals, also the determination of them. errors of chrono meters for the Royal Indian Navy.

(p) Observations and researches on terrestrial magnetism at Bombay and atmospheric electricity at Bombay and Poona.

(q) Regular study (mainly by spectroscopic examination) of the sun at the Solar Physics Observatory at Kodaikanal.

(r) Maintenance of seismological instruments at various centres.

ORGANISATION.

It is necessary to note that practical meteorology implies a meteorological organisation, not merely individual meteorologists relying upon their own personal and purely local obser-The making of a single forecast in any of the larger meteorological offices of the world requires the co-operation of some hundreds of persons. In India some 400 observers cooperate daily to take simultaneous observations at about 300 separate places, and hand in their reports to telegraphists, who transmit them to forecast centres, where, for rapid assimilation, clerks decode them and chart them on maps; meteorological experts then draw therefrom the conclusions on which their forecasts are based. not telegraph them.

An efficient system of telegraphic communication of weather reports is an essential feature in all meteorological organisations. This is recognised in the International Tele-communication Convention,

applications of practical meteorology, its application to aviation involves the existence of a well as for voluntary different levels, have information about visi- Karachi Radio), Jodhpur, Delhi, bility, fogs, dust-storms, thunderstorms, height Gaya, Asansol (through Galeuti of low clonds, etc., along with forecasts of I Calcutta and Chittagons.

The study of temperature and moisture changes in these elements. Many of these are conditions in the upper air by means of instru- local, short-lived and rapidly changing phenomena,

Definite recommendations regarding the nature of information to be supplied to aircraft, the exhibition of current weather information at aerodromes and the meteorological organisation of international airways have been embodied in Annexe G of the International Convention of Air Navigation, In accordance with these recommendations, expert meteorologists should be stationed at aerodromes at reasonable intervals along the airway to supply to the aviation personnel current information and forecasts of weather conditions along the routes up to the next aerodrome of the same class. Forecast centres should be established at least at each main aerodrome along ærial routes and forecasts prepared at such centres should be transmitted to the other aerodromes for the information of nilote Other recommendations refer to hours and kind of observations and manner of codifying

In India,* the meteorological service for aviation is, for financial reasons, not able to attain the standard recommended in Annexe G the International Convention for Air Navigation. The net-work of observatories in India is much sparser than that in Europe and America and the frequency of observations taken at each of them much smaller. The 3.000-mile air route between Shariah and Akvab is served by two forecasting centres at Karachi and Calcutta, which prepare two synoptic charts a day based on observations taken twice daily at observatories reporting to them. sole forecasting centre in southern India is at Poona,

The opening of a chain of wireless stations and fuller development of ground organisation along the main trans-India route has enabled the Meteorological Department to place meteo-rological arrangements relating to this route on organical arrangements relating to this foure on a 'routine' basis. Under the routine system, the trans-India Air Route is divided into four sections with terminal points at Karachi, Jodhpur, Allahabad, Calcutta and Akyab. Forecasts for each section of the route are issued meteorological experts then draw therefrom the twice daily, at 13.00 and 21.00 journs, I.S.T., the nonclusions on which their forceasts are based, first covering the period from 14.00 to 22.00. There are other observatories, which take house I.S.T. and second the period from 22.00 observations for climatological purposes but do hours of the day of issue to 14.00 hours of the nout of these are distributed by wireless to aircraft in flight and to the aerodromes principally concerned. The diffusion of the latest upper wind data and the latest "current weather" report relating to cloud, visibility, rain, ground wind, etc., has been similarly placed on routine basis. There are also arrangements While the above is true, in general, of all for the supply of special current weather reports at any time to aircraft in flight on request, as regarding reports specialised and particularly designed organisa-tion. Aviators require detailed information improvement. The stations taking part in the about the weather; they wish to know winds at scheme are Karachi, Barner (through Barmer (through Calcutta Radio),

^{*} Fuller details of the aviation organisation are contained in the departmental pamphlet entitled "Meteorological Organisation for Airmen."

On other routes, the method of supplying ments of pilots taking off very early in the weather reports either in person or through morning, arrangement has also been made for a landline telegraph (or by W.T where W.T night pilot balloon ascent at Jacobabad, communication is available) for each individual Similar arrangements have been made at Juho flight or to each individual aircraft separately is still in vogue as the air traffic is not yet sufficiently heavy to justify the introduction of the full routine method as on the trans-India route, On the necessary W/T facilities becoming on the necessity with natural available, however, the routine system has been partially histoduced on the Karachi-Madras route from the 1st December 1937; from this date, upper wind reports as well as current weather observations taken at fixed hours at the principal observatories on this route are distributed by W/T daily as a routine measure to aerodromes principally concerned. Communication of these reports, or of special current weather reports, to aircraft in flight on request tion of these representation of the second section of the sec morning upper wind report Trichinopoly morning upper wind and current weather reports being sent by W/T daily from Madras to Colombo, On the Bahrein-Karachi route, a restricted scheme of distribution of upper wind and current weather reports on days storm-warning for shipping in the Bay of Bengal of flight of the Imperial Airways' planes has a scarried on by the Meteorological Office at upper wind and current weather reports on days been introduced.

For the Karachi-Madras, Karachi-Lahore and Bombay-Delhi services, arrangements exist for communicating, by landline telegraph, current weather information to aerodromes from a few observatories on the route, which do not have W/T facilities, to supplement the information available in the reports supplied by the forecasting centres and pilot balloon stations.

The abovementioned schemes of issue of current weather and pilot reports make it possible for aircraft to have the latest weather reports from important points in the air route. The principal acrodromes on the route also get copies of these messages and display them on weather notice boards.

Till recently, the latest upper wind data on the trans-India air route were disseminated through wireless twice daily as a routine measure. This arrangement sufficed to meet the requirements of pilots during daylight hours. On the the responsibility of issuing weather reports and trans-India route, a certain amount of night flying already exists. Pilots frequently take off very early in the morning and extend the flight till late in the evening, and it is expected that night flying will increase still further in the near future. Arrangements have accordingly been made for an additional pilot balloon and current weather observation at night at Karachi, Jodhpur, New Delhi, Allahabad, Gaya and Calcutta. The diffusion of these night data by wireless has also been placed on a routine basis, Regular night pilot balloon and current weather observations and the diffusion of the data on and forecasts over this portion of the route flying days have also been arranged at Bahrein, which are similar to those in the Indian portion Sharjah and Gwador. To meet the require of the route remain same as before separation,

with effect from 1st January 1938

A scheme of broadcasting twice daily from the aeronautical short-weave W/T stations at Karachi and Calcutta, weather data of about 25 stations selected from the surrounding region has been brought into operation with effect from 1st August , 1937.

In order to fulfil the various duties described above, the organisation of the department is made up of a central office, 7 sub-offices, 32
pilot beloon observatories and 309 weather observatories of various classes* distributed over a region stretching from Iran, Zanzibar on the between the offices at Poona, Calcutta and Karachi. Forecasting for aviation is divided between these three offices and the offices at Peshawar and Quetta; the last two forecast for military flying and do not serve civil aviation Calcutta, while similar duties in respect of the Arabian Sea are undertaken at Poona. Upper Air Observatory, Agra, is in adminis-trative charge of all the pilot balloon observatories in India and the Persian Gulf. Bombay and Alibag Observatories specialise in the study of Geophysics, particularly terrestrial magnetism and seismology, while the observatory at Kodaikanal specialises in the study of solar physics. The next section describes in some-what greater detail the general duties of the offices mentioned above.

On separation of Burma from India with effect from 1st April, 1937, the Government of Burma started an independent meteorological service for that country, with its headquarters at Rangoon. The Burma Meteorological Department has assumed control over all the surface and pilot balloon observatories in Burma and has taken over, with effect from 1st July 1937 forecasts relating to the Burma area to the general public and also to aviators flying over Burma. It has not yet taken over the duties of issuing storm warnings to the ports in Burma and to shipping in Burman waters ; these duties will continue to be carried on by the Calcutta Office of the India Meteorological Department for some time. On the main Empire and International air route across Burma, the responsibility of the new service extends from Akyab to Victoria Point, "Routine" arrangements for the dissemination of weather reports

Class Total. Number 180 14 54 15 309

^{*} Classified into various classes, the number as it stood on 31st December 1936 was distributed as follows :-

The Burma Meteorological Department has arranged for broadcast twice daily from Rangoon Aeronautical Wireless Station of weather data

GENERAL DUTIES OF THE MAIN OBSERVATORIES AND OFFICES.

Headquarters Office, Poona.—The general administration of the department, including co-ordination of technical work and technical questions relating to aviation, is carried on by the headquarters office at Poona. In addition it is in immediate and complete charge of all and also certain observatories in Kashmir. and also certain Osservatories in Ausmir. [4] It prepares two weather charts daily and issues uplished the indian badly Weather Report, this forecasts to airmen flying in north-east India entitled the India Weather Review and also can be also contained to the India Weather Review and also can be also cannot be also containing rainfail data of about 3,000 stations in India. It undernotes the issue of heavy rain warmings, freet and observations and data for stations in this area. untimely rain warnings for practically the whole untimety rath warmings for storms in country, and the issue of warmings for storms in the Arabian Sca. Weather forecasts in respect office was established primarily as a forecasting of aerial flights, either routine or occasional, over the Peninsula and the central parts of the country are issued from this office. Weather Charts are prepared twice daily and a telegraphic weather summary covering the whole of India issued daily to the press, and two regional telegraphic weather summaries covering the Peninsula and the central parts of the country remisina and the central parts or the collinery respectively to other subscribers. The head-quarters office is responsible for practically all climatological work in India, including the preparation of normals of rainfall, temperature, humidity, etc., for all observatories. It issues a limited number of long-range seasonal forecasts for the country. It collects and analyses for the country. It concess and analyses weather logs from ships in the Arabian Sea. It is responsible for the design, specification, test and repairs of all meteorological instruments

It maintains an upper air observatory and a first class weather observatory. It has facilities for research in theoretical and practical meteorology. Sounding balloon work in the Peninsula is directed from this office. It collects and compiles for the International Aerological compiles for the International Aerological Commission the upper air data in respect of India, Rurma, Ceylon, Siam, Indo-China, Malaya and the Dutch East Indies. It carries on all necessary correspondence with the various international commissions on technical questions and supplies meteorological data and certain periodical returns to the international bodies. The programme of work of the Agricultural Meteorology Branch of the office includes experimental work on microclimatology, standardisa-tion of methods of observations under field conditions and construction of suitable instruments for the purpose as well as statistical investigations involving a critical enquiry into the available data on the area and yield of crops for the various presidencies and districts in India, and after careful selection, the correlation of some of them with the accumulated meteorological data.

The Headquarters Office is divided into eight The Journal Profession Series and Profession Rangeon | Section Ran

Meteorological Office, Calcutta.—The Allpore Office is responsible for the publication of a Daily Weather Report for north-east India. for storm warning in the Bay of Bengal, heavy rainfall warning in north-east India and for squall warnings in Bengal. It gives time signals by time-ball to the Port of Calentta, by it is in immediate and compute charge α on whereas to Shipping at sea and α excussions second, third, fourth and fifth class observatories signals through the Indian telegraph system. A in Gujarat, the central parts of the country and regional telegraphic weather summary for the Peninsule excluding some in Indian Section profit-east India is issued daily from this office. wireless to shipping at sea and by telegraphic It prepares two weather charts daily and issues

> centre for aviation. It is responsible for the issue of weather reports and forecasts in respect issue of weather reports and forecasts in respect of the 2,500-mile long section of the Trans-India air route extending from Sherjah or Bushire on the west to Allahabad on the east, and also all feeder routes in northwest India. This office prepares two weather charts daily and a daily weather report; it also issues a telegraphic weather summary for northwest India. It is in charge of all auxiliary centres, current weather station and second, third, fourth and fifth class observatories in northwest India (excluding Kashmir), Iran and Arabia,

Upper Air Office, Agra.—This office is the headquarters of upper air work in India. It is responsible for maintaining more than 30 pilot and repairs of all meteorological instruments is allown stations scattered over India and the and supply of necessary instruments and state of the different observatories and maintains stoke of instruments. also a principal centre of upper air research work. Several instruments and devices have been developed in this office for the study of conditions in free air. It collects and scrutinises all upper air data.

> Colaba and Alibag Observatories.—These observatories specialise in Geophysics, particularly terrestrial magnetism, seismology and atmospheric electricity. They also maintain a large number of self-recording meteorological instruments and responsible for the time-ball service in the Bombay harbour and the rating of chronometers belonging to the Royal Navy. They publish an annual volume on the magnetic, meteorological and seismographic observations,

> Kedaikanal Observatory.—This observatory specialises in the study of the physics of the sun and is specially equipped for spectroscopic observations and research. It is also a seismological station and a first class weather observatory. The observatory issues bulletins from time destribute the conservatory issues bulletins from time to time destribute the conservatory. from time to time describing the results of observations of the surface of the sun or of special investigations on the subject.

Offices, at Peshawar and Meteorological Unices, at Pelaswar and I are unknutz centres (c) fire studied at Dirich Continued and the statement of the studied at Dirich Continued and the statement of the studied at Dirich Continued and the statement of th Meteorological and detailed local forecasts and warnings each at each of these centres is authorised to add to for his own immediate neighbourhood. As a the weather report received from the forecasting result of the earthquake damage in 1935, the centres his own conclusions about the head Quetta Office has been temporarily shifted to weather situation. The latest information Karachi. The date of its retransfer to Quetta available regarding the local surface conditions is still uncertain.

The auxiliary centres (c) are situated at Drigh and upper winds can also be obtained from him

INDIAN METEOROLOGICAL SERVICE, AS ON 1ST MARCH 1938.

MONSOON OF 1937.

The south-west monacon period, June to recorded over the region extending from September, was marked, on the one hand, by Baltehistan to the west Central Provinces and and the Decean. On the whole rainfall was nowhere in large excess or defect. Averaged over the plains of India the season's rainfall was in defect by 1 per cent.

During the retreating south-west monsoon period, October to December, the season's radinfall was in excess by 7 per cent, over the plains as a whole, radinfall having been comparatively abundant in Bihar, Kashmir, Sind and the Central Provinces and scanty in Orissa, the west United Provinces, Baluchistan and Gujarat.

Taking the year as a whole, the rainfall over the country was within 20 per cent, of the normal, except in the Bay Islands, Sind, Gujarat, Berar and the west Central Provinces, which subdivisions recorded excesses ranging from 21 to 31 per cent.

June.—The Arabian Sea branch of the monsoon advanced on the Malabar Coast on the 4th-5th establishing itself there by the 10th and reaching lombay on the 12th. A depression of small extent, forming off the Konkan-Kathlawar Coast on the 14th established the monsoon on the Konkan; it also induced bad weather in the extreme north, that was connected west are in the exercise north, that was connecess with the Nanga Parbat tragedy. Penetrating inland, the monsoon strengthened in the west Central Provinces and south Hyderabad on the 18th and in Gujarat and the north Deccan on the 22nd. Fresh unsettled conditions off the Konkan and Kathiawar then caused heavy rain in the two divisions, with destructive floods in Kathiawar. Thunderstorms were frequent in the Peninsula and northern India, resulting in loss of life and extensive damage to property in the United Provinces and Bengal,

The Bay of Bengal branch of the monsoon began strengthening in north-east India during the first week. A depression formed in the north from the 6th June onwards, and, following a Bay on the 20th, temporarily intensified and travelled to north-west India during the last week; it caused an extension of the monsoon extended also over northern India on the 16th-over the central parts of the country and into 17th. A fall of temperature then began and the United Provinces, cast Rajputana and Sind, with heavy rain along its track,

Soptember, was marked, on the one mane, by Esmenistan 10 line were central information and spells of heavy rains, causing floods over parts in Malabar. The Bay depression and storm, of northern India, and on the other, by a prolong—in their westward travel, caused widespreaded break in the monsoon in August, resulting and locally heavy rain in north Bengal, Orisan, and Constitution of the contraction of the c west Central India, Gujarat, cast Rajputana, the east United Provinces and the east and north Punjab and, in consequence, disastrous floods occurred in these areas

August.—With the passage of a depression from the north Bay to the cast Central Provinces during the first week, the monsoon considerably strengthened over the region from west Bengal to the United Provinces and Central India and extended into the Punjab hills and over the Peninsula. For the next two weeks there was a break in the monsoon over the country outside north-east India resulting in drought in north-west India and the Deccan, with a keenly felt scarcity of water in the south Bombay Deccan. During the rest of the month, the passage of a depression from west Bengal to east Central India and the appearance of a low pressure area over north Bengal and Bihar caused a revival of the monsoon in most of northern and central India, the associated heavy rainfall in Assam, Bihar, Orissa and the east United Provinces resulting in widespread and disastrous floods,

September.-The first half of the month was marked by the passage of two depressions from the Bay of Bengal north-westwards causing a revival of the monsoon further westwards and southwards over the country, with heavy rains and floods in Gujarat and the east Punjab. From the 16th onwards thunderstorm activity grew in North-east and Central India and the Decean, the rainfall in the Bombay Decean proving particularly beneficial to crops. A spell of unsettled weather in the east Arabian Sea and a depression in the south-west Bay added to the frequency and intensity of thunderstorms during the last week, when heavy rain fell also in Bengal and Bihar with the advance of a severe cyclone from the north Bay, by Calcutta, into Bihar.

High temperatures prevailed over the central parts of the country and most of the Deccan cold wave over western Himalayas and the adjoining plains between the 11th and 13th, after the normal conditions were gradually restored during the next week, exceptionally July.—In association with a low pressure of North-west and Central India and the north area, a depression and a storm in the Bay of Decean till the end of July and again in the first Dengal and two land depressions, one over the land of September. During the rest of septement Contral Provinces and the other over ber day temperatures were sometimes high in Dengal, the monsoon was active over most the south Decam, cast Central India and the of the country a large excess of rainfall being least United Provinces.

The total rainfall for the season—June to September—averaged over the plains of India was 32.7 inches, I per cent less than the normal. The following table gives detailed information of the seasonal rainfall of the period:

	RAIN	PALE, JUNE TO	SEPTEMBER, I	937.
bivision.	Actual.	Normal.	Departure from normal.	Percentage departure from normal
Burma	Inches, 67.6	1nches, 62.2	Inches, + 5.4	+ 9

Mean of India (excluding Burma),	32.7	33,1	0.4	- 1

October.—A depression, which moved from the Bay of Bengal off Cuddadore across the Peninsula to the east Arabian Sea and restreved to the centre of the country during the first week of the month centsed widespread and bendly week of the month centsed widespread and bendly in severe floods in Mysors and Bilhar. A trough of low pressure, with a depression at each end, then developed over the Bay, the two depressions subsequently coalescing into a severe cyclone south of Calestita. The cyclone moved from south of the control of the control of the causing heavy rain in the two provinces and doing great damage in east Bengal.

The north-east monsoon set in, over the Bay of bengal in the third week and extended to the south-east Arabian Sea in the fourth week, increasing the thunderstorm activity in the Peninsula.

Abundant rain fell in the extreme north and Sind, in association with six western disturbances one of which developed into a shallow active depression over the Punjab and caused unusually early snowfall in Kashmir.

November.—Spells of disturbed weather n the sea areas, including two depressions in the

lay of lengal, maintained the activity of the north-cast monsoon in the south of the Peninsula, causing a large excess of rainfall in south-cast Madras. Over the rest of the contary, despite the passage of seven western disturbances across North-west India, rainfall was less than usual, the defects being large in most subdivisions.

December -- The second of the two depressions mentioned above moved castwards and caused rain at several places in Assam and Bengal in the beginning of the month a fall of 15" at Cox's Bazar breaking the past 39 years record for December at that station. Another deep depression, which formed between the Andaman and the Nicobars on the 26th and subsequently moved to the Gulf of Martaban, was responsible for a record fall of 12" of rain at Port Blair, The north Deccan and Mysore experienced a spell of marked thunderstorm activity during the month but over the rest of the Peninsula the north-east monsoon was on the whole much weaker than usual. There were eight western disturbances during December and abundant rainfall occurred in most of north-west India and neighbourhood.

Famine.

noming is more remarkable than the manner of the control of the co history of famine in India. For nearly forty years it was the bogey of the Indian administrator. The forecasts of the rains were studied with acute anxiety. The actual progress of the rains was followed with no less anxiety, and at the first signs of a bad or poor season the famine relief machinery was furnished up and prepared for any emergency. The reason for this is clear if we examine for a brief space the economic condition of the Indian peasantry. Nearly three-quarters of the people are directly dependent on agriculture for their daily bread. Very much of this agriculture is dependent on the seasonal rains for its existence. Immense areas in the Bombay Presidency, Madras, the United Provinces and Central India are in a Immense region of erratic and uncertain rainfall. The rainy season is short and if for any natural reason there is a weakness, or absence, of the rain-bearing currents, then there is either a poor harvest or no harvest at all. In Western lands everyone is acquainted with the difference between a good and a poor season, but western countries offer no parallel to India, where in an exceptionally bad year wide tracts of thickly populated land may not produce even a blade In the old days there were no railof grass. ways to distribute the surplus of one part of India to the districts where the crop had failed. There were often no roads, The irrigation works were few and were themselves generally dependent on the rainfall for their reserves. people lived from hand to mouth and had no store of food to fall back upon. Nor had they any credit. In the old days then they died, Commencing with the Orissa famine in 1865-67 the Government of India assumed responsibility for the saving of human life in such crises, After the famine of 1899-1900 this responsibi-lity was also shouldered by the Indian States. Stage by stage this responsibility was expressed in the evolution of a remarkable system of famine relief covering the whole field. But now that machinery has reached a remarkable degree of perfection, it is rusting in the official armouries, because the conditions have changed. The whole of India is covered with a network of railways, which distributes the produce of the soil to the centres where food is required. The extension of irrigation has enormously increased the product of the soil and rendered large areas much less dependent on the monsoon rainfall. At the same time the scientific study of the prob-At the same time the scientific study of the prob-lems of indian agriculture has raised the expacity of even the "dry" zones. The peasantry has necuminated a certain reserve against the rain-less days from the prosperity which accom-panied the period of high prices. The rapid spread of the co-operative credit movement has mobilised and strengthened rural credit.

To the student of Indian administration lightened the pressure on the soil. The relation nothing is more remarkable than the manner of famine to the question of Indian administra-

Famine under Native Rule.

Famines were frequent under Native rule, Famines were request unout and frightful when they came, "In 1630," and frightful when they came, in the History says Sir William Hunter, in the History of British India, "a calamity fell upon of British India, a camine, and applicate which enables us to realise the terrible meaning of the word famine in India under Native rule. Whole cities and districts were left bare of inhabitants," In 1631 a Dutch merchant reported that only cleven of the 260 families at Swally survived. He found the road thence to Surat covered with bodies decaying on the highway where they died, there being none to bury them. In Surat, that great and crowded city, he could hardly see any living persons; but "the corpses at the corner of the streets lie twenty together, nobody burying them. Thirty thousand had perished in the town alone. Pestilence followed famine." Further historical evidence was adduced by Sir Theodore Morrison in his volume on the Economic Transition of India. It has come to be seen that whilst rallways have checked the oldfashioned practice of storing grain in the villages they have made the reserves, where they exist, available for the whole of India. India there is now no such thing as a food famine; the country always produces enough food for the whole of the population; famine when it comes is a money famine and the task of the State is confined to providing the means for those affected by drought to earn enough to buy food. The machinery whereby this is done will be examined after we have seen the experiences through which it was evolved,

History of Recent Famines.

The Orissa famine of 1865-67 may be taken as the starting point because that induced to first great and organised effort to combat distress through State agency. It affected 180,000 square miles and 47,500,000 people. The Bengal Government was a little slow in appreciating the need for action, but later food was poured into the district in prodigious quantities. Thirtyfive million units were relieved (a unit is one per-son supported for one day) at a cost of 95 lakhs. The mortality was very heavy, and it is estimated that a million people or one-third of the popu-lation died in Orissa alone. This was followed by the Madras famine of 1806, and the famine in Western India of 1868-70. The latter famine introduced India to the great migration from Marwar which was such a distinguishing feature of the famine of 1899-1900; it is estimated that out of a total population of a million and a half has mobilised and strengthened rural credit. In Marwar, one million emigrated. There was The spread of manufacturing enterprise has famine in Behar in 1873-74, then came the great

South Indian Famine of 1876-78. This affected Madras, Mysore, Hyderabad and Bombay for two years and in the second year extended to parts of the Central and United Provinces and affected was 257,000 square miles and the population 58,500,000. Warned by the excessive expenditure in Behar and actuated by the desire to secure economy the Government relief programme was not entirely successful. The excess mortality in this famine is said to have been 5.250,000 in British territory alone. Throughout British India 700,000 000 units were relieved at a cost of Rs. 81 crores. Charitable contri-butions from Great Britain and the Colonies aggregated Rs. St lakhs

The Famine Codes.

The experiences of this famine showed the n cessity of placing relief on an organised basis. The first great Famine Commission which sat under the presidency of Sir Richard Strachey, elaborated the Famine Codes, which amended to meet later experience, form the basis of the tamine relief system to-day. They recommended (1) that employment should be given on the relief works to the abie-bodied, at a wage sufficient for support, on the condition of performing a suitable task; and (2) that gratuitous relief should be given in their villages or in poor houses to those who are unable to work. recommended that the food supply should be left to private agency, except where that was unequal to the demands upon it. They advised that the land-owning classes should be assisted by loans, and by general suspensions of revenue in proportion to the erop failure. In sending a Famine Code to the provincial governments, the Government of India laid down as the cardinal feature of their policy that the famine wage "is the lowest amount sufficient to maintain health under given circumstances. Whilst bound to maintain the labouring population at its normal level of comfort." Provincial at its normal level of comfort. Frommend, codes were drawn up, and were tested by the famine of 1896-97. In that 307,000 square miles were affected, with a population of 69,500,000. The numbers relieved exceeded 4.000.000 at the time of greatest distress. The cost of famine relief was Rs. 71 crores, revenue was remitted to the extent of Rs. 11 crore, and loans given aggregating Rs. 12 crore. The charitable relief fund amounted to about Rs. 12 crore, of which Rs. 12 crore was subscribed in the United Kingdom. The actual famine mortality in British India was estimated at 750,000. The experiences of this famine were examined by a Commission under Sir James Lyall, which reported that the success attained in saving life and the relief of distress was greater than had ever been recorded in famines, Supense was moderate. But before the Local bodied workers; payments by results were Governments had been given time to digest for saving cattle.

Governments had been given time to digest for saving cattle.

The proposals of this Commission or the people to recover from the stock, the great familine of 1899-1900 supervened.

The Famine of 1899-1900

Provinces, Berar, Bombay, Ajmer, and the Hissar district of the Punjab famine was acute: it was intense in Rajputana, Baroda, Central India, Hyderabad and Kathiawar. It was marked by several distinctive features. The rainfall over the whole of India was in extreme defect, being eleven inches below the mean. In several localities there was practically no rain. There was in consequence a great fodder famine, with a terrible mortality amongst the cattle. The water supply was deficient, and brought a crop of difficulties in its train. Then districts like Gujarat, where famine had been unknown for so many years that the locality was thought to be famine immune, were affected; the people here being softened by prosperity, clung to their villages, in the hope of saving their cattle, and came within the scope of the relief works when it was too late sto save life. A very large area in the Indian States was affected, and the Marwaris swept from their impoverished land right through from their impoversace and right through Central India like a horde of locusts, leaving desolation in their train. For these reasons relief had to be given on an unprecedented scale. At the end of July 4,500,000 persons were supported by the State, Rs. 10 crores were spent on relief, and the total cost was estimated at Rs. 15 crores. The famine was also marked by a widespread acceptance by asso marked by a widespread acceptance by Indian States of the duty hitherto shouldered by the Government of India alone—the supreme responsibility of saving human life. Aided by loans to the extent of Rs. 3‡ crores, the Indian States did a great deal, to bring their administration into line with that in British India. Although actual deaths from staryation were insignificant, the extensive outbreaks of cholera, and the devastating epidemic of malaria which followed the advent of the rains induced a famine mortality of approximately a million. The experiences of this faminwere collated by the Commission presided over by Sir Antony MacDonnell. This Commission reported that taking the famine period as a whole the relief given was excessive, and laid down certain modified lines. The cardinal feature of their policy was moral strategy. Pointing out that if the people were assisted at the start they would help themselves, whilst if their condition were allowed to deteriorate it proceeded on a declining scale, they placed in the forefront of their programme the neces-sity of "putting heart into the people." The machinery suggested for this purpose was the prompt and liberal distribution of taccavi loans. the early suspension of revenue, and a policy of prudent boldness, starting from the preparation of a large and expansive plan of relief and secured by liberal preparations, constant vigilance, and a full enlistment of non-official help. The wage scale was revised; the mi-

The Government of India are now in possession of complete machinery to combat the This famine affected 475,000 square miles with effects of drought. In ordinary times Govern-population of 59,500,000. In the Central ment is kept informed of the meteorological

conditions and the state of the crops; programmes of suitable relief works are kept up-to-date, the country is mapped into relief cricles, reserves of tools and plant are stocked. If the rains fail, policy is at once declared, if the rains fail, policy is at once declared, if the rains fail, policy is at once declared. The works are then opened, and if fabour in Considerable quantities is attracted, they are converted into relief works on Code principles. Poor houses are opened and 'gratuitous relief given to the infirm. On the advent of the works of the control of the

Famine Protection.

Site by side with the perfection of the mechanism for the relief of famine ban some mechanism for the relief of famine ban some bands of the development of famine protection. The Famine Commission of 1880 stated that the best, and often the only means of securing protection from the extreme effects of famine and drought, are railways and trigation. These productions were sufficiently and trigation. These productions which will pay interest and sinking indicates which will pay interest and sinking indicates which will pay interest and sinking indicates which will pay interest solution to the large transfer of the pay interest works, which do not pay, directly from revenue. It order to guarantee that there should be the Famine Insurance Grant was instituted in 1870. It was decided to see apart from the general revenues Rs. 1½ crores annually or one million sterline. The first charge on this grant is famine relief, the second protective collways is now practically complete. Great progress is being made with protective irigation. Acting on the advice of the Irrigation Commission an elaborate properties of the protective religation. The second protective protective religation and the Bombay seamme of protective religation and the Bombay in India—and in the Central Provinces.

Under the Statutory Rules framed under the Government of India Act of 1910, Provincial Governments (except Burna and Assam) are required to contribute from their resources a fixed sum every year for expenditure of the state of

The Outlook.

Such in brief is the official programme and organisation which has been built up not of the experience and practice of the man of the experience and practice of the property

Increased Resisting Power. The causes of this economic change in the con-

litions of India, whose influence is widespread are many. We can only briefly indicate them here. There is a much greater mobility in Indian labour. Formerly when the rains failed the ryot clung to his village until State relief in one form or another was brought almost to his doors. Now at the first sign of the failure of the rains he girds up his loins and goes in search of employ-ment in one of the industrial centres, where the supply of labour is, when general economic conditions are normal, rarely equal to the demand, or on the constructional works which are always in progress either through State or private agency in the country. Then the ryot generally commands some store of value, often mistermed a heard. The balance of exports in favour of India in normal times is approximately £50 millions a year. The gold and silver bullion in which this is largely liquidated is distributed all over the country, in small sums or in ornaments, which can be drawn upon sums of mornaments, when can be drawn up of in an emergency. The prodigious coining of rupees during the last two years of the war, and the continuous absorption of gold by India, represent small diffused savings, which take this form owing to the absence of banking institutions and lack of confidence in the banking system. There has been a large extension of irrigation. More than one-third of the land in the Punjab and common one-similar to the state in the Finitian is now under irrigation, and in other Provinces, particularly in the famine-susceptible tracts of the Bombay Deccan, irrigation works have been constructed, which break the shock of a failure of the rains. The natural growth of the population was for some years reduced by plague and famine diseases, followed by the great influenza epidemic of 1918-19, which swept off five millions of people. This prevented the increase of congestion, but brought some areas particularly in the Indian States, below their former population-supporting capacity, (The 1931 census showed an increase of over 30 million in the population since 1921.) The increase of railways distributes the resources of the country with ease; the spread

of the co-operative credit movement has General of India, is the Secretary & Treasurer of improved rural credit. Finally, there is the Trust. The endowment of Rs. 32,78,400

The increased resisting power of the people was effectively demonstrated during the famine of 1920-21, which was due to the failure of the monsoon towards the end of the year 1920. The distress which appeared in the end of 1930 persisted during the early months of 1921 and regular famine was declared in parts of Madras, Bombay, Central Provinces and Baluchistan. Local distress prevailed also in Bengal, Puniah and Central India. The largest number of persons on relief of all kinds did not exceed 0.45 million which was considerably less than 3% of the total population of the area affected by the failure of the monsoon.

The Indian People's Famine Trust.

Outside the Government programme there is always scope for private philanthropy, especially in the provision of clothes, help for the superior class poor who cannot accept Government aid, and in assisting in the rehabi-At every great famine large sums have been subscribed, particularly in the United Kingdom, of the United States gave generous help. With fund, the Maharaja of Jaipur gave in 1900 a sum of Rs. 15 lakhs, in Government securities to be held in trust for the purposes of charitable relief in seasons of general distress.

The state of the state of the state of the state of the cartinghase of 1934 and 1935 in means of the cartinghase of 1934 and 1935 in the state of th

improved rural credit. Finally, there is the the Trust. The endowment of Rs. 32.78.400 considerable development of manufacturing above mentioned is permanently invested and influstry, which is generally short of labour and the principal never taken for expenditure. The helps to above the energies of a faming year, income from it is utilised for relief work as Whilst the Government is completely equipped in the constant of the present of that there will ever recur such an emergency as years of trouble savings accumulated one that of 1899. Familie can now be efficiently expenditure is not necessary. The temporary met by the liberal distribution of tagat, the investments—in Government Securities—attempts. suspension and remission of the land revenue end of 1937 stood at Rs. 3,200 and the cash demand, the relief of the aged and others balance at the same time was Rs. 1,07;482-11-8. who cannot work, the provision of cheap fodder so that the total available for expenditure at the for the cattle, with possibly some assistance commencement of 1938 was Rs. 1,10,682-11-8. in transporting the affected population of the In 1937 relief was granted to the extent of famine-affected tract to the industrial centres, Us. 35,000 as compared with Pa. 1-15, letter to Rs. 35,000 as compared with Rs. 1:15 lakbs granted during 1936.

The whole conditions to meet which the Trust was founded have changed in recent years. This is the result of the improved policy of Govern-ment in regard to famine relief and of the difference in the meaning of the word famine in consequence of the improvement of transport communications and other factors affected by modern progress. An area stricken by failure of seasonal rains now obtains supplies from other regions in a manner impossible before the development of railways and of modern marketing practice and Government belp its people by loans given direct or through Co-operative Societies to tide them over the period of scarcity. The experience of successive visitations of scarcity in different parts of the country also proves that the general economic progress of the neonle makes them able to meet temporary periods of stress in a manner formerly unimaginable. Famine in the old terrible sense of the term has in fact ceased to occur. This was well litation of the cultivators when the rains break. illustrated by the events of 1919, when the land suffered from a failure of the rains more general throughout India and worse in degree than any for this purpose, and in 1899-1900 the people previously recorded by the Meteorological Depreviously recorded by the meteorological De-with mamine with the crisis was borne with a mini-mum of suffering. The demands upon the 900 a Famine Trust have consequently so greatly writtes diminished in their original sense that hardly any money is now distributed from it for the relief of famine in the proper sense of the word, resulting from rain failure and expenditure has This Trust Fund in a few years increased to mainly become grants of assistance to sufferers This Triks rung in a rew years increased to imminy occurs grains or assistance to sinceres to all color of the control of the Endowment Act. 1890. The income of the caused by the carthquakes of 1934 and 1935 in

Hydro-Electric Development.

tries of the world in regard to the development of hydro-electric power and great strides in this direction have already been made. India not only specially lends itself to projects of the kind, but peremptorily demands them. Cheap motive power is one of the secrets of successful industrial development and the favourable initial conditions caused by the war, the enthusiasm for industrial development which has seized nearly all classes of educated Indians, and the special attention which the circumstances of the war have compelled Government to direct towards the scientific utilisation of Indian natural resources all point to a rapid growth of industrial enterprise in all parts of India within the next few years. Indeed, the process, for which sound foundations had been laid before the war, is now rapidly under way. India is severely handicapped compared with other lands as regards the generation of power by the consumption of fuel, coal or oil. These commodities are all difficult to obtain, and costly in India except in a few favoured areas. Coal supplies, for example, are chiefly centred in Bengal and Chota Nagpur and the cost of transport is heavy. Water power and its transmission by electricity offer, on the other hand, immense possibilities, both as regards the quantity available and the cheapness at which the power can be rendered, in all parts of India.

Water power schemes, pure and simple, are generally difficult in India, because the power needs to be continuous, while the rainfaills only during a small portion of the year. Perennial rivers with sufficient water throughout the year are practically non-existent in India. Water, therefore, must be stored for use during the dry parts in the mountainous and hilly regions where the heaviest rainfails occur and the progress already made in utilizing such opportunities by the electrical transmission of ower affords high encouragement for the future. Further, hydro-electric schemes can be used to be a supply the property of the propert

The Industrial Commission emphasized the necessity for a Hydrographic Survey of India, On this recommendation the Government of India in 1918 appointed the late Mr. G. T. Branch, United Provinces, Government of Hydrographic Commission of the Commission of India, Mr. S. W. Méares, Mr. C. S., Electrical Advisor to the Government of India, Mr. Sarlow dide, but Mr. Meares Mr. C. S., Electrical Advisor to the Government of India and cultiling a programme of investigation to be undertaken in the course of the Commission of the Commiss

Indla promises to be one of the leading counter of the control of

The Report points out that the Rombey Presidency holds a unique position owing to its great existing and projected schemes at Lonavia, the Andhra Valley, the Nila Mula and the Koyna Valley and has the still greater advantage of possessing a firm ready to develop its resources.

Bombay Hydro-Electric Works.

pany, I.id. ", ", 1927.
These Hydro-Electric schemes have a combined normal capacity of 246,000 H.P. and provide electrical energy for the City of Bombay, Bombay suburbs, Thana, Kalyan and Greater Poona.

Bombay, after London, is the second largest manufacturing centre in India. Its population including submista the 1931 census was 1,263,13 with a total population of approximately 1,000,000 in all of the areas served by these companies. Its cotton mills and other factories are 1,000,000 in ., which multi these companies. Its cotton mills and other factories are 1,000 in

The favourable position of the Western Ghats which rise to a height of more than 2,000 feet above sea-level within a few miles of Bombay City, situated on the shores of the Arabian sea with their heavy rainfalls was taken full advantage of for providing Bombay City and vicinity with an adequate and economical power supply.

problem in India and outlining a programme of investigation to be undertaken in the course of the inquiry. Mr. Meares showed that industries of the inquiry, Mr. Meares showed that industries now, of which only some 286,000 ht. p. is supplied by electricity from steam, oil or water business of ar actually in sight amount of the first owner of the industries of the foreign that is not the foreign and the interval of the foreign and the interval of the foreign and the interval of the foreign and the interval of the foreign and the interval of the foreign and the interval of the foreign and the interval of the foreign and the interval of the foreign and the interval of the foreign and the interval of the foreign and the interval of the foreign and the interval of the foreign and the interval of the foreign and the interval of the foreign and the interval of the foreign and the foreign and the interval of the foreign and the foreign

the foot of the Ghats, where the head at turbine nozzles is 1,750 feet or approximately 750 lbs. per sq. inch. The normal capacity of the Power Station at Khopoli is 48,000 KW or 64,300 H.P. This scheme was formally opened by H.E. The Governor of Bombay on the 8th of February

Investigations in 1917-18 led to the discovery of a site on the Andhra River just to the North of the Tata Hydro-Electric Supply Company's lakes, where an additional 48,000 KW (or 64,300 H.P.) could be developed. These investigations resulted in the formation of the Andhra Valley Power Supply Co. and the construction of the schemes, the principal features of which consist of a reservoir formed by a dam about 190 feet high, across the Andhra River and a tunnel 8,700 feet long driven through solid trap rock to the scarp of the Ghats, from which the water is taken in steel pipes 4,600 feet long to the turbines in the generating station at Bhivpuri. The head of water at turbine nozzles is 1,750 feet or approximately 750 lbs. per sq. inch. The electrical energy is transmitted to Bombay over a transmission line 56 miles long for augmenting the supply from Khopoli.

The Tata Power Company's scheme on the Nila-Mula River to the South-East of Bombay was investigated and developed along lines similar to the Andra Valley scheme and has a normal installed capacity of 87,500 KW or 117,000 HP. The power is transmitted to Bombay over a transmission line 76 miles long and is used to augment the supply of the two earlier companies to mills, factories and railways.

The Tata Hydro-Electric Power Supply Co., The Andhra Valley Power Supply Co. and the Tata Power Company operating as a unit under one management supply the whole of the electrical energy required by the Bombay Electric Supply & Tramways Co. Ltd., the majority of the mills and industries in Bombay City, the B. B. & C. I. Railway for their suburban electrification the whole of the energy required by the G. I. P. Railway in Bombay City and for their main line traction up to Kaiyan, the whole of the electrical energy required by the Poona Electric Supply Company and the distributing licensees in Thana, Ralyan and the Bombay suburbs

These three schemes operating as a unit under one management provide an adequate and economical power supply in the areas mentioned above for all purposes. The rate for energy delivered to the Mills, Factories and Railways has, for several years, shown a steady decrease and now averages 0.50 of an anna per unit, which downward trend will continue as industries develop and individual consumptions increase. This power supply greatly enhances the natural advantages Bombay has as a great manufacturing, trading and shipping centre,

The fact that the Bombay Electric Supply and Tramways Company has shut down its steam-driven generating plant and now takes its supply in bulk from the various Tata companies is of note, and it is of more than passing interest to note that the Poona Electric Supply

steel pipes to the Power House at Khopoli | Company has recently adopted a similar course This is a phase of hydro-electric distribution which is quite in its infancy in India, but it is possible to foresee the time when every village within a couple of hundred miles of a hydro-electric power station will receive its supply of electric current in bulk, thus greatly reducing capital and administrative charges and minimising the price of current to the consumer. It is a system which has become something of a fine art in California, where current is transmitted by overhead wires for many hundreds of miles at a pressure of 200,000 volts or double the pressure commonly employed in India for overhead long-distance transmission.

Mysore Hydro-Electric Works.

The first Hydro Electric Scheme of any magnitude undertaken in India or indeed in the East. was that on the Cauvery River in Mysore State, which with its generating station, transmission line and distributing system was inaugurated in 1902.

The Cauvery River rises in the district of Coorg in the Western Ghats and flows across Mysore State. The principal object of this scheme was the supply of power to the Mining companies on the Colar Gold Field. about 92 miles from Sivasamudram, the site of the generating station. This transmission line was for a number of years the longest line in Asia, Since 1902 the supply of electrical energy from Sivasamudram has been provided for Bangalore and Mysore cities and about 200 other towns and villages in the South-Eastern Half of the State.

The initial undertaking has constantly been expanded so that its total capacity now stands at 46,000 E.H.P. This is the maximum obtainable from the water available. This great increase has been made possible by the construction of the Krishnarajasagar reservoir near Mysore City. which has a capacity of 44,000 million cubic feet of storage above the minimum draw off,

The number of the consumers of all classes continues to increase rapidly every year with greatly increased demands. The Government of Mysore have encouraged this growth in the use of electrical energy and have made a survey of Hydro Power resources of the State and prepared plans for the construction of a second generating station at the most the construction economical site.

The number of lighting and power consumers of all classes in about 250 towns and villages within the Mysore State has increased to approximately 40,000. Demands for very large additional blocks of power have arisen making it necessary for Government, in continuing its policies for the industrial development of the State, to sauction the construction of a Power Station at the Shimsha Falls for the production of 23,000 H.P. and the construction of a Power Station at the Jog Falls for the production of 20,000 H.P. The construction of these projects are to be completed in the shortest time possible and will bring the total capacity of Government's Hydro-electric Generating Stations to 89,000 Horsepower,

The Transmission System consists of 555 route-miles of 78,000 and 37,500 volt lines with a total of 850 miles of circuits. The transmission

System is now being extended into every District within the State which together with the appropriate distribution systems will supply hydroelectric power to more than 350 towns and yillages within the next 2 to 3 years.

Works in Madras

The Pykara Hydro-Electric Scheme an metertaking of the Maddras Government, was commenced at the end of 1929, the first stage of the project being completed at the end of 1932. The waters utilised for the development of the scheme are taken from the Pykara river which drains from the Nikeli and the Pykara river which drains from the Nikeli and the Pykara river which drains from the Nikeli and the Pykara river which drains from the Nikeli and the Pykara river at taken from the Nikeli and the Pykara river at taken from the Nikeli and the Pykara river at taken from the Nikeli and the Pykara river at taken from the Nikeli and the Nik

The natural head available exceeds 4,000 ft. which is higher than any other in the British Empire or America. A direvsion we're across the river 3 miles below the Pytam bridge diverts the stream flow to the forehay through a 7,006 feet open channel. From the forebay water is leit to a surge tank by a 78° dia, phip 1,006 feet long. At the surge tank two 27° penstocks branch off and feed 3 turbines through manifold phiping and valves at the power through the postock is about 3000 feet.

At present three 7,800 K.V.A. 3—januse 600 R.P.M. alternators coupled to 11,000 H.P. petton wheels are installed. Power is generated at 11,000—volts, 50-eyeles and stepped upto 60,000 volts by means of three 7,810 K.V.A. 3-plasse, II. K.V.,64-110 K. V. transformers. The supply to Mighris district is at 11 K.V. from an auxiliary bus in the power station.

A 50 mile double circuit 66/110 K.V. line transmits power to Coimbatore which is the main receiving station as also the chief load centre, 66 K.V. lines have also been extended to Erode, Trichinopoly and Negapatam, a distance of nearly 200 miles from Golmbatore,

The longest direct transmission at 66 K.V. is 280 miles. But the loads at those places have recently been transferred to the Mettur scheme which came into operation in June 1937. In addition to the main transmission lines considerable lengths of 11 and 22 K.V. distribution

lines have been constructed, particularly in the Coimbatore district. At all load centres outdoor step-down transformers have been constructed with the necessary transformers and switchgear.

The total capital expenditure up to the end of 1938-97 is nearly 2 crores of rupes, the revenue during the year being about 23, lakins. The scheme has already become self-supporting in the 4th year of operation. The load development has been much more rapid than anticipated, the peak load in June 1937 being over 16,000 KW, which is in excess of the normal capacity of the station, The formal capacity of the station, The or the state of the station of the station of the station of the station of the station of the station of the station of the station of the station of the station of the station of the station of the station.

To provide for the rapidly increasing demand in the existing area and also the extensions to Madura and Rammad districts additional plant has recently been ordered. Additional storage of 500 million cuble feet has also been provided by constructing a dam in the upper reaches of the Pykara river in the Mukutti basin. The main features of the extensions are described

Pykara Scheme Extensions.—Two 12,500 K.V.A., 600 R.P.M. 11 K.V., generators coupled to two 16,000 H.P., hupsies wheels and two have already been ordered, as sloo an additional perstock line. Provision is also made for installing at a later date two additional units installing at a later date two additional units expected to be completed by the end of 1938. It is also proposed to raise the voltage of the Pykara Coliniators line to 110 K.V. About the proposed that the control of the pykara Coliniators line to 110 K.V. About units of the pykara coliniators line to 110 K.V. About manager are under constructions.

The construction of the Mukurti dam commenced in 1935. The dam is to be 90 feet high providing a storage of 1,600 million cubic feet, and costing Rs. 21 lakins. It has already been raised to a level assuring 500 million cubic feet of storage.

The load on the plants of the Madras Electricity department is expected to exceed 20,000 K.W. and generation 100,000,000 units in the year 1937-38.

The Mettur Hydro-Electric Scheme,— This is a Madras Government scheme which commenced operation in June 1937.

The development consists in utilising the irrigation supplies which will be let down from the Mettur Reservoir for the generation of hydroelectric power. The reservoir is of 93,500 million cubic feet capacity and the salide head over the minimum of 60 feet. The dam is pierced by 4 cast from pipes 8'-6" diameter for connection to 4 turblace.

As the potential output of the Mettur station is very variable due to the wide variations in head and discharge, it is proposed to generate and sell three classes of load viz:—

(1) Primary power available at all times;

(2) Secondary power subject to restricted use in dry months but which could be made into primary power by the assistance of the existing Pykara (and later Madras steam-station) station

(3) Tertiary power generally available for Four pipes 600 feet long lead from the forebay cight mouths in the year,

The scheme is designed to supply nower initially to the districts of Salem, Trichinopoly, Tanjore, North Arcot, South Arcot and Chittoor,

The power house is situated immediately below the Metter dam and in it are now installed three 12.500 KVA, 250 R.P.M. generators coupled to overhung type twin horizontal Francis turbines of 16,000 H.P. each, Provision is made for installing a fourth unit at a later date, Power is generated at 11,000 voits, 50 cycles, 3-phase and stepped up to 66,000 volts (110,000 voks later) for transmission to various load centres. Supply to local industries near Mettur is at 11 from an auxiliary bus in the power station. The present load on the station is about 4,000 K.W. including the load which was till recently being supplied by the Pykara station,

Two double circuit 66/110 K.V. trunk lines take off from the power station, one to Erode in the south and the other to Singarappet in the north. At Erode, the Mettur System is linked with the Pykara net work and both stations will be working in parallel for some months in the year. From Singarappet, it is proposed to extend the transmission system to Madras eventually. The initial transmission and distribution system consists of about 100 miles, of 66/110 K.V., 300 miles of 66 K.V., 100 miles of 33 K.V., 100 miles of 22 K. V. and 25 miles of 11 K.V. lines.

At all important load centres, outdoor transformer stations are provided for stepping down the voltage to 11 or 22 K.V. as required. At Trichinopoly, which is an important station in

the southern area, two 2500 K. V. schrynonous -eonô condensers are installed for ensuring proper

voltage regulation. The cost of the initial scheme is about Rs. 1-4

Papanasam Hydro-Electric Scheme.—This is the third hydro-electric scheme to be undertaken by the Madras Government. The scheme has just been sanctioned and is expected to commence operation in 1941.

Works in Kashmir.

A scheme of much importance from its interesting size. but more because of the developments that may be expected from it than for the part which current supply already plays in the life of the countryside, is one installed a few years ago by the Kashmir Durbar, utilising the River near Baramulla, which lies thirty-Thelum. four miles north-west of Srinagar. The head works of the Jhelum power installation are situated six and a half miles from the power house and the main connection between the two is a great timber flume. These works and a capacity for carrying water sufficient for the mittee, appoint generation of 20,000 electrical horse power, consideration.

Four pipes out feet rong and from fore large say to the power house, and from fore bay to water-wheel there is an effective head of 395 feet. There are four vertical waterwheels, each coupled on the same shaft to a 1,000 k.w., 3-phase, 2,300 volt, 25-period generator running at 500 r.p.m., and each unit is capable of taking a 25 per cent. overload, which the generator end is guaranteed to maintain with safety for two hours. The power house is of sufficient capacity to allow of 15,000 k.w. generating plant being installed within it. Two transmission lines run side by side as far as Baramulla. 21 miles distant, at which point one terminates. The other continues to Srinagar, a further 34 miles. The installation at Baramulja was originally utilised for three floating dredgers and two floating derricks, for dredging the river and draining the swampy countryside and rendering it available for cultivation. The lighting of Baramulla has lighting of Baramulla has been taken in hand with satisfactory results and it is expected that the lighting demand will rapidly increase and that a small demand for power will soon spring up. At Srinagar, the line terminates at the State slik factory, where current is part of Srinagar city is now electrically lighted.

United Provinces Works.

The Ganges Canal Hydro-electric Grid supplies power at attractive rates for domestic, industrial and agricultural purposes to 14 districts in the west of the province and to Shahdara in Delhi province. Seven of the ten falls available for electrification have been developed and a standby steam power station at Chandausi of 9,000 kilowatts has been constructed. During 1938 no less than 29,700 kilowatts in all will be available. Besides supplying some 75 towns with current for light and fans and minor industries, the grid provides energy for irrigation pumping from rivers and open and tube wells. The Ganges Valley State Well Scheme comprises about 1,500 tube-wells, covering the districts of Moradabad, Bijnor, Budaun, Muzaffarnagar, Meerut, Bulandshahr and Aligarh, introducing irrigation on the volumetric system over anproximately one million acres hitherto without any source of irrigation. This supply of chean power from some 2,000 sub-stations is already having an important bearing on the economic disposal of crops and the development of minor industries in the urban centres.

The steam power house at Sohwal is canable of supplying 1800 kilowatts. The energy will be used to electrify Fyzabad and Ajodyha and to pump 160 cusecs from the Gogra into the Fyzabad canal system 120 miles in length.

Investigations into the electrical and financial possibilities of a Grid Project for the eastern districts of the province have been completed the forebay at the delivery end of the flume have and the recommendations of an expert committee, appointed in November 1937, are under

Local Self-Government.

A field of the diffinance of 1919 was who allow residences to the tenantry, artisans, that of local government. This was one of the traders and others. The waste land is allotted subjects transferred to Indian ministers, and to the village, and, if wanted for cultivation, is under their leadership considerable developments have been essayed. On the whole, the progress of local government in India for the past quarter of accutury has been disappointing. The greatest successes have been won in the Presidency towns, and particularly by the Municipality of Bombay. The difficulties in the way of progress were fielal character of this appointment, as compared manifest. Local government had to be a creation -the devolution of authority from the Government to the local body, and that to a people who for centuries had been accustomed to autocratic administration. Again, the powers entrusted to local bodies were insignificant and the financial support was small. There are however many indications that the dry bones of the mofussil arestirring.

Throughout the greater part of India, the village constitutes the primary territorial unit of Government organisation, and from villages are built up the larger administrative titles-tabsils, sub-divisions, and districts.

"The typical Indian village has its central residential site, with an open space for a pond and a cattle stand. Stretching around this nucleus lie the village lands, consisting of a cultivated area and (very often) grounds for grazing and wood-cutting. . . . The inhabitants of such a village pass their life in the midst of these simple surroundings, welded together in a littlecommunity with its own organisation and government, which differ in character in the various types of villages, its body of detailed customary rules and its little staff of functionaries, artisans and traders. It should be noted, however, that in certain portions of India, s.g., in the greater part of Assam, in Eastern Bengal, and on the west coast of the Madras Presidency, the village as here described does not exist, the people living in small collections of houses or in separate homesteads,"-(Gazetteer of India.)

The villages above described fall under two main classes, viz.-

Types of Villages .- "(1) The 'severalty' or raiyatwari village which is the prevalent form outside Northern India. Here the revenue is assessed on individual cultivators. There is no joint responsibility among the villagers though some of the non-cultivated lands may he set apart for a common purpose, such as grazing, and waste land may be brought under the plough only with the permission of the Revenue authorities, and on payment of assessment. village government vests in a hereditary headman, known by an old vernacular name, such as patel or reddi, who is responsible for law and order, and for the collection of the Government revenue. He represents the primitive headship of the tribe or clan by which the village was originally settled."

"(2) The joint or landlord village, the type prevalent in the United Provinces, the Punjab and the Frontier Province. Here the revenue was formerly assessed on the village as a whole, this incidence being distributed by the body of the special guidance of sympathetic officers. superior proprietors, and a certain amount of collective responsibility still, as a rule, remains, future possibilities, and for present purposes it

A field of the administration of India The village site is owned by the proprietary body, partitioned among the shareholders. The village government was originally by the punchauet or group of heads of superior families. In times one or more headmen have been added to the organisation to represent the village in its dealings with the local authorities; but the artiwith that which obtains in a raivatwari village with that which is evidenced by the title of its holder, which is generally lambardar, a vernacular derivative from the English word 'number.' It is this type of village to which the well-known description in SIr H. Maine's Village Communities is alone applicable, and here the co-proprietors are in general a local oligarchy with the bulk of the village population as tenants of labourers under

Village Autonomy.-The Indian villages formerly possessed a large degree of local autonomy, since the native dynasties and their local representatives did not, as a rule, concern themselves with the individual cultivators, but regarded the village as a whole, or some large landholder as responsible for the payment of the Government revenues, and the maintenance of local order. This autonomy has now dis-appeared owing to the establishment of local, civil and criminal courts, the present revenue and police organisation, the increase of com-munications, the growth of individualism, and the operation of the individual rappateari system, which is extending even in the north of India, Nevertheless, the village remains the first unit of administration; the principal village functionaries—the headman, the accountant, and the village watchman—are largely utilised and paid by Government, and there is still a certain amount of common village feeling and interests.

Punchayets.—For some years there was an active propaganda in favour of reviving the village council-tribunal, or Punchayet and the Decentralisation Commission of 1908 made the following special recommendations:

"While, therefore, we desire the development of a punchayet system, and consider that the objections urged thereto are far from insurmountable we recognise that such a system can only be gradually and tentatively applied, and that it is impossible to suggest any uniform and definite method of procedure. We think and definite method of procedure. that a commencement should be made by giving certain limited powers to Punchayets in those villages in which circumstances are most fa yourable by reason of homogeneity, natural intelli-gence, and freedom from internal feuds. These powers might be increased gradually as results warrant, and with success here, it will become easier to apply the system in other villages. Such a policy, which must be the work of many years, will require great care and discretion, much patience, and judicious discrimination between the circumstances of different villages: and there is a considerable consensus of opinion that this new departure should be made under

This is, however, still mainly a question of

is unnecessary to refer at greater length to the subject of village self-government. Various measures have been passed, but it is too carty to say what life they have. The Panjab Government has passed a Village Pundayar As willage, a system of connellors to whom certain local matters, including judicial power, both civil and etaiminal of a minor character, may be assigned. In Bihar a Village administration of village affairs by villagers and connellors of the control

in the same direction. Municipalities.—The Presidency towns had some form of Municipal administration, first under Royal Charters and later under statute, from comparatively early times, but outside of them there was practically no attempt at municipal legislation before 1842. An Act passed in that year for Bengal, which was practically inoperative, was followed in 1850 by an Act applying to the whole of India. Under this Act and subsequent Provincial Acts a large number of municipalities was formed in all provinces. The Acts provided for the appointment of commissioners to manage municipal affairs, and authorised the levy of various taxes, but in most Provinces the commissioners were all nominated, and from the point of view of self-government, these Acts did not proceed far. It was not until after 1870 that much progress was made. Lord Mayo's Government, in their Resolution of that year introducing the system of provincial finance, referred to the necessity of taking further steps to bring local interest and supervision to bear on the management of funds devoted to education, sanitation, Medical, charity, and local public works. New municipal Acts were passed for the various Provinces between 1871 and 1874, which, among other things, extended to the elective principle, but only in the Central Provinces was popular representation generally and successfully introduced. In 1881-2 Lord Ripon's Government issued orders which had the effect of greatly extending the principle of local self-government Acts were passed in 1883-4 that greatly altered the constitution, powers, and functions of municipal bodies, a wide extension being given to the elective system, while independence and reaponsibility were conferred on the committees of many towns by permitting them to elect a private citizen as chairman. Arrangements were made also to increase municipal resources and financial responsibility, some items of provincial revenue suited to and capable of deveiopment under local management being transferred, with a proportionate amount of provincial expenditure, for local objects. The general principles thus laid down have continued to govern the administration of municipalities down to the present day.

The Present Position.—There are some 781 unutelpathies in British india, with something over 21 million people resident within their limits. Of these municipathies, coughly 710 have a population of less than 50,000 persons and the remainder a population of \$0,000 and over-remainer a population of \$0,000 and over-remainer a population of \$0,000 and over-remainer and \$0,000 and over-remainer and \$0,000 and over-remainer and \$0,000 and \$0,

amounts to 20 per cent., and is smallest in Assam where it amounts to only 2 per cent. In other provinces it varies from 4 to 9 per cent, of the Turning to the composition total population. of the municipalities, considerably more than half of the total members are elected and there is a steady tendency to increase this proportion.
Ex-officio members are only 7 per cent.
and nominated 25 per cent. Elected members are almost everywhere in a majority. Taking all municipalities together, the non-officials outnumber the officials by nearly six to nearly six to one. The functions of municipalities are classed under the heads of Public Safety, Health, Convenience and Instruction. For the dis-charge of these responsibilities, there is a municipal income of Rs. 14'03 crores derived principally from taxation, just over one-third coming from municipal property, contributions from provincial revenues and miscellangous sources. Generally speaking, the income of municipalities is small, the four cities of Calcutta. Bombay, Madras and Rangoon together providing over 40 per cent. of the total. The heaviest items of this expenditure come under the heads of "Conservancy" and "Public Works" which amount to 14 per cent, and 13 per cent, respectively, "Water-supply" comes to 13 per cent. "Drainage" to 4 per cent. and "Education" to over 11 per cent. In some localities the expenditure on education is considerably in excess of the average. In the Bombay Presidency, excluding Bombay City, for example, the expenditure on education amounts to more than 21 per cent. of the total funds, while in the Central Provinces and Berar it is over 17 per cent,

District Boards .- The duties and functions assigned to the municipalities in urban areas are in rural areas entrusted to district and local Boards. In almost every district of British India save in the province of Assam, there is a board subordinate to which are two or more sub-dis-trict boards; while in Bengal, Madras and Bihar and Orissa, there are also Union Committees. Throughout India at large there are some 207 district boards with 584 sub-district boards besides 455 Union Panchayats in Madras. This machinery has jurisdiction over a population which was over 221 millions in 1980-31. Leaving aside the Union Committees and Union Boards or Panchayats the members of the Boards numbered over 16,000 in 1930-31, of whom 73 per cent, were elected. As in the case of municipalities the tendency has been throughout India to increase the elected members at the expense of the nominated and the official members. The Boards are practically manned by Indians, who constitute 96 per cent, of the whole membership, Only 11 per cent, of the total members of all boards are officials of any kind. The total income of the Boards in 1930-31 amounted to Rs. 16:57 crores, the average income of each board being Rs. 2,00,000. The most important item of revenue is provincial rates, which represent a proportion of the total income varying from 25 per cent. in Bombay and in the N. W. F. Province to 63 per cent, in Bihar and Orlssa. The principal objects of expenditure are education which has come remarkably to the front within the last three years and civil works such as roads and bridges.

Medical relief is also sharing with education year 1930-31; and a distinct step forward has though in a less degree the lion's share of the been projected by the administration in the direcavailable revenue.

Improvement Trust .- A notable feature in the recent sanitary history of India is the activity played by the great cities in the direc-tion of social improvements. In Bombay, Calcutta, Lucknow, Allahabad, Rangoon and Cawnpore the Improvement Trusts developed important activities which are described in a separate chapter (q.v.). In Bombay the work of the Improvement Trust is carried forward by the Bombay Development Directorate. Other cities are beginning to follow the examples of these great cities. The Government of India in 1937 established an Improvement Trust to attend to slum clearance in old Delhi City and to the general expansion of their Winter Capital.

Provincial Progress .- There was passed in Rengal in 1919 a Village Self-Government Act embodying the policy of constituting Union Boards at the earliest possible date for groups of villages throughout the province. The number of these boards continues to increase, rising from 1,500 to more than 2,000. In 1930-31 the number of Union Boards rose to 4,510. There are also 12 Union Committees. Though they are in their infancy as yet, many of them show a remarkable aptitude for managing their own affairs.

In Bombay the development of village selfgovernment has also proceeded, as the result dency, some 145 out of 155 municipalities had a was recently made a two-thirds elected majority of councillors in the will prove a success.

tion of liberalizing the constitution of all municipal bodies. The polloy of appointing a non-official president has been extended both to district and sub-district boards, and a large number of non-officials have also been appointed presidents of sub-districts (taluka) boards. In Madras also the institutions of local self-government continued to progress in an encourag-ing manner. In the United Provinces the new District Boards, which consist of non-official members only with elected non-official Chairman, were plunged straight-way into financial difficulties. In the Puniab municipal administration has shown improvement, the general attitude and mass now man proveniers, the general abbilities of the members in regard to their responsibilities being promising for progress in the future. In the Central Provinces, the year 1920 winnessed the passing of a Local Self-Government Act intended to guide into proper channels the undoubtedly growing interest in public matters. The continued reduction of official members and chairman, and the wider powers of control given to local bodies have been an incentive to the development of local self-government, leading to an increased sense of public duty and respon-sibility. Another very important measure regulating municipalities was passed into law in 1922. Its chief features are the extension of the Municipal franchise, the reduction of official and nominated members, the extension of the powers of Municipal Committees and the relaxation of official control. In the North-West Frontier Province, the institution of local selfof an Act for constituting, or increasing the power of all Act for constituting, or increasing the power of village committees which was passed in government is somewhat of a foreign ground. In this presi. An important extension of the elective principle was recently made and it is hoped that this

Calcutta Improvement Trust.

The Calcutta Improvement Trust was instiimprovement schemes.

The origin of the Calcutta Improvement Trust must, as in the case of the corresponding Bombay body, upon which the Calcutta Trust was to a large extent modelled, be looked for in a medical enquiry which was instituted into the sanitary condition of the town in 1896, owing to the outbreak of plague. It was estimated that the Trust might in the ensuing 30 years have to provide for the housing of 225,000 persons. The population of Calcutta proper, which includes all the most crowded areas, was 644,995 in 1891, and increased to 801,251, or by 25 per cent, by 1901. The corresponding figure according to the 1921 Census was 903,508 and this had increased by 1931 to 1,196,734.

Preliminary Investigations continued tuted by Government in January, 1912, with a several years, so that it was only in 1910 view to making provision for the improvement that legislation was eventually introduced in and expansion of Calcutta by opening up con-the provincial legislature and the Trust instituted getted areas, laying out or altering streets, by it. The Bill provided for a large expendifrevelding open spaces for purposes of vents bare on improvement schemes and the provision lation or recreation, demolshing or constructed of open spaces and for special loral taxation ing buildings and ro-housing the poorer and to this end. It also provided for the appoint-working classes (Isplaced by the execution of ment of a wholetime chairman of the Board of Trustees and the membership of the Trust was fixed at eleven.

The following constituted the Board of Trastees at 31st March 1987;—Mr. C. W. Gurner, 1.0.8., Chairman; Mr. J. C. Muterian, Bara-Law, Chief Excettive Officer, Calcutta Corporation (xx-officio); Mr. D. J. Cohns. Section 7(1) (a) of the Calcutta Improvement Act, 1911; Kamar Biswanath Roy, elected by the elected Connelliors, Corporation by the elected Connection 7 (1) (b) of the of Calcutta, under Section 7 (1) (b) of the Calcutta Improvement Act, 1911, as modified Calcutta Improvement Act, 1911, as modified by the Amendment Act of 1926; Mr. Sudhansu by Kumar Mitter, elected by Councillors other than elected Councillors of the Corporation of Calcutta, under Section 7 (1) (c) of the and this had increased by 1904 to 3,1905.

The problem of expansion was difficult, of Calentte, under Section 7 (1,190 of Calentte, under Section 7 (1,190 of Calentte).

Because of the peculiar situation of Calentta. Calentta Improvement Act, 1011, as modified by the Mendentent Act of 1928; Mr. F. Roney, elected by the Bengal Chamber

of Commerce; Sir Hari Sankar Paul, Kt., elected important scheme which is now complete is the by the Rengal National Chamber of Commerce; new 60 ft. road between Darpanarayan Tagore son, D.S.O., M.C., F.R.L.B.A., P.A.S.L., appointed by the Local Government.

During the 25 years that it has now been at work, the Trust have decided, and partly or entirely carried through, many improvement schemes for opening up congested areas, laying out or widening streets and providing open

In Central Calcutta many highly insanitary busiess have been done away with and several roads of an improved type laid out, the most important of which is the Chittaranjan Avenue. 100 ft. wide, which at present extends from Chowringhee past Shambazar to Raja Raj Ballay Street, a stretch of 3 miles. It is intended ultimately to extend it up to the Chitpur Bridge, The Section of Chittaranjan Avenue near the Chowringhee end is well placed for commerce and trade and is expected to gain increased importance by being linked up with Dalhousie Square on the West by means of a new road 84 feet wide which the Trust have constructed between Mission Row and Mangoe Lane. A further extension of this road from Chitaranjan Avenue to Wellington Street on the east is now in progress. The most important of the Trust's new schemes in the Central Area, namely, that for a new 100-ft, road from the north-east corner of Dalhousie Square to Canning Street with a cross road from Royal Exchange to Chittaranjan Avenue, barely reached the first steps in land acquisition,

In the north of the City, two large and fliteen small parks have been constructed in different quarters. Of the two large parks one is named Deshabandhu Park and the other Cossinore-Chitpore open space measuring 53 bighas and 156 bighas respectively The Cossipore-Chitpore Park has a small artificial lake and the layout of the area sur-rounding the lake has been completed. Four football grounds have been provided i.r schools and clubs of North Calcutta. Some tennis courts are also being made. The Deshabandhu Park has also been provided with play-grounds. Several wide roads have been driven through this highly congested area. The approaches to the City have also been adequately widened.

Good progress has also been made with that highly congested area to the west of the City by opening up new roads and widening the existing ones. This Scheme is known as Maydapati, Scheme No. XXVII.

The new \$4 ft. road connecting Chittaranjan Avenue with Strand Road slightly to the north of Jagannath Ghat has been completed so that there is now a continuous main traffic route with the same width of roadway as Chittaranjan Avenue, extending right across Calcutta from Strand Road on the west to Upper Circular Road on the east. The widening of Maniktala Road between Upper Circular Road and Maniktala Bridge which has been completed forms a further extreme castern limit of Mankitala. Another club houses adjoining the main lake have been

by the fernal action demand Abdul Mouin. Street and Pathuriaghat Street which, with the Khan Takadur Muhammad Abdul Mouin. Street and Pathuriaghat Street which, with the c.l.k., Sir Badridas Gecuka, Kt., c.l.k., Rad side roads, opens up a very compessed area and Eabashur Dr. Haridian Dutt, Mr. A. J. Thomp: [Orms a portion of a main projected north and Street and Pathuriaghat Street which, with the south road through Bara Bazar from Harrison Road to a new main east-and-west diagonal road through Abiritollah. The completion of the widening of Kalakar Street represents the most important effort yet made to penetrate the inner recesses of Burrabazar and provides a new 60 feet road from Harrison Road to Jagarnath Ghat Road with short lengths of widening of cross roads in accordance with existing alignments. Running, as it does, through an area with a pepulation of over 200 to the acre and closely built up with four or five storeved houses, the gross cost of acquisition of land is exceptionally high. Demolition was of greater difficulty than usual owing to the height of the buildings and the narrowness of the lanes.

The passing of the Calcutta Improvement (Amendment) Act, 1931, which empowers the Board of Trustees in certain cases to levy betterment fees on properties which abut on to a new or widened street instead of acquiring the properties has made it financially possible for the Trust to proceed with some portion of its original programme for the improvement of Bara Bazaar. The Kalakar Street scheme in Bara Bazaar which forms the southern section of the aforesaid road is one of the schemes to which the new Act is to be applied. Another scheme to which this Act is to be applied is the widening of a short length is to of Darmahatta Street and it will be interesting to see how the methods of assessment provided for in the Act will work out in practice.

The Suburban Areas to the south and southeast of Calcutta required greater attention and extensive development schemes were undertaken. Several open spaces and squares have been made in various parts. Insanitary tanks requiring approximately 2 crores c.ft. of earth have been filled up. Russa Road which forms the southern approach to the town has been widened to 150 ft. for a length of one mile and 100 ft, for a length of another mile. It now gives a most pleasant drive from Chowringhee to Tollygunge. To improve the drainage of this area a 100 ft. wide East to West road from Ballygunge Railway Station to Chetla Bridge, and for recreation an artificial lake of 167 bighas with adequate grounds have been constructed. In the south of the town the mest important of the older schemes approaching completion was the first section of the Southern Avenue, including the extension of the Dhakuria Lake and Park and the lay-out of the area round the park to the west of Junction of Lansdowne Road Extension. This scheme, which is essen-tially one for residential development, has been practically completed; and the greater part of the first section of surplus lands placed on the market was sold and is being rapidly built up,

Another small lake has also been completed and a road is being constructed round it to link up with the road surrounding the main lake. The road round the main lake has been surfaced extension of this main roadway which will with asphalt and lighted with electricity and a eventually continue at a width of 100 ft. to the much frequented in the evenings. Sites for

allotted to several chibs. Excavation has been Berlin and Rirmingham. But shout allotted to several claus. Excavation has been been and himmingham, But about 1,000 continued in a new section of the lake which is acres of Calcuta's 1 250 was accounted for in to be attractively laid out with an island to to be attractively and out with an island to which the public will have access by means of a footbridge. The two lakes have been linked on by a concrete bridge constructed before up by a concrete orage constructed before the joining canal was excavated. The Calcutta Tramways Co., Ltd., have now extended tram tracks from Russa Road along Rash Belarv Avenue to Ballygunge Station.

The Board in pursuance of its policy of carrying out schemes in the centre of the town and in the suburbs simultaneously, so as to have an adequate supply of suburban sites for regidential buildings to meet the needs of those displaced from overcrowded areas in the centre of the town has carried out a large developsection of the undeveloped area between Russa Road and the Lake District.

To the east of the city, several new roads have been constructed in Scheme No. VIIIC (New Ballygunge Road—Park Circus to Old Ballygunge Road). They are now open to traffic, and the majority of them are surfaced with asphalt. Arrangements have been made with asphair, Arrangements have been made for lighting the roads with electricity. The development of Calcutta east of Lower Circular Road, between Park Circus and Middle Road. Entally, is a pressing need, but the work can only proceed slowly in small sections. The Trust in the execution of this scheme cannot ignore the bustee dwellers, who are pushed further east. as the development from bustee conditions to blocks of masonry buildings proceeds. The ntilisation of highly-improved lands for bustee purposes is not an economic proposition, but at the same time, it is necessary to provide the essentials of sanitation for the working

The linking up of Amherst Street with Loudon Street by a broad thoroughfare has commenced in two small sections. The Trust has constructed a large park near Park Circus Scheme No. VIII, known as Eastern Park, measuring 65 bighas, with a large playing field for football and tennis. The Gorachand Road Scheme provides for the completion of the northern portion of this park and the com-mencement of a wide avenue running parallel to Lower Circular Road through the outer fringe of Entally. As the scheme involved the ringe of saturity. As the scientific involved rade demolition of a large number of bustees, in-vestigations were made to ascertain the best means of reducing the displaced bustee population as a result of which a Bustee Rehousing Scheme at Christopher Road which will cost the Trust Rs. 2,70,000 for land acquisition and Rs. 1,97,000 for engineering works has been taken in hand and first section completed.

The public squares vested in the Calcutta Corporation in 1911 had a total area of about 96 acres. In 1912, Mr. Bompas, the first Chairman of the Trust, pointed out that in the ratio, viz., about 9 per cent. of its public open Zoological Gardens) to its total acreage, Calcutta-was almost on a par at that time with London possessing 6,675 acres of public parks or gardens the Maidan and new open spaces in other parts of Calcutta were an urgent need. Up to date of Calcutta were an urgent need. Up to date the Trust had added (including the new take at Dhakuria)—another 250 acres.

Lastly for the housing of the displaced nondigation the Prest has undertaken on a large Scale the following Schomos:-

In the early stages three blocks of three storied tenement buildings containing lettable rooms were built in Wards Institution Street for persons of the poorer classes. It was found, however, that the persons displaced preferred to take their compensation and migrate to some place where they could erect bactic of their own, the class of structures they were accustomed to live in. These chawls were then filled with persons of limited means. e.g., school masters, poor students, clerks and persons of the artisan class. As many as 1,200 people are housed in these chawls, these buildings, including land, cost Rs. 2,44,368 and are let at very low rents—ground floor rooms at Rs. 5 per mensen and ton floor rooms on Rs. 6 per mensem, each room measuring 12' × 12' with a 4 ft. verandah in front opening on to a with a 4 ft. vermanan in front opening on to a central passage 7 ft. wide. The total collection of rent during the year 1936-37 including previous year's arrears was Rs. 13,802.

As these chawls failed to attract the people for whom they were meant, the Board next tried an experiment in providing sites for bustees. Two sites with a lettable area of 16 bighas were acquired within the area of Maniktola Municipality, but they failed to attract because they were out of the way and were expensive.

Kerbala Tank Lane Re-housing Scheme.— In this scheme 4 detached and 35 semi-detached houses were built. The detached houses were sold as this scheme never became popular with the class of tenants for whom they were originally intended. Owing to this unpopularity the Board further decided to throw open to tenants of all classes 18 out of the remaining 35 semi-detached houses. This change of policy, however, produced no effect on the letting.

Owing to want of suitable tenants the entire dwellings in Kerbala Tank Re-housing scheme had been sold by private sale shortly after the 31st March 1927.

Bow Street Re-housing Scheme .- Seven rocmed and three-roomed suites have been constructed to re-house Anglo-Indiana displaced by the operations of the Trust. This scheme has proved a striking success. There are 182 suites for letting and the rent received from these suites during the year 1936-37, amounted to Rs. 26,884.

Paikpara Re-housing Scheme.-This scheme has an area of 36 bighas well laid out in 96 buildradio, siz., about 5 per cent. of its public open ing sites. A new just when sing scheme has been spaces which measured about 1,250 acres (and in the state of th displaced busice dwellers. Special facilities has been completed, has a roadway of 30 feet are offered to dishoused persons for securing (3 traffic widths) and 2 footpaths of 6 feet hand in various improved areas for reinstate lead, and these are also to be the probable ment burposes.

Bridges.—Some progress has been made in replacing the old bridges of Calcutta, which is hemmed in by canals and railway lines inadequately bridged, by modern and up-to-date bridges to suit the growing traffic requirements. The opportunity is being taken of widening the Maniktala, Narikeldanga and Beliaghata Bridge approaches on both sides—on the west (in the case of Maniktala and Narkeldanga Bridges) right or mankean and Markedangs Briggs) injury to Circular Road. The new bridges of the city will in their traffic capacity compare favourably with those of London. The new Bridges at Mankkala, Beliaghata and at Shambazar have roadways of 37 feet, with two Tootpaths each 10 feet in width. The Chitpore ture, the Trust has borrowed Rs. 3.47,50,000: Bridge reconstruction of which has been combother Capital receips have leaded Rs. 3,49,13,000 pleted has been redesigned as a relinforced [and and buildings have yielded Rs. 3,49,13,000] concrete bridge capable of accommodating four and the revenue fund from its annual surplus

widths of the Tollygunge and Hastings Bridges which need re-building.

The Tollygunge Bridge across Tolly's Nullah was practically completed during the year. The reconstruction of the Barrackpore Bridge is held up pending removal by the Corporation of the water mains across the old Bridge, which would be the first step towards its demolition.

Financial .- Capital charges during the year 1936-37 amounted to Rs. 89.09 lakhs which included Rs. 80.01 lakhs spent on land acquisi-tion and Rs. 8.31 lakhs on engineering works. The gross expenditure of the Trust on Capital Works up to the end of the year 1936-37 was Rs. 16,81,32,000. To meet this large expendilines of fast traffic and two lines of slow traffic. (after providing for the service of loans) has The Alipore Bridge, the reconstruction of which contributed Rs. 4.93 crores to Capital Works.

The Indian Ports.

The Indian Ports.

The administration of the affairs of the are subject in a greater degree than those of larger ports (Calcutta, Bombay, Madras, Karachi, municipal bodies to the control of Government. Rangoon and Chittagene) is vested by law in At all the ports the European members con-bodies specially constituted for the purpose, stitute the majority and the Board for Madras They have wide powers, but their proceedings consists mainly of European members.

Figures for 1935-36 relating to income, expenditure and capital debt of the six principal ports managed by Trusts (Aden is excluded from the tables) as obtainable from the Department of Commercial Intelligence and Statistics (India) are shown in the following table :-

	-		.	Income.	Expenditure.	Capital Debt.
Calcutta		 ٠		Rs. 3,00,27,620	Rs. 3,19,84,315	Rs. 24,50,94,403
Bombay		 		2,06,02,138	2,63,76,849	19,86,32,695
Madras		 		31,46,183	32,05,921	1,50,59,927
Karachi		 		70,69,685	64,13,384	4,03,09,000
Rangoon		 		72,05,954	69,51,700	4,91,28,667
Chittagong		 		6,46,978	6,60,926	(a) 26,10,736

Includes the first instalment of Rs. 15 lakhs, the second instalment of Rs. 5 lakhs, the third instalment of Rs, 2 lakhs, the fourth instalment of Rs, 3 lakhs and the fifth instalment of Rs. 3 lakhs of a loan of Rs. 50 lakhs from Government.

CALCUTTA.

The Commissioners for the Port of Calcutta are as follows:-

Sir Thomas H. Elderton, Chairman. Mr. W. A. Burns, Deputy Chairman. Elected by the Bengal Chamber of Commerce:-

VIZAGAPATAM HARBOUR PROJECT.

gan in the barrier of the Eastern Ghats, is posed port and obviate the long and expensive

The question of creating a harbour at Vizaga-formed by nature to be the outlet of the patam to supply an outlet for a large area of Central Provinces, from which a considerable fortile country adjacent to the east coast of amount of trade has taken this route in the fortile country adjacent to the east coast of amount of trade nas taxen this route in the india hithered undeveloped, with considerable past, even with the imperfect communications mineral resources wild, with the interpret committed in the total countries of the test of the control of the product of the fortile of the

circuit by Calcutta. A link has also been supplied in the most direct route to Rangoon from Europe in the most direct route to mangoon from Europe by way of Bombay, while, from an imperial point of view, the provision of a fortified rout on the long and almost unprotected stretch of coast between Colombo and Calcutta is held of coast between Colombo and Calcutta is near to be a consideration of great importance. The lofty projecting headland of the Dolphin's Nose would offer facilities for this purpose.

The Government of India with the approval of the Secretary of State and the Legislative
Assembly, sanctioned the construction of
the new railway line from Raipur to Parvatithe new railway line from Raipur to Parvati-puram. The work is completed and the line opened to traffic. They also decided to develop the port of Vizagapatam under their direct control and the port has accordingly been declared to be a major Port.

The work was carried out by a staff of Engineers under the direct charge of an Enginear-in-Chief who comes under the administrative charge of an Administrative Officer for the development scheme a post which is held ex-officio by the Agent of the B. N. Railway.

The scheme for the construction and develonment of the Harbour will be carried out in stages according to the demand of trade The first stage is now complete. Ships started using the Harbour in October 1933 and the official opening by His Excellency the Vicercy took place on 19th December 1933.

The present provision includes a 1,000 ft. diameter Turning Basin together with access to the steamer Berths and an Entrance Channel dredged out to afford a passage 300 ft. wide at the bottom. Vessels of 28 ft. 6 ins. draft and 550 ft. length are admitted at present.

A quay wall comprising three 500 ft. Berths has been completed and equipped with 3-ton has been completed and equipped what a ton-electric cranes. Storage accommodation aggre-gating 140,000 sq. ft. of covered area, in three single storied sheds has been provided in the vicinity of the quay, equipped with full railway and road facilities. Two sheds with lighter betths have been completed for export cargo. Special facilities have been provided for the storage and shipment of manganese ore. In addition to the quays, four Mooring Berths and one coal bunkering Jetty have been installed, around the Basin and additional facilities provided for dealing with lightered cargo

A large area of land has been reclaimed in the course of the dredging operations and it has been laid out in blocks served by broad consequence and out in diocks served by broad. The whole preventive arrangements are in roadways. Plots are ovalable for office sties; charge of the Collector of Salb. Royenne in and for industrial concerns. Water supply Madras. This roat has been some form of the property of the concentration of the contract of the and electric lighting have been arranged for

The floating equipment of the Harbour com-prises five tugs of 1,500, 600, 450, 120 and 100 experienced officer. H. P. respectively and 27 lighters.

length of ships is at present restricted to 300 feet. Calcutta and Madras.

The part is at present capable of decling with lifts of 50 tons on the quays but cannot lift more than 3 tons into and out of vessels.

The sea entrance channel is protected on the South side by the provision of a sand trap and protecting Breakwater

At present shins enter and leave the Harbour during day time only and pilotage is compulsory, The Port is administered by the Government of India through the Agent of the Bengal-Nagour Railway who is represented at Vizagapatam by a Deputy Administrative Officer.

The principal officers are :---

Administrative Officer .- A. Duncan, Calcutta. Denuty Administrative Officer Manager,-E. G. Lilley, Vizaganatam.

Port Engineer and Demuty Conservator --E. F. Johnson, Vizaganatam

Smuggling in India.-With the increase in British Indian customs duties, smuggling has grown in volume, and the Government of India had recently to appoint a Special Officer to report on its extent and the means necessary for its suppression.

This officer's report in 1936 disclosed that large quantities of such articles as silk, sugar and saccharine are being smuggled into British India from the French Settlements of Pondicherry and Karikal, thereby seriously endangering Government revenues and dislocating normal business in those goods.

Governments, therefore, decided that effective measures to suppress this traffic should at once be taken. The Customs cordons were greatly strengthened and an outer cordon placed around Karikal. Co-operating with each cordon is a special detective staff, which watches the move-ments of smugglers. The coast north and south of both Settlements are patrolled by coastguards, and launches equipped with searchlights and signalling apparatus search the sea day and night for smuggling graft. Land has been acquired for the erection of an impenetrable barbed wire barrier on the more open parts of the frontiers.

To protect the Customs staff against the danger of attack by numerically stronger bodies of smugglers, arrangements have been made to station hodies of armed police at strategic points on the two frontiers.

in order that the situation can be closely and continuously watched by a responsible and

Indian education is unintelligible except through its history. Seen thus, it affords the through its misory. Seek which, while to one it spectacle of a growth which, while to one it will appear as a blunder based on an initial error easily avoided, to another it stands out as a symbol of sincerity and honest endeavour on the part of a far-sighted race of rulers whose aim has been to guide a people alien in sentiments and prejudices into the channels of thought and attitude best calculated to fit them for the needs of modern life and western ideals. There is to-day no subject in the whole area of administrative activity in India which presents greater complexities and differences of opinion than education. Government, local bodies and private persons of learning have in the past devoted their limited funds to meeting the demands of those who perceived the benefits of education, rather than to cultivating a desire for education where it did not exist. The result is that the structure has become top-heavy. The lower classes are largely illiterate, while the middle classes who constitute the bulk of the intelligentsia are in point of numbers at least educated to a pitch equal to that of countries whose economic conditions are more highly developed. As might be expected from this abnormal distribution of education, the form which it has eventually assumed contains corresponding defects. In recent years, however, strenuous efforts have been made to remedy these defects. Primary Education Acts have been passed in the several provinces in favour of the expansion of primary education among the masses. On the other hand, the numbers of students in colleges and universities have grown apace; and, espe-cially during the period of financial depression, the volume of middle class unemployment has reached alarming proportions. A movement has therefore set in with the object of stemming the drift of unsuitable students to universities by means of a radical reconstruction of the school system of education.

The Introduction of Western Learning -In the early days of its dominion in India, the East India Company had little inclination for the doubtful experiment of introducing western learning into India. Warren Hastings, the dominating figure of the time, was a genuine admirer of the laws and literature of the East. His policy was to enable the ancient learning to revive and flourish under the protection of a sta-ble government, and to interfere as little as possible with the habits and customs of the people. Even the Act of 1813 which set apart a lakh of rupees for the introduction and promotion of a knowledge of the sciences was interpreted as a scheme for the encouragement of Sanskrit and Arabic. In the following year the Court of Directors instructed the Governor-General to leave the Hindus "to the practice of usage, long estab-lished among them, of giving instruction in their own homes, and to encourage them in the exercise and cultivation of their talents by the atimulus of honorary marks of distinction and in some cases by grants of pecuniary assistance. It was from sources other than Government that the desire for western knowledge arose in India. In 1816, David Hare, an Eng-lish watchmaker in Calcutta, joined hands with the enlightened Brahmin, Mohan Roy, to insti-

tute the Hindu College for the promotion of western secular learning. The new institution

was distrusted both by Christian missionaries and by orthodox Hindus, but its influence grew apace. Fifteen years later, the Committee of Public Instruction in Bengal reported that a taste for English had been widely disseminated and that independent schools, conducted by young men reared in the Hindu Colducted by young men reared in the Handu of the lege, were springing up in every direction. In Bombay, the Elphinstone Institution was founded in memory of the great ruler who left India in 1827. A still more who left India in remarkable innovation was made in 1835 by the establishment of the Calcutta Medical College. whose object was to teach " the principles and practice of medical science in strict accordance with the mode adopted in Europe." Many pronounced the failure of the undertaking to be inevitable; for, under the Hindu custom the higher castes were forbidden to touch the dead. This obstacle was surmounted by Madusudan Gupta who, with a few courageous pupils, began the dissection of a human body. From that time onward Indians of the highest castes have devoted themselves with enthusiasm and with success to the study of medicine in all its branches.

Another impens to the introduction of west or learning was the devotion of Christian missionaries. The humanitarian spirit, which missionaries is the humanitarian spirit, which all been kindled in England by Wesley, Burke Caroy, Marshman and Ward opened the first missionary College at Serampore in 1818; and twolvy wars later, Alexander, Duff rowned the instance of the control of

Lord William Bentinck's minute of 1835 (based upon Macaulay's famous minute) marks of somewhat tardy acceptance by Government of the new policy. Government then determined, while observing a neutrality in religious matters to devote its available funds to the maintenance of secondary schools and colleges of western learning to be taught through the medium of But this decision did not entail that English. Oriental learning should be neglected; still less that the development of the veraculars should be discouraged. Other changes powerfully contributed to the success of the new sys-The freedom of the press was established in 1835; English was substituted for Persian as the language of the Courts in 1837; and in 1844 Sir Henry Hardinge ordained that preference in Government appointments should be given to those who had received a western education. In the following decade the new learning took firm root in India; and, though the Muhammiadans still held aloof, the demand for English schools outstripped the means of Government for providing them. Fortunately there has been of late a marked appreciation among Muslim leaders of the need of improving the instructional level of their co-religionists; and in many of the provinces of India a great impulse towards educational advance among the Muhammadan community is now noticeable.

GROWTH AND ORGANISATION OF ENGLISH EDUCATION.

An epoch in Ludian educational history is marked by Sir Charles Wood's despatch in 1854. Perhaps its most notable feature was the emphasis which it laid on the importance of primary education. The old idea that the education imparted to the higher classes of society would filter down to the lower classes was discarded. The new policy was boldly "to combat the ignorance of the people which may be considered the greatest curse of the country." For this purpose Departments of Public Instruction were created on lines which do not differ very materially from the Departments of the present day. The despatch also broke away from the practice followed since 1835 whereby most of the available public funds had been expended upon a few Govern-ment schools and colleges, and instituted a policy of grants-in-aid to private institutions. Such a system as this, placed in all its degrees under efficient inspection, beginning from the humblest elementary institution and ending with the university test of a liberal education would impart life and energy to education in india, and lead to a gradual but steady ex-tension of its benefits to all classes of people." Another feature of the despatch was an outline Another leading of the despatch was an outfine of a university system which resulted in the foundation of the Universities of Calcutts, Madras and Bombay three years later. The affiliating type of university then became the pivot of the Indian education system. It has andoubtedly been of value in several ways, It enabled Government to select recruits for its It enabled to exercise to select recraits for its service on an impartial basis; it did much, through the agency of its Colleges to develop backward places; it accelerated the conversion of Indians to a zeal for western education; and it cost little at a time when money was scarce. On the other hand, the new universities were not corporations of scholars, but corporations of administrators : they did not deal directly with the training of men, but with the examination of candidates; they were not concerned with learning, except in so far as learning can be tested by examination. The colleges were fettered by examination re-quirements and by uniform courses; their teachers were denied that freedom which teachers should enjoy and their students were encouraged not to value training for its own sake but as a means for obtaining marketable qualifications. In certain important respects the recommendations in the despatch were not followed. The Directors did not intend that university tests, as such, should become the sole tests qualifying for public posts; they also recommended the institution of civil service examinations. They did not desire the universities to be deprived of all teaching functions; they recommended the establishment of university chairs for advanced study. They were aware of the dangers of a too literary course of instruction; they hoped that the system of education would rouse the people of India to develop the vast resources of their country

...and gradually, but certainly, confer upon them all the advantages which accompany the healthy increase of wealth and commerce. The encorragement of the grant-in-aid system was

advocated to an even greater extent by the Education Commission of 1882, which favoured the policy of withdrawing higher education from the control of Government within certain limits and of stimulating private effort. In theory the decision was correct, but in practice it was irretrievably wrong. In its fatal desire to save money, Government deliberately accepted the mistaken belief that schools and colleges could be maintained on the low fees which the Indian parent could be expected to pay. And, in the course of time, an unworkable system of dual control grew up, whereby the Universities with no funds at their disposal were entrusted with the duty of granting recognition to schools and the Departments of Public Instruction were encouraged to cast a blind eye on the pri-vate institutions and to be content with the development of a few favoured Government institutions. There can be little wonder that, under such a system of neglect and short-sightedness, evils crept in which are now being re moved gradually by the establishment of independent Boards of Intermediate and Secondary Education charged with the administration of the high school and intermediate stages of education.

The Reforms of 1902-4. In 1902, the Universities Commission was appointed by Lord Curzon's Government, and its investigation was followed by the Universities Act of 1904. The main object of the Act was to tighten up control, on the part of Government over the universities, and on the part of the universities over the schools and colleges. The Chancellors of the Universities were empowered to nominate 80 per cent. of the ordinary members of the Senates and to approve the election of the remainder; the Government retained the power of cancelling any appointment, and all university resolutions and proposals for the affiliation or disaffiliation of colleges were to be subject to Government sanction. The universities were given the responsibility of granting recognition to schools and of inspecting all schools and colleges, the and of inspection of schools and coneges, the inspection of schools being ordinarily conducted by the officers of the Department of Public Instruction. Permission was also given to the universities to undertake direct teaching functions and to make appointments, subject to Government sanction, for these objects but their scope was in practice limited to postgraduate work and research. The territorial limits of each university were defined, so that universities were precluded from any connexion with institutions lying outside those boun-Neither the Commission nor the Governdaries. Neither the Co ment discussed the fundamental problems of university organisation, but dealt only with the immediate difficulties of the Indian system. They did not inquire whether the affiliating system could be replaced by any other mode of organisation, nor whether all schools might be placed under some public authority places under some punce authority which would be representative of the universities and of the departments. They assumed the per-manent validity of the existing system, in its main features, and set themselves only to improve and to strengthen it.

Recent Developments.

Indian Educational Policy.—The Indian Universities Act of 1904 was followed by two important resolutions of the Government of India on Indian Educational Policy—one in 1904 and the other in 1913. The resolution of 1904 was comprehensive in character and reviewed the state of education in all its departments. The following passage from it summarises the intentions of Government: "The progressive devolution of primary, secondary and collegiate education upon private enterprise and the continuous withdrawal of Government from competition therewith was recommended by the Education Commission in 1883 and the advice has generally been acted upon. But while accepting this policy, the Government of India at the same time recognise the extreme importance of the principle that in each branch of education Government should maintain a limited number of institutions, both as models for private enter-prise to follow and in order to uphold a high standard of education. In withdrawing from direct management it is further essential that Government should retain a general control, by means of efficient inspection, over all public educational institutions." The comprehensive instructions contained in this resolution were followed in the next few years by the assignment to the provinces of years by the assignment to the provinces of large Imperial grants, mainly for University, technical and elementary education. The resolution of 1913 advocated, inter alia, the establishment of additional but smaller Universities of the teaching type; it reaffirmed the policy of reliance on private effort in secondary education: it recommended an increase in the salaries of teachers and an improvement in the amounts of grants-in-aid; and it insisted on proper attention being paid to the formation of character in the education given to scholars of all grades. It further discussed the desirability of imparting manual instructions and instruction in hygiene; the necessity for medical inspection; the provision of facilities for research; the need for the staffing of the girls' schools by women teachers and the expansion sentions by women teachers and me expansion of facilities for the training of teachers. The policy outlined in 1913 materially accelerated progress in the provinces, but the educational developments foreshadowed were in many cases delayed owing to the effects of the Great

The Reforms Act -The Reforms Act of 1919 altered the conditions of educational administration in India, Education became a provincial 'transferred' subject in the Goverprovincial transferred supject in the Gover-nors' provinces under the charge of a Minister, but the education of Europeans was made a provincial 'reserved' subject, i.e., it was not within the charge of the Minister of Education. The introduction of the provincial autonomy under the Government of India Act, 1925, has brought education in these provinces under the full control of their Ministers of Education.

The Government of India still deal with matters relating to Universities like Aligarh, Benares, and Delhi, and certain other Universities which function in more than one province. The purpose in offering expert advice on important

Government of India Resolutions on Government of India are also in charge of the institutions maintained by the Governor-General in Conneil for the benefit of members of His Malesty's Forces or of other public servants or of the children of such members or servants. The Chiefs' Colleges are now the concern of the Crown Representative.

> Administration.-The transfer of Indian education to the charge of a Minister responsible to the Provincial Legislative Assembly, of which he himself is an elected member, has brought the subject directly under popular control in the eleven major provinces, Generally speaking, education, is not, however, under the charge of a single Minister in all the provinces of India Certain forms of education have been transferred to the technical departments concerned and come within the purview of the Minister in charge of those departments. In each province, the Director of Public Instruction is the administrative head of the Department of Education and acts as adviser to the Education Minister. He controls the inspecting staff and the teaching staff of Government institutions and is generally responsible to the provincial government for the administration of education. The authority of Government in controlling the system of public instruction Government, is in part shared with and in part delegated to Universities as regards higher education and to local bodies as regards elementary and verna-cular education. In some provinces, boards of secondary, or of secondary and intermediate, education have also been set up and have to some extent relieved the Universities in those provinces of their responsibilities in connection with intermediate education and with entrance to a University course of studies. Institutions under private management are controlled by Government and by local bodies by "recognition" and by the payment of grants-in-aid, with the assistance of the inspecting staffs employed by Government and by local bodies.

of Education. Department Health and Lands of the Government of India —In 1910 a Department of Education was established in the Government of India with an office of its own and a Member to represent it in the Executive Council. The first Member was Sir Harcourt Butler. In 1923, the activities of the Department were widened, in the interests of economy, by absorption in it of the Department of Revenue and Agriculture. The enlarged Department has been designated the Department of Education, Health and Lands. The Hon'ble Kunwar Sir Jagdish Prasad and Sir Girja Shankar Bajpai are the present Member and Secretary, respectively. The Department possesses an educational adviser styled Educational Commissioner. The Present Educational Commissioner is Mr. J. E. Parkinson, M.A., I.E.S., who is an eminent educationist of wide experience.

Central Advisory Board of Education,-In 1920, a Central Advisory Board of Education was created in India under the chairmanship of the Educational Commissioner with the Govern-ment of India. This Board served a very useful recommendations of the Indian Retrenchment Committee, which was presided over by Lord Inchease, it was abolished in 1923 in the interests of economy. This Board was revived in 1935. Its main functions are to serve as a clearing house of ideas and a reservoir of information. The constitution of the Board is as follows:—

The Hon'ble Member in charge of the Department of Education, Health and Lands (Chairman).

The Educational Commissioner with the Government of India,

Ten nominees of the Government of India,

One member elected by the Council of State, Two members elected by the Legislative Assembly.

Three members nominated by the Inter-University Board, India,

One representative of each provincial Govern-ment (either the Minister for Education or his deputy or the Director of Public Instruction or his deputy).

There is also a Secretary to the Board, who is appointed by the Government of India.

In 1935, the Board passed a series of important resolutions suggesting a radical reform of the present system of education so that apart from providing instruction which would lead to universities and to professional colleges, the system might have stages at the end of which students could branch off either to occupation or to vocational schools. All the provinces have reviewed their system of education in the light of these resolutions and several are considering the possibilities of reconstruction of that system on lines approximating to those suggested by the Board. The main subject of deliberation at its meeting held in 1936 was that of primary education. The Board referred this question to its Vernacular Education Committee with definite suggestions in regard to the nature of administration and control of primary education. The sub-committee reported that there was need of more efficient administration and control of primary education and recommended, inter alia, that Government should take over the control from local bodies. The Board considered the report at its third annual meeting and decided that a copy of it should be forwarded to Pro-vincial Governments for consideration and such action as they might consider necessary. report of the Women's Education Committee of the Board on the curriculum of girls' primary schools was also considered. The report first deals with certain conditions which are essential before any curriculum can work smoothly and then proceeds to the actual curriculum which would be suitable for girls' primary schools. The suggestions made in the report were generally accepted and the Board decided that a copy of this report should also be forwarded to Provincial Governments for consideration and such action as they might consider necessary.

Another subject of considerable importance that was considered at the third annual meeting of the Board in January 1938 was the report tional Service was stopped as a result of the on Vocational Education in India by Mr. A. recommendations of the Royal Commission on

educational matters. But as a result of the Abbott, C.B.E., formerly H.M. Chief Inspector recommendations of the Indian Retrenchment of Technical Schools, Board of Education, England, with a section on General Education and Administration by Mr. S. H. Wood, M.C., Director of Intelligence, Board of Education, England. During the discussion on this report, what is popularly known as the Wardha educa-tion scheme was referred to. The basis idea of this scheme is that education should be imparted through some craft or productive work which should be the centre of all the other instruction provided in the school and by the sale of the produce make the school self-supporting. The Board felt that a further examination was desirable and appointed a special committee to examine the scheme of educational reconstruction incorporated in the Wardha scheme in the light of the Wood-Abbott Report and other relevant documents.

The Board has also decided that it should act as a National Centre of Educational Information for India.

Bureau of Education in India.—As a measure of retrenchment, the Bureau of Education was abolished in 1923, but accepting the advice of the Central Advisory Board of Education in India, the Government of India revived it in 1937 under the control of the Educational Commissioner with the Government of India for dealing specially with the collection and dissemination of literature relating to educational problems in the various provinces, The Secretary of the Board is the Curator of this Bureau.

Educational Services.—Until recently, the educational organisation in India consisted mainly of three services—(i) the Indian Educa-Service, (ii) the Provincial Educational Service, and (iii) the Subordinate Educational Service. The Indian Educational Service came into existence as a result of the recommendations made by the Public Services Commission of 1886, and in 1896 the Superior Educational Service in India was constituted with two divisions—the Indian Educational Service staffed by persons recruited in England and the Provincial Educational Service staffed by persons recruited in India. These two divisions were originally considered to be collateral and equal in status, though the pay of the European recruit was higher by approximately 50 per cent, than the pay of the Indian recruit, Gradually, however, status came to be considered identical with pay and the Provincial Educational Service came to be regarded of inferior status to the Indian Educational Service. Later as a result of the recommendations of the Islington Commission of 1912-16, the Indian Educational Service was formed into a superior educational service and all posts were thrown open to Indian The Provincial Educational Serrecruitment. vice was simultaneously reorganised and a vice was simultaneously reorganised and a number of posts, generally with their Indian incumbents, were transferred to the superior service. This reorganisation resulted in a considerable Indianisation of the superior educational services in India. It was then laid down that the proportion of Indians in this service should on an average be 50 per cent. of the total strength, excluding the posts in Burma.

In 1924, all recruitment to the Indian Educa-

be made to the all-India services which operate in transferred fields. The personnel required for these branches of administration should in future be recruited by local Governments". The Commission further recommended in regard to the question of the future recruitment of Europeans that "it will rest entirely with the local Governments to determine the number of Europeans who may in future be recruited. In this matter the discretion of local Govern-ment must be unfettered but we express the hone that Ministers on the one hand will still seek to obtain the co-operation of Europeans in these technical departments and that quali-fied Europeans on the other hand may be no less willing to take service under local Governments than they were in the past to take service under the Secretary of State". As a result of the acceptance of these recommendations, the Indian Educational Service is dying out and with the gradual retirement of its existing members, the history of the service which has by the had a brief but fine record will be brought to an end. The present organisation of education in the present organisation of members of this service; while in the sphere of higher education, it has trained many men of more than ordinary attainments.

The new Provincial Educational Services which function under provincial control as the superior educational services, have been constituted in most provinces. These schemes vary from province to province, but it may be gene-rally remarked that, while the rates of pay are not uniform, they consist of two main classes—class I into which the existing Indian Educational Services have been merged for the time being, and class II which may be said to represent the

old Provincial Educational Service.

the appealor services in India. The Commistude affected, more in some provinces than sion recommended that "for the purposes of others, by the changes which have taken place local Governments no further recuritment should since 101b. Communial interest have inhumance recruitment, and in some places they have influenced promotions also, in a direction which has not always tended towards service content-ment. But these results are the natural consequenees of the devolution of control of education and power of recruitment to provincial and local authorities and will for some time continue to affect the efficiency of the Education Departments in the provinces.

Hartog Committee on Education.—The most notable event in recent years has been the appointment of the Auxiliary Committee of the appointment of the Auxiliary Committee of the Indian Statutory Commission, under the Chairmanship of Sir Philip Hartog, to report on the Auxiliary of Education in India. The report of the growth of education in India. The report of the Committee, which was published in 1929, constitutes a valuable document on the present state of education in India.

Lindsay Commission .- Another Commission. which deserves mention, was appointed in 1929 by the international Missionary Council to investigate the various problems connected with the higher education provided by the various allissionary bodies working in India, It was presided over by Dr. A. D. Lindsay, Master of Ealibi College, Oxford. The Commission visited India in 1930-31 and its report was published in 1931. International Missionary

Unemployment Committee, United Provinces. -This committee known popularly as the Sapru Committee from the name of its distinguised chairman the Right Hon'ble Sir Tej Behadur Sapru was appointed by the Government of the United Provinces in 1934 to investigate the question of unemployment among educated youngmen and to suggest practical ways and means for reducing the same. The report of the committee, which was published in 1936. The existing Provincial and Subordinate constitutes a valuable document not only for Educational Services in the provinces have the United Provinces but for the whole of India.

Statistical Progress.

The two tables given below afford useful comparisons with previous years and serve to illustrate the growth and expansion of education in India.

	Total	160	3,206	10,355

N.B.—This table does not include areas for which schemes of compulsory primary education are under consideration or have been sanctioned but not yet introduced. It includes, on the other hand, areas in which such schemes have been partially introduced.

Due to the indifferent attitude of the local points, composition has not proved as fruitful as it was intended to be. The mere passing of a where compulsion is considered desirable does not in itself either bring children to school or specific theory. The first point is considered desirable does not in itself either bring children to school or specific theory. The first point is shown to the second of the

The provinces now appear to realise the danger of the transference of the control of primary education to local bodies without provinces, there is a move to take over control of primary education from local bodies. For example, the Government of Madras amended their Primary Education Act during the year than the control of primary education. The provinces in the control of primary education.

Secondary and High School Education.— Some attempts have been made to give a greater bias towards a more practical form of instruction in these schools. The Commission of 1882 suggested that there should be two sides in secondary schools, leading to the entrance examination of the universities, the other of a more practical character, intended to fit youths for commercial non-literary pursuits." Some and other years later, what classes were started in some schools in Bengal but, as they did not lead to a university course, they have not been successful. In more recent years the Government of India have advocated the institution of a school final examination in which the more practical subjects may be included. Efforts have also been made to improve the conduct of the matriculation and to emphasise the importance of oral tests and of school records. In Madras, this examination which was placed under the direction of a Board representative of the University and of Government, proved somewhat cumbrous and certain modifications were made. In the United Provinces and the Central Provinces the control of secondary education has been made over to special Boards created for this purpose. Similarly, the Administration of Delhi has established a Board of Secondary Education for that province and the Government of India have established a Board of Intermediate and High School Education, with headquarters at Ajmer, for Rajputana, Central India and Gwallor. In the Punjab the school leaving examination is conducted by a Board. But the main difficulty has not yet been touched. The University which recognises the schools has no money wherewith to improve them: and the Department of Public Instruction, which allots the Government grants, has no responsibility for the recogni-tion of schools, and no connexion whatever with the private unaided schools. This dual authority and this division of responsibility

have had unhappy effects. The standard of the schools also is very low so that the matriculates are often unable to benefit by the college courses. In some provinces an endeavour has been made to raise the standard of the standard of the college of the college of the college of the college of the college of the college of the standard of the college of the college of the in a number of the hetter schools in the state. In Bombay, the gravity of the situation created by the dual control of secondary education has been realised and efforts are being and to by the university authorities in collaboration problem.

As has already been stated, there is now a widespread desire to cure these will by a radical reconstruction of the school system of colucation. The main defect of the present system is that all upplis, even those in the system is that all upplis, even those in the hand of the school is the system of the school system of the school system of an university. In consequence, very many pupils drift on to a university and prolong unduly their purely literary studies. In order to counteract this tendency, the school system should be divided to objective released from the transmels of a university, on the successful completion of each stage, pupils should be encouraged either to join the humbler occupation of life or to join the humbler occupation of life or to join the humbler occupation of life or to which should be provided in more ample measure than at present.

Reconstruction along these general lines was first proposed by the Punjab University Committee, and was subsequently endorsed by the Universities Conference which met in Delhi in 1934. Its details were worked out in greater detail in an important Resolution of the Government of the United Provinces later in the same year. The matter was also considered by the Central Advisory Board of Educa-tion, which generally endorsed the views expressed by the Universities' conference and suggested that expert aid should be obtained to work out the scheme of school reconstruction in the provinces. The Government of India. in consultation with the provincial Governments. accepted this suggestion and the services of two experts—Mr. A. Abbott, C.B.E., formerly Chief Inspector of Technical Schools, Board of Education, England, and Mr. S. H. Wood, Director of Intelligence, Board of Education, England, were obtained for this purpose. As these experts considered that an intensive study of a limited area would be more profitable than a necessarily area would be more promises and a necessaric cursory survey of the greater part of British India, they limited their investigation mainly to three provinces, viz., the United Provinces, the Punjab, and Delhi, although they discussed their problems with administrators, teachers and others concerned with education from practi-cally every province. Their recommendations are contained in their report commonly called the Wood-Abbott Report on Vocational Education in India of which mention has been made above

Anglo-Indian and European Education. There are schools for Europeans and Anglo-Indians which are placed under the control of special inspectors for European Schools. The education of the domiciled community has

proved to be a perplexing problem, and in 1912 a conference was summoned at Simits to consider the matter. The difficulty is that European Schools are when in Infile. But efforts are being made to bring these schools more into line with the ordinary schools, and Indian Universities generally are affording special for higher education in Indian colleges,

In country was a result of the recommendations and by the Irwin Sul-Committee of the Irwin Sul-Committee of the Irwin Sul-Committee of the Irwin Sul-Committee of the Irwin Sul-Committee of the Irwin Sul-Committee of the Irwin Sul-Committee of the Irwin Sul-Committee of the Irwin Sul-Committee of the Irwin Sul-Committee of the Irwin Sul-Committee of the Government of India. The office of the Irwin Sul-Committee of Anglo-Indian and European Schools in India, The Provincial Irwin Sul-Committee of the Irwi

Medium of instruction in public schools.—The position of English as a needigm and as a medium of instruction in public schools was discussed by a representative conference which met as Sinia in 1977 under the conference which met as Sinia in 1977 under the Education Member. Althought is was cenerally conceided that the teaching of school subjects through a medium which was imperfectly understood led to cramming and memorising of text-books, the use of English meitium was defended by some on the ground that it improves the conference was therefore inconclusive. Some local authorities have since then approved of schemes providing for the recognition of local vernaculars as media of instruction and examination in overlain subjects. There seems condition of instruction and cardinality in certain subjects. There seems candidn't in condition of instruction and caradination is gradually increasing all over India.

The main difficulty, however, is that school classes have often to be split up at considerable expense into a number of language sections. The problem needs further investigation, especially in the direction of evolving a common to the control of

Boy Scout Movement.—A happy development in recent years has been the spread of the boy scout movement which has had an excellent effect in all provinces in creating amongst boys an active sense of good discipline.

It is gratifying that intimate contact is being established between the Boy Scott Movement and the Junior Red Cross and St. John's Ambulance Associations, as well as with movements for social uplift and improvement of village conditions.

Girl Guide Movement.—This movement is making steady progress. There is, however, a lack of those competent and willing to give instruction.

Medical Inspection.—Arrangements have been made for medical inspection of scholars but progress has been hampered by the shortage of funds and the continued indifference of parents. In the United Provinces, schools are now inspected by officers of the Public Health Denartment. In Madras, the scheme of medical inspection of schools has been made compulsory in all Government institutions, and it has been made a condition of recognition that all secondary schools should introduce the scheme. In Bihar & Orissa, certain posts of school medical officers were abolished in 1932, but it has since been found possible to revive them. There is, however, still need for adequate facilities for the treatment of children suffering from diseases. In a few towns in the Punjab, satisfactory arrangements exist not only for medical inspection but also for effective treatment, and an extension of this useful scheme is under contemplation.

The activities of Junior Red Cross and St. John Ambulance Societies have been particularly beneficial in improving the health of school children and in interesting them in the health of others,

Professional and Technical Education ---A research institute in agriculture was started by Lord Curzon at Pusa in Bihar, which has done valuable work. Its buildings were seriously damaged by the Bihar earth-quake in 1934. The Institute has therefore been transferred to New Delhi, where new buildings have been constructed for it. Conferences have been held at Pusa, Simla and Poona, with the object of providing a suitable training in agriculture. A Royal Commission on Agriculture has submitted its report and as a result of its recommendations an Imperial Council of Agricultural Research has been established by the Government of India at their headquarters. Among commercial colleges, the most important is the Sydenham College of Commerce in Bombay. Industrial institutions are dotted about India, some maintained by Government, others by munici-palities or local boards, and others by private The bodies. most important are Victoria Jubilee Technical Institute in Bombay. The Indian Institute of Science at Bangalore the product of generous donations by the Tata family. The tendency in recent years has been to place these institutions under the control of the Departments of Industries. In addition to a number of engineering schools, there are Engineering Colleges at Roorkee, Sibpur, Poona, Madras, Rangoon, Patna and Benares each of which except that at Roorkee is affiliated to a university. The engineering colleges to a university. The engineering colleges maintain a high standard and great pressure for admission is reported from several provinces. There are schools of art in the larger towns where not only architectare and the fine arts are studied, but also practical crafts like pottery and iron work. There are two forest colleges at Dehra Dun and Colmbatore and a Technical Institute is in existence at Cawnpore and a Mining School at Dhanbad, Mining and

metallurgy are also taught by the Mining and Government of India for the training of cadets Metallurgical College at Benares which provides for the Mercantile Marine Service and a ship a 4-year course leading to a B.Sc. degree in "I.M.M.P.S. Dufferin" has been stationed for each subject. Provision has been made by the this purpose in Bombay waters.

The following table shows in summary form the number of such institutions and of students at ending them:—

Allahabad University and the creation of a Calcutta University Commission.—The Board to control secondary and intermediate report of the Calcutta University Commission is ducation. The Punjab University Enquiry Committee was appointed in 1932 and submitted its report in the following year. The committee reported that "the University is overburdened by the immense area of its jurisdiction and by the ever-increasing number of its students many of whom are ill-fitted for such education." The main recommendation was that the school system should be re-adjusted so that many pupils would be diverted at an earlier age to vocational and other forms of education,

There are now 19 Universities in India, (including Burna) of which three are situated in Indian States. The last University in India Statistics of Universities-1936. was established in Travancore in 1937. The following table gives the

(e) Reconstituted in 1921.(h) Situated at Waltair (South India).

Intermediate Colleges—One Important part of the Calenta University Commission's recommendations has been accepted by the Government of the United Provinces and the Government of the United Provinces and the Government of the Calenta of the Calenta of the Calenta of the Calenta of the Calenta of the Calenta of the Internediate classes from the separation of the intermediate classes from the separation of the intermediate classes from the separation of the intermediate classes from the college of the Calenta of t

The United Provinces Board was constituted by an Act possed in the same year. The Alignah Muslim University has, however, reverted to the old system under which the Intermediate classes form part of the University, and the separatic Alignar Moran, the Intermediate classes are under a separate Board which operates in a Capitana, Central India and Gwalior. Intermediate Colleges of the new type have also been the property of the Pupilsh University, and the property of the Pupilsh University, the Capital Colleges of the property of the Pupilsh University.

Inter-University Board.—The idea put forward by the Indian Universities Conference in May 1924 for the constitution of a central agency in India took practical shape and an Inter-University Board came into being during 1925, All the Universities in India are now members of the Board. Its functions are:—

- (a) to act as an inter-university organisation and a bureau of information ;
- (b) to facilitate the exchange of professors;
 (c) to serve as an authorised channel of communication and facilitate the co-ordination of
- university work;

 (d) to assist Indian universities in obtaining recognition for their degrees, diplomas and examinations in other countries;
- (a) to appoint or recommend, where necessary, a common representative or representatives of India at Imperial or International conferences on higher education;
- (f) to act as an appointments bureau for Indian universities;
- (g) to fulfil such other duties as may be assigned to it from time to time by the Indian Universities.

The Inter-University Board also functions as a National Committee of Intellectual Co-operation in India so far as questions of high education are concerned.

The Board has not yet had much influence Home Scienc on University policy in India but it has done of two years.

a considerable amount of useful work in collecting information and in stimulating thought regarding current University problems.

Education of Indian Women and Girls.—It has now been recognised that the education editins to progress that has now been recognised that the education of cirils is necessary for happiness and progress in editing in the education of conservatism have weakened. Customs and of conservatism have weakened. Customs and regulates which were for long detrimental to the advancement of formale education are now the education are now as the education of the education are now as the education of the education are now as the education are now as the education are now as the education are now as the education are now as the education are now as the education are now as the education and the education are now as the education and the education are now as the education and the education are now as the education are now as the education are not education as the education are not education as the education are not education as the education are not education as the education are not education as the education are not education as the education are not education as the education are not education as the education are not education as the education are not education as the education are not education as the education are not educated as the education are not educa

For the higher education of women, there are colleges aspecially meant for them, e.g., there colleges aspecially meant for them, e.g., there colleges aspecially meant for them, e.g., there is a straining colleges with 134 women students, and one medical colleges with 134 women students, and one medical colleges with 134 women students colleges for men. In 1136, 2,971 women were calling in arts colleges for men, 147 in training colleges for men. In 1136, 4,971 women were calling in arts colleges for men. The Lady Hardings Medical College for Women at New Delhi is the only institute of its kind in the whole of India, It provites a full medical course for women students and is affiliated to the Punjab University.

The Shreemati Nathibai Damodher Thackersey Indian Women's University, which was started at Poona by Professor Karve in 1916, was transferred to Bombay in 1936. It is a private institutional is global was trans-

institution and is doing much useful work.

The All-India Women's Conference on Educational Reform, which holds its meetings annually and has constituent conferences established all over the country, is also doing much useful work. An All-India Women's Education work. An All-India Women's Education work. An All-India Women's Education work and the secondary of the secondary of the secondary of the secondary of the secondary of the secondary work of establishing a central Tacaher's Training follege of a special committee to enquire into the feasibility of establishing a central Tacaher's Training follege of a special committee to enquire into the feasibility of establishing a central Tacaher's Training follege of a special condigen 'en absolutely new lines which would synthesise the work of existing provincial colleges by spechological research.' The proposal was adopted by the Association and a college, called the Lady Irwin follege, has since provides a three years' Teachers' course for those who wish to qualify as High School Teachers of Home Science. Others take the Home course of two years.

The comparative statement below shows the state of women's education during 1935-36:--

Education in the Army.-The Army in India undertakes the responsibility of the education of certain sections of the community. Its activities are directed into various channels with certain definite objects, which may be summarised as follows :--

(i) The education of the soldier, British and Indian, in order to :-

- (a) develop his training faculties;
- (b) improve him as a subject for military
- training and as a citizen of the Empire : (c) enhance the prospects of remunerative employment on his return to civil life.
- (ii) The fulfilment of the obligations of the State to the children of soldiers, serving and exservice (British and Indian).
- (iii) The provision, as far as possible, of training for the children of soldiers, who have died in the service of their country.
- (ir) The creation of a body of Indian gentlemen educated according to English public school traditions, which should provide suitable candidates for admission to the Royal Military College, Sandhurst.

The demand for education in the Indian Army has continued to grow and with it the numbers of Indian ranks, who have passed the Indian Army English Certificate, have increased proportionately. A recent development in the case of the Indian soldiers' education is the introduction of Rural Reconstruction and Citizenship as subjects of study for the higher certificates.

Doon School,-The efforts of the Indian Public Schools Society, which owes its origin to the initiative and enthusiasm of the late Mr. S. R. Das, have culminated in the establishment of a School at Dehra Dun, The school is attempting to develop, in an atmosphere of Indian culture and social environment, the best features of English Public Schools, It was opended by His Excellency the Viceroy (Lord Willingdon) in October, 1935, The School is located on the two estates known as Chandbagh (on rent from the Government of India) and the adjoining estate, known as Skinner's, which has been purchased by the gives some training in surgery.

Society. There are at present about 250 pupils. who are distributed in four houses, Mr. A. E. Foot continues to be the Headmaster. He is assisted by eighteen masters, of whom six have heen appointed from England, The School prepares candidates for the Senior Cambridge Examination and thereafter for the United Provinces Intermediate Examination, and subsequently for entrance to the Indian Military Academy and Medical and Engineering Colleges or for English Universities. The age of admission is between 11 and 13 years, and the age of leaving will be about 18 years. The oldest hove at present were born in 1921. The Board of Management of the Society, which maintains the School, includes the Hon'ble Kunwar Sir Jagdish Prasad (Chairman), Sir B. L. Mitter (Vice-Chairman), Mr. J. G. Laithwaite, Mr. J. E. Parkinson Mr. M. S. A. Hydari, Rai Bahadur Amarnath Atal, Rai Bahadur Chuttan Lal, and Mr. B. M. Staig (Honorary Treasurer),

Indigenous Education .- Of the 13,816,149 scholars being educated in India 701.072 are classed as attending 'private' or 'unrecognised' institutions. Some of these institutions are of importance: The Gurukula near Har-Sir Rabindra Nath Tagore's dwar and School at Bolpur have attained some fame. There is also an Indian Women's University at Bombay, to which reference has been made under the education of Indian women and girls. This University provides instruction through the medium of vernacular English being, however, a compulsory subject Four colleges are affiliated to the University which are situated at Bombay, Poona, Ahmedahad and Baroda. Connected with every big mosque in northern India there is some educational organisation and the schools attached to the Fatchpuri and Golden Mosques at Delhi and the Dar-ul-Ulm, Deoband, are noted. These institutions generally have a religious or 'national' atmosphere.

The Ayurvedic and Unani Tibbia College Delhi, founded by the late Hakim Aimal Khan. is an important unrecognised institution. It provides instruction in the indigenous system of medicine up to the highest standard and also

BOY SCOUTS.

The Boy Scouts movement, initiated in England by Lord Baden-Powell (the Chief Scout), has spread widely in India, both among Europeans and Indians. The Vicercey is Chief Scout of India and the heads of Provinces are Chief Scouts in their own areas, the aim of the Association is to develop good clitzenship among boys by forming their character—tanling them in habits of observation, obedience and self-reliance-inculating topalty and thoughtfulness for others—and teaching them services useful to the public and handicaritis useful to themselves.

INDIAN HEADQUARTEES.

Chief Scout for India.—His Excellency The Most Honourable the Marquess of Linlithgow, K.T., G.M.S.I., G.M.I.E.

Chief Commissioner.—Captain Nawab Sir Muhammad Ahmad Said Khan, K.C.S.I., K.C.I.E., M.B.E., LL.D., of Chhatari.

Deputy Chief Commissioner.—H. W. Hogg, Esq., G.L.E., O.B.E., D.C.C., Ak.L. General Secretary for India.—G. T. J. Thaddacus, Esq., B.A., D.C.C., Ak.L.

Headquarters Council for India.—

President.—The Chief Scout for India.
Chairman—The Chief Commissioner (ex-officio.)
Members.—The Treasurer (ex-officio).

The Deputy Chief Commissioners (ex-officio).

Sir Chunilal V. Mehta, K.C.S.I. M.A., LL.B., Malabar Hill, Bombay,

The Hon'ble Chief Justice Sir Douglas Young, Kt., Provincial Commissioner, Boy Scouts Associaation, Punjab, High Court, Lahore.

- The Hon'ble Mr. Justice Vivian Bose, Bar-at-Law, Provincial Commissioner, Boy Scouts Association, C. P. High Court, Nagpur.
- G. A. Small, Esq., I.E.S. Provincial Commissioner, Boy Scouts Association, Assam, Shillong.
- K. C. De, Esq. C.L.E. I.C.S., (Rtd.) Asst. Provincial Commissioner, Boy Scouts Association, Bengal, 2, Gokhale Road, Calcutta.
- S. F. Grant, Esq., M.B.E., Govt. Printing and Stationery, Peshwar.
- Sir R. K. Shamuukham Chetty, K.C.I.E., State Scout Commissioner, Boy Scouts Association, Cochin State Ernakulam,
- F. S. Young, Esq., District Scout Commissioner, Boy Scouts Association, Jaipur State, Jaipur.
- Prof. V. S. Ghurye, M.A., State Scout Commissioner, Boy Scouts Association, Junagadh.
- Dr. Shri Ram, Scout Organiser, Boy Scouts Association, Jammu and Kashmir State, Jammu.
- K. P. Naidu, Esq., State Scout Commissioner, Boy Scouts Association, Dewas Scnior (C.I.).
- Raja Sankar Pratap Singh Deo Mahindra Bahadur, Chief Scout, Dhenkanal State, Dhenkanal.

Secretary.-The General Secretary (ex-officio)

The Boy Scouts Association in India, GRAND

The Co-operative Movement.

Rural Poverty.-The outstanding feature of Indian rural economy that is bound to arrest the attention of any observer is the appalling poverty of the rural population. The various estimates, official and non-official, that have been made of the income per head of population in India at various times leave the matter absolutely in no doubt. The Central Banking Enquiry Committee estimates that the average income of an agriculurist in British India does not work out at a higher figure than Rs. 42 a year. The vast magnitude of this evil will be better realised when we take into account the predominance of the agricultural population in India. In 1891, 61 per cent, of the total population of the country lived on agriculture; this percentage rose to 66 in 1901 and to 73 per cent. in 1921; in 1931, the percentage has fallen a little to 67. The poverty of the agriculturist may be due to a variety of causes, but we cannot ignore the fact that agriculture has in a large measure ceased to be an industry worked for profit; the cultivator labours not for a net return but for sub-The extent of an average holding sistence. which works out at about 6 acres for an agricultural family of 5 persons is too inadequate to maintain it in ordinary comfort even with the low standard of living which is so characteristic of the rural population of India. Moreover the Indian cultivation is in a large measure exposed to the yleissitudes of seasons and the vagaries of the monsoon. In every 5 years there is but one good year, one bad year and three indifferent years. These unfavourable conditions might be mitigated to some extent by a well conceived policy of irrigation by the State; but so far, of the total cultivated area State; put so har, of the total cutovased area in the country, about 16 per cent. only has irrigation facilities from rivers, tanks or wells while the remaining 84 per cent. depends merely on rainfall. Thus the frequency of failure of crops, owing to drought and floods, frost and pests, coupled with the low vitality and high mortality of the live-stock, render the economic position of the cultivator worse still. The inadequacy of the subsidiary occupations to supplement the slender income from agriculture conributes further to his extreme economic weakness. He has sufficient spare time on his hands to devote himself to subsidiary occupations but he has been exposed to the full blast of competition of forces from the rest of the world and many of the industries on which he relied in the past have suffered largely from or been wiped out by the competition of machine-made articles. The recent fall in the world prices of agricultural produce has affected him powerfully for he is now being drawn steadily into the sphere of influence of markets both national and international and he has neither the organisation n or the credit facilities to help him as in countries like the United States of America and Canada and several European countries. In addition to these numerous difficulties, the Indian agriculturist has another serious handicap in this that

he is largely illiterate. The percentage of literacy in India is still very low being only 8 per cent, and any progress in agriculture is well nigh impossible without the background of general education. All these factors lead to the most outstanding feature of Indian rural economythe chronic and almost hopeless indebtedness of the cultivator. The Central Banking Enquiry Committee has estimated that the total rural indebtedness in India is about Rs. 900 crores. Though indebtedness of the agricultural population has been there from old times, it is acknowledged that the indebtedness has risen con-siderably during the last century and more especially during the last 50 years. This colossal burden of debt is the root problem which has got to be faced in any attempt towards the economic regeneration of the masses. Numerous causes have been advanced to account for rural indebtedness and we already have pointed out some of the general causes which give rise to it. A peculiarity, however, that we notice is that the debt which remains unpaid during the lifetime of the cultivator who contracted it passes on as a burden to his heirs contracted in passes on as a burden to ms nerrs so that many agriculturists start their career with a heavy burden of ancestral debt which they in their turn pass on with some further increase to their successors. Ignorance and improvidence, extravagance and conservatism have further been held forth as the reasons for the continued growth of this heavy load. A marriage festival in the family tempts him to launch out into extravagance while funeral feasts prove no less costly. All these factors— the uneconomic nature of the agricultural industry, chronic and heavy indebtedness and illiteracy form a thoroughly depressive background of Indian rural economy.

Genesis of the Movement.—It is no wonder under the circumstances detailed above to find that the Indian agriculturist has constant recourse to borrowing and that too not only for any land improvement that he may contemplate but for his current agricultural needs as also for periodical unproductive purposes such as weddings and funeral feasts. absence of any banking organisation in the country-side has driven him into the arms of the sowcar or the mahajan who, while proving a very accommodating person, has exercised a grip on him from which it has been found almost impossible to extricate him. usurious rates of interest charged, coupled with various devices which increase still further the actual rate of interest, and the numerous services which the sowcar performs as a retail tradesman and the buyer of his produce, make him the dominant force in the village, reducing the agriculturist to the position of a serf, toiling for generation after generation, without ever hoping for a release from his clutches, getting bare subsistence as a reward for all the trouble that he might take and therefore becoming listless, fatalistic and absolutely unprogressive, In 1883 the Land Improvements Loans Act was passed and this was followed in the next year

thrift, self-help and co-operation amongst agriculturists, artisans and persons of limited means and the societies that were to be started were intended to be small simple credit societies of and confidence in their fellow members which are the keynote of success were ensured by providing that a society should consist of persons residing in the same town or village or group of villages and should be members of the same of villages and should be members of the same tribe, class or caste. In order to provide facili-ties in urban areas for the small man, urban societies were also permitted. The Act intro-duced the principle of unlimited liability for rural societies following the Raiffelsen system in Germany, though it permitted urban societies to choose the Schultz-Delitzsch model. societies to enose the Schulze-Penesch model. The local Governments were empowered to appoint special officers called Registrars of Co-operative Societies, whose duty it would be to register societies formed under the Act, to get the accounts of such societies audited by a member of their staff and in general to see that the societies worked well. The seed thus sown has grown to-day in the course of 30 years into a fine tree with twigs and branches, spread out in many directions. In spite of several weakho-day, it is beyond dispute that the movement has been a powerful instrument towards the awakening of the country-side and has led to a steady improvement in various directions of the life of the Indian cultivator. Moreover, the use of the vote, the elective system, self-help, selfreliance, compromises, gives and takes, work on an organized plan, rounding of angularities are great items in the training up of a citizen and the co-operative societies have been great

grew up very slowly but the growth was consi-up to 1910, the working capital has advanced derably accelerated from 1910 and the average very rapidly and stands to-day at more than 100

by the Agriculturists Loan Act enabling number of societies from 1910 to 1915 was about Government to advance loans repayable by 1,400. The pace of growthstill further quickened easy instalments and at low rates of interest and now there are 9,4,433 agricultural for improvements and also for current agricultural societies and about 12,167 non-agricultural for improvements and also for current agricultural societies and about 12,167 non-agricultural continuited a report to the Malarus Government of the societies and about 12,167 non-agricultural continuited a report to the Malarus Government by proceeding distribution of these societies and the societies of the continuited as the continuity of the continui the ideas of common brotherhood among the Provinces, Burma and Assam show distinctly unselsme were ovidences of the peoples' natural smaller figures. The Punjab with about 22,500 agittude for co-operation and the withis of sectletle stands fars in the number of societies Southern India furnishes a practical proof of (89) per one laki inhabitunts, while Bengal 100 appointed a committee to consider the Punjab stands second in that respect with 45 question of the establishment of agricultural The progress in smaller area, like Coora and banks in India and the report of this committee of Almer-Merwara, must be regarded as very resulted in the passing of the Co-operative Credit satisfactory in view of their small population, resulted in the passing of the operative move-siline the number of societies per one lake hulable ment was thus launched in India on the 25th tants works out in a their case at 141 and 125 March, 1904. The Act almed at encouraging respectively. It is satisfactory to note that the co-operative movement has spread not only among the British Indian Provinces but also in Indian States and compared to the total population, Bhopal and Gwallor lead in this matter for small and simple folks with simple needs though the premier States of Kashmir, Mysore, and requiring small sums only. Knowledge Baroda and Hyderabad have also made considerable progress. Even more instructive are the figures in Table 2. The total number of members of primary societies stands on the 30th of June 1936 at 45 lakhs. Taking the normal family at a little under 5, it is clear, therefore, that more than two crores of the people of India are being served by this movement. There is no single movement in the country fraught with such tremendous possibilities for the uplift of masses as the co-operative movement and there is no single movement with such a large percentage of the population affected by it. Though the Punjab leads in the number of members of societies 30 8 per one thousand inhabitants, Bombay comes next with 28.1, while Madras and Bengal rank thereafter. This shows that the size of societies thereafter. This shows that the size of societies varies in different provinces and that Bombay, while having a smaller number of societies, has a larger average of membership per society as compared with the other provinces of British India. Of the smaller areas, Coorg takes a nesses in the co-operative movement in India leading place with 87.9 members per one thou-to-day, it is beyond dispute that the movement sand inhabitants, while Travancore has an has been a powerful instrument towards the average of 38.2. Membership is a much better test in many respects of progress than the aumber of societies and from this point of view, the progress in Bombay, the Punjab, Coorg, Travancore and Bhopal must be regarded as distinctly satisfactory. There is, however, a third aspect also of the growth of the movement. Merely the number of societies, or the member-ship in the societies is not an index of the work sal the co-operative successes and suggested the movement.

Since patches for political and civic education. Since the launching of the movement in 1904, being a conferred by the movement of the operative law and committees and commissions or capture in the movement of enquiry to remedy defects and to suggest institutions and the part that they play can be better appreciated from their working capital than from merely the number of members. In the direction also we must note the marvellous Growth of Co-operation.—In the first few years of the movement, the number of societies from about its. 65 after achieved by the movement.

crores. It is pleasing to note from Table 2; but Indian villages, the well-do-do and the that this large sum has been derived needly enterly needly rather form distinct groups, the former capital, the reserve fund and the deposits from instead or comprising near correct sum of the deposits from instead or comprising more or less all sections members together contribute about Rs. 40 crores of the population of the village, the society and this is really owned equidal or the members is rather made up of the needly section only, at crores while the non-members or the outside public contribute about 30 crores. This latter they serve in the banking organisation of the lawsesing are savings, it any, in anish and orna-country. The distribution so for even is a single property of the control o in different parts of India. lead in this respect with 125 annas per head of population. The Punjab is a close second with 117. Madras and Bengal fall behind with 55 and 58 respectively. Among the smaller areas, Ajmer-53 respectively. Among the smaller areas, AjmerMerwara comes out first with 146 amass per to raise money from towns and make them
head of population white Coorg follows with
150 amass of the control amount to over three crores out of a total working capital of about 15 crores and this is one of the best tests of the success of a co-operative society. It is obvious from a glance at the figures in the tables that there has been very rapid progress in the number of societies, in their membership and in the working capital of these societies. The Punjab, generally speaking, leads in many respects with Bombay coming close behind. The smaller areas and the Indian States have also achieved considerable progress though the movement there started comparatively later. The agricultural societies predominate in all the provinces and States while non-agricultural, that is, urban societies show a much slower development. While there is much room for satisfaction at the phenomenal growth of the movement in rural and urban areas, it must be admitted, however, that merely the figures of the number, membership and working capital are not enough to base conclusions upon. before we proceed further, we must now explain the chief component parts of the structure, as it has now been built up, of the co-operative movement in the country.

Financial Structure of the Movement.-Apart from the comparatively few co-operative societies at present working in India for noncredit purposes, it must be recognised that whether in urban or rural areas, a co-operative society largely means a small bank or a credit institution for providing financial accommoda- brotherhood which imposes such an obligation the second of processing analysis and cooperative basis, as unlimited liability on all, so that they either of these credit nutritions, by far the greater swim or sink typether. To secure snoess, proportion is runtil more and credit society therefore, the proper selection of members is has, for its much purpose, the financing of the of the utmost importance; and it has been agriculturities and as such it needs funds. The junfortunes that in India this has not been in original idea of co-operative credit lies in making practice as well kept in view as it should have available to the needy the surplus of the well-to-been, in the eager desire to promote the formado brathern through the medium of the society it ion of more and yet more societies,

own money. The provincial or central banks any rate, very largely. Even otherwise, the and other societies contribute a little less—29 slender savings of the well-to-do would not be a second or societies. enough to meet the wants of the needy and each village society is not, therefore, able to be selfitem shows to a remarkable extent the growth sufficient, making available the deposits of its of public confidence in co-operative institutions well-to-do members as loans for the needy of public conneince in co-operative instantions were considered in memoria as foams for the needy and speaks well in general of the management ones. The heavy load of unproductive dob of the societies and the very useful purpose of the average Indian farmer, his habit of they serve in the banking organisation of the livesting his availing, if any, in lands and organization. Eombay and Sind either from members or locally. The question annas per head of of funds for the working of a rural co-operative Society thus becomes a vital question indeed Central banks have therefore been brought into existence at the district headquarters in order structure of the co-operative movement is thus largely composed of three parts-(i) the Agricultural Credit Society, (ii) the central financing agencies, and (iii) the provincial banks. Obvi-ously one more part in the structure seems possible and desirable, namely, an Apex All-India Co-operative Bank. So far, however. such an All-India Bank has not been started and the provincial banks have been content with an All-India Provincial Co-operative Banks' Association. Agricultural Credit Societies .- The suc-

cess of these societies is closely related to their very peculiar constitution. In an ordinary joint stock company, a member is liable only to the extent of the value of his share holding and his liability is therefore limited ; but in the case of agricultural credit societies, the liability is unlimited, that is to say, members are jointly and severally liable to the creditors of the society for the full amount of the debts incurred by it Such a liability would never be acceptable to any person, unless he was imbued with the broader vision of brotherhood between members and unless he himself had an active voice in the management of the society and had a more or less full knowledge of the character and antecedents of his fellow members. Co-operative credit is the capitalisation of character and unlimited liability is the great instrument to secure the admission into a society as members of these persons only, who by their character and antecedents deserve to be taken into that

Credit is a blessing only if turned to productive of rupees. Their financial position as on the account; if used up for unproductive purposes, 30th of June 1936 stood thus:—
it is a curse. It would enrich the producer
but it would only impoverish the consumer. It is capable of fruitful employment by the intelligent but it leads the illiterate and the ignorantowards perdition. The Indian agriculturist meds money for productive purposes, such as his current agricultural needs, land improvement, purchase of stock and imple-ments, minures and seeds as also for unproductive purposes, such as repayment of old debts, weddings and funerals. He thus requires credit not only as a producer but also as a consumer—a producer who hardly makes profits from his industry and a consumer who has no past savings to enable him to tide over a bad period, but who is a perpetual borrower ready to live for to-day and letting the to-morrow take care of itself. He is besides ignorant and illiterate and though sufficiently conversant with the routine of his industry, hardly awake to the need or scope for improvements in his methods. Under such circumstances, it is imperative for the management of the rural co-operative society very carefully to scrutinise the loan applications and examine the purpose for which loans have been asked and to see carefully that the loan when sanctioned is used for the specific purpose. And yet, it is in this respect that there is considerable scope for improvement.

The funds of an agricultural credit society are raised from entrance fees, share capital deposits or loans from non-members, loans from the central or provincial banks, loans from Government and the reserve fund. The income from entrance fees and share capital is small compared with the financial requirements of the members. The large sources from which funds are derived are deposits and loans. volume of deposits which a society is able to secure on terms offered by it is an index of the measure of the public confidence it has inspired and the soundness and the stability of its financial position. The ideal placed before these societies is the development of members' deposits to the extent of making the society financially selfsufficient. These deposits by members further serve the purpose of stimulating thrift and saving habit among them, and are, therefore, eminently desirable. Attempts are everywhere made to encourage them, but the response has been small, except in the province of Bombay, where it forms about 1 of the total working capital. Loans from central banks therefore furnish the bulk of the working capital of these agricultural credit societies at present.

Low dividends and voluntary services resulting in low cost of management have made it possible to divert a substantial proportion of the profits of these societies to reserve funds. and thereby provide against unforeseen losses, bad debts and losses on the realisation of certain assets such as by investment depreciation. The general practice in regard to the use of the reserve fund in the business of the societies is that it is used as ordinary working capital.

In thousands

of rupees Share capital 4,31,80 Reserve and other Funds . . 9,64,28 2,92,85 Deposits 17,70,43 Loans Total Working Capital 34,59,36

The figures show that these tiny agricultural societies in India work with about Rs. 17 crores of their own capital (including members' deposits in this head) as against their outside borrowed capital of about Rs. 18 erores. The owned capital was thus about 49 per cent, of their total working capital, and this proportion is rising steadily as years pass by.

Central Financing Agencies. -The formation of banks in urban areas on co-operative principles, with the sole object of raising funds for advances to societies having been found necessary to place the financial structure of the movement on a sound basis, the Co-operative Act of 1904 was amended in 1912 and the Co-operative Societies Act II of that year provided for the registration of central banks with the sole object of financing societies. Soon thereafter the number of central financing agencies grew rapidly all over the country, especially in the United Provinces. The function of these central societies was not only to supply the required capital to the primary societies but also to make the surplus resources of some societies available for other societies suffering from a deficiency of funds and to provide proper guidance and inspection over them. On the 30th June 1936 the number of central banks was 615,

There are four main sources from which a central bank derives its working capital which stood in 1935-36 at 29 4 crores: (a) Share capital, (b) Reserve, (c) Deposits, (d) Loans.

The paid up share capital and reserves of central banks constitute the owned resources of these banks as distinguished from horrowed resources and provide the guarantee fund against which additional funds are raised by them in the shape of deposits or loans. It is usual to prescribe a suitable proportion between the owned and borrowed resources of central banks in each province. The most usual proportion observed in practice between the borrowed and owned resources in all parts of the country is 1 to 8. Deposits from members and nonmembers constitute the bulk of the borrowed capital of central banks. The total amount of deposits held by central banks in the year 1935-36 from individuals and other sources amounted to Rs. 17 0 crores, and from primary societies to Rs. 2 9 crores. Deposits in central banks are mainly of two kinds, viz., savings and fixed. Current deposits are not universal but confined only to selected central banks in selected areas. The principle usually observed by these banks is not to grant loans to societies for periods longer than those for which deposits are available and where loans for long periods are advanced, the periods of deposits are also comparatively The funds collected by the agricultural long. In addition to funds obtained by deposits. societies in India at present are by no means central banks raise loans either from outside negligible. They aggregate to over 34 crores banks, from other central banks, from the local provincial bank or from Government. The total central banks and provincialization of finance amount of loans held by the central banks in in them. It is found that in a large majority banks in other provinces of British India of co-operative societies and central banks do not directly borrow loans from Government; the central banks of Indian States, excepting Mysore and Travancore do States, excepting Mysore and Travacore to to a greater or less extent hold loans from Government, while in Gwalior, loans from Government constitute the most important item of the total working capital. Borrowings from outside banks are generally confined to accommodation obtained from the Imperial Bank of India against Government Securities or Promissory Notes executed by societies in favour of the central bank and endorsed by the latter in favour of the Imperial Bank. This accommodation is, however, limited and advances from other joint stock banks are also now The main source of loans is, therefore, the provincial bank, and where a provincial bank exists, the central banks are generally prohibited from having any direct dealings with either the Imperial Bank or any other joint stock bank or with one another. This rule is however not or with one another. This rule is however not rigidly observed in the Punjab and Madras. Several central banks in the country, due to their long standing, now possess sufficient resources to be independent of any outside financial assistance but they all continue credit arrangements mainly with the provincial bank on which they rely for emergencies,

In the initial stages, several central banks developed from ordinary urban societies which granted advances to individual shareholders, A few of such central banks have continued the practice and the amount advanced by central banks to individual members during the year 1935-36 was Rs. 1,03 lakhschiefly in the Punjab. Bombay and Madras. This practice, however, is gradually being abandoned as the chief function of a central bank is to finance societies and to serve as their balancing centre. The total advances made by central banks to societies at the end of the year 1935-36 amounted to over Rs. 8.8 crores.

After meeting management expenses the profits of central banks are distributed as allocations to reserves and dividends to shareholders. The combined net profits of the 615 central banks of the country during the year 1935-36 amounted to Rs. 40 lakhs on the total working capital of Rs. 29 crores; the rate of dividend paid varied from 4 to 9 per cent. in different parts of the country but the most usual rate paid was 6 per cent, per annum,

Excepting in Burma, central individual sharcholders as well as representatives

> All apex banks both in British India and in the Indian States depend for their working capital largely on deposits from the affiliated co-operative societies as also from the public. It is, therefore, thought necessary to insist upon the maintenance of fluid resources on a certain scale and in some provinces the Government of the province has prescribed definite rules with regard to the maintenance of fluid resources. The period for which deposits are accepted determine the maximum period for which they can lend out these borrowed funds to their clients, and in every province the apex bank has fixed for itself a maximum term, beyond which no loans are, in general, sanctioned to the borrowing client. The following figures will clearly show the position and transactions of the apex banks in 1935-36:-Provincial Banks, 1935-36

While accepting deposits from co-operative banks and the general public, most of the apex banks have also dealings in current account with the latter. The Punjab bank does not encourage such accounts with individual nonmembers, as it does not wish to enter into Provincial Co-operative Banks,—In India, competition with central banks. Apex banks at present, all the major provinces except the also generally carry on ordinary banking busilined Provinces have apex banks functioning ness, such as collecting hundis and dividends United Provinces have apex banks inuctioning iness, such as concetting minutes and crivacends in them. There are apex institutions in two from companies and collecting the pay and of the Indian States, Mysore and Hyderabad, pensions of public servants. Overdues.—Among the most important tests of the success or otherwise of a co-operative arcidis cockety is undoubtedly the promptness in repayment of loans by members and it is in this respect that one has to recognise that in 30th June 1936.

The cont of the working capital and 44 per cent, of the correspondence to arrange for inter-provincial by book entries and extensions of the date of borrowings. borrowing from the sowcar to pay the society's

The position has since June 1933 grown more repaying capacity of the borrowing member, serious, since the fall of prices of agricultural in sanctioning loans for unproductive though produce and the world crisis and trade depress perhaps necessary social or domestic purposes sion have reduced the repaying capacity of of overdue loans is an ominous portent and reflects very badly on the soundness of the cooperative structure. The loans having been based on the basis of the assets of members, the ultimate solvency of the societies is beyond consequent wholesale liquidation of societies would react very seriously both politically and economically. The causes that have led to this

or for the redemption of old debts and generally the agricultural horrower considerably and in the uneconomic nature of the agricultural increased the terrible load of overdue loans in industry. The loose sortifly of the purposes rural credit societies. This continued growth is tacked in the loan applications and the absence of a careful watch on the way the loan is spent by the members, which must be the case, where almost every member is a borrower or a surety to other borrowers and where the societies are ultimate solvency of the societies is beyond composed almost wholly of the needy section dispute; but severe pressure on members and the of the village, the well-to-do standing aloof, the remissness in exerting pressure and in taking action against the defaulter, even when he is wilfully defaulting, add considerably to the phenomenon, which menaces the entire existence growth of this menace of excessive overdues, of the co-operative movement are chiefly to be. The central financing agencies are more confound in not basing the loans sanctioned on the cerned with the assets that in the last resort new credit societies.

Land Mortgage Banks.—The loans advanced by co-operative societies to their members and by the central financing agencies to their constituent societies are, from the very nature of the source from which they derive the bulk of their finance, for short or intermediate terms only. By concentrating upon the growth and multi-plication of rural credit societies and thus upon facilities for short and intermediate term loans, the co-operative movement did not provide for the redemption of old debts or for increasing the earnings of agriculturists which alone would prevent any further increase in their debts and pave the way for the paying off of the old ones. It does not seem to have been adequately realised that the removal or the lightening of the heavy load of indebtedness does not depend so much upon the easy terms on which co-operative finance can be made available, as upon the ascertainment of the amount of individual indebtedness to the sowear, upon so fully financing the agriculturists that they could be prevented from resorting to the smeatr any more, and above all on making agriculture an industry sufficiently paying to leave a little saving after all legitimate current expenditure on agriculture credit could serve this purpose and which has clung more or less till now as evidenced by permitting this purpose to be regarded as a legitimate purpose for loans is largely responsible registance purpose for rounts a safety responsible for increasing the load yet further. Short or intermediate term loans can, if judiciously employed, prevent any further increase in the burden, though even that in the present state of uneconomic agriculture seems scarcely possible; but it cannot leave any adequate margin of saving which could be employed to redeem past follies or misfortune. The sowcar, it is often forgotten, is the village retailer as also the purchaser of the villagers' produce and what he cannot recover from the borrower by way of interest or the part payment of the principal of the loans, he can more than make good on the while the profits of the merchant and the retail shop-keeper are still enjoyed by the somear; the attack ought to have been on all fronts. However, under the circumstances, the clarification of the situation of indebtedness is most desirable as a preliminary towards tackling the important questions of the redemption of old debts. The Indian Central Banking Enquiry Committee has wisely emphasised the need for a vigorous policy of debt conciliation on a voluntary basis and for exploring the possibility of value. eary mass same are exporting the possibility of values. While minuted Enfowledge of a find materiaking legislation to secure, if need be, the fourther than the management of the control ting those who have already given up all their valuation of security, careful investigation of

are the security for their lendings and, with assets, from the incubus of ancestral and old are the second than they could use, are more eager debts, so that at least they and their heirs could even than the Registrar himself for organising start with a clean slate. In any case, the need for long term loans to the agriculturists for land improvement and for the redemption of old debts seems obvious, and it has now been recognised that the time has come for the provision of this facility by the starting of land mortgage banks.

There are three main types of such banks. The strictly co-operative type is an association The strictly co-operative type is an association of borrowers who raise credit by the issue of mortgage bonds bearing interest and made payable to bearer and is well illustrated in the German Landschaften. The commercial type German Landsenation. The commercial type is represented by the Credit Fonder of France, which works for profit and declares dividends. The third type—the quasi co-operative has a mixed membership of borrowers and nonborrowers, operating over fairly large areas and formed with share capital and on a limited liability basis. The banks organised so far in India are in a sense of the co-operative type. though strictly speaking they belong to the quasi co-operative variety, admitting as they do to the membership a few non-borrowing individuals for attracting initial capital as well as business talent, organising capacity and efficient management.

At present there are 12 co-operative land all legitimate current expenditure on agriculture as present users are 12 co-operative land and the household has been mets, so that this mortgage banks in the Punjab. Two of these saving could be applied to the liquidation of old operate over whole districts, the rest confine debts. The mistaken notion associated with their operations to a single tehsil. Bombay the start of the movement that co-operative has 15 land mortgage societies, which have only recently started their operations. Bengal has two, Assam has five, while Madras has as primary land mortgage banks and a central land mortgage bank has been started recently. It is too early to pronounce on the success or otherwise of these few banks. Among the objects for which these banks advance loans are the redemption of old debts, improvement of land and method of cultivation and the purchase of land in special cases. The Central Banking Committee think however that for a long time to come the resources of these institutions will be mainly required for enabling the cultivator to redeem his land and his house from mortgage and to pay off his old debts. One feels, however extremely doubtful whether the emphasis should not be laid on the intensive and extensive developor sue nous, see can more suam mana good on the more and on see minerative and extensive develop-trenshing floor or in his shop. The co-operative ment of agriculture, since as pointed out above, movement by concentration on the credit side unless agriculture becomes a paying industry, the has attacked him on one front only, so that the redemption is impracticable and illusory. The risks of non-payment are saddled on the society bulk of the funds of these banks will have to be raised by debentures and for these purposes, there will have to be in the provinces central land mortgage banks as in Madras and in Bombay, Government will have also to render assistance to these institutions for the success of the debenture issue, and its guaranteeing the interest as in the Punjab ought to meet all successible words thank its granteeing the succession of the control of the success of the debenture issue, and its guaranteeing the interest as in the Punjab ought to meet interest as in the Punjab ought to meet all reasonable needs, though in special cases there would not be much harm in the Government purchasing debentures of a certain value. While mutual knowledge of and

titles, correct assessment of borrower's credit In Bombay, the Institute has created a special lities, correct assessment of borrower a crears in bombay, the institute has created a special management of affairs.

Propaganda, Education and Training. In the initial stages of the movement, it fell on In the initial stages of the movement, is lent our secreties. In the Funjan, nowever, co-operative to Registrar to carry on propaganda and detaction has been organised by the Co-operative organize co-operative societies. For this purpose Department, though the Punjab Co-operative the assistance of non-official honorary workers [Unior renders active assistance therein. In Bihar was imperative and in the various provinces a hand of such workers was brought into exisa hand of sach workers was brought had care institute has been established at Sabour in the or talukas actively co-operated with the officials or talukas actively co-operated with the omenas in carrying on propaganda, organising new societies as a result thereof and looking after the societies so started in some measure the rapid growth of co-operative societies, however, it was felt that for the further pronahowever, it was felt that for the further propa- tand cumentain have not yet neen property many, agation of the movement it was desirable to though there also it is the Department assisted earry on work by the non-officials in a more lower of the provincial union which organises the ownshied manner and for that purpose co-opera-italing classes. The need for proper co-operaorganised manner and the parpose of the last tive institutes were started in the various provinces. In some provinces, like Bombay, these vinces. In some provinces, like Bolinary, these institutions are mixed institutions with a membership of individual sympathisers and workers and of co-operative societies. In others, like Madras and the United Provinces, individuals were not admitted as members and the institutions became provincial unions of co-operative societies. In some provinces, like Biliar and Orissa, they became federations of co-operative societies, while in others, like Bengal and Assam, they are known as co-operative in the country must include a proper organisation societies. Whatever the exact of co-operative advertion not value to the country must be considered to the control of the co-operative advertion not value to the control of the co-operative advertion not value to the control of the co-operative advertion not value to the co-operative advertion not value to the co-operative advertion not only to the co-operative advertion not only to the co-operative control of the co-operative societies. form assumed by these provincial institutions. their functions were more or less the same in tors of central and provincial banks but also fagir functions were finite of a season and for so it centers and provinces using propagands and the for the inspectors, auditors and assistant regisficussing of non-official co-operative opinion trars of the co-operative departments. The on the various problems that confronted [correment of India have for the last two on the various problems that confronted Government of India have for the last two that movement from time to time. They years have placed at the disposal of each of have come to be regarded in an ever increasing measure as the third arm of the movement, the Registrar and his staff representation of en-operative training that movements the Registrar and his staff representation of en-operative training that the representation of the contradiction of the staff representation of the contradiction of the staff representation of the contradiction of the staff representation of the contradiction of the staff representation of the contradiction of the staff representation senting the administrative side performing more or less the functions assigned to them under the statute, the provincial bank with the central banks and banking unions representing the financial side and as such concerned more with the financing of the movement and the institutes. unions, federations or organisation societies representing the propagandist side and as such concerned more with educating popular opinion and representing non-official views to the authorities. A few years back, the All-India Co-operative Institutes' Association was established. with a view to co-ordinate the activities of the provincial institutes, to formulate non-official co-operative opinion on important co-operative problems from time to time and the provincial unions be accepted, it will natuto encourage the growth of co-operative rally follow that they will also have to assume literature.

It was soon perceived that one of the serious handicaps to the successful working of co-opera-tive societies was the ignorance of the members and the absence of trained men as office-bearers of societies. Illiteracy of the rural population, however, has been found too big a problem for these institutes and they have, therefore, at-

schools at different centres and conducts periodically training classes suitable for different types workers and employees of co-operative societies. In the Puniab, however, co-operative and Orissa a permanent Co-operative Training Institute has been established at Sabour in the erning body which includes the Registrar, and a few representatives of the Co-operative Federa-tion. Madras has organised 6 training institutes. In the United Provinces, Bengal and the Central Provinces, arrangements for co-operative training and education have not yet been properly made. tive training and education has been felt in an Increasing degree in recent years and the Central Banking Enquiry Committee has recommended very strongly the establishment of provincial co-operative colleges and an All-India Co-opera-tive College for the higher training of more important officials in the Department, banks or societies. No action apparently has been taken till now on these recommendations, but there is no doubt whatever that any serious attempt at improvement of the co-operative societies of co-operative education not only for the officebearers of societies or the managers and inspecorganisation of co-operative training and education for the staff of the co-operative

In some provinces, like the Puniab and Bihar and Orissa, the provincial union or federation has been actively associated in discharging the Registrar's statutory function of the audit of societies and the Second All-India Co-operative Institutes' Conference held at Hyderabad (Decean) in 1931 also expressed an opinion that the Registrar's statutory obligation in this matter could be discharged by a system of licensing and that audit should be a function entrusted to the provincial unions or federations. If this idea of a uniform system of audit through rany follow that they win also have to assume the responsibility for supervision of the co-operative societies. The departmental audit or inspection by the central banks cannot dispense with the need of careful supervision, which to be effective must be from within and the provincial federation or union is obviously the best agency for this friendly and efficient supervision. The combination of the functions of audit and of supervision as suggested by the tempted only to spread knowledge of co-operation All-India Conference and endersed by the Central supercounty to spread a nowledge Go-Occeptation | Antitina Connectice and enderson by the Central Property of the Central Prop

Of these the important are the marketing and invite concentration on the co-operative societies, particularly for the sale of cotton in organisation of agricultural marketing. The Bombay, and the consolidation holdings and jute and paddy sale societies of Bengal have not better living societies in the Punjab.

Marketing Societies .- Marketing of Agricultural produce is the real crux of the whole sale societies. Absence of fraud in weighment, question of rural prosperity and betterment and adequate and high prices, insurance of the as group marketing is always more effective than produce against risks of fire, prompt payment individual marketing especially in India where of sale proceeds, financial accommodation till the an individual producer is illiterate and consti- produce is sold, information of daily price tutes a small unit, co-operative marketing has liuetuations in the Bombay market, supply of been accepted now as one of the most desirable gunnies and genuine and certified seed, bonus ideals to work for. It is only the complexity and a dividend are no small gains to the agricult of the working of co-operative sale societies, turists, who was otherwise at the mercy of the difficulty of providing for marketing finance, the adatya or worse still of his village sowear, the lack of expert knowledge on the part of The cotton sale societies of Surat have co-operative officials and the lack of godown recently combined in a federation which and storage facilities that have prevented the has taken over the co-operative ginning factory rapid multiplication of sale societies and their already started by the members. A few societies rapid multiplication of sale societies and their already started by the members. A few societies efficient working. met with success, it is true; but the cotton grower in Gujarat and the Bombay Karnatak has reaped considerable benefit from the cotton of America in co-operative marketing organisa-tion and the successful examples of the cotton chants yet, nather than to the merchants at the sale societies in Bombay should arrest attention port. Madras has a number of sale societies, not yet made much progress.

Consolidation of Holdings.—The law of primogeniture, by which the eldest son alone succeeds to the property of his ancestor and which is in force in some European countries does not obtain in India. Each heir is given a proportionate share of each them of the inherited property and not a share of the whole, equivalent to his portion. The result is that successive generations descending from a common ancestor inherit not only smaller and smaller shares of his land but inherit that land broken up into smaller and smaller plots. This continuous partition of each field amongst heirs leads to fragmentation, which is accentuated by the expansion of cultivation, irregularly over the waste, by purchase and sales, by the extinction of families in default of direct heirs and the division of their property amongst a large number of distant relatives, and by the break up of the joint family system and the custom of cultivation in common.

The disadvantages of fragmentation are obvious. A part of land is wasted owing to fragmentation being so excessive as to prevent any agricultural operations, and another part is lost in boundaries. Fragmentation involves endless waste of time, money and effort; it restrains the cultivator from attempting improvement; it prevents him from adopting scientific methods of cultivation; it discourages him from carrying out intensive cultivation; it enforces uniformity of cropping, and especially restricts the growing of fodder crops in the period during important and interesting experiment originated in the Punjab in the year 1920. The procedure adopted in establishing a Co-operative Consolidation of Holdings Society is to call together all persons directly interested in land in a given village, persuade them to accept the by-laws whereby a majority in a general meeting might approve a method of repartition, and then carry out actual adjustment of fields and holdings in such a manner that no single individual might have any grievance. As the result of patient work which has now extended over ten years, some very striking results have been achieved and the movement for consolidation in the Punjab has assumed the dimensions of an important agricultural reform. It is steadily gaining in popularity, and, as more staff is trained and the people become better educated to the advantages of the system, the figures for the area consolidated are mounting up year by year. This work began in 1920-21 and in the 10 years that have elapsed since then, 2,63,462 acres have been consolidated by the end of July 1930, millions, at an average cost of Rs. 2-5 per welfare.

In the Central Provinces some success in consolidation has been achieved in the Chattisgarh Division where scattered holdings are acres broken into 40 plots. The Local Govern-Sir Frederick Sykes, the therment found it desirable to resort to legislation Bombay, concentrated on and passed the Central Provinces Consolidation and carried on an init and passed the Central Provinces Consolidation and carried on an intensive proof Holdings Act in 1928. Any two or more ganda in that behalf which has led

but their transactions are small and they have permanent holders in a village holding together not less than a certain minimum prescribed area of land, may apply for the consolidation of their holdings, but the outstanding feature of the Act is that it gives power to a proportion, not less than one-half of the permanent right-holders, holding not less than two-thirds of the occupied area in a village, to agree to the preparation of a scheme of consolidation, which scheme, when confirmed, becomes binding on all the permanent right-holders in the village and their successors in interest.

In Bombay a Bill was introduced in the Legislative Council in 1928 to deal with certain features of the problem. When this Bill was introduced a good deal of opposition was created and it had to be ultimately dropped.

There are 11 societies for consolidation of holdings in the United Provinces, and 11 in the Baroda State based on the Punjab model.

Rural Reconstruction .- One of the main reasons why the achievements of the co-operative movement fall so short of the expectations of the promoters and workers lies in the extreme backwardness of the rural population and it is not too much to state that the ultimate success or otherwise of the co-operative movement lies bound up with general, rural development and progress. So long as agriculturists remain steeped in illiteracy and ignorance, are heavily and almost hopelessly indebted, have a fatalistic and listless outlook on life and have an extremely low standard of living, carrying on agriculture with simple tools and implements in more or less a primitive fashion, no great approach to mus. The economic loss due to this system all other rural sovements is possible. The can be easily imagined, and the only solution is co-operative movement itself is indeed a great consolidation of holdings. This most difficult experiment in rural resonancial consolidation of the most difficult experiment in rural resonance. protect the agriculturist from exploitation of the usurer, the middleman dalal and the mer chant; but concentration on the credit side of the movement with but half-hearted attempts for the co-operative organisation of supply and marketing, a growing multiplicity of institutions for various purposes and above all the neglect of the educational, sanitary, medical and the social sides of village life explain very clearly why the achievements of the movement during the last 34 years have fallen far short of its objective. Rural reconstruction has, however, of late years claimed an increasing amount of attention; but so far attempts on a mass scale have not been made; what has been done has been individual effort—the efforts of individuals fired by the impulse of social service and moved by enthusiasm to utilise their opportunities to the best advantage by contributing to the welfare of the humble village folk. best known of such centres is at Gurgaon in the Punjab. The work done there covers education, have been consolidated by the end of July 1930, sanitation, medical relief, improvement of out of the whole cultivable area of about 30 agriculture, female education and maternity

In the Central Provinces and Berar the local Government carried on similar work from November 1929. The later part of 1933 saw a considerable impetus imparted to the cause of particularly common and it is not rare to see 10 rural reconstruction in India. His Excellency Sir Frederick Sykes, the then Governor village uplift

the formulation of a scheme whereby the of urban people without any distinction of caste work is being carried on carnestly by District Committees under the guidance of the District Collectors, the work being co-ordinated by Divisional officers. The Punjab has appointed Mr. Brayne of Gurgaon fame as Commissioner for Rural Reconstruction and Bengal has made a similar appointment, and it appears that all provincial Governments are devoting considerable thought to this very important work.

Better Living Societies.-The Punjab has been responsible for introducing this very desirable type of co-operative society to promote better living among its members. There are about 300 such societies in that province and they have been doing quite important work in their own way. The societies do not collect any levy from their members, except the small entrance fee and they lay down a programme of work and make rules for carrying it out from year to year, violation of which is punishable with fine under the by-laws. Though these societies in the first instance have for their object the curtailment of ruinous expenditure on marriages and other social occasions, they have also helped in various other matters; so that apart from saving to their members thousands of rupees each year, they are contributing to the general village uplift in some measure. Some of these societies have levelled and paved and swept the village lands, some have promoted sanitation, some have induced the villagers to improve ventilation in their houses, some have repaired and roofed the village drinking well, some have arranged that all manure should be pitted, some have discouraged expenditure on jewellery, and some have stopped waste on farms. Thus in a variety of ways these societies generally have been great factors in the improvement of conditions in the life of the village. It is earnestly hoped that such better living societies will be started in large numbers in the various provinces of India or better still that the cooperative credit societies would take upon themselves the function performed by these societies and that the term better living be given as wide a connotation as possible so that the co-operative movement would be doing good to itself and the nation by carrying on the general work of village uplift, as well as its own economic objective of strengthening the position of the agriculturist.

Urban Credit Societies.-While the chief objective of the co-operative movement was from the first to do service to the rural population, it must be remembered that the Act of 1904 permitted two classes of societies,-rural and urban, recognising thus the suitability of the co-operative method for solving the problems of urban population also. At present there are in all 12,158 non-agricultural societies with a membership of 14,46,790. Of these, 5,652 are credit societies, the rest being societies for other purposes.

An important class of the urban population is that of the merchants and traders, and though the joint-stock banking system that has so far developed in India is quite well suited in many respects for them, from the point of view of the small trader, it is co-operative banking that is obviously wanted. The importance of People's

or creed is, therefore, very great, for the finance of small merchants, artisans and craftsmen for the stimulation of trade and industries in and around district and taluka towns. The principal business of these banks is short-term credit and in this respect they resemble the ordinary commercial banks. In the absence of any industrial co-operative bank, it is also for the peoples' bank to finance small industrialists and help the development of cottage industries. which still play a very considerable part in the industrial economy of India. Another very important function which falls to peoples' banks is the financing of the marketing of the produce of the land from the field to the port or to the principal market centres and thus assist in the development of the internal trade of the country. It is only, however, in the Bombay and Bengal Presidencies that we meet with some good institutions functioning as peoples' banks. In Madras there are 1,055 non-agricultural credit societies but most of these are not real peoples' banks. The Punjab has 1,030 unlimited liability societies and only 162 with limited liability. Even here we hardly find any develop-ment of real peoples' banks. In Bengal the Even here we hardly find any developlimited liability urban credit societies number 527 and though these societies seem to have won public confidence the more important of them are salary earners' credit societies. Some of the divisions especially the Chittagong divisions have several big concerns, however, working on sound lines. The question of starting Peoples' Banks in Bihar and Oriesa has not yet been seriously taken in hand. In the Bombay Presidency, institutions with a working capital of Rs. 50,000 and more are classed as urban banks. Since 1922 co-operators in this Presi-dency have been very keen on having a full-fledged peoples' bank in every taluka town. for it has been realised that with the proper development of urban co-operative banking there is no doubt that the various units will come into touch with one another and that mutual settlement of terms and co-ordinated and harmonious work will greatly assist the development of inland trading agencies; Peoples' banks are a repository of peoples savings, a nucleus for co-operative activity and an institution giving facilities for internal remittance and it is quite necessary therefore that their share capital must be pretty large. In the Bombay Presidency on the 30th June 1935 there were 131 urban banks most of which are The total membership was fairly successful. 2,09,603, the working capital was Rs. 4,83,53,376 and the reserve fund amounted to Rs. 25,59,154. It can be said without exaggeration that the development of urban banking has been a distinct contribution of Bombay to the cooperative movement in India and other provinces might well follow Bombay's example in this direction.

An important variant of the urban co-operative society is the Thrift Society. The system adopted is to collect regular savings every month for a continuous period of two to four years, invest the collected amount to the best advantage and pay back to the subscriber his amount at the end of the term with interest. In many societies, loans are advanced also but not exceeding a Co-operative Bank promoted for the benefit | certain fixed proportion, usually 2 of the deposits, The Punjab has about 1,000 such societies and official hands. the bulk of the members are school masters. There are about 125 thrift societies for women only having a membership of about 2,000. Madras has also more than 100 thrift societies and Bombay has half a dozen. Recently however. Life Insurance Societies have been start-ed in Bombay, Bengal and Madras. The Bombay society was started in July 1980 and for a few months worked as a provident society only, issuing policies of Rs. 150 to Rs. 500 and that to without medical examination, the idea being to bring life insurance within easy reach of the small man in the village as in the town. It has small man in the village as in the town. It has no share capital and works on a mutual basis. It has now, however, widened its scope and has been writing policies for larger amounts under its ordinary branch, while under the rural branch, besides the ordinary small policies, it has recently issued, a scheme for decreasing term insurance, which will, it is hoped, meet the needs of the primary societies and their borrowing members much better. It has by now written a business of over Rs. 40 lacs. The Bengal society is yet a provident society issuing small policies, while the Madras society—the South India Co-operative Insurance Society has started vigorously as a full fledged life insurance society with share capital and com-paratively low rates of premia, and has already written a large business of about Rs. 40 lacs.

Review .- The Co-operative Societies Act of 1904 had limitations which were soon recognised and at a conference of the Registrars, a bill was drawn up which became the Co-operative Societies Act of 1912. This Act remedied the defects of its predecessor, authorized the registration of societies for purposes other than eredit, substituted a scientific classification based on the nature of the liability for the arbitrary one into rural and urban and legalised the registration of Unions and Central Banks.

In 1914 the Government of India reviewed the situation in a comprehensive resolution and recommended a change in the pollcy regarding the grant of loans to members, so that they might lend money for domestic purposes as well as for agricultural ones in order that the members might confine their dealings with the Co-operative Societies and be weaned from the sowcars. In 1914, the Maclagan Committee on Co-operation was appointed and its report in 1915 led to the reorganisation and overhauling of the whole administration of co-operation. Punctual repayment of loans was insisted upon, and all From this time onwards the share of non-officia s in the movement assumed increasing importance and it came to be realized that for the success of the movement, deofficializing of the same was necessary. The Government of India Act of 1919 made co-operation a provincial transferred sub-ject and the local Governments were left free to adapt the 1912 Act to their own requirements.

The steady growth of the Central Financing Agencies relieved the Registrars partly of the need for attending to this very important matter in the development of co-operation; but propa-gands still remained the function of the Registrar and his staff, paid or honorary, and it was perceived that non-official institutions should

Accordingly Co-onerative Institutes were started in various provinces, in some cases as unitary societies reaching down to the village through their branches in the divisions and the district, in other cases as a federation or union more or less complete of the primary societies. The part these non-official bodies began to play henceforth became increasingly important, some adding to the primary function of propaganda, others such as co-operative education, supervision over societies and even audit.

The steady progress of the movement-sometimes even too rapid-for nearly 20 years. however, was found hardly to lessen the colossal burden of the indebtedness of the ryot, for cooperative credit necessarily confined itself to short-term loans. It was in the Punjab that the first Co-operative Land Mortgage Bank was started at Jhang in 1920. Soon after other provinces also followed suit.

While the movement was developing at a rapid pace it was found that financially the situation was worsening. Defaults in repayment were becoming increasingly common and Co-opera-tive Committees of Enquiry were insti-tuted in various provinces. The Central Provinces thought it necessary to have such a committee in 1922, while Bihar and Orissa followed with a similar committee in 1923. A few years after the Oakden Committee made similar inquiries for the U. P., the Townsend Committee for Madras and the Calvert Committee for Burma. These Committees have carefully analysed the position in their respective provinces and have made recommendations for the consolidation and rectification of the co-operative credit organisation and the extension of the non-credit side of agricultural co-operation. The powers conferred upon the Local Government by the Act of 1919 to modify the Act of 1912 have been exercised so far in but few provinces such as Bombay, Burma, Madras, Bihar and Orissa. Bombay passed the Co-operative Societies Act of 1925 incorporating the suggestions made from time to time for the amendment of the previous All-India Act. This new Act made the object of the movement still wider than that of its predecessor and its preamble refers to "better living, better business and better methods of production" as the aim of the movement. The chief features of the Bombay Act of 1925 are the adoption of a scientific system of classification of societies, the improvement of the procedure for liquidation of cancelled those societies that failed to live up to the ideal societies, the extension of summary powers of of co-operation were sought to be eliminate': recovery to the awards of arbitrators and the provision of penalties against specified offences. The Burma Act came into force in 1927 and the Madras Act in July 1932. Bihar and Orissa has also now passed a similar Co-operative Act of its own recently. The progress of the movement in forms other than credit has not been very remarkable and credit societies still predominate, especially the Agricultural Credit Societies.

The non-credit movement has had naturally more obstacles to overcome than the credit but the former is slowly gathering force in the shape of sale societies for cotton in Karnatak, Gujarat and Khandesh, cattle insurance societies in Burma and irrigation societies in Bengal and the be established to take over this function from Southern Division of the Bombay Presidency. Perisans the most remarkable instance of the jof India to hold an All-India Co-operative in Bombay, Madras and Mysore, and artisans' societies and unskilled labour societies in Madras. It may be noted that on the agricultural side. ment has made but meagre progress,

In 1926, the Royal Commission on Agriculture was appointed and co-operation formed only a part—though an important one—of its extensive enquiry. Recently, in consequence of the committees, for obvious reasons, confined their inquiries to banking in relation to agriculture. small industries and trade. Thus only those aspects of the co-operative movement which have an intimate bearing on the credit needs of the population and the development of banking facilities have been examined, while the need for separate enquiries into the whole movement in the different provinces of the lines of those undertaken in C. P., U. P. and Madras and emphasised by the Royal Commission on Agriculture is still to be met. Bihar and Orissa recently got its movement examined by a committee; Travancore followed suit and Mysore too appointed a Committee which has published its report last year. The Government of Bombay convened in June 1933 a Round Table Conference of official and non-official Co-operators to discuss the problems that confronted the Movement in Bombay. As a result of this Conference, three Committees were appointed, one to examine the system of supervision over Co-operative societies by the Supervising Unions in the Presidency, another able progress, more or less on the same lines as to report on the best way to help the agriculturists those followed in the neighbouring British in these times of falling prices and trade Indian Provinces. depression, and the third to examine the problem of extension of land mortgage banking on a Co-operative basis. These Committees have submitted their reports, their recommendations have led to a tightening up of supervision, an extension of land mortgage banking and efforts to meet the growth of overdue loans.

Recently the Goverment of Bombay appointed a small committee to inquire into the cooperative movement and to suggest how effective action could be taken to improve, extend and strengthen the movement. The report has been submitted and early Government action may be expected. The one welcome feature of the suggestions is the adoption of the multiple society as the primary unit in villages suggested by us for years and advocated strongly by the Agricultural Credit Department of the Reserve Bank The reconstruction of the primary of India. societies on these lines will be a great step in the right direction, but cannot yield the fullest non-credit agricultural co-operation; urban benefit, unless the curse of Illiteracy and co-operative banking; long-term loans and debt ignorance is removed or mitigated by a strong redemption schemes; land mortgage banks; drive for adult education in rural areas.

Movement throughout India in these times of supervision over primary societies and rural unprecedented depression led the Government construction.

remaps the most remarkance instance of the of finding to hold an an-india co-operative non-credit movement in India is to be found Conference at New Delhi on the 29th January in the Pujab where consolidation of holdings 1934. This Conference was unique in so far has been successfully attempted through co- as it was not restricted only to the Registrars operation. In the non-agricultural non-credit of Co-operative Societies and their advisers sphere, a still smaller headway has been made. from the various provinces and States, but if There are a number of housing societies especially also included some ministers in charge of Agrialso included some ministers in charge of Agriculture and Co-operation from the provinces and a representative of each of the two All-India Co-operative organisations-the Institutes' co-operative farming has hardly been touched association and the Provincial Banks' Associa-and on the non-credit side the consumers' move-tion. This Conference recommended the enactment of an All-India Co-operaties Societies Act so as to permit the registration of Co-operative Societies working in the whole of India or in more provinces than one. It also recommend. ed earnest efforts for the development of land enquiry. Recently, in consequence or use appointment of the provincial committees under mortgage banks by the Government guarantee the Indian Central Banking Bayatire Committee in go to only the interest on their debentures the co-operative movement in the different but also the capital and suggested the creation provinces has been surveyed. But the provincial of a Central Co-operative Board under the provincial of a Central Co-operative Board under the provincial provinces has been surveyed. But the provincial of a Central Co-operative Board under the provincial provincial committees are considered to the committee of the comm to bring about a closer co-ordination of work between the different provinces and States of This last suggestion has met with some India. opposition, since after the provincialisation of Co-operation under the Montford Reforms of 1914, the provinces do not much fancy the imposition of control from the centre, And vet. there seems to be nothing wrong in the idea of a central organisation, which would be a clearing house for authentic information and stimulate progress through a careful study of experiments and efforts in particular areas and drawing attention of other areas to the success achieved or the deficiencies revealed. In Decem-ber 1936, another Conference of Registrars met at Delhi and discussed the situation further.

It may also be mentioned that the Indian States were not slow in introducing the co-operative movement within their limits, and the movement in some of the more important of the States, such as Hyderabad (Decean), Mysore, Baroda, Gwalior and Indore has made considerable progress, more or less on the same lines as

The landmarks in the history of the co-operative movement in India are: the Co-operative Credit Societies Act of 1904; the Co-operative Societies Act of 1912; the Maclagan Committee Report, 1915; the provincialisation of co-opera-tion, 1919; the establishment of institutes, tion, 1919; the establishment of institutes, unions and federations for propaganda; the unions and federations for propagana; the Committees of Enquiry into the oo-operative movement in several provinces; provincial legislation; the Report of the Royal Commission on Agriculture, 1925; Reports of the Indian Central and Provincial Banking Enquiry Commission of the Commi mittees, 1931; and marketing surveys, debt conciliation schemes and land mortgage banking,

The movement has thus developed rapidly and the stages of its evolution may be briefly summarised as-agricultural credit; urban credit; central credit organisations; apex cooperative banks; propaganda by non-officials; non-credit agricultural co-operation; urban co-operative education; rectification and consoli The growing difficulties of the Co-operative dation of the credit movement; organisation of TABLE No. 1.

POGNA SEVA SADAN SOCIETY,-This Institution, RECREATION CLUB INSTITUTE,-This Instituwas started in 1909 by the late Mrs. Ramabai Banade, the late Mr. G. K. Devadhar, C.I.E., and a few other ladies and gentlemen in Poona and registered in 1917. Its main object is to make women self-reliant and to train them for missionary work undertaking educational and medical activities for their sisters and brethren, especially the former in backward areas and working on a non-sectarian basis. Nominal fees are now being charged for instruction in all classes. There are eight different departments sub-divided into about 100 classes. Arrangements are made for training Nurses and Midwives and women Sub-Assistant Surgeons at the Sassoon Hospitals, Poona, and a hostel is maintained for the former and another for those attending the Sub-Assistant another for those attenuing the San-Assisant Surgeon's Classes. There is a Public Health School affiliated to the Lady Chelmsford League for Maternity and Child Welfare, Delhi, with a hostel. The total number of women and girls on the rolls at these various Centres of the Society is over 2,000. Thus there are in Poona 6 hostels, three of which are located at the headquarters and the other three for Nurses, etc., under training at the new Nurses quarters near the Sassoon Hospitals. The number of resident students is above 125 in these six hostels. Two fully qualified Nurses have so far been sent by the Society for their post-graduate course in Public Health post-graduate course in Pu Nursing at Bedford College for London, with the partial help of a scholarship of the League of Red Cross Society, Paris. There is an ante-natal clinic with the average daily attendance of 50 expectant mothers. Besides, there are Maternity Hospitals and Nursing Homes at Ahmednagar, Alibag, Nasik, and Sholapur under the management of the society in connection with other organizations. The institution is largely dependent upon public contributions ano Government assistance. The annual expenditure of the whole organization now exceeds President Shrimant Saubha-Rs. 1,69,000. The Ismaily (a weekly) and The Nizari (a Hon. Secretary, Gulamhusein monthly). Viriee.

ROYAL SOCIETY OF ARTS, INDIAN SECTION .-This Society was founded in 1754 "for the encouragement of Arts, Manufactures and Commerce," and devotes itself primarily to the application of science and art to practical purposes. The Society ranks as one of the three oldest learned societies in England, and numbered among its early members most of the famous Englishmen of the 18th century. During its long history it has been the source of many reforms and improvements in all branches of art and industry, and it is from its activities that most of the more specialised British societies have sprung

The Society has from its earliest days extended its interests and membership to all parts of the British Empire, and in 1869 it founded an Indian Section, and a little later a Dominions and Colonies Section. The Indian Section is under the control of a Committee comprised largely of former Lieutenant-Governors of Provinces, and others who have held the highest Indian administrative posts. its auspices a series of important lectures on Indian subjects is given each year, which, with the other lectures delivered before the Society, are published in the weekly "Journal" and circulated to members of the Society all over the world. There are a large number of Fellows resident in India. Patron: H. M. the King; President: H. R. H. the Duke of Connaught; Chairman of Council: The Right Hon. Lord Amulree, P. O. G.B.E., K.C. REGIL HOM. LOVE ABURDES, F. O., G.B.E., K.C., LLD.; Chairman, Indian Section Committee: Sir Atul C. Chatterjee, G.C.I.E., K.O.S.I.; Secretary; K. W. Luckhurst, M.A.; Assistant Secretary and Secretary, Indian and Dominions and Colomics Sections: Frank R. Lewis, M.A., D. Phil; Society's House: 18, March 1988, M.A., D. Phil; Society's House: 18, John Street, Adelphi, London, W.C. 2.

SERVANTS OF INDIA SOCIETY .- The Servants of India Society, founded by the late Hon. Mr. G. K. Gokhale in 1905, is a body of men who are pledged to devote all their lives to the service of the country on such allowances as the Society may be able to give. Its objects are to train national missionaries for the service of India and to promote, by all constitutional means, the interests of the Indian people. Its present strength is 25 Ordinary members, 7 members under training, and 1 permanent assistant. The Society has its headquarters in Pona with branches at, Madras, Bombay, Allahabad and Nagpur and other centres of work at Joshi, the Vice-Precident and Mayanur, Mangahore and Calleut in the Rao, the Secretary, Messrs, Madras Presidency; Shendurjana in C. P.; balor, Joshi, Kunzru and D. Lackaow in U. P.; Ladnore in the Punjah members of the four branches. and Cuttack in Orissa.

The Society's work is primarily political but as it believes in all round progress of the Indian people, it has always laid equal emphasis on social economic, educational, labour depressed class activities and has worked in these fields. The political work is done through the legislatures the non-official political organiza-tions, deputations to foreign countries and

propaganda. In the field of social, economic and educational work, the Society's activities are equally varied. Some of its members are practically the founders of such institutions as the Poona Seva Sadan, Bombay and Madras Social Service Leagues, the U. P. Seva Samiti, the Bhil Seva Mandal eatering for the needs and uplift of the aboriginal tribes in Gujerat. The Seva Sadan has been a model institution for the education of women which gives training to over 1,500 girls and women in all useful directions. It has many branches in different parts of India carrying on social and educational work. The Social Service League has done good co-operative, educational and welfare work for the mill workers in Bombay by starting Co-operative Societies, adult night and technical schools and conducting welfare centres. The Seva Samiti India doing service to the pilgrims going to religious places such as Hardwar and Benares, and working in times of epidemics. Its Boy Scouts organization is a well-knit body recognised both by the public and Government, Mr. Chitalia conducts the Bhagini Samaj for social, educational work among the Gujarati ladies. The Society has been conducting a model Depressed Class Mission in Mangalore and the Devadhar Malabar Reconstruction Trust activities in Malabar Reconstruction Trust activities in Reconstruction Trust activities in movement district. Society the pioneering Bombay and Madras presiwork in the During natural calamities as floods, famines and epidemics, the Society has done relief work in every part of India. By its work in the Moplah rebellion, the Society has become a household name in Malabar. During recent years several members of the Society have paid special attention to rural reconstruction, including rural education.

The Society conducts three papers.-The Serrant of India, an English weekly of which Mr. S. G. Vaze is Editor, the Dnyan Prakash, the oldest Marathi daily of which Mr. Limaye is the Editor and the Hitawad, a weekly. Mr. Parulekar conducts the All-India Trade Union Bulletin, and Mr. A. V. Patwardhan, the Sansthani Swaraj, a Marathi weekly for the The benefit of the subjects of Indian States. Society has also published several pamphlets on public questions of the day.

The question of the subjects of the Indian States has also engaged the attention of the Society and some of its members, particularly Messrs, A. V. Patwardhan, S. G. Vazo, and A. V. Thakkar are devoting a part of their energies for that work.

Mr. H. N. Kunzru, is the President, Mr. N. M. Joshi, the Vice-President and Mr. P. Kodanda Rao, the Secretary. Messrs. V. Venkatasubbaiya, Joshi, Kunzru and Dravid are senior

The Society is a non-communal, non-sectarian body which does not recognise any easte distinctions.

SIVA SADAN,-The Seva Sadan Society started on the 11th of July 1908 by the late Mr. B. M. Malabari and Mr. Dayaram Gidumal. It is the pioneer Indian ladies' Dayaram society for training Indian sisters ministrant and serving (through them) the poor, the sick and the distressed. To spread its Gospel far and wide, the first branch was opened at Poona as early as 1909. The Society has its headquarters in Gamdevi, Bombay. The Society maintains the following departments of work: (1) Home for the Homeless: (2) Ashrams (Training Homes); (3) Marathi Normal Classes with a primary School; (4) Home Education Classes; (5) Industrial Department including a workroom, Sewing, Cutting, Hosiery, Cooking and Pastry and machine and hand Embroidery are among the chief industries taught. WESTENN INDIA NATIONAL LIBERIA ASSOCIA-TION—(Portunded in 1919)—The Association was formed, in pursuance of clause (b) of Resolution XI of the Pirst Session of the All-India Conference of the Moderate Party, with a view to do sustained work for the political progress and the moral and material welfare of the people; to give expression from time to time to the considered opinion to inform and educate public opinion in this presidency in support of its views, policy and methods.

The objects of the Association are the attainment by constitutional means of full Dominion Status for India at the earliest possible date. For the promotion of these objects, the Association shall adopt constitutional methods of agitation and work and shall foster a spirit of broadminded liberalism based on principles of liberty, equality and fraternity among the different classes and communities of the people. For the fulfilment of these objects the Association shall carry on educative, and propagandist work by means of leaflets, pamphlets and other publications, (a) representations to Government, (c) meetings or conferences, lectures and all such methods as may be deemed practicable and expedient to educate public opinion, and (d) for advancing the interests of the Liberal Party by organising and influencing elections to the legislatures, Central and Provincial, to Municipalities and District Local Boards.

The affairs of the Association are conducted by a Council consisting of 46 members who are elected every two years.

President: Sir Chimanlal H. Setalvad, K.O.I.E., Ll.D.; Vice-Presidents: The Hon. Sir Phiroze C. Sethua, Kr., O.B.E. and Sir Cowasji Jehangir (Jr.), K.O.I.E.; Hon. Secretaries: Mr. Kazi Kabiruddin, Mr. J. R. B. Jecjebhoy, D. G. Dalvi and Mr. A. D. Siroff.

Assistant Secretary: Mr. V. R. Bhende.

Office:—107 Esplanade Road, Fort, Bombay.
WOMEN'S INDIAN ASSOCIATION ("EVEREST."
MYLAPORE, MADRAS).—This Association was
started in Madras, in July 1917, with aims
of service.

Aims and Objects :- To present to women their responsibilities as daughters of India To secure for every girl and boy the right of Education through schemes of Compulsory Primary Education, including the teaching of religion. To secure the abolition of childmarriage and to raise the Age of Consent for married girls to sixteen. To secure for women the vote for Municipal and Legislative Councils on the same terms as it is or may be granted to men. To secure adequate representation of women on Municipalities, Taluk and Local Boards, Legislative Councils and Assemblies To secure for women the right to vote and to be elected for the Council of State. establish equality of rights and opportunities between men and women. To help women to realise that the future of India lies largely in their hands; for as wives and mothers they have the task of training, guiding and forming the character of the future rulers of India. To band women to groups for the purpose of self-development and education and for the definite service of others.

It has 48 branches and over 4,000 members. Each branch is autonomous and works according to the needs of the locality.

The Association grants scholarships to girls, interests women in maternity and child-welfare work in the uplift of the depressed class and in other social and welfare activities for the general betterment of Indian society; has worked successfully for securing Franchise for women in India, (see pages 93 and 94 of the Simon Report, Vol. II) and compulsory education for girls and also actually helped in the passage of Child-Marriage Restraint Act in the Assembly and the Acts for the Suppression of Traffic in women and children and the abolition of the Devadasi system, in the local legislature. Holds regular meetings of women to educate them as to their duties as wives, mothers and citizens, publishes a monthly magazine titled Stri-Dharma now edited by Dr. (Mrs.) S. Muthulakshmi Reddi for carrying out of the above objects. The Association is an All-India body. Its largest branch being in Bombay and its branches are spread throughout India and flourishing as far as Kashmir and Lashkar. It is found that women everywhere welcome the opportunities given for their self-development and selfexpression. The Association is affiliated to all the important progressive women associations in India and throughout the world. It

was the Initiator of the All-India Women's Conference and the First All-Asian Women's Conference and the First All-Asian Women's Conference at Lahore. The Madras Seva Sadan and the Madras Olditors, Aid Society, the Montesor's School of the Conference of the Confer

NONSO MEN'S CHERSTIAN ASSOCIATION— This Association, which was founded by the late Sir George Williams in 1844, is now a cond-wide movement, well established in almost every country in both the hemispheres. Properties of the condition of the condition of the condication of the condition of the condication of the condition of the condition of the condication of the condition of the condition of the condication of the condition of the condition of the condication of the condition of t

men and boys.

The Young Men's Christian Association, though relatively new to India, is spreading rapidly. The 'local' Associations are autonomous and governed by local Boards of Directors. These Associations in Convention elect a National Council which is responsible for the supervision and expansion of all forms of the Association work in India, Burma and

Ceylon.

"There are now over 60 Associations affiliated to the National Council and many other village Associations with many thousands of members of all races and creeds. The following Associations own one or more buildings which serve as largactors. Bombay: Calentia; Calleut; Coimbatore; Colombo; Delhi; Gallet, Hyderad, Jubbulpore; Kandy; Karachi; Kunnamkulam; Kottayam; Lahore; Madras; Madura; Magpur; Nali Tal; Ostacamund; Poona; Rango, Marker, Madras; Calleut; Cal

The work of the National Conneil and of the local Assorbition is carried on by numerous voluntary workers and Committees, assisted Ar feature of the Y.M. C. A. in India: Is the international character of its Scendens, 15 is made up of Americans, 2 Canadians, 5 I is made up of Americans, 2 Assistalians, 1 Duran and 35 Indians and Copylorida (Anglo-Indians, 1 Duran, 2 Assistalians, 1 Duran and 35 Indians and Copylorese,

The work of the National Council (excluding that of the 50 local Y.M.C.As.) called for a Budget of Rs. 1,25,662 in 1933. Of this sum Rs. 28,790 had to be raised from the

public in India.

The Headquarters of the National Council is 5, Russell Street, Calcutta. The officers are:—Patron:—His Excellency The Most Hon. The Marquess of Lialithgow, K.T., P.O., G.M.S.I., G.M.I.E., O.B.E. D.L., T.D., Viceroy and Governor-General of India.

and Governor-General of India.

President of the National Council:—The Most
Rev. Dr. Foss Westcott, Metropolitan of
India.

General Secretary: -B. L. Rallia Ram, B.Sc., B.T. The Bombay Association now possesses four well-equipped buildings: "Woodhouse Road, Lamington Road, Rebsch Street, and Reynolds Road. The President is Mr. C. G. Personal Street, and the Control of the Property of the Prope

Young Women's Christian Association of India, Burma and Cevilon.—This Association founded in the year 1875 was organised nationally in 1896.

The aim of the Association is to unite women and girls of India, Burma and Ceylon in fellowship and mutual service for their spiritual. sulp and mutual service for their spiritual, intellectual, social and physical development. The Association exists for Indian, Anglo-Indian and European girls and women. There are members in the following branches: General 43, 32 and 32 and 33 and 34 and niemers in the tonowing transfers: creaters 20, Schoolgrif 23, Girl Guide Companies 35, Blue Bird Flocks 19. The needs of girls are met by physical drill, recreation, clubs and classes, lectures, commercial classes, Bible Study and devotional meetings, and meetings for social intercourse. Hostels, some of them holding as many as 70 girls, are established where there is a demand for them and the Association, at present, owns 21, including 8 Holiday Homes in the hills. These hostels accommodate working girls, teachers, nurses, students and apprentices, Rates vary according to the residents' salaries and accommodation, though all equally receive the benefits of a comfortable home, good food and wholesome surroundings. The holiday Homes provide cheap holidays in healthy surroundings and also accommodate girls who work in the hills during the hot season. In addition to Hollday Homes Summer Conferences are held annually at Anandagiri, the Conference estate owned by the Association, in Ootacamund. Special Girls' Camps are arranged from time to time in many centres.

Travellor's aid work is done in the large ports, especially Colombo, and a large number of transient guests and visitors are accommodated in the Home in these centres. The Association also runs Employment Bureaux Hrought the The Commercial schools train girls for office and business life. These large Associations are manned by a staff of Trained Secretaries, are manually a staff of Trained Secretaries, Australia, New Zealand and Chanda, The others are found and trained in India, in

many of the smaller branches where the work wishes to join the world-wide fellowship of the is of a simpler nature, it is carried on by voluntary workers who render faithful service year by year.

The Association, which is affiliated to the World's Young Women's Christian Association is International and interdenominational. Active membership is open to all who declare their faith in our Lord Jesus Christ and desire to serve others in His spirit of love, and Associate membership is open to any girl or woman, each month and regardless of what her religion may be, who the Association.

purpose, and to share in its activities.

The Patroness of the Association is H.E. The Marchioness of Linlithgow.

Copies of the Annual Report and other printed matter can be obtained from the National Office which is at 134, Corporation Street, Calcutta. The official organ of the Association is the leadet "Everymember" which is issued each month and sent to members and friends of

ASSOCIATION OF BRITISH UNIVERSITY WOMEN IN INDIA.

in India was established in 1913. Its objects ore .

(1) To facilitate Intercommunication and co-operation between women belonging to the universities of the United Kingdom, resident

in India. (2) To provide a means of keeping in touch with the universities of the United Kingdom, by communication with the British Federation of University Women, and otherwise

as may seem expedient. (3) To act as an organisation which shall afford opportunity for the expression of united evinion and for concerted action by university women

Membership is open only to those women who hold degrees in any university in the United Kingdom, or hold Oxford or Cambridge Honours Certificates : but Associate Membership is open to women who have studied at a British University for two years and each Branch may admit as Honorary Members women who have advanced the higher education and interests of women.

The Association of British University Women has two branches. The addresses of the Honorary Secretaries are as follows :-

Hony Local Secretaries.

Rombay

Puniab

. Mrs. Gebbett, 9 Pedder Road. Bombay. ..Mrs. Skemp, Race Course

Road, Lahore. The Delhi and Puniab Branches came into existence in 1918. The Calcutta and Bombay Branches are influential and have repeatedly intervened with good effect to educate public opinion sity women of the world, with regard to subjects affecting women. All Branches have, for instance, made investigations on behalf of the Education Department, Government of India, the Calcutta University Commission, etc., and have supplied, through the International Federation of University Women, information on Secondary Education in India to the League of Nations. They have been the means of introducing women on to University Senates and Municipalities. The Calcutta Branch carried through an important exhibition of Food Products.

The Rombay Branch has done good work in connection with the formation of the Social Purity Committee and has, through a special Pedder Boad, Cumballa Hill, Bombay.

The Association of British University Women | sub-committee, organized public meetings for women on subjects affecting their interests about which legislation was being or had been recently enacted.

A valuable part of the work of Association was the establishment of Women's Employment Bureau in Calcutta and Bombay. They were remarkably successful. The Bombay Bureau was eventually merged into the employment Bureau established by the Women's Council; the Calcutta Bureau has coased to exist.

As a means of promoting friendships between women from various parts of the United Kingdom, with widely differing tastes and interests and spheres of life in India, and as an instrument for affording opportunities for usefulness to educated women, the Association of University Women has a useful function to perform,

This Association is Federated to the "Federation of University Women in India," and thus forms one of the Units of the Indian Federation.

Federation of University Women in India.

The Federation of University Women in India unites various Associations of University Women throughout the country, its object being to promote friendship and understanding among University Women of all races resident in India and to further their common interests. It is affiliated to the International Federation of University Women which has a membership of over 60,000. representing thirty-three nations and which seeks by scholarships, exchange of teachers, group discussions and conferences to unite in common action and understanding the Univer-

The Federation in India is controlled by a Central Committee at present (1938) located in Bombay. It has branches in Bombay, kanal and Lahore, while women, eligible for membership, resident in places where no branch exists can be enrolled as "Scattered Members," Office Bearers (1938) :--

President .- Mrs. McKenzie, M.A., J.P., Wilson College, Chowpatty, Bombay.

Hon. Treusurer.—Mrs. Platts, M.Sc., 9, Rafiya Manzil, Wodehouse Road, Bombay.

Hon, General Secretary .- Mrs. A. J. Moore, 31,

ASSOCIATION OF COLUMBIA UNIVERSITY ALUMNI IN INDIA,—This is an organization conceived to unite for service and fellowality all Columbia alumal who may be resident in India. It was anomad in 1921, and is a constituent memire of the Alumni Federation of Columbia University, New York of the Columbia Co

President of the Association: Dr. Jal Dastur C. Pavry, M.A., Ph.D., 63, Pedder Road, Malabar Hill, Bombay.

Church Organisation in India.

Down to March 1st 1930 the Church of England in India (and Ceylou), though possessing its own bishops and Metropolitan, was in the eyes of the law an integral part of the Church of England, and subject to the general supervision of the Archbishop of Canterbury. By the Indian Church Act and the Indian Church Measure passed by Parliament in 1927 this legal connecion was severed, and on March 1st 1920, for the fixing of which date provision was made by the Indian Church Measure, the Church of England in India and in Ceylon, in future to be known as The Church of India, Burma and Ceylon, and, for short, The Church of India, became wholly responsible for the management of its own affairs, although, as it states in the Preamble to its Constitution, it has no intention or desire "to renounce its obligations to the rest. of the Holy Catholic Church and its fundamental principles, but on the contrary acknowledges that if it should abandon those fundamental principles it would break spiritual continuity with its past and destroy its spiritual identity.

Andlean work in India dates from the first establishment of the Bast India Company in the 17th Century on the shores of India at Surari, Malaras, and Bombay, where the servants of the Company were ministered to by a continuous succession of the Hard State of the Company were ministered to by a continuous succession of the India of the India of the India of the India of the India of the India of the India of India

Like all other branches of the Anglean Communion the Church of India is episcopal. The first bishoprie was not, however, founded until 1814 when the see of Calculta was set up, the community of the control of the con

Rules for the government of the Church are contained in its "Constitution, Canons and Rules" adopted by its General Council in

session at Calcutta in 1930. All clergy before receiving a license from their bishop make in addition to an oath of canonical obedience to their bishon, a declaration accepting the Constitution, Canons and Rules, as well as a declaration concerning the faith and formularies of the Church, Lay members of the General and Diocesan Councils also make declarations of accept and acceptance. The government of the Church is through these councils, the General Council being for the whole ecclesiastical province of India, Burma and Ceylon, Its membership consists of the bishops of the province, and houses of elergy and laity elected by the diocesan councils. The Diocesan Councils consist of the Bishop of the Diocese and all its elergy, together with lay representatives elected by the parishes. To exercise a vote in the election of lay representatives parishioners must be adult communicant members of the Church. It is open to a diocese to add to these qualifications that of having contributed some specified amount to the expenses of the Church. In addition to these councils every parish has a Church committee or council with a recognized constitution and these are in many areas organised into district Church councils, particularly where Indian parishes are numerous. Again in addition to these councils the bishops of the province meet in Synod, with clerical and four lay assessors if a matter of faith or order is being dealt with, and the bishop of a diocese can at any time hold a Synod of his clergy. Determinations on mat-ters of faith and order are made only by the House of Bishops of the General Council and cannot be made subjects of disciplinary action unless adopted in the form of a canon by the whole Council.

The additional title of Metropolitan was given to the Bishop of Galentia when the sees of Madras and Bombay were formed. It is an another than the seed of Madras and Bombay were formed. It is an another than the holder has jurisdiction ever the other bishops of the province. Before consecration a diocesan hisbop takes an oath of canonical obedience to the Metropolitan. Under the bythe diocese, subject to confirmation by the bishops of the province. In the Constitution, Ganons and Rules, the Constitution consists of Charch of Rules, the Constitution of Constitution of Constitution of Constitution of Constitution of Constitution, the Rules arrange in detail for the carried in; the Rules arrange in detail for the carried in; the Rules arrange in detail for the carried in; the Rules arrange in detail for the carried in; the Rules arrange in detail for the carried in; the Rules arrange in detail for the carried in; the Rules arrange in detail for the carried in; the Rules arrange in detail for the carried in; the Rules arrange in detail for the carried in the second of the Bishops of Calentin, Madras and Bombay, have from the foundation of those ment, as also in part those of the Bishops of Labore, Rangeon, Lucknow and Napagu. Down 1980 these bishops were appointed by the Crown, Since 1830 the bishops of these seven to 1930 these bishops were appointed by the Crown, Since 1830 the bishops of these seven are also as a series of the Rules of the Crown Since 1830 the Bishops of the Rules of the Crown Since 1830 the Bishops of the Rule

responsible.

The Ecclesiastical establishment of the Government of India is an inheritance from the East India Company. That Company from the first provided chaplains for its servants. The chaplains of the present establishment are maintained for ministration to the Government's British and Anglo-Indian community, has from early for munistration to the Government's Direction and Angio-Indian community, has from early born servants, civil and military. They are days been a concern of the Church. In addition chosen by the Indian Chaplaincies Board sitting to day-schools it has established over 70 boardchosen by the Indian Chaplatanetes Board storing in Uniform London, are appointed by the Secretary of ing schools for boys and girls, many of them in hill in London, are appointed by the Governor-stations. The provincial Governments assist State, are posted to Dioceses by the Governor-General in consultation with the Metropolitan, General in consultation with the Metropolitan, traces exponed wing grains-mean room rounting and within their placeses are posted to stations and current expenditure, just as they do all by the Provincial Governor on the recommendate other schools, according to the rules of the endured them of the diocesan bishop. Their pay and tion codes, The schools are inspected by allowances are wholly met by Government. In (Government inspectors, Indian boya and girls extitual matters thay are subject to the supervi- are admitted to these schools, but the number spiritual matters they are subject to the supervision and jurisdiction of their bishop, and while Government servants civil and military are their primary charge, they are the parish priests of the chaplaineies to which they are appointed and are responsible for the care of all members of the church in their parish except in so far as Indian Members of the Church are cared for by missionaries or Indian clergy. Besides providing chaplains the Government of India, again follow-ing the practice of the East India Company, has provided or assisted in the provision of churches and their maintenance, and also of cemeteries. Where numbers do not warrant the provision of an Establishment chaplain Government has assisted in the provision of clergy by grants-inaid, and when from time to time the number of Establishment chaplains has been reduced special grants-in-aid have been granted. The Establishment and all grants-in-aid are subject to revision and are in fact revised from time to time.

Ecclesiastical establishment includes besides Anglican chaplains, Church of Scotland, Free Church, and Roman Catholic chaplains, for ministrations to members of those communions; and churches and grants-in-aid are provided or given on the same principles as for Anglicans.)

The special interests of those parishioners whose domicile is England in the continued use, should they so desire, of the services of the English Prayer Book, which the Church of matters connected with the schools. India is now free to alter at its discretion, are safeguarded by certain of the canons, and these interests together with other matters concerning the undertakings and relation of the Governare provided for by a set of Statutory Rules drawn up under the Indian Church Act. Members of the Church of England or any of the branches of the Anglican Communion are, while resident in India, full members of the Church of India, and are a most important part of the Indian Church, their numbers still in some places exceeding those of Indian members, and some stations being still exclusively European, although in the Church as a whole the number of Indian members greatly exceeds that of with great activity into the work of evangelism. Europeans. European clergy numbered (in The formation of the Society of Jesus led to to 1986) 444, and Indian clergy The There of its first members the Statous St. Francë. are no racial distinctions whatever in the Church; | Xavier being sent to Goa, where he arrived

episcopal supervision of its establishment of Indian elergy frequently preach or celebrate episcopal supervision of its establishment of indian energy frequency preach of celebrate characters. For the other seven bishoprics, and for European congregations, and in a few chaplains. For the other seven disaphates, and any others, set up, Government is in no way instances are in permanent charge of European parishes. The Indian laity though usually preferring services in their own languages are everywhere free to attend English churches, and to be enrolled, if they wish, as parishioners

The education of European children, and more particularly the children of the Domiciled these schools with grants-in-aid both for building that may be taken is limited to a percentage fixed by the local Government. The Archbishop of Canterbury has recently issued in England an appeal for £250,000 for the endowment of these schools. Indianisation of Government services, especially of the railways, customs and post and telegraph departments has severely hit the Domiciled and Anglo-Indian community. and the ability of parents to pay fees is steadily decreasing. Hence the urgent need for increased endowments. The existing endowments of all the schools yield an income of less than £1 ner child per annum.

(The Church of India is not the only community responsible for European education in India. The Roman Catholics, the Church of Scotland and the various free churches provide schools for their children, and receive similar assistance from Government.)

The Government of India Act of 1935, section 83, provides for the continuance of government grants to European schools at a total figure in each province not less than the average figure for the ten years preceding 1933, unless the whole grant of a government to education is reduced. when the grant to European education may be reduced in proportion. And, as a result of the recommendations of a sub-committee of the Round Table Conference, provincial boards For Anglo-Indian and European Education have been set up, and also an Inter-Provincial Board, to consider and advise Governments on

Missions.

In Malabar, on the south-west coast of India ment of India to its chaplains and the Church there have been Christians certainly from the 6th century, probably from the 4th century and possibly from the 1st century A.D. They are called "Syrian" Christians owing to their connection with the Church in Syria. They do not appear to have attempted to spread the Christian faith in India. The Portuguese may therefore be regarded as the first missionaries in India, and from their arrival at Goa the Franciscans and Dominicans who accompanied their fleets in large numbers threw themselves

In 1541, Under his leadership the preaching of Christianity was carried on with great earnestness. The missionary work of the Roman Catholic Church thus begun has been continued. and at the present day the number of Indian members of that Church is given as 2,113,659 (Census 1931), to which may be added 654,939 Syrian Christians attached to the Roman Church. The number of independent Syrian Christians (Census 1931) is given as 525,607.

Protestant missions did not begin till the 18th Century, and as missionaries were not allowed to establish themselves in the Company's tarritories, they worked from Danish territory and in Indian States. These missionaries were Lutherans, but as stated above, were in the latter part of the 18th Century assisted with latter pare of the 18th Century assisted with must from England. Famous men among them were Ziegenbalg, Kiernander, Schultze and Christian Friedrick Schwarz. By the end of the 18th Century it is believed that there were in South India about 30,000 Lutheran converts. In 1800 the famous Baptist trio, Carey, Marshman and Ward established themselves at Serampore in Bengal (Carey had come to India in 1793). Men of humble origin and education. one was a cobbler, one a ragged-school teacher, and one a printer, they displayed great ability and enterprise, and threw themselves not only into evangelism but into the scientific study of India, its languages and culture, and its flora and fauna. Books and translations poured from their printing press. Carey was made professor of Sanscrit in Lord Wellesley's College for the training of civil and military officers.

The 19th Century saw a great increase in missionary effort of every sort. This was due to the opening of the Company's territories to missionaries by the Government of India Act of 1813, and it was only after that date that Anglican (Church of England) missionary Societies took up work in India, namely the Church Missionary Society and the Society for the Propagation of the Gospel, by sending as missionaries ordained clergy of the Church of England, those hitherto subsidised or sent by the S.P.C.K. (see above) being Lutherans. The first missionaries to arrive after the passing of the Act were American Congregationalists. London Missionary Society were also early in the field and Presbyterians from America and Scotland soon followed. In the course of the century India became covered by a network of missions, engaged not only in evangelism, but in educational work in schools and colleges, in medical work and in industries. Among famous names of missionary educationalists are those of Dr. Duff of Calcutta, and Dr. Wilson in Bombay. In the education of women missions may fairly claim to have taken the lead. The total number of missionary societies from Europe and America working in India is now over 150. For consulta-tion and common action there is a National Christian Council with headquarters at Nagpur, first organised in 1914, and in connection with this there are 10 Provincial Christian Councils. Membership of these councils is by election or appointment by local churches and mission councils.

The Directory of the National Christian Council shows that the missions connected with it have 53 Colleges: 315 High Schools and about the in India, Burma and Ceylon number ...

same number of middle schools; 103 Teachers training institutions; 217 industrial schools, and very many primary schools; 250 hospitals and about the same number of dispersaries; 68 Leper institutions and 11 Tuberculosis Sanatoria, and 15 homes for the Blind or Deaf ; 64 Agricultural Settlements; 21 Co-operative Societies; 40 printing presses; 36 miscellaneous industries. The Census of 1931 gives 3,002,558 as the total number of Protestant Christians in India, making the total number of Christians, including Roman Catholics, Romo-Syrians and Syrians (see above) 6,296,763; included in this total are 167,771 Europeans and 138,758 Anglo-Indians.

Reunion. Since the Great War there has been widespread interest in India in the subject of the reunion of the separated Christian bodies. In South India the movement for union was started in 1919 by a group of Indian clergy. This has led to the preparation of an elaborate scheme of union the parties to which are Anglicans, Methodists and the already united South Indian United Church which consists of Presbyterians and Congregationalists. Much time and thought have been given to the preparation of the scheme, the problem presented by the task of reconciling Anglican, Presbyterian, Wesleyan and Congreg-

ationalist principles being of extreme difficulty. The scheme is now practically complete and awaits acceptance or rejection by the bodies concerned. If the scheme is accepted the four southern dioceses of the Church of India, Madras, Dornakal, Tinnevelly and Travancore will be separated from the rest of the province and form part of the united Church, which is pledged to maintain episcopal government. The general principles of the scheme were approved by the Lambeth Conference (of Bishops of the Anglican Communion) in 1930. At the present moment (1938) the Church of India has submitted the scheme to the Consultative Committee of that Conference drawing attention to points of detail altered or settled since 1930 and asking whether the scheme can still be considered acceptable.

The existence of a united church in South India consisting of Congregational and Presby-terian elements has been mentioned in the preceding paragraph. In north India there has been in existence for some years The United Church of India (North) consisting of similar elements. Since 1929 a further movement for a wider union in north India has been considered at a series of Round Table Conferences to which the Church of India has sent representatives, In south India, again, a movement has started for union between two sections of the Syrian Church (the Orthodox and the Mar Thoma Reformed) and the Anglican Church, and the Church of India has agreed to send delegates to the Kerala Council of Church Union responsible for this movement (Kerala is a general name for the area covered by the States of Travancore and Cochin and the district of British Malabar).

Anglican Missions.

In addition to the two principal missionary societies of the Church of England, the S.P.G. (Society for the Propagation of the Gospel in Foreign Parts) and the C.M.S. (Church Missionary Society) already mentioned, whose missionaries

Ordained, Laymen, Women, Total. 100 207 S.P.G. .. 86 232+68 130 CMS ... 71 91 married women, there are also certain smaller, but important missions, namely The Oxford but miportant missions, namely The Oxford Misslon to Calentta working in Calentta among students and also at Barisal; the Cowley-Wantage-All Saints Misslon, working in Poona and Bombay; the Dublin Mission at Hazari-bagh, the Cambridge Mission at Delhi, the Cawapore Brotherhood; the Scottish Episcopal Chwindore dromermood; one scoular Hiscopal Church Mission, at Chanda C.P.; the Bible Churchmen's Missionary Society (12 ordained missionaries in the Lacknow and Nagpur and Rangoon diocess); the Christa Seva Sangha, Poona, 1927 and the Christa Prema Seva Sangha, Poona 1934; the Canadian Church Mission (4 ordained missionaries in the Lahore Diocese); the Church of England Zenana Missionary Society, in several dioceses; the Sisters of St. Margaret (East Grinstead) in the Colombo diocese; Sisters of St. Denys (Warminster) in the Chota Nagpur Diocese; Sisters of the Holy Family, Naini Tal; the Winchester Brotherhood, Mandalay, and the Sisters of the Church, Maymyo. The first two of these, and several of the others in the list, consist of communities of priests or sisters under religious yows. Members of the brotherhoods mentioned are in most cases not under life vows. The work and influence of these communities is a most important element in the life of the Church of India.

The Church of India has taken its full share in educational, medical and industrial work in

Church, Cawnpore, and Trinity College, Candy. are well known. A college at Trichinopoly has been amalgamated with the inter-denominational Madras Christian College, For the training of Indian and Anglo-Indian ordination candidates Bishops' College, Calcutta, serves the whole of India. In the various language areas are other colleges for the training of ordinands and lay church-workers through the medium of the local language. Among hospitals are those at Quetta (Sir Henry Holland). Ranna (the late Dr. Pennell) and St. Stephen's Delhi (for women). The C.M.S. High School at Shrinagar is distinguished among the many High Schools of the Church for the methods adonted to develop manliness and esprit de corns in the boys. Campore in the north and Nazareth in the extreme south are well known centres of industrial work and traums. The Press at Madras was built up into a very large Missionary. At Hubli, in the Bombay Diocese. S P G. missionaries have, since 1919, done extremely good work in charge of an Industrial Settlement (for the reformation and training of members of criminal tribes) committed to their care by Government.

Exact figures of the membership of the Church of India are not obtainable, From figures. available there appear to be about three quarters of a million (750,000) of which about a lakh and a half (150,000) are European and Anglo-Indian; dioceses, with large numbers of Indian Christians are Dornakal, Tinnevelly, Travancore, Lahore, educational, menical and industrial work in pare Journasa, Amineveny, Lravancore, Lallore, India, Among colleges founded and managed Madras, calentals, Lacknor, and chota Nagmir. But insistonaries 8t. Stephen's, Delhi, St., The number of clergy, European and Indian, John's, Agra, St., Columba's, Hazarlangh, Christ-i has been given in an earlier paragraph.

THE ROMAN CATHOLIC CHURCH.

The Catholic community is composed of the following elements:-

 The "Syrian" Christians of the Maiabar Coast, traditionally said to have been converted by the Apostle St, Thomas. They were brought under allegiance to the Under the Sacred Congregation of Extraordi-Pope by the Portuguese in 1599, and placed first under Jesuit bishops and then under Carmelite Vicar-Apostolics. They are at present ruled by an Archbishop and three suilragan Bishops of their own Syriac rite.

(2) Converts of the Portuguese missionaries and working in the south of the peninsula and up the west coast, Ceylon, Bengal, etc.

(3) European immigrants at all times, including British troops. (4) Modern converts from Hinduism and

Animism in recent mission centres. (5) Recent converts from the Jacobite community in Malabar, of which 3 Bishops, 71 priests and some 28,000 laity have been

received into the Catholic Church.

The Portuguese mission enterprise, starting after 1500, continued for about 200 years, after which it began to decline. To meet this decline fresh missionaries were sent out by the Congregation de propaganda fide, till by the middle of the 19th century the whole sountry was divided out among them except such portions as were occupied by the Goa clergy. Hence arose a conflict of jurisdiction in many parts between the Portuguese clergy of the "Padroado" or royal patronage, and the propaganda ciergy. This conflict was set at rest by the Concordat of 1886 (amended by the Agreement of 1928, abolishing "double jurisdiction"). At the same time the whole country was placed under a regular hierarchy, which after subsequent adjustments now stands as follows:-

nary Ecclesiastical Affairs: The archbishopric of Gos and Damaun

(having some extension into British territory) with suffragan bishoprics at Cochin and Mylapore (both in British territory). Under the Sacred Congregation of Oriental

Churches: from 1500 and onwards, starting from Gos The archbishopric of Ernakulam, with suffragan bishoprics of Changanacherry, Kottayam

and Trichur. The archbishopric of Trivandrum, with suffra-

gan bishopric of Tiruvella. Under the Sacred Congregation of Propaganda Fide:-

The archbishopric of Agra, with suffragan bishopries of Allahabad and Aimere and the Prefecture Apostolic of Indore.

The archbishopric of Bombay, with suffragan bishoprics of Poona, Mangalore, Calicut, Trichinopoly and Tuticorin, and the Missions of Ahmedabad and Karachi.

The archbishopric of Calcutta, with suffragan bishoprics of Ranchi, Dacca, Chittagong, Krishnagar, Dinajpur, Patna and Shillong and the Prefecture Apostolic of Sikkim.

The archbishopric of Madras, with suffragan bishopries of Nellore, Hyderabad, Vizagapatam, Nagpur, Bezwada and Cuttack, the Prefecture Apostolic of Jubbulpore, and the Mission of Bellary.

The archbishopric of Pondicherry (French), with suffragan bishopries of Mysore Colmbatore, Kumbakonam, Salem and Malacea.

The archbishopric of Delhi and Simla, with suffragan bishopric of Lahore and the Prefectures Apostolic of Kashmere and Multan.

The archbishopric of Verapoly, with suffragan bishoprics of Quilen, Kettar, Trivandrum and Vijayapuram. The archbishopric of Colombo (Ceylon), with

suffragan bishopries at Kandy, Galle, Jaffna and Trincomalee.

Three Vicariates Apostolic and one Prefecture Apostolic of Burma.

The European clergy engaged in India almost all belong to religious orders, congregations or mission seminaries, and in the great majority are either French, Belgian, Dutch, Swiss, Spanish or Italian by nationality. They number over 2,000 besides which there is a body of secular clergy mostly Indian, etc., numbering about 2,400, and over 9,000 nuns. The first work of the clergy is parochial ministration to existing Christians, including railway people and British troops. Second comes education, which is not confined to their own people; their is not commed to their own people; their schools being frequented by large numbers of Hindus, Mahomedans, Parsis, etc. Among the most important institutions are St. Xavier's College, Calcutta, St. Peter's College, Agra, St. Kavier's College, Bombay, St. Joseph's College, Trichinopoly, St. Aloysius College, Mangalore. Loyola College, Madras, teaching university courses; besides a large number of high

schools and elementary schools. The education of girls is supplied for by numerous convent schools worked by religious congregations of nuns to say nothing of ornhenages and other charitable institutions. The total number under education of the total number under education and the second control of the total control o education in As to missionary work proper, the country is centres, among which those in the Punjab, Chota-Nagpur, Krishnagar, Gujerat, the Chota-Nagpur, Krishnagar, Gujerat, the may be mentioned. (Fuil particulars on all points will be found in the Catholic Directory already quoted.) The mission work is limited solely by shortage of men and money, which if forthcoming would give the means to an indefinite extension. The resources of the clergy after the ordinary church collections and pay of a few military and railway chaplaincies are derived mainly from Europe, that is, from the collections of the Society for the Propagation of the Faith and of the Holy Childhood. helped out by private or other donations secured from home by the different local missionaries. In mission work the fathers count as enrolled only those who are baptised and persevering as Christians, and no baptism, except for infants or at point of death, is administered except after careful instruction and probation. This, while keeping down the record, has the advantage of guaranteeing solid results. represented is hv

THE MISSION TO LEPERS-Founded in 1874. is an interdenominational and international Society for the establishment and maintenance of Homes and Institutions for Lepers and of their untainted children working in 20 countries but largely in India, Burma, China, Korea and Japan, Its work in India is carried on through co-operation with 30 Missionary Societies. In India and Burma, alone the Mission now has 36 Asylums of its own with upwards of 7,000 inmates and is aiding or has some connection with work for lepers at 22 other places in India. Altogether in India and Burma over 9,000 lepers are being helped.

The Mission also provides for the segregation of the healthy children of lepers from their diseased parents. More than 800 children are thus being saved from becoming lepers.

An important feature of the work of the Mission is the measure of successful medical treatment whereby early cases both adults and children are now benefiting.

Most of the Mission's income is received from voluntary contributions. Some funds are raised in India and Burma but the bulk of the money expended by the Mission in India and Burma is received from Britain, although the provincial Governments give regular maintenance grants.

There is an Indian Auxiliary of the Mission to Lepers, of which Lady Brabourne, Lady Marjorie Erskine, Lady Gowan, and Lady Hubback are Vice-Presidents. Hon. Treasurer :- William McIntyre,

c/o Macneill & Co., 2, Fairlie Place, Calcutta, Hon. Treasurer, Bombay: -R. C. Lowndes. Esq., c/o Messrs, Killick, Nixon & Co., Bombay.

COLLEGE WOMEN'S CHRISTIAN MEDICAL with Which is incorporated THE PUNJAB MEDICAL SCHOOL FOR WOMEN.—In 1894 the North India School of Medicine for Christian Women was opened in Ludhiana in order to give a Medical Education under Christian influences to Indian women. Doctor Edith Brown, D.B.E., M.A., M.D. was its Founder and Principal. The School was Inter-denominational, and trained students for various Missionary Societies.

The Memorial Hospital in connection with the College has 240 beds.

In 43 years 333 medical students, qualified as and 614 as Nurse Dais and Midwives.

At present 280 are in training, 136 medical students, 21 Compounders, 57 Nurses, 66 Nurse Dais and Midwives besides a large number of Indigenous Dais.

During the past year 4,188 in patients were treated and 51,822 out-patients.

The New Lady Willingdon Assembly Hall has been completed with the Library forming part of it and meets a great need. A Deep X-Ray Therapy Machine has also been installed and Radjum Treatment has also been started.

THE MISSIONARY SETTLEMENT FOR UNIVER-SITY WOMEN was founded in Bombay in 1896. Its work is religious, social and educational. The Settlement supplies a hostel for University students of all nationalities and a few Indian professional women. Classes for educated girls provided and teaching is also given in nunils' homes. The Settlement staff take part in many of the organised activities for women's work in the city. The Social Training Centre for women is now an integral part of the work of the Settlement. The course, lasting a year, includes both theoretical and practical work.

Warden :- Miss R. Navalkar, B.A., Reynold's Road, Byculla, Bombay.

Methodist Church.

THE METHODIST MISSIONARY SOCIETY COMmenced work in India, in 1817. The Mission in India apart from Ceylon is organised into To Districts with their separate District Synods working under 2 Provincial Synods, in connection with these Synods there is a large English work with 22 milisters giving their whole time to Military and English work.

The Districts occupied include 148 Gireutis Bengal, Madras, Mysore, Bombay, Punjah, North West Frontier Provinces, Baluchistan, Central Provinces, United Provinces and Manus-Dominions. The Buropean staff number Deminions. The Buropean staff number There are 413 Churches with a Christian consumity of 122,986 and 33,556 Communicatis, There are a number of Circuits with their Churches thoroughly organised and self supporting. Buractional work comprises 3 Christopher and Christian Chri

Medical work is represented by 17 Medical Institutions with 3 European and 12 Indian doctors, 3,377 In-patients and 51,137 Outpatients.

THE MAPPHONES EFFISOOFAL CHURCH IS the organization in the United States of America which grew out of the Wesleyan revival in England and her American colorise during the latter and the properties of the Colorise of the Co

Philippine Islands. In 1920 a rearrangement but about two hundred American men of the mission field of the Church separated and women as compared to 600 ordained and India, Burma and Baluchistan into what is now known as the Southern Asia division. Within this present field the Church now has a total heptized Christian community of 525,668.

The major task of the Church has been the uplift of the depressed classes, and its work has been largely among that class. As a matter of fact, however, it has large numbers who Hindus, and among such its influence is extend-

The educational work of the Church is extensive, it having in this area a total of 1,100 schools of all grades, including three colleges, trenty-two high schools, and numerous normal training and theological institutions. The registered attendants in these schools number 40.000.

Special effort is made for the instruction and development of the young people of the Church. there now being 336 chapters of the Epworth League with 13,394 enrolled members, and 4,021 organized Sunday Schools with an enrolment of 139,422.

The publishing interests of the Church are represented by the Lucknow Publishing House at Lucknow doing work in English, Urdu, Hindi and other Vernaculars. The periodicals issued cover the interests of both the evange-listic and the educational field, the Indian Witness, the Junior Methodist and Christian Bducation being in English, while the Kaukab-i-Hind, and other periodicals are issued in several of the vernaculars.

The governing body of the Church is the General Conferences held quadrennially in America in which the eleven conferences now existing and village health work. in India are represented by twenty-four delegates. The policy of the Church in India looks forward to complete independence under the Yeotmal, Berar,

Burma, Malaysia, Netherlands Indies and the general governing body, there at present being 4,000 unordained Indian and Burmese workers. At present the area is divided into seventy-two districts each in charge of a superintendent and among whom are many Indians. The work is supervised by three Bishops resident as follows :-

> Bishop Brenton Thoburn Badley, M.A., LL. Disamp Brenton Thodurn Badley, M.A., M.L. D., Delhi, Bishop Jashwant Roa Chitamber, D.D., LL.D., Jubbulpore; Bishop J. Waskom Picket, M.A., D.D., Bombay. The governing body in India is the Central Conference, which meets quadrennially under the Chairmanship of the three Bishops.

> The American Wesleyan Methodist Mis-sion—Sanjan, Thana District Headquarters, Stations with Missionaries, Dandi-Maroli, via Nargole, and Sanjan District Thana. THE SALVATION ARMY.

The work of the Salvation Army in India and Ceylon was commenced in 1882 by the late Commissioner Booth-Tucker; and was for many years under his control, with Headquarters in India. For some time now, the areas occupied have been divided for administrative purposes into 6 Territories, each under a Territorial Commander; and one smaller Command.

Lahore. Western Territory, with Headquarters at

Bombay. Madras and Teluau Territory, with Head-

quarters at Madras. Southern Territory, with Headquarters at Trivandrum, in Travançore State.

Territory, with Headquarters Ceulon Colombo.

Eastern Territory, with Headquarters at

Calcutta. Burmah Command, with Headquarters at Rangoon.

The Commanders are directly responsible to the International Headquarters in London.

Northern Territory .- The area in this Ter-Northern Territory, with Headquarters at ritory is the Salvation Army work in the Punjab, Delhi and United Provinces. The Territory is controlled from Lahore,

> Evangelistic work, especially among the "depressed classes," is extensively carried on, both in the Punjab and the U. P.

> A number of Settlements for the reformation of "Criminal Tribes" are under the control of the Salvation Army in the United Provinces (where this important reformative work was

commenced). A special Settlement has also been opened in the Andamans during the last few years.

A land colony 2,000 acres in extent is in existence in the Multan District, where a population of 1,800 has been settled. The land will ultimately become the property of the holders.

Medical work is carried on in two Hospitals, one of which is in the Punjab and the other in he United Provinces; and also in one dispensary.

Other institutions include, Day and Boarding Schools, Agricultural Colonies Soldiers, and Civilians Hostel, Delhi.

Territorial Headquarters—Ferozepur Road, Lahore, Punjab.

Territorial Commander—Colonel W. D. Pennick.
Western Territory.—The Western Territory
comprises Bombay, Gujarat, Panch Mahals

and the Maharastra.

Territorial Headquarters—The Salvation Army.

Morland Road, Byculla, Bombay.

Territorial Commander—Lt.-Commissioner H. B. Colledge (Prakram Singh).

Chief Secretary—Brigadier Stephen J. Seager (Himmat Singh).

Corp. 287; Outposts 485; Societies 473; Social Institutions 16.

Bestices the distinctly evangedistic operations there are established a large General Hospital—Emory Memorial, Anant—and soveral Dispersives; 220 Day Schools; 4 Boerding Artistics, 200 Day Schools; 4 Boerding Artistics, 200 Day Schools, 200 Day for the management of the Bombay Helpiess Beggars Camp; Weaving Schools, Factory for the unking of Weaving Schools, Factory for the unking of Weaving Colony having a population of about 375 Salvationists.

Madras and Telugu Territory.—This Territory comprises the city of Madras and work situated in the Nellore, Guntur, Kistna and West Godavari Districts of the Northern Circars of the Madras Presidency.

There are the following agencies at work, wie, places in which work is systematically one, both wangelical and education and social:—So Corps and Outposes, 1100. Section of the section o

Territorial Headquarters:—The Salvation Army, Broadway, Madras. G.P.O. Box 206. Territorial Commander—Brigadier Maslin,

Chief Secretary: Brigadier Edward Walker, Southern India Territory.

From Cape Comorin, the extreme southern tip of India, 300 miles up the East coast and 400 miles up the West Coast and across from these points, following the Southern boundary of the States of Mysore all within that area forms the Southern India Territory where two of the major Dravadian languages of South India Tamil and Malayani, are spoken.

The West Coast country is a watered garden of laxinian tertility. Here for the last lift years of laxinian tertility so that the Army has found a fertile soil of human life, 598 with great needs and opportunity for so into the 5 good seed of the world of Life, which has brought forth wonderful harvests. Ou the other side and, of the lifts the country may be drier, but here, too, The Army is marching forward.

The 'Depressed Classes' have become a hyword in India, sploon lightly by many, who refer to the serf, the labourer, the man with a mattock spade, and hoe. Up and down Travancore one is impressed with the levelled valleys of green rice cultivation—the labour of share, men bound from one generation to another, kept on the border line of starvation, hopelessly involved in dobt. These are the poor to whom The Army's Grospel has been preached who have opened wheir hearts and received its message, Over 73,000 are inscribed on our Rolls.

In hundreds of communities the people gather once a week at the market, to soil their small products and buy weekly provisions. These market-days offer The Salvation Army an opportunity of proclaiming the message of Salvation to thousands of people of all classes,

Medical work is a strong feature of activity in the Territory. The Catherine Booth Hospital is a great centre of healing, whose many branches minister to the needs of thousands of people.

The Salvation Army takes care on behalf of the Cochin Government of the Lopers of that State. The Evangeline Booth Leper Colony in North Travancore is one of the newest Institutions, reaching out a helping hand to these poor and stricken people.

Primary education and instruction in industrial handwork are given in more than 200 centres.

Statistics:—Officers, 1,140: Employees, 187; Corps, 511; Outposts and Societies, 809; Schools, 222; Hospitals, 9; Institutions, 7.

Territorial Headquarters:—S. A. Kuravanconam, Trivandrum, Travancore State. Territorial Commander:—Lieut, Commissioner,

Chief Secretary: —Liout, Colonel, A. J. Hedén,

Laws and the Administration of Justice.

extricably interwoven with religion, and each law, like Evidence, Contract, Trunfer of Pro-exists in combination with a law based on perty, Trusts, Negotiable Instruments, etc., exists in communication when a law bases on 1973, these, requestible Heartificials, etc., custom. At first the tendency of the English were collided in the form of Acts of the Indian was to make their law public and territorial. Legislature applicable to the whole of Pittish and on the establishment of the Supreme Court [India, These, amended from time to time and at Calcutta in 1773 and the advent of English supplemented by rules derived from English lawors as judges, they proceeded to apply it decisions, constitute the bulk of the law to Europeans and Indians allike. This error administered in British India.
